Muncie 4-Speed Transmissions Paul Cangialosi 2014-10-15 The Muncie 4-speeds, M20, M21, and M22 are some of the most popular manual transmissions ever made and continue to be incredibly popular. The Muncie was the top high-performance manual transmission GM offered in its muscle cars of the 60s and early 70s. It was installed in the Camaro, Chevelle, Buick GS, Pontiac GTO, Olds Cutlass, and many other classic cars. Many owners want to retain the original transmission in their classic cars to maintain its value. Transmission expert and veteran author Paul Cangialosi has created an indispensable reference to Muncie 4-speeds that guides you through each crucial stage of the rebuild process. Comprehensive ID information is provided, so you can positively identify the cases, shafts, and related parts. It discusses available models, parts options, and gearbox cases. Most important, it shows how to completely disassemble the gearbox, identify wear and damage, select the best parts, and complete the rebuild. It also explains how to choose the ideal gear ratio for a particular application. Various high-performance and racing setups are also shown, including essential modifications, gun drilling the shafts, cutting down the gears to remove weight, and achieving race-specific clearances. Muncie 4-speeds need rebuilding after many miles of service and extreme use. In addition, when a muscle car owner builds a high-performance engine that far exceeds stock horsepower, a stronger high-performance transmission must be built to accommodate this torque and horsepower increase. No other book goes into this much detail on the identification of the Muncie 4-speed, available parts, selection of gear

ratios, and the rebuild process.

The other stories explore the profoundness of human psyche where joy, suffering, humour and even madness can all be found. Encounter stories about cult escapees, an incompetent lawyer, a liberated husband, a case of mistaken identity and the serendipitous nature of synchronicity.

Creació i simulació de mapes de canvi per a vehicles comercials lleugers elèctrics Xavier Morales Melero 2014 En aquests últims anys s'ha vist incrementada l'oferta de vehicles de passatgers elèctrics, mentre que en els LCV (de l'anglès Light Commercial Vehicle o Vehicle Comercial Lleuger) l'oferta ha estat bastant més reduïda, no obstant s'ha observat un creixent interès d'aquests fabricants en portar la tecnologia elèctrica cap aquest sector. Aquest projecte es descompon en varies etapes. Primer de tot i basant-se en un prototip de LCV elèctric existent, es pretén explicar d'una manera simplificada la transformació que es va dur a terme partint d'un Nissan Cabstar MT de 3,5 tones i motor Diesel per arribar a un vehicle elèctric amb reductor d'una marxa. Generalment, en vehicles de passatgers, amb un motor i un reductor de velocitat el vehicle obté unes prestacions acceptables, però degut a que els LCV són vehicles destinats al transport de mercaderies l'enginyer es veuria obligat a posar un motor elèctric d'unes dimensions destacables o, com en aquest prototip, a acceptar un vehicle elèctric amb unes prestacions poc competitives. Aquest projecte aporta una idea diferent i pretén millorar el disseny utilitzant un motor elèctric de potencia mitja amb una caixa de canvis AMT (de l'anglès Automated Manual Transmission o Caixa de canvis Manual Automatitzada) de dues marxes. Aquest tipus de caixes tenen una unitat de control que decideix quina marxa posar en funció d'un mapa de canvi que depèn d'unes variables d'entrada. Al ser un estudi de la construcció d'un prototip de baix cost, es pretén utilitzar peces existents o peces de Nissan les quals es poden obtenir via recanvis. En quant a la caixa, es disposa d'una AMT de 6 marxes de les quals s'estudiarà quines dues marxes s'haurien d'utilitzar. Per tant, la primera etapa d'aquest projecte avarca primer l'estudi de quins elements de la línia motriu del vehicle es van suprimir i quins es van afegir per a la construcció del prototip i segon, la realització d'una comparativa per demostrar la justificació d'utilització d'una caixa de dues marxes vers un reductor d'una única marxa. Un cop definida l'especificació de la línia motriu, el segon objectiu d'aquest projecte és desenvolupar una eina informàtica amb MATLAB que permeti obtenir un mapa de canvi de partida introduint-hi com a paràmetres d'entrada l'especificació del vehicle. Un cop obtingut aquest mapa, el tercer i últim objectiu és dissenyar un model de vehicle en SIMULINK en el que es pugui introduir el mapa de canvi anterior i testear-lo en diferents condicions dinàmiques. Com és

un departament específic qui valida aquests mapes de canvi valorant des de les prestacions fins a les sensacions, és complicat obtenir un mapa correcte directament de l'eina. Per això el que es pretén és que entre l'algorisme i les simulacions s'obtingui el mapa més ajustat possible.

Handbook of Research on Metaheuristics for Order Picking Optimization in Warehouses to Smart Cities Ochoa Ortiz-Zezzatti, Alberto 2019-04-05 Building accurate algorithms for the optimization of picking orders is a difficult task, especially when one considers the delays of real-world situations. In warehouse environments, diverse algorithms must be developed to enhance the global performance relating to combining customer orders into picking orders to reduce wait times. The Handbook of Research on Metaheuristics for Order Picking Optimization in Warehouses to Smart Cities is a pivotal reference source that addresses strategies for developing able algorithms in order to build better picking orders and the impact of these strategies on the picking systems in which diverse algorithms are implemented. While highlighting topics such ABC optimization, environmental intelligence, and order batching, this publication examines common picking aspects in warehouse environments ranging from manual order picking systems to automated retrieval systems. This book is intended for researchers, teachers, engineers, managers, and practitioners seeking research on algorithms to enhance the order picking performance.
