Black Identities Mary C. WATERS 2009-06-30 The story of West Indian immigrants to the United States is generally considered to be a great success. Mary Waters, however, tells a very different story. She finds that the values that gain first-generation immigrants initial success--a willingness to work hard, a lack of attention to racism, a desire for education, an incentive to save--are undermined by the realities of life and race relations in the United States. Contrary to long-held beliefs, Waters finds, those who resist Americanization are most likely to succeed economically, especially in the second generation.

Afro-Cuban Voices Pedro Pérez Sarduy 2020-04-28 From the forewords: "At a time when Cuba is undergoing immense economic and social changes, race becomes a kind of cultural litmus test for the national identity. . . . This anthology illustrates fully that it is possible to be both revolutionary and black in Cuba."--Manning Marable, Columbia University "The authors of Afro-Cuban Voices, also key actors in the new, unfolding dialogue about race in Cuba, make a seminal contribution through a forthright critique of 'racial blind spots' in official history and present-day racial discrimination."--James Early, director of cultural studies and communication, Smithsonian Institution From the series editor: "A courageous attempt to deal head-on with the issue of race in Cuba today. . . . Pérez Sarduy and Stubbs [seek to] put a human face on this debate, and do so well. The book will be received with relief by some and with frustration by others. Controversial it will undoubtedly be, since--as with most things Cuban--strong emotions are a given assumption. It will be an admirable beginning for the series and, it is hoped, will spark a much-needed debate in the United States on many aspects of the 'Cuban question.' It is about time."--John M. Kirk Based on the vivid firsthand testimony of prominent Afro-Cubans who live in Cuba, this book of interviews looks at ways that race affects daily life on the island. While celebrating their racial and national identity, the collected voices express an urgent need to end the silences and distortions of history in both pre- and postrevolutionary Cuba. The 14 people interviewed--of different generations and from different geographic areas of Cuba--come from the arts, the media, industry, academia, and medicine. They include a doctor who calls for joint U.S.-Cuban studies on high blood pressure and a craftsman who makes the batá drums used in Yoruba worship ceremonies. All responded to four controversial questions: What is it like to be black in Cuba? How has the revolution made a difference? To what extent is that difference true today? What can be done? Exposing the contradictions of both racial stereotyping and cultural assimilation, their eloquent answers make the case that the issue of race in Cuba, no matter how hard to define, will not be ignored. A volume in the series Contemporary Cuba, edited by John M. Kirk

Language of Conflict Natalia Knoblock 2020-06-11 Exploring the ways in which language and conflict are intertwined and interrelated, this volume examines the patterns of public discourse in Ukraine and Russia since the beginning of the Ukrainian Crisis in 2014. It investigates the trends in language aggression, evaluation, persuasion and other elements of conflict communication related to the situation. Through the analysis of the linguistic features of salient discourses and prevalent narratives constructed by different social groups, Language of Conflict reflects competing worldviews of various stakeholders in this conflict and presents multiple, often contradictory, visions of the circumstances. Contributors from Ukraine, Russia and beyond investigate discursive representations of the most important aspects of the crisis: its causes and goals, participants and the values and ideologies of the opposing factions. They focus on categorization, stance, framing, (de)legitimation, manipulation and coping strategies while analysing the ways in which the stress produced by social discord, economic hardship, and violence shapes public discourse. Primarily focusing on informal communication and material gathered from online sources, the collection provides insight into the ways people directly affected by the crisis think about and respond to it. The volume acknowledges the communicators' active role in constructing the (often incompatible) discursive images of the conflict and concentrates on the conscious and strategic use of linguistic resources in negative and aggressive communication.

Policies and Research in Identity Management Elisabeth de Leeuw 2010-08-26 st The world of the 21 century is, more than ever, global and impersonal. Criminal and terrorist threats, both physical and on the Internet, increase by the day. The demand for better methods of identification and access control is growing, not only in companies and organisations but also in the world at large. At the same time, such security measures have to be balanced with means for protecting the privacy of users. Identity management is put under pressure, due to the growing number of frauds who want to hide their true identity. This challenges the information security research community to focus on interdisciplinary and holistic approaches while retaining the benefits of previous research efforts. In this context, the IFIP Working Group 11.6 on Identity Management has been founded in August 2006. The intention of the Working Group is to offer a broad forum for the exchange of knowledge and for the tracking and discussion of issues and new developments. In this, we take an interdisciplinary approach. Scientists as well as practitioners, from government and business, who are involved in the field of identity management are welcome to participate. The IDMAN 2007 Conference on Policies and Research in Identity Management was the very first conference organized by this Working Group. We aim to organize conferences bi-annually. The IDMAN 2007 Conference has been centered around the theme of National Identity Management or, in other words, identity management in the public sector.

What Is a Nation? and Other Political Writings Ernest Renan 2018-08-28 Ernest Renan was one of the leading lights of the Parisian intellectual scene in the second half of the nineteenth century. A philologist, historian, and biblical scholar, he was a prominent voice of French liberalism and secularism. Today most familiar in the English-speaking world for his 1882 lecture "What Is a Nation?" and its definition of a nation as an "everyday plebiscite," Renan was a major figure in the debates surrounding the Franco-Prussian War, the Paris Commune, and the birth of the Third Republic and had a profound influence on thinkers across the political spectrum who grappled with the problem of authority and social organization in the new world wrought by the forces of modernization. *What Is a Nation? and Other Political Writings* is the first English-language anthology of Renan's political thought. Offering a broad selection of Renan's writings from several periods of his public life, most previously untranslated, it restores Renan to his place as one of France's major liberal thinkers and gives vital critical context to his views on nationalism. The anthology illuminates the characteristics that distinguished nineteenth-century French liberalism from its English and American counterparts as well as the more controversial parts of Renan's legacy, including his analysis of colonial expansion, his views on Islam and Judaism, and the role of race in his thought. The volume contains a critical introduction to Renan's life and work as well as detailed annotations that assist in recovering the wealth and complexity of his thought.

The roots of nationalism Lotte Jensen 2016-04-15 This collection brings together scholars from a wide range of disciplines to offer perspectives on national identity formation in various European contexts between 1600 and 1815. Contributors challenge the dichotomy between modernists and traditionalists in nationalism studies through an emphasis on continuity rather than ruptures in the shaping of European nations in the period, while also offering an overview of current debates in the field and case studies on a number of topics, including literature, historiography, and cartography.

Towards an Avant-Garde Europe. Current Status and Future Perspectives Goran Ilik 2020-04-24 Anthology from the year 2017 in the subject Politics - International Politics - Topic: European Union, , language: English, abstract: The first chapter is a qualitative analysis of the Lisbon Treaty and its institutional and political implications for the international political identity of the European Union as a global actor. With the integration of the EU's foreign policy capacities and the fusion of the (former) three pillars, the Lisbon Treaty makes some sort of rationalization of the institutions in terms of providing efficient and simplified decision-making, suitable for implementing a coherent foreign policy. This chapter concludes that the Lisbon Treaty does not represent a finalité politique of the EU integration process, but just a step towards its achievement. The second chapter analyses the main determinants that can affect the functioning of the European Union as one of the key global players in the contemporary world. Being a unique and highly specific international actor, the EU is a major power in terms of economic potential and the attractiveness of its social and cultural model, but it is also a

dwarf in the sphere of foreign and security policy. The third chapter suggests an answer to the question of national identity and belonging to nation-states in an avant-garde Europe. In other words, it examines: what might the avant-garde of national identity in Europe in the XXI century be; will nationalities and simple belonging to nation-states be sufficient for Europeans; what is the vitality and the potential of pan-European identity to fill the gaps of national identity; and how the two strains of belonging relate to each other. The fourth chapter describes how judicial bodies through their case law shaped and modeled the federal structures of government in the cases of the United States and the European Union. Through initially laying out the theoretical explanations of the significance of constitutional (judicial) review in federal structures, and elaborating on the powers and position of the Supreme Court in the United States and the Court of Justice in the European Union, the author seeks to show how these bodies influenced, in similar ways, some of the key features of these two federal organizations. The fifth chapter argues about Europe, which as a continent has throughout its history been one of the most popular destinations for migrants and foreigners who have viewed the Old continent as a place of better social and economic possibilities. The migrant crisis has thus become a real litmus test for the EU coherence and unity.

Identity Card Technologies Great Britain: Parliament: House of Commons: Science and Technology Committee 2006-08-04 This report focuses upon the Home Office's identity cards scheme, which uses various technologies including biometrics, information and communication technology (ICT) and smart cards. It explores the ways in which scientific advice, risk and evidence are being managed in relation

to technologies that are continually developing. The Home Office has followed good practice by the establishment of advisory committees, the use of Office of Government Commerce (OGC) Gateway Reviews and the development of risk management strategies, along with a policy of gradual implementation. But the Committee has identified weaknesses in the use of scientific advice and evidence. There has been a lack of transparency surrounding the incorporation of scientific advice, the procurement process and the ICT system. Consultations have been limited in scope and their objectives have been unclear. Only some aspects of the scheme such as the biometrics have been determined. The Home Office's decisions demonstrate an inconsistent approach to scientific evidence, and the Committee is concerned that choices regarding biometric technology have preceded trials. With extensive trialling still to take place, the Committee is sceptical about the validity of projected costs. The Committee recommends that the Home Office seeks advice on ICT from senior and experienced professionals and establishes an ICT assurance committee. It is crucial that the Home Office increases clarity and transparency across the programme, not only in problem areas. The programme should also be flexible enough to change should evidence emerge that contradicts existing assumptions.

Identity and Symbolic Interaction Richard T. Serpe 2020-04-22 This book examines identity theory's centrality within social psychology and its foundations within structural symbolic interaction, highlighting its links not only to other prominent sociological subfields, but also to other theoretical perspectives within and beyond sociology. The book provides a synthetic overview outlining the intellectual lineage of identity theory within structural symbolic interactionism, and how the "Indiana School" of identity theory and research, associated especially with Sheldon Stryker, relates to other symbolic interactionist traditions within sociology. It also analyses the latest developments in response to the push to integrate identity theory, which initially focused on role identities, with the study of personal, group and social identities. Further, it discusses the relationship between identity theory and affect control theory, providing a sense of the many substantive topics within sociology beyond social psychology for which the study of identity has important, sometimes underappreciated implications. The book concludes with a chapter summarizing the interrelated lessons learned while also reflecting on remaining key questions and challenges for the future development of identity theory.

Contemporary British Identity Christina Julios 2017-11-30 Against the background of an increasingly diverse British society, this book traces the evolution of British identity in the twentieth century. Debates exploring the nature of Britishness and multiculturalism are here deconstructed through a linguistic lens, which considers the role played by the English language in shaping Britain's national identity. Within this context, two significant historical events are considered: the expansionism of nineteenth century British Empire, and the subsequent rise of the United States to the position of world superpower. In charting the development of British nationhood over time, the book identifies three contrasting public narratives, each reflecting society's perceptions of the identity question at particular points in time: a discourse of laissez-faire at the turn of the century; a discourse of multiculturalism in the ensuing decades; and a discourse of integration during the closing years. The book raises fundamental questions about who we are as a nation and how we got here. It also provides clues as to the direction the prevailing public discourse on British identity is likely to take in the twenty-first century.

National Identity, Popular Culture and Everyday Life Tim Edensor 2020-06-15 The Millennium Dome, Braveheart and Rolls Royce cars. How do cultural icons reproduce and transform a sense of national identity? How does national identity vary across time and space, how is it contested, and what has been the impact of globalization upon national identity and culture? This book examines how national identity is represented, performed, spatialized and materialized through popular culture and in everyday life. National identity is revealed to be inherent in the things we often take for granted - from landscapes and eating habits, to tourism, cinema and music. Our specific experience of car ownership and motoring can enhance a sense of belonging, whilst Hollywood blockbusters and national exhibitions provide contexts for the ongoing, and often contested, process of national identity formation. These and a wealth of other cultural forms and practices are explored, with examples drawn from Scotland, the UK as a whole, India and Mauritius. This book addresses the considerable neglect of popular cultures in recent studies of nationalism and contributes to debates on the relationship between 'high' and 'low' culture.

Colonialism and National Identity Paolo Bertella Farnetti 2015-09-04 Until the latter part of the twentieth century, Italy's colonial past was a largely neglected topic in historical studies. Before then, only a handful of historians had shown any inclination for rescuing it from the dusty shelves of history, to which it had been relegated. With a few exceptions - most notably Angelo Del Boca - not many had the courage to venture into such treacherous territory. Colonial studies experienced a resurgence at the start of the new millennium, with remarkable progress in the quantity and quality of research, along

with the wider public's newfound interest, as evidenced by an important conference held in Milan in 2006 and the large audience it attracted. This book addresses the relationship between national identity and colonial culture in Italy. The centrality of the construction of Otherness in the identity formation of the colonizer has been extensively reported, both in Europe and elsewhere, and the relevance of colonial heritage has also been attested. In Italy, however, this relationship has been neglected in existing historiography, and the colonial experience has traditionally been side-lined and marginalized. This volume is divided into several sections, each organized around an underlying theme. Within each theme, a broad array of topics and methodologies reflect the authors' approach in analysing the role of colonialism in the process of Italian identity formation. The rather heterogeneous works contained in this book, which attest the vitality and complexity of the debate on Italian colonialism, are clustered around one central theme: the reconstruction of un-comfortable memories, and a past that will not pass - which overlap the challenging present circumstances of rigidity, racism and rejection. As such, this book is a work of critical reflection, assembled using varied resources and scientific tools in order to shed light on a common past that is still so near and vivid in the minds of Italians, but at the same time so denied, distorted and forgotten in the collective memory.

Toward a Geography of Art Thomas DaCosta Kaufmann 2004-03-14 Art history traditionally classifies works of art by country as well as period, but often political borders and cultural boundaries are highly complex and fluid. Questions of identity, policy, and exchange make it difficult to determine the "place" of art, and often the art itself results from these conflicts of geography and culture. Addressing an important approach to art history, Thomas DaCosta Kaufmann's book offers essays that focus on the intricacies of accounting for the geographical dimension of art history during the early modern period in Europe, Latin America, and Asia. Toward a Geography of Art presents a historical overview of these complexities, debates contemporary concerns, and completes its exploration with a diverse collection of case studies. Employing the author's expertise in a variety of fields, the book delves into critical issues such as transculturation of indigenous traditions, mestizaje, the artistic metropolis, artistic diffusion, transfer, circulation, subversion, and center and periphery. What results is a foundational study that establishes the geography of art as a subject and forces us to reconsider assumptions about the place of art that underlie the longstanding narratives of art history.

Cultural Diversity Versus Economic Solidarity Francqui Colloquium (7th : 2003 : Brussels, Belgium)
2003 Du fait de l'immigration, la diversité culturelle et linguistique de nos sociétés a tendance à augmenter. Du fait d'interdépendances multiples, nous devons aussi de plus en plus fonctionner au niveau d'entités plurinationales, comme l'Union européenne, qui connaissent une diversité culturelle et linguistique sensiblement plus grande que chacune de leurs composantes. N'est-il pas d'autant plus difficile d'organiser durablement une solidarité généreuse au sein d'une population qu'elle est plus hétérogène culturellement et linguistiquement ? Si c'est le cas, les politiques dites " multiculturelles " sont-elle de nature à adoucir cette tension ou au contraire à l'exacerber ? C'est autour de ces questions que Philippe Van Parijs a rassemblé des chercheurs de divers horizons, mondialement réputés, pour deux jours de discussion intense. Ce livre reprend l'ensemble des communications et commentaires, suivi de conclusions personnelles par Brian Barry, Will Kymlicka et Philippe Van Parijs.

American Reckoning Christian G. Appy 2015 Christian G. Appy explores how the Vietnam war was managed, reported, packaged, and consumed; the myths that were created; why decisions were made; who (if anyone) got left behind; America's accountability for atrocities and how the real 'Vietnam syndrome' has played out in popular culture and our foreign policy. He reports across newspaper accounts, TV coverage, Pentagon stats and position papers, memoirs, movies, novels, and more to create a completely fresh account of the meaning of the war, asking the hard questions.

[The Minority Muslim Experience in Mainland Southeast Asia](#) John Goodman 2021-07-13 This book examines the lives of the Malay and Cham Muslims in Thailand, Cambodia and Vietnam and examines how they co-exist and live in societies that are dominated by an alternative consensus and are illiberal and non-democratic in nature. Focusing on two major Muslim communities in Southeast Asia, both of whom live as minorities in societies that are not democratic and have a history of hostility and repression towards non-conforming ideas, the book explains their circumstances, the choices and life decisions they have to make, and how minorities can thrive in an unfriendly, monocultural environment. Based on original field work and research, the author analyses how people live, and how they adapt to societies which are not motivated by Western liberal ideals of multiculturalism. The book also offers a unique perspective on how Islam develops in an environment where it is seen as alien and disloyal. A useful contribution analyzing historical and post-colonial experiences of Muslim minorities and how they survive and evolve over the course of state monopoly in mainland Southeast Asia, this book will be of interest to academics working on Muslim minorities, Asian Religion and Southeast Asian Studies.
