**Light of the Northern Dancers** Robin F. Gainey 2017-11-23 Fiery aristocrat, Eden Rose, uprooted from her native Scotland, has tended a foundering marriage and failing ranch at the corner of Crazy Woman Creek and the Powder River for a decade. Best friend, backwoods spitfire Maddie True, has her own woes a few miles away: widowed with a passel of young children, and caretaker to her addled father. Abandoned by her husband during the height of Wyoming Territory's worst drought in history, Eden depends on her inept brother, Aiden, to see her through the coming winter. But when he disappears into the wild Bighorn mountains, she shuns Maddie's fearful cautions, teaming with enigmatic Lakota holy man, Intah, to find her brother before the wicked snow holds them all hostage. "Light of the Northern Dancers is a powerful novel of a woman's journey, thought-provoking and unsettling in its authenticity and unflinching honesty." — Susan Wiggs, NYT Bestselling Romance Author "Half of what happens to us may have reason, the rest is chaos. Robin F. Gainey's second novel, Light of the Northern Dancers, has this brand of existentialism. It's real and it doesn't let go!" — Tom Skerritt, Award Winning Actor, Writer, Director

*The Lost Constellations* John C. Barentine 2015-10-23 Casual stargazers are familiar with many classical figures and asterisms composed of bright stars (e.g., Orion and the Plough), but this book reveals not just the constellations of today but those of yesteryear. The history of the human identification of constellations among the stars is explored through the stories of some influential celestial cartographers whose works determined whether new inventions survived. The history of how the modern set of 88 constellations was defined by the professional astronomy community is recounted, explaining how the constellations described in the book became permanently "extinct." Dr. Barentine addresses why some figures were tried and discarded, and also directs observers to how those figures can still be picked out on a clear night if one knows where to look. These lost constellations are described in great detail using historical references, enabling observers to rediscover them on their own surveys of the sky. Treatment of the obsolete constellations as extant features of the night sky adds a new dimension to stargazing that merges history with the accessibility and immediacy of the night sky.

**The World of the Gauls** Antón Bousquet More than two millennia after the Roman conquest that marked the beginning of the fading away of the Gaulish tongue and culture, traces of the world of the Gauls still pervade their land. The Gauls obstinately refused to put their worldview into writing, but they nonetheless left a foundation, buried into the soil in the form of artifacts or written in the manuscripts of their neighbors. The artworks of the Gauls, in particular, represent an invaluable source concerning the way the early Celts viewed the creation: more than mere folklore, it is also a philosophy that can be seen behind the images that they carved on rocks, stamped on coins, or cast in bronze. The world of the Gauls is gone, but its foundations remain, and they can become the basis for the edification of something new, a philosophy that will not be a reconstruction of the philosophy of the ancient Celts, but rather only one that shares roots with it. The present work examines these foundations and uses them as the starting point of a modern Celtic philosophy. The backbone of the old foundation is the tripartition of the creation into three realms: the first is the Dubnos, which is the Dark and the Deep, the earth, the waters, and the shadows of the night. The "middle realm" is Bitu, Life and Being, which is characterized by the color of blood: the one of the dawn and the dusk. Finally, the last one is the Albios, which is the Bright, the light of the skies that illuminates the day, and all that cannot be touched with the hands, that is, the metaphysical world. The three realms of nature, to which the Gauls associated different gods, are

themselves constantly at war with one another, as reflected in their central myth, and it is through this harmonious strife that the creation can flourish and that man can accomplish his destiny. This book represents an encounter between the traces of the essence of the Gaulish world and the works of ancient and modern philosophers such as Heraclitus and Heidegger, an encounter that offers a new vision of the world in which man lives.

**Lights Out** David Crawford 2010 "... Chronicles the challenges of Mark "Karate Man" Turner when the lights go out over most of the free world. He must find in himself the ability to unite his family, friends, and neighbors if any of them are to survive the harsh reality that everyday life becomes when the veneer of civilization is stripped away"--From publisher description.

Jonathan White takes readers across the globe to discover the science and spirit of ocean tides. In the Arctic, White shimmies under the ice with an Inuit elder to hunt for mussels in the dark cavities left behind at low tide; in China, he races the Silver Dragon, a twenty-five-foot tidal bore that crashes eighty miles up the Qiantang River; in France, he interviews the monks that live in the tide-wrapped monastery of Mont Saint-Michel; in Chile and Scotland, he investigates the growth of tidal power generation; and in Panama and Venice, he delves into how the threat of sea level rise is changing human culture—the very old and very new. *Tides* combines lyrical prose, colorful adventure travel, and provocative scientific inquiry into the elemental, mysterious paradox that keeps our planet's waters in constant motion. Photographs, scientific figures, line drawings, and sixteen color photos dramatically illustrate this engaging, expert tour of the tides.

**That Winter** Pamela Gillilan 1986 Pamela Gillilan was born in London in 1918, married in 1948 and moved to Cornwall in 1951. When she sat down to write her poem *Come Away* after the death of her husband David, she had written no poems for a quarter of a century. Then came a sequence of incredibly moving elegies. Other poems followed, and two years after starting to write again, she won the Cheltenham Festival poetry competition. Her first collection *That Winter* (Bloodaxe, 1986) was shortlisted for the Commonwealth Poetry Prize.

**Living as an Author in the Romantic Period** Matthew Sangster 2021-01-27 This book explores how authors profited from their writings in the late eighteenth and early nineteenth centuries, contending that the most tangible benefits were social, rather than financial or aesthetic. It examines authors' interactions with publishers; the challenges of literary sociability; the vexed construction of enduring careers; the factors that prevented most aspiring writers (particularly the less privileged) from accruing significant rewards; the rhetorical professionalisation of periodicals; and the manners in which emerging paradigms and technologies catalysed a belated transformation in how literary writing was consumed and perceived.

*Internal Combustion Engines* Institution of Mechanical Engineers 2014-10-10 This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets
