We Want Everything Nanni Balestrini 2022-04-12 The explosive novel of Italy's revolutionary 1969 It was 1969, and temperatures were rising across the factories of the north as workers demanded better pay and conditions. Soon, discontent would erupt in what became known as Italy's Hot Autumn. A young worker from the impoverished south arrives at Fiat's Mirafiori factory in Turin, where his darker complexion begins to fade from the fourteen-hour workdays in sweltering industrial heat. His bosses try

to withhold his wages. Our cynical, dry-witted narrator will not bend to their will. "I want everything, everything that's owed to me," he tells them. "Nothing more and nothing less, because you don't mess with me." Around him, students are holding secret meetings and union workers begin halting work on the assembly lines, crippling the Mirafiori factory with months of continuous strikes. Before long, barricades line the roads, tear gas wafts into private homes, and the slogan "We Want Everything" is ringing through the streets. Wrought in spare and measured prose, Balestrini's novel depicts an explosive uprising. Introduced by Rachel Kushner, the author of the best-selling *The Flamethrowers*, *We Want Everything* is the incendiary fictional account of events that led to a decade of revolt.

Cultures of Violence Ruth Kinna 2020-04-24 Investigating art practitioners' responses to violence, this book considers how artists have used art practices to rethink concepts of violence and non-violence. It explores the strategies that artists have deployed to expose physical and symbolic violence through representational, performative and interventional means. It examines how intellectual and material contexts have affected art interventions and how visual arts can open up critical spaces to explore violence without reinforcement or recuperation. Its premises are that art is not only able to contest prevailing norms about violence but that contemporary artists are consciously engaging with publics through their practice in order to do so. Contributors respond to three questions: how can political violence be understood or interpreted through art? How are publics understood or identified? How are art interventions designed to shift, challenge or respond to public perceptions of political violence and how are they constrained by them? They discuss violence in the everyday and at state level: the Watts' Rebellion and Occupy, repression in Russia, domination in Hong Kong, the violence of migration and the unfolding art activist logic of the sigma portfolio. Asking how public debates can be shaped through the visual and performing arts and setting taboos about violence to one side, the volume provides an innovative approach to a perennial issue of interest to scholars of international politics, art and cultural studies.

Language Testing Tim McNamara 2006-11-10 Winner of the SAGE/ILTA Award for Best Book on Language Testing 2009 This volume focuses on the social aspects of language testing, including assessment of socially situated language use and societal consequences of language tests. The authors argue that traditional approaches to ensuring social fairness in tests go some way to addressing social concerns, but a broader perspective is necessary to examine the functions of tests on a societal scale. Considers these issues in relation to language assessment in oral proficiency interviews, and to the assessment of second language pragmatics. Argues that traditional approaches to ensuring social fairness in tests go some way to addressing social concerns, but a broader perspective is necessary if we are to fully understand the social dimension of language assessment.

Dynamics of Transformation, Elite Change and New Social Mobilization Heiko Wimmen 2018-02-02 The political transformations initiated by the so-called Arab Spring in Egypt, Libya, Tunisia and Yemen have been marked by strong political contention, continued social mobilization and, albeit to different

degrees, weak central state institutions. This book proposes that, rather than agreed roadmaps of institutional change (e.g. elections, drawing up new constitutions) and centrally crafted transition processes, it has been the competition of key political actors for resources of political power and control that has set the pace and influenced the direction and depth of the transformation processes. Hence, the contributions in this volume use an actor-centred approach. Two perspectives are assumed: first key political actors - referring to the "Politically Relevant Elite (PRE)"- are identified and their motivations as well as their strategies and capacities to steer the transformation process. Secondly, the authors investigate the capacity of politically "Mobilized Publics" to exert influence on agenda setting and decision making, ask to what extent popular and social movements have emerged as political actors in their own right, and to what extent such forms of bottom-up participation have constituted a fundamental change to the political culture of these countries. Both avenues of inquiry analyze how the elites are constrained by continued social mobilization, how they engage with mobilized publics to promote their own agendas, and whether the extended scope of popular participation contributes to the legitimacy and stability of the emerging political orders, or causes disruption, fragmentation and conflict. This book was previously published as a special issue of *Mediterranean Politics*.

Digital Cash Finn Brunton 2020-10-13 The fascinating untold story of digital cash and its creators—from experiments in the 1970s to the mania over Bitcoin and other cryptocurrencies Bitcoin may appear to be a revolutionary form of digital cash without precedent or prehistory. In fact, it is only the best-known recent experiment in a long line of similar efforts going back to the 1970s. But the story behind cryptocurrencies like Bitcoin and its blockchain technology has largely been untold—until now. In *Digital Cash*, Finn Brunton reveals how technological utopians and political radicals created experimental money to bring about their visions of the future: to protect privacy, bring down governments, prepare for apocalypse, or launch a civilization of innovation and abundance that would make its creators immortal. Filled with marvelous characters, stories, and ideas, *Digital Cash* is an engaging and accessible account of the strange origins and remarkable technologies behind today's cryptocurrency explosion.

The Complete Guide to Business Risk Management Kit Sadgrove 2020-07-26 Risk management and contingency planning has really come to the fore since the first edition of this book was originally published. Computer failure, fire, fraud, robbery, accident, environmental damage, new regulations - business is constantly under threat. But how do you determine which are the most important dangers for your business? What can you do to lessen the chances of their happening - and minimize the impact if they do happen? In this comprehensive volume Kit Sadgrove shows how you can identify - and control - the relevant threats and ensure that your company will survive. He begins by asking 'What is risk?', 'How do we assess it?' and 'How can it be managed?' He goes on to examine in detail the key danger areas including finance, product quality, health and safety, security and the environment. With case studies, self-assessment exercises and checklists, each chapter looks systematically at what is involved and enables you to draw up action plans that could, for example, provide a defence in law or reduce your insurance premium. The new edition reflects the changes in the global environment, the new risks that have emerged and the effect of macroeconomic factors on business profitability and success. The author has also included a set of case studies to illustrate his ideas in practice.

Superflex Rina Carvajal 2019-02-19 The critically-acclaimed Danish artist group SUPERFLEX, founded in 1993 by Jakob Fenger (b. 1968), Bjørnstjerne Christiansen (b. 1969), and Rasmus Nielsen (b. 1969), create humorous and playfully subversive installations and films that deal with financial crisis, corruption, migration, and the possible consequences of global warming. The artists describe their practice as the provision of "tools" that affect or influence social or economic contexts, and often root

their projects in particular local situations, inviting the participation of viewers. Their work poses questions of political, economic, and environmental behavior and responsibility. This catalogue accompanies the group's first major museum survey in the United States and highlights video, sculpture, and installation works relevant to the history, present, and future of cities like Miami, poised on the leading edge of pressing issues such as climate change and immigration. Co-published by Museum of Art and Design at Miami Dade College (MOAD), *Superflex: We Are All in the Same Boat* includes an introduction by the exhibition's curator, Jacob Fabricius, Artistic Director of Kunsthall Aarhus, essays by Stephanie Wakefield and Gean Moreno, and George Yudice, and a fictional text about water, flooding, and the future of Miami by science-fiction writer Mark von Schlegell. EXHIBITION November 15, 2018 - April 21, 2019 Museum of Art and Design at Miami Dade College (MOAD), Miami

Selected Writings Mikhail Alekseevich Kuzmin 2005 This book consists largely of previously untranslated work. Kuzmin was a master of many genres: poet, dramatist, writer of narrative prose, and influential literary manifestos. All these facets of Kuzmin's creativity are represented in this volume, which traces his development from a decadent to a key figure of Russia's artistic underground during the repression of the Soviet period. A cycle of poems, *Thrall* (1919), published here for the first time in English, provides the book with its dominant theme. *Thrall* is a leitmotif of Kuzmin's early love poetry, where it signifies a lover's impassioned submission. Kuzmin the playwright is represented here by his only full-length drama, *The Death of Nero* (1929); Kuzmin the prose writer by two short stories that exemplify contrasting periods of his evolution. The collection also contains two literary manifestos that played pivotal roles in the development of Russian letters. -- Bucknell University Press.

Vipers and Virtuosos Sav R. Miller 2021-12-12 Aiden From the second I saw her, I knew she'd be my ruin. Sitting all alone at the bar, she looked like an angel. Eurydice in human form; her beauty eclipsed by demons. Now, I'm one of them. The ghost she's tried for years to escape. Thinking I wouldn't be able to find her. But I never stopped trying, and now that I have, her past sins should be the least of her worries. Riley From the moment he saw me, I knew I'd ruin his life. Alone at the bar, I dared the monster to come and play. Orpheus in the flesh, with his sad songs and strange obsessions. I became one of them. The siren who calls to the darkest parts of him. Only, I disappeared before he could act on it. But now he's here, and he wants me to repent for my sins. *** *Vipers and Virtuosos is a full-length, standalone dark rockstar romance inspired by the myth of Orpheus and Eurydice. It is NOT fantasy, historical, or a retelling. If you are not a dark romance reader, this book may not be suitable for you. Reader discretion is advised.

Icebergs, Zombies, and the Ultra-Thin Matthew Soules 2021-05-04 "Soules's excellent book makes sense of the capitalist forces we all feel but cannot always name... Icebergs, Zombies, and the Ultra Thin arms architects and the general public with an essential understanding of how capitalism makes property. Required reading for those who think tomorrow can be different from today."— Jack Self, coeditor of *Real Estates: Life Without Debt* In *Icebergs, Zombies, and the Ultra Thin*, Matthew Soules issues an indictment of how finance capitalism dramatically alters not only architectural forms but also the very nature of our cities and societies. We rarely consider architecture to be an important factor in contemporary economic and political debates, yet sparsely occupied ultra-thin "pencil towers" develop in our cities, functioning as speculative wealth storage for the superrich, and cavernous "iceberg" homes extend architectural assets many stories below street level. Meanwhile, communities around the globe are blighted by zombie and ghost urbanism, marked by unoccupied neighborhoods and abandoned housing developments. Learn how the use of architecture as an investment tool has accelerated in recent years, heightening inequality and contributing to worldwide financial instability: • See how investment imperatives shape what and how we build, changing the very structure of our communities • Delve into high-profile projects, like the luxury apartments of architect Rafael Viñoly's 432 Park Avenue • Understand the convergence of technology, finance, and spirituality, which together are configuring the financialized walls within which we eat, sleep, and work Includes dozens of photos and drawings of architectural phenomena that have changed the way we live. Essential reading for anyone interested in architecture, design, economics, and understanding the way our world is formed.

Whistleblowing for Change Tatiana Bazzichelli 2021-11-30 The courageous acts of whistleblowing that inspired the world over the past few years have changed our perception of surveillance and control in today's information society. But what are the wider effects of whistleblowing as an act of dissent on politics, society, and the arts? How does it contribute to new courses of action, digital tools, and contents? This urgent intervention based on the work of Berlin's Disruption Network Lab examines this growing phenomenon, offering interdisciplinary pathways to empower the public by investigating whistleblowing as a developing political practice that has the ability to provoke change from within.

Latoya Ruby Frazier: The Last Cruze Latoya Ruby Frazier 2020-06-15 As the General Motors plant in Lordstown, Ohio halted production and faced possible closure, displacing its workers, artist LaToya Ruby Frazier joined with these workers, their families, and their local union leaders to tell the story of the plant in its final days. After more than fifty years of automobile production and a commitment to manufacture the Chevrolet Cruze until 2021, the facility was recently "unallocated" by GM, as the company shifts its focus toward overseas manufacturing and the production of electric and autonomous vehicles. For many, this meant uprooting their families and giving up the support of a close-knit community. Those who turned down transfers to GM plants in other states lost their income, pensions, and benefits. *The Last Cruze*, which sets out to amplify the voices of the auto workers in Lordstown, introduces a new chapter to Frazier's work in investigating labor, family, community, and the working class. Exhibited at the Renaissance Society in 2019, this body of work includes over sixty photographs, alongside the written stories of the workers, and was staged within an installation that echoes the structure of the plant's assembly line. This substantial catalogue includes extensive documentation of the work and introduces new essays and dialogues by contributors including Coco Fusco, David Harvey, Werner Lange, Lynn Nottage, Julia Reichert, Benjamin Young, and members of the local chapter of the United Auto Workers.

This Is Not an Atlas kollektiv orangotango+ 2018-11-30 *This Is Not an Atlas* gathers more than 40 counter-cartographies from all over the world. This collection shows how maps are created and transformed as a part of political struggle, for critical research or in art and education: from indigenous territories in the Amazon to the anti-eviction movement in San Francisco; from defending commons in Mexico to mapping refugee camps with balloons in Lebanon; from slums in Nairobi to squats in Berlin; from supporting communities in the Philippines to reporting sexual harassment in Cairo. *This Is Not an Atlas* seeks to inspire, to document the underrepresented, and to be a useful companion when becoming a counter-cartographer yourself.

Art in the Age of Anxiety Omar Kholeif 2021-01-26 Artists and writers examine the bombardment of information, misinformation, emotion, deception, and secrecy in online and offline life in the post-digital age. Every day we are bombarded by information, misinformation, emotion, deception, and secrecy in our online and offline lives. How does the never-ending flow of data affect our powers of perception and decision making? This richly illustrated and boldly designed collection of essays and artworks investigates visual culture in the post-digital age. The essays, by such leading cultural thinkers as Douglas Coupland and W. J. T. Mitchell, consider topics that range from the future of money to the role of art in a post-COVID-19 world; from mental health in the digital age to online grieving; and from the mediation of visual culture to the thickening of the digital sphere. Accompanying an ambitious exhibition conceived by the Sharjah Art Foundation and volume editor and curator Omar Kholeif, the book is a work of art and a labor of love, emulating the labyrinthine corridors of the exhibition itself.

Ada 95 David A. Wheeler 2012-12-06 Lovelace provides an introduction to Ada 95, one of the most widely used programming languages in the world. Although the reader is assumed to have a basic understanding of programming, no prior exposure to Ada is assumed and all the basics of the language are covered. The book comprises eighteen chapters each of which is composed of short sections designed to cover a small number of key concept and to provide a test question to check the reader's understanding of the concepts covered. Each chapter then concludes with a small quiz to help ensure that the reader has grasped the principles covered in the chapter. One of Ada 95's new features, its object-oriented facilities, is covered in depth, and all of the essential features of Ada programming are covered thoroughly. In Ada 95 significant enhancements were also added to Ada's ability to interface with other programming languages (such as C, Fortran, and Cobol) and these are covered in one chapter. As a result both students and professional programmers learning Ada for the first time will welcome this new text.
