The Development of a Common Framework Scale of Language Proficiency Brian North 2000 Scales describing language proficiency in a series of levels can provide orientation for educational programmes, criteria for assessment, and reporting to stakeholders. However, in most cases such instruments are produced just by expert opinion. A scale of language proficiency actually implies a descriptive scheme related to theory but usable by practitioners. It also implies a methodology for scaling content to different levels. This book describes the use of both qualitative and quantitative techniques to develop scales for the «Common Reference Levels» in the Common European Framework of Reference for modern languages. Short stand-alone descriptors were (i) developed and classified, (ii) refined and elaborated in workshops, and then (iii) scaled by analyzing the judgments of one hundred teachers on the English language proficiency of the learners in their classes.

Arts Education and Social-Emotional Learning Outcomes Among K-12 Students Joseph Maurer 2019-04-14 Social and emotional learning is a topic of increasing focus in the education sector. Though definitions and terminology vary, at its core this trend reflects an increased interest among educators, administrators, parents, and other stakeholders in students' development of individual and interpersonal

skills beyond the realm of academic achievement. This project, conducted as a partnership between Ingenuity and the University of Chicago Consortium on School Research, consists of two components: a review of literature on this topic and an interview-based fieldwork component with educators, administrators, students, and parents in Chicago Public Schools. The authors reviewed more than 200 studies on arts education spanning six decades. They also conducted focus groups and interviews with key participants in the arts education process—including educators, administrators, students, and parents—to evaluate evidence of the effects of arts education on social-emotional development in school and after-school settings. They found a widespread belief that arts education contributes to children's and adolescents' social-emotional development.

Human Enhancement Technologies and Our Merger with Machines Woodrow Barfield 2021-06-15 A cross-disciplinary approach is offered to consider the challenge of emerging technologies designed to enhance human bodies and minds. Perspectives from philosophy, ethics, law, and policy are applied to a wide variety of enhancements, including integration of technology within human bodies, as well as genetic, biological, and pharmacological modifications. Humans may be permanently or temporarily enhanced with artificial parts by manipulating (or reprogramming) human DNA and through other enhancement techniques (and combinations thereof). We are on the cusp of significantly modifying (and perhaps improving) the human ecosystem. This evolution necessitates a continuing effort to re-evaluate current laws and, if appropriate, to modify such laws or develop new laws that address enhancement technology. A legal, ethical, and policy response to current and future human enhancements should strive to protect

the rights of all involved and to recognize the responsibilities of humans to other conscious and living beings, regardless of what they look like or what abilities they have (or lack). A potential ethical approach is outlined in which rights and responsibilities should be respected even if enhanced humans are perceived by non-enhanced (or less-enhanced) humans as “no longer human” at all.
