*The Price of Literature* Patrick M. Bray 2019-03-15 The Price of Literature examines the presence of theory in the nineteenth-century French novel, something Proust likened to leaving a price tag on a gift. Emerging after the French Revolution, what we now call literature was conceived as an art liberated from representational constraints. Patrick M. Bray shows how literature's freedom to represent anything at all has meant, paradoxically, that it cannot articulate a coherent theory of itself—unless this theory is a necessarily subversive literary representation, or “the novel's theoretical turn.” Literary thought, or the theory produced by the text, can only function by exploring what escapes dominant representations. The Price of Literature analyzes how certain iconic texts from the nineteenth century (by Mme de Staël, Hugo, Balzac, Flaubert, and Proust) perform a theoretical turn to claim the freedom to represent anything in the world, but also literature's ability to transform the world it represents. The conclusion advances a new way of thinking about literary scholarship—one based on how literature redistributes ways of writing by lending form to thought.

*Dramatica* Melanie Anne Phillips 2004-12-10 *Dramatica: A New Theory of Story* is the definitive guide to the most profoundly original and complete paradigm of story since Aristotle wrote *Poetics*. This book is chock-full of stunning solutions to vexing story structure and development problems that have mystified and tormented writers for ages. An absolute must read for any writer who wants to elevate the quality of their written work.

**The VR Book** Jason Jerald 2015-09-01 Virtual reality (VR) potentially provides our minds with direct access to digital media in a way that at first seems to have no limits. However, creating compelling VR experiences is an incredibly complex challenge. When VR is done well, the results are brilliant and pleasurable experiences that go beyond what we can do in the real

world. When VR is done badly, not only is the system frustrating to use, but sickness can result. Reasons for bad VR are numerous; some failures come from the limitations of technology, but many come from a lack of understanding perception, interaction, design principles, and real users. This book discusses such issues, focusing upon the human element of VR rather than technical implementation, for if we do not get the human element correct, then no amount of technology will make VR anything more than an interesting tool confined to research laboratories. Even when VR principles are fully understood, first implementations are rarely novel and never ideal due to the complex nature of VR and the countless possibilities. However, the VR principles discussed within enable us to intelligently experiment with the rules and iteratively design towards innovative experiences.

**Literary Theory** Terry Eagleton 2011-11-30 A quarter of a century on from its original publication, *Literary Theory: An Introduction* still conjures the subversion, excitement and exoticism that characterized theory through the 1960s and 70s, when it posed an unprecedented challenge to the literary establishment. Eagleton has added a new preface to this anniversary edition to address more recent developments in literary studies, including what he describes as "the growth of a kind of anti-theory", and the idea that literary theory has been institutionalized. Insightful and enlightening, *Literary Theory: An Introduction* remains the essential guide to the field. 25th Anniversary Edition of Terry Eagleton's classic introduction to literary theory First published in 1983, and revised in 1996 to include material on developments in feminist and cultural theory Has served as an inspiration to generations of students and teachers Continues to function as arguably the definitive undergraduate textbook on literary theory Reissue includes a new foreword by Eagleton himself, reflecting on the impact and enduring success of the book, and on developments in literary theory since it was first published

*Telling Children's Stories* Michael Cadden 2010 The most accessible approach yet to children's literature and narrative theory, *Telling Children's Stories* is a comprehensive collection of never-before-published essays by an international slate of scholars that offers a broad yet in-depth assessment of narrative strategies unique to children's literature. The volume is divided into four interrelated sections: "Genre Templates and Transformations," "Approaches to the Picture Book," "Narrators and Implied Readers," and "Narrative Time." Mike Cadden's introduction considers the links between the various essays and topics, as well as their connections with such issues as metafiction, narrative ethics, focalization, and plotting. Ranging in focus from picture books to novels such as *To Kill a Mockingbird*, from detective fiction for children to historical tales, from new works such as the Lemony Snicket series to classics like *Tom's Midnight Garden*, these essays explore notions of montage and metaphor, perspective and subjectivity, identification and time. Together, they comprise a resource that will interest and instruct scholars of narrative theory and children's literature, and that will become critically important to the understanding and development of both fields.

**Signs and Meaning in the Cinema** Peter Wollen 2019-07-25 First published in 1969, *Signs and Meaning in the Cinema* transformed the emerging discipline of film studies. Remarkably eclectic and informed, Peter Wollen's highly influential and groundbreaking work remains a brilliant and accessible theorisation of film as an art form and as a sign system. The book is divided into three main sections. The first explores the work of Sergei Eisenstein as filmmaker, designer and aesthetician. The second, which contains a celebrated comparison of the films of John Ford and Howard Hawks, is an exposition and defence of the auteur theory. The third formulates a semiology of the cinema, invoking cinema as an exemplary test-case for comparative aesthetics and general theories of signification. Wollen's Conclusion argues for an avant-garde cinema, bringing post-structuralist ideas into his discussion of Godard and other contemporaries. Published as part of the BFI Silver series, this fifth edition features a new foreword by film theorist David Rodowick and brings together material from the four previous editions, inviting the reader to trace the development of Wollen's thinking, and the unfolding of the discourse of cinema.

Critical Theory Today Lois Tyson 2012-09-10 *Critical Theory Today* is the essential introduction to contemporary critical theory. It provides clear, simple explanations and concrete examples of complex concepts, making a wide variety of commonly used critical theories accessible to novices without sacrificing any theoretical rigor or thoroughness. This new edition provides in-depth coverage of the most common approaches to literary analysis today: feminism, psychoanalysis, Marxism, reader-response theory, new criticism, structuralism and semiotics,

deconstruction, new historicism, cultural criticism, lesbian/gay/queer theory, African American criticism, and postcolonial criticism. The chapters provide an extended explanation of each theory, using examples from everyday life, popular culture, and literary texts; a list of specific questions critics who use that theory ask about literary texts; an interpretation of F. Scott Fitzgerald's *The Great Gatsby* through the lens of each theory; a list of questions for further practice to guide readers in applying each theory to different literary works; and a bibliography of primary and secondary works for further reading.

**A Philosophy of Cinematic Art** Berys Gaut 2010-01-14 *A Philosophy of Cinematic Art* is a systematic study of cinema as an art form, showing how the medium conditions fundamental features of cinematic artworks. It discusses the status of cinema as an art form, whether there is a language of film, realism in cinema, cinematic authorship, intentionalist and constructivist theories of interpretation, cinematic narration, the role of emotions in responses to films, the possibility of identification with characters, and the nature of the cinematic medium. Groundbreaking in its coverage of a wide range of contemporary cinematic media, it analyses not only traditional photographic films, but also digital cinema, and a variety of interactive cinematic works, including videogames. Written in a clear and accessible style, the book examines the work of leading film theorists and philosophers of film, and develops a powerful framework with which to think about cinema as an art.

**From Shakespeare to Obama** J. Hart 2013-12-17 *From Shakespeare to Obama* discusses language, slavery, and place from the Portuguese enslavement of African people, through slavery in Shakespeare's plays, to President Obama's 2012 speech on "modern slavery." Balancing close reading with context, this expansive book offers new insight into questions of otherness, rhetoric, and stereotyping.

**Pronouns in Literature** Alison Gibbons 2018-01-04 This edited collection brings together an international, interdisciplinary group of scholars who together offer cutting-edge insights into the complex roles, functions, and effects of pronouns in literary texts. The book engages with a range of text-types, including poetry, drama, and prose from different periods and regions, in English and in translation. Beginning with analyses of the first-person pronoun, it moves onto studies of the subject dynamics of first- and second-person, before considering plural modes of narration and how pronoun use can help to disperse narrative perspective. The volume then debates the functional constraints of pronouns in fictional contexts and finally reflects upon the theoretical advancements presented in the collection. This innovative volume will appeal to students and scholars of linguistics, stylistics and cognitive poetics, narratology, theoretical and applied linguistics, psychology and literary criticism.

**Literary Theory : An Introduction, Anniversary Ed.** Terry Eagleton 2008

Mathematics for Machine Learning Marc Peter Deisenroth 2020-04-23 The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

**A Reader's Guide to Contemporary Literary Theory** Raman Selden 1989 Unsurpassed as a text for upper-division and beginning graduate students, Raman Selden's classic text is the liveliest, most readable and most reliable guide to contemporary literary theory. Includes applications of theory, cross-referenced to Selden's companion volume, *Practicing Theory and Reading Literature*.

**Agency and Imagination in the Films of David Lynch** James D. Reid 2019-12-13 *Agency and Imagination in the Films of David Lynch: Philosophical Perspectives* offers a sustained philosophical interpretation of the filmmaker's work in light of classic and contemporary discussions of human agency and the complex relations between our capacity to act and our ability to imagine. With the help of the pathological characters that so often leave their unforgettable mark on Lynch's films, this book reveals several important ways in which human beings fail to achieve fuller embodiments of agency or seek substitute satisfactions in spaces of fantasy. In keeping with Lynch's penchant for unconventional narrative techniques, James D. Reid and Candace R. Craig explore the possibility, scope, and limits of the very idea of

agency itself and what it might be like to renounce concepts of agency altogether in the interpretation and depiction of human life. In a series of interlocking readings of eight feature-length films and *Twin Peaks: The Return* that combine suggestive philosophical analysis with close attention to cinematic detail, Reid and Craig make a convincing case for the importance of David Lynch's work in the philosophical examination of agency, the vagaries of the human imagination, and the relevance of film for the philosophy of human action. Scholars of film studies and philosophy will find this book particularly useful.

*A Theory of Adaptation* Linda Hutcheon 2012-08-21 *A Theory of Adaptation* explores the continuous development of creative adaptation, and argues that the practice of adapting is central to the story-telling imagination. Linda Hutcheon develops a theory of adaptation through a range of media, from film and opera, to video games, pop music and theme parks, analysing the breadth, scope and creative possibilities within each. This new edition is supplemented by a new preface from the author, discussing both new adaptive forms/platforms and recent critical developments in the study of adaptation. It also features an illuminating new epilogue from Siobhan O'Flynn, focusing on adaptation in the context of digital media. She considers the impact of transmedia practices and properties on the form and practice of adaptation, as well as studying the extension of game narrative across media platforms, fan-based adaptation (from Twitter and Facebook to home movies), and the adaptation of books to digital formats. *A Theory of Adaptation* is the ideal guide to this ever evolving field of study and is essential reading for anyone interested in adaptation in the context of literary and media studies.
