Empowering Underrepresented Gifted Students Joy Lawson Davis 2021-12-22 Help underserved high-potential students claim their right to an education that addresses their unique needs. In gifted education, an important and contentious issue that has yet to be sufficiently addressed is the systemic underrepresentation of gifted students who have been discriminated against in school-based gifted and advanced learner programs because of their race, ethnicity, gender identity, sexual orientation, socioeconomic status, or other realities. *Empowering Underrepresented Gifted Students* gives a voice to those students and brings their stories into focus. With chapters written by student and expert scholars who specialize in addressing the structural inequity and educational inequality in gifted and advanced learner programs, *Empowering Underrepresented Gifted Students* recommends practices and strategies for helping underserved high-potential students claim their right to an education that addresses their unique needs. Each chapter has key takeaways and discussion questions, providing a built-in book study guide to prepare educators to engage students in conversation and to help develop their self-advocacy skills. Coeditors Dr. Joy Lawson Davis and Deb Douglas have brought together the voices of experts and students to help educators move closer to ensuring equity, access, and excellence in gifted education. By arming historically marginalized gifted students with self-advocacy strategies, these remarkable students will be better enabled to fulfill their dreams.

Helping Children Learn Jack A. Naglieri 2010 "Exceptional...delivers on the goal of connecting assessment with intervention."---Alan S. Kaufman, Ph.D., Clinical Professor of Psychology, Yale Child Study Center, School of Medicine "A valuable resource for teachers and parents...enables educators to access exactly the information they need to improve the performance of students who struggle."---Norah S. Hooper, Ph.D., College of Graduate and Professional Studies, University of Mary Washington, Fredericksburg, Virginia Enhanced with 27 new handouts and the Spanish translations users have requested, the second edition of this popular book offers a fresh, practical approach to teaching struggling students in elementary through high school. Applying their expert knowledge of how children learn, the authors developed more than 75 highly effective intervention handouts---ideal for teachers to use in the classroom and share with parents for use at home. This second edition is set up like the first: A short questionnaire helps school psychologists pinpoint students' strengths and needs, and teachers use the handouts to address the areas that need work. Each intervention handout is ready to use: It clearly describes the skill involved, indicates which children should use the intervention, and suggests easy-to-implement strategies. And because the handouts were developed around the four cognitive areas in Dr. Naglieri's well-respected PASS theory--- Planning, Attention, Simultaneous processing, and Successive processing---users can be sure they're getting proven, reliable approaches to solving students' academic challenges.
