When Sunday Comes Claudrena N. Harold 2020-11-16 Gospel music evolved in often surprising directions during the post-Civil Rights era. Claudrena N. Harold's in-depth look at late-century gospel focuses on musicians like Yolanda Adams, Andraé Crouch, the Clark Sisters, Al Green, Take 6, and the Winans, and on the network of black record shops, churches, and businesses that nurtured the music. Harold details the creative shifts, sonic innovations, theological tensions, and political assertions that transformed the music, and revisits the debates within the community over groundbreaking recordings and gospel's incorporation of rhythm and blues, funk, hip-hop, and other popular forms. At the same time, she details how sociopolitical and cultural developments like the Black Power Movement and the emergence of the Christian Right shaped both the art and attitudes of African American performers. Weaving insightful analysis into a collective biography of gospel icons, *When Sunday Comes* explores the music's essential place as an outlet for African Americans to express their spiritual and cultural selves.

Under the Same Sky Mojgan Shamsalipoor 2017-04-26 After fleeing their homeland, Australian refugee policies threaten to tear this young couple apart. An unforgettable story of love, hope and a quest for freedom. At seventeen, all Mojgan Shamsalipoor wanted was to be safe from physical and sexual abuse, go to school, and to eventually marry for love. In Iran, she was denied all of this. Milad Jafari was a shy teenage boy who found his voice as a musician. But the rap music he loved was illegal in his country. All Milad's father, a key maker, builder and shopkeeper, wanted was for his family to live free from the fear of arrest, imprisonment or execution. To do that they all had to flee Iran. Mojgan and Milad met in Australia. But in the months between their separate sea voyages, the Australian government changed the way asylum seekers were treated. Though Milad is recognised as a refugee and will soon become a proud Australian citizen, Mojgan has been told she cannot stay here even though the threat of imprisonment and further abuse, or worse, means she can't return to Iran. *UNDER THE SAME SKY*, is a powerful insight into the human face of asylum seekers and the the way history has shaped the lives of these two young people. It also shows the compassion alive in our suburbs. For Mojgan and Milad, their love keeps their hopes alive.

Let It Be Morning Sayed Kashua 2007-12-01 A revealing portrait of the conflicted allegiances of Israeli Arabs in this searing new novel from one of the most daring voices of the Middle East. A young Arab journalist returns to his hometown—an Arab village within Israel—where his already vexed sense of belonging is forced into crisis when the village becomes a pawn in the never-ending power struggle that is the Middle East. Hoping to reclaim the simplicity of life among his kin, the prodigal son returns home to find that nothing is as he remembers: everything is smaller, the people are petty and provincial. But when Israeli tanks surround the village without warning or explanation, everyone inside is cut off from the outside world. As the situation grows increasingly dire, the village devolves into a Darwinian jungle, where paranoia quickly takes hold and threatens the community's fragile equilibrium. In a novel that "relates the experience of those caught in the middle, the Arab-Israelis who are citizens but are separated from many of their countrymen by faith and heritage" (School Library Journal), *Let It Be Morning*, proves once again that Sayed Kashua is a fearless, prophetic observer of a political and human quagmire that offers no easy answers. "Kashua . . . writes about the Israeli Arabs' balancing act with knowledge and passion." —Publishers Weekly

Orphan Island Laurel Snyder 2017-05-30 A National Book Award Longlist title! "A wondrous book, wise and wild and deeply true." —Kelly Barnhill, Newbery Medal-winning author of *The Girl Who Drank the Moon* "This is one of those books that haunts you long after you read it. Thought-provoking and magical." —Rick Riordan, author of the *Percy Jackson* series In the tradition of modern-day classics like Sara Pennypacker's *Pax* and Lois Lowry's *The Giver* comes a deep,

compelling, heartbreaking, and completely one-of-a-kind novel about nine children who live on a mysterious island. On the island, everything is perfect. The sun rises in a sky filled with dancing shapes; the wind, water, and trees shelter and protect those who live there; when the nine children go to sleep in their cabins, it is with full stomachs and joy in their hearts. And only one thing ever changes: on that day, each year, when a boat appears from the mist upon the ocean carrying one young child to join them—and taking the eldest one away, never to be seen again. Today's Changing is no different. The boat arrives, taking away Jinny's best friend, Deen, replacing him with a new little girl named Ess, and leaving Jinny as the new Elder. Jinny knows her responsibility now—to teach Ess everything she needs to know about the island, to keep things as they've always been. But will she be ready for the inevitable day when the boat will come back—and take her away forever from the only home she's known? "A unique and compelling story about nine children who live with no adults on a mysterious island. Anyone who has ever been scared of leaving their family will love this book" (from the Brightly.com review, which named Orphan Island a best book of 2017).

Karl Marx and Mathematics Pradip Baksi 2020-11-02 This collection of various texts on Karl Marx and Mathematics is the revised and extended second edition of the Special Supplement to Karl Marx, Mathematical Manuscripts (1994; Calcutta: Viswakos) titled Marx and Mathematics. The sources of the texts included in the three parts of this collection and, some biographical information about their respective authors have been indicated at the end of each text. The emergence and development of the Ethnomathematics movement continue to change our understanding of the history of evolution of plural mathematics on planet earth since the Neolithic age. Rediscovery and study of some of the neglected source texts have further energized investigations on the subsequent history of mathematical cultures, including those on the histories of algebra and analysis in some of the ancient and medieval languages of Asia, like Sanskrit, Arabic and Malayalam. Consequently, it is now possible to indicate some of the larger gaps in the dominant understanding of history of mathematics not only in Marx's time, but also at the time of editing Marx's mathematical manuscripts in the twentieth century, and even today. Finally, the emergence and development of mathematical and statistical software packages are vigorously reshaping our ways of conceptualizing and doing mathematics towards an unknown future. It is time now for taking yet another look at all mathematical text from the past and that includes the mathematical manuscripts of Marx. These texts have been divided into three parts. Part one contains some topical texts related to the history of emergence, development, editing,

publication and reception of the mathematical manuscripts of Karl Marx. Part two contains a selection of five articles reflecting some of the investigations inspired by these manuscripts in Russia, India and France. Part three contains five articles on plural mathematics before and after Karl Marx (1818-1883). The texts in this collection are followed by two appendices containing two bibliographies: one on Hegel and mathematics and, the other on mathematics and semiotics. Please note: This title is co-published with Aakar Books, Bew Delhi. Taylor & Francis does not sell or distribute the print edition in South Asia (India, Sri Lanka, Nepal, Bangladesh, Pakistan, Maldives or Bhutan).

Laura Grisi: the Measuring of Time Clément Dirié 2022-01-26 On the many lives and mediums of a postwar Italian artist-adventurer Published on the occasion of her long-deserved retrospective at Muzeum Susch, this book testifies to the singular vision of Italian artist Laura Grisi (1939-2017) within contemporary art history. Born in Greece, educated in Paris and living between New York and Rome, where she died, Grisi spent long periods of her life in Africa, South America and Polynesia. This involvement with non-Western cultures indelibly marked her own search for a cosmic thinking. Although her work is often reduced to Pop art, Grisi always worked within the fundamental motif of the "journey"-- from remote locations visited and documented, to the multiplicity of mediums used. Grisi embodied a stateless, nomadic female subject defying the politics of identity, the univocity of representation and the unidirectionality of time. Grisi's work spans from her avant-garde Variable Paintings of the mid-1960s and her 1970s pioneering environmental installations dealing with fog, wind and rain, to her conceptual photo-works of the 1980s.

The History of Media and Communication Research David W. Park 2008 «Strictly speaking», James Carey wrote, «there is no history of mass communication research.» This volume is a long-overdue response to Carey's comment about the field's ignorance of its own past. The collection includes essays of historiographical self-scrutiny, as well as new histories that trace the field's institutional evolution and cross-pollination with other academic disciplines. The volume treats the remembered past of mass communication research as crucial terrain where boundaries are marked off and futures plotted. The collection, intended for scholars and advanced graduate students, is an essential compass for the field.

Intuition David G. Myers 2008-10-01 How reliable is our intuition? How much should we depend on gut-level instinct rather than rational analysis when we play the stock market, choose a mate, hire an employee, or assess our own abilities? In this engaging and accessible book, David G. Myers shows us that while intuition can provide us with useful—and often amazing—insights, it can also dangerously mislead us. Drawing on recent psychological research, Myers discusses the powers and perils of intuition when: • judges and jurors determine who is telling the truth; • mental health workers predict whether someone is at risk for suicide or crime; • coaches, players, and fans decide who has the hot hand or the hot bat; • personnel directors hire new employees; • psychics claim to be clairvoyant or to have premonitions; • and much more.

Machine Dreams Jayne Anne Phillips 2011-11-09 In her highly acclaimed debut novel, the bestselling author of *Shelter* introduces the Hampsons, an ordinary, small-town American family profoundly affected by the extraordinary events of history. Here is a stunning chronicle that begins with the Depression and ends with the Vietnam War, revealed in the thoughts, dreams, and memories of each family member. Mitch struggles to earn a living as Jeans becomes the main breadwinner, working to complete college and raise the family. While the couple fight to keep their marriage intact, their daughter Danner and son Billy forge a sibling bond of uncommon strength. When Billy goes off to Vietnam, Danner becomes the sole bond linking her family, whose dissolution mirrors the fractured state of America in the 1960s. Deeply felt and vividly imagined, this lyrical novel is "among the wisest of a generation to grapple with a war that maimed us all" (*The Village Voice*), by a master of contemporary fiction.

Dancing Arabs Sayed Kashua 2007-12-01 A nimble, engaging, unflinching debut novel of a young Arab-Israeli who struggles to rise above larger forces beyond his control. In this debut novel that “rings out on every page with a compelling sense of human truth” (Kirkus Reviews), a nameless anti-hero contends with the legacy of a grandfather who died fighting the Zionists in 1948, and a father who was jailed for blowing up a school cafeteria in the name of freedom. When the narrator is granted a scholarship to an elite Jewish boarding school, his family rejoices, dreaming that he will grow up to be the first Arab to build an atom bomb. But to their dismay, he turns out to be a coward devoid of any national pride; his only ambition is to fit in with his Jewish peers who reject him. He changes his clothes, his accent, his eating habits, and becomes an expert at faking identities, sliding between different cultures, schools, and languages, and eventually a Jewish lover and an Arab wife. With refreshing candor and self-deprecating wit, *Dancing Arabs* is a “slyly subversive . . . chilling, convincing tale” (Publishers Weekly) that brilliantly maps one man’s struggle to disentangle his personal and national identities, only to tragically and inevitably forfeit both. “Despite its dark prognosis, there is a lightness and dry humor that lifts it with the kind of wings its protagonist once hoped for.” –Booklist

The Cerebral Code William H. Calvin 1998-03-02 The Cerebral Code is a new understanding of how Darwinian processes could operate in the brain to shape mental images in only seconds, starting with shuffled memories no better than the jumble of our nighttime dreams, but evolving into something of quality, such as a sentence to speak aloud. Jung said that dreaming goes on continuously but you can't see it when you are awake, just as you can't see the stars in the daylight because it is too bright. Calvin's is a theory for what goes on, hidden from view by the glare of waking mental operations, that produces our peculiarly human type of consciousness with its versatile intelligence. As Piaget emphasized in 1929, intelligence is what we use when we don't know what to do, when we have to grope rather than using a standard response. Calvin tackles a mechanism for doing this exploration and improvement offline, as we think before we act or practice the art of good guessing. Surprisingly, the subtitle's mosaics of the mind is not a literary metaphor. For the first time, it is a description of a mechanism of what appears to be an appropriate level of explanation for many mental phenomena, that of hexagonal mosaics of electrical activity that compete for territory in the association cortex of the brain. This two-dimensional mosaic is predicted to grow and dissolve much as the sugar crystals do in the bottom of a supersaturated glass of iced tea. A Bradford Book
