

# Nsfas Bursary Application Forms For 2014

This is likewise one of the factors by obtaining the soft documents of this **nsfas bursary application forms for 2014** by online. You might not require more mature to spend to go to the books launch as without difficulty as search for them. In some cases, you likewise realize not discover the publication nsfas bursary application forms for 2014 that you are looking for. It will entirely squander the time.

However below, similar to you visit this web page, it will be hence categorically simple to acquire as without difficulty as download lead nsfas bursary application forms for 2014

It will not give a positive response many epoch as we accustom before. You can accomplish it even if law something else at house and even in your workplace. consequently easy! So, are you question? Just exercise just what we provide under as competently as evaluation **nsfas bursary application forms for 2014** what you like to read!

**Professions and Professionalization: Volume 3, Sociological Studies** J. A. Jackson 1970 An exploration of professions and the characteristics of professionalism.

*Transformative Research and Evaluation* Donna M. Mertens 2008-10-29 From distinguished scholar Donna M. Mertens, this core book provides a framework for making methodological decisions and conducting research and evaluations that promote social justice. The transformative paradigm has emerged from - and guides - a broad range of social and behavioral science research projects with communities that have been pushed to the margins, such as ethnic, racial, and sexual minority group members and children and adults with disabilities. Mertens shows how to formulate research questions based on community needs, develop researcher-community partnerships grounded in trust and respect, and skillfully apply quantitative, qualitative, and mixed-methods data collection strategies. Practical aspects of analyzing and reporting results are addressed, and numerous sample studies are presented. An ideal core book for graduate courses, or practitioner resource, the book includes: Commentary on the sample studies that explains what makes them transformative. Explanations of key concepts related to oppression, social justice, and the role of research and evaluation. Questions for Thought to stimulate critical self-reflection and discussion. Advance chapter organizers and chapter summaries. The book is intended for graduate students in psychology, education, social work, sociology, and nursing, as well as practicing researchers and program evaluators. It will serve as a core book or supplement in Research Methods, Program Evaluation, and Community Psychology courses.

Special Needs Education South Africa. Department of Education 2001

**Change Management in TVET Colleges** Kraak, Andre 2016-07-25 The Technical and Vocational Education and Training (TVET) college environment is marked by increasingly stark juxtapositions between what needs to be achieved in the post-school education sector and the increasing difficulty of current conditions. The 'triple challenge' of poverty, inequality and unemployment weighs heavily on the social, political and economic fabric of the country and expectations are high that the TVET colleges can make a pivotal contribution to counter these challenges. Despite laudable increases in TVET enrolment, the education system needs to work harder to accommodate the weight of demand for post school further education and training (FET) band qualifications from young people not in education,

employment or training. At the same time, it is vital to secure adequate quality in TVET programmes which depend so much on the competence and commitment of college lecturers. This collection offers a set of research papers that provide new analytic and empirical material on: • The political economy of TVET types in different countries which, by comparison, illuminate the South African case; • A periodisation of government interventions in the TVET sector over the last three decades; • The unsettled state and status of TVET lecturers in relation to their job requirements and conditions of service; • The halting evolution of collegial relationships between college lecturers towards higher collegiality; • Employer expectations of college graduates and how colleges are responding; and • An analysis of the outcomes of a college improvement intervention in Limpopo and the Eastern Cape. This book will offer valuable information and insights for decision-makers as well as analysts of institutional change concerning links between education and economic growth, with particular regard to TVET graduates' employment rates.

**Student Retention & Graduate Destination** Moeketsi Letseka 2010 Student attrition has been a perennial theme in South African higher education throughout the decade. In its National Plan for Higher Education (2001), the Department of Education attributed high dropout rates primarily to financial and/or academic exclusions. Four years later, it reported that 30% of students dropped out in their first year of study and a further 20% during their second and third years. Against this backdrop, the erstwhile research programme on Human Resources Development initiated a research project to investigate more thoroughly why students dropped out, what led them to persist in higher education to graduation, and what made for a successful transition to the labour market. The chapters in this volume address these issues in relation to one or more of seven institutional case studies conducted in 2005.

**Higher Education Financing in East and Southern Africa** P. N. Pillay 2010 This nine-country study of higher education financing in Africa includes three East African states (Kenya, Tanzania and Uganda), five countries in southern Africa (Botswana, Lesotho, Mozambique, Namibia and South Africa), and an Indian Ocean island state (Mauritius). Higher Education Financing in East and Southern Africa explores trends in financing policies, paying particular attention to the nature and extent of public sector funding of higher education, the growth of private financing (including both household financing and the growth of private higher education institutions) and the changing mix of financing instruments that these countries are developing in response to public sector financial constraints. 'This unique collection of African-country case studies draws attention to the remaining challenges around the financing of higher education in Africa, but also identifies good practices, lessons and common themes.

**Responding to the Educational Needs of Post-school Youth** Nico Cloete 2009 The research reflected in this volume indicates that in South Africa there are almost three million youth between the ages of 18 and 24 who are not in education, training or employment—a situation which points not only to a grave wastage of talent, but also to the possibility of serious social disruption. The authors in this work paint a picture of the enormous reservoir of human talent which exists in the country, but is not provided with the means to develop. Responding to the Educational Needs of Post-School Youth attempts not only to sketch the scope and extent of the current post-school educational crisis, but also to explore possible solutions through collaboration in the higher education sector. The findings reported here are a result of three distinctive but linked research components conducted by the Further Education and Training Institute (University of Western Cape), the Centre for Higher Education Transformation, and the Southern Africa Labour and Development Research Unit (University of Cape Town). The research was funded by the Ford Foundation and the project conducted in consultation with the Department of Education.

**New South African Review 6** Devan Pillay 2018-01-29 Wide-ranging essays demonstrate how the consequences of inequality extend throughout society and the political economy. Despite the transition from apartheid to democracy, South Africa is the most unequal country in the world. Its extremes of wealth and poverty undermine intensifying struggles for a better life for all. The wide-ranging essays in this sixth volume of the *New South African Review* demonstrate how the consequences of inequality extend throughout society and the political economy, crippling the quest for social justice, polarising the politics, skewing economic outcomes and bringing devastating environmental consequences in their wake. Contributors survey the extent and consequences of inequality across fields as diverse as education, disability, agrarian reform, nuclear geography and small towns, and tackle some of the most difficult social, political and economic issues. How has the quest for greater equality affected progressive political discourse? How has inequality reproduced itself, despite best intentions in social policy, to the detriment of the poor and the historically disadvantaged? How have shifts in mining and the financialisation of the economy reshaped the contours of inequality? How does inequality reach into the daily social life of South Africans, and shape the way in which they interact? How does the extent and shape of inequality in South Africa compare with that of other major countries of the global South which themselves are notorious for their extremes of wealth and poverty? South African extremes of inequality reflect increasing inequality globally, and *The Crisis of Inequality* will speak to all those general readers, policy makers, researchers and students who are demanding a more equal world.

*Your Guide to Case Study Research* Peter Rule 2011

**Staying the course** Great Britain: National Audit Office 2007-07-26 This report finds that, when compared internationally, England achieves a high rate of student retention. However the variation between retention rates of different institutions and the worsening of some institution's continuation rates shows that there is scope for further improvement. This will be increasingly important as access to further education is broadened, bringing in students who are likely to need more support. Amongst the recommendations are: the monitoring of retention at student, faculty and course level; the use of early-leaver surveys when problems are identified; more positive student support that emphasises ways to improve grades; identification of students eligible for Disabled Students' Allowances; the adoption of good practice from other institutions.

**Reflections of South African Student Leaders: 1994 to 2017** Ntokozo Bhengu 2020-05-13 *Reflections of South African Student Leaders 1994-2017* brings together the reflections of twelve former SRC leaders from across the landscape of South African universities. Reviews of the previous volume, 1981-2014 suggested that it contributed significantly to a better understanding of the stringent demands of visionary and transformative leadership required by university leaders in the fastchanging and increasingly complex public higher education sector. This volume is based on comprehensive interviews with former student leaders, each of whom provided a personal account in their own words of their experience in the position of student leadership. The interviewees are from different backgrounds and of diverse political persuasions. The book is important for current and future leaders of higher education institutions as it provides insights into the thinking, aspirations, desires, fears and modus operandi of student leaders. Such insight can contribute to developing and implementing appropriate strategies for achieving meaningful and constructive engagement with current and future student leaders.

**Twenty Years of Education Transformation in Gauteng 1994 to 2014** Felix Maringe 2015-05-05 *Twenty Years of Education Transformation in Gauteng 1994 to 2014: An Independent Review* presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of

Downloaded from [avenza-dev.avenza.com](https://avenza-dev.avenza.com)  
on September 27, 2022 by guest

democracy in 1994. These essays talk to what a provincial education department does and how and why it does these things whether it be about policy, resourcing or implementing projects. Each essay is written by one or more specialist in the relevant focus area. The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader. It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years, both nationally and provincially. There has been no attempt to fit the books chapters into a particular ideological or educational paradigm, and as a result the reader will find differing views on various aspects of the Gauteng Department of Educations present and past. We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years.

Living in the Balance of Grace and Faith Andrew Wommack 2011-06-24 Popular Bible teacher and host of the Gospel Truth broadcast, Andrew Wommack takes on one of the biggest controversies of the church, the freedom of God's grace verses the faith of the believer. Wommack reveals that God's power is not released from only grace or only faith. God's blessings come through a balance of both grace and faith. Addressing many of the misconceptions believers are taught in the Church today, this book opens up the Scriptures revealing the vital connection between grace and faith. Many believers think they walk in both grace and faith when actually they are misusing one or both of these principles. Wommack addresses: \* Some believers willingly sin believing Gods grace will cover them, while the blessing of grace is not to sin, but to release guilt and condemnation when they make a mistake. \* Other believers think they must "work" their faith by ritualistic prayer, confession, or Bible study. Although all these things are good, Jesus Christ set believers free from works of the law. God wants a relationship where He can communicate directly to each believer. \* Grace and faith work together. When believers receive the unmerited favor or grace of God, they can release their faith without doubt or reservation and receive God's blessings. Andrew Wommack in his logical, practical style brings believers back on track in their Christian walk through living in the balance of grace and faith.

Student Politics in Africa Luescher, Thierry M. 2016-05-12 The second volume of the African Higher Education Dynamics Series brings together the research of an international network of higher education scholars with interest in higher education and student politics in Africa. Most authors are early career academics who teach and conduct research in universities across the continent, and who came together for a research project and related workshops and a symposium on student representation in African higher education governance. The book includes theoretical chapters on student organising, student activism and representation; chapters on historical and current developments in student politics in Anglophone and Francophone Africa; and in-depth case studies on student representation and activism in a cross-section of universities and countries. The book provides a unique resource for academics, university leaders and student affairs professionals as well as student leaders and policy-makers in Africa and elsewhere.

Mergers and Alliances in Higher Education Adrian Curaj 2015-03-31 This volume casts light on mergers and alliances in higher education by examining developments of this type in different countries. It combines the direct experiences of those at the heart of such transformations, university leaders and senior officials responsible for higher education policy, with expert analysts of the systems concerned. Higher education in Europe faces a series of major challenges. The economic crisis has accelerated expectations of an increased role in addressing economic and societal challenges while at the same time putting pressure on available finances. Broader trends such as shifting student demographics and expectations, globalisation and mobility and new ways of working with business have contributed to these increased pressures. In the light of these trends there have been moves, both from national or

regional agencies and from individual institutions to respond by combining resources, either through collaborative arrangements or more fundamentally through mergers between two or more universities. After an introductory chapter by the editors which establishes the context for mergers and alliances, the book falls into two main parts. Part 1 takes a national or regional perspective to give some sense of the historical context, the wider drivers and the importance of these developments in these cases. Included are both systemic accounts (for countries as France, Sweden, Romania, Russia, Wales and England), and specific cross-cutting initiatives including a major facility at Magurele in Romania and a Spanish programme for promoting international campuses of excellence. Part 2 is built from specific cases of universities, either in mergers or alliances, with examples from different countries (such as France, UK, Romania, Spain, Germany, Denmark, Finland, Switzerland). A concluding chapter by the editors assesses these experiences and indicates the implications and future needs for understanding in this domain.

*Nursing Students with Disabilities* Donna Carol Maheady 2003-01-01 A powerful collection of stories recounting the challenges faced and determination employed by nursing students with disabilities at different stages of their careers. In addition to being inspirational and motivational, this book is also an important educational tool for teachers, professors, and students in nursing programs, as well as practicing nurses.

*Higher Education Pathways* Ashwin, Paul 2018-12-14 In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

**Parental Involvement in Higher Education** Katherine Lynk Wartman 2008-05-02 Helicopter parents have become a recent phenomenon in higher education. Who are these parents and why have they landed on our college campuses? This monograph examines parental involvement in higher education by looking at the history of the relationship between students and institutions and institutional responses to this phenomenon. It explores alternative theoretical frameworks that highlight the benefits of strong parental relationships for today's college students, paying particular attention to the variables of gender, race, and socioeconomic class and how they inform the student-parent relationship. This text concludes with implications for practice and suggestions for policy so that all parents are included in our institutional efforts, not just the ones making all the noise. -- Back cover.

Disability and Social Change Brian Watermeyer 2006 This powerful volume represents the broadest engagement with disability issues in South Africa yet. Themes include theoretical approaches to, and representations of, disability; governmental and civil society responses to disability issues; aspects of education as these pertain to the oppression/liberation of disabled people; social security for disabled people; the complex politics permeating service provision relationships; and a consideration of disability in relation to human spaces - physical, economic and philosophical. Firmly located within the social

model of disability, this collection resonates powerfully with contemporary thinking and research in the disability field and sets a new benchmark for cutting-edge debates in a transforming South Africa.

**Getting Skills Right: South Africa** OECD 2017-07-10 This report identifies effective strategies to tackle skills imbalances in South Africa.

*Socio-Economic Perspectives on Vocational Skill Development: Emerging Research and Opportunities* Okolie, Ugochukwu Chinonso 2019-11-15 Vocational skill development (VSD) has the capacity to contribute to poverty reduction because it serves as the key to job creation and inclusive growth. As developed nations have been faced with high youth and graduate unemployment rates, basic education and vocational skill development have become a priority of development cooperation activities. However, there is a realization that measures to improve skill training can only be successful if they are in harmony with employment and economic policies. *Socio-Economic Perspectives on Vocational Skill Development: Emerging Research and Opportunities* is a collection of innovative research on the methods and applications of equipping individuals with relevant work skills and implementing effective skills systems that can lead to economic growth and high levels of productivity. While highlighting topics including human capital, professional development, and skill gaps, this book is ideally designed for managers, business professionals, policymakers, academicians, researchers, and management students seeking the current understanding of the strategic role of skill development at different levels of the socio-economic system.

**Perspectives on Student Affairs in South Africa** McGlory Speckman 2014-07-17 The goal of *Perspectives on Student Affairs in South Africa* is to generate interest in student affairs in South Africa. The papers contained herein are based on best practice, local experience and well-researched international and local theories. The papers in this book deal with matters pertaining to international and national trends in student affairs: academic development, access and retention, counselling, and material support for students coming from disadvantaged backgrounds. They are linked to national and international developments, as described in the first two papers. This publication will assist both young and experienced practitioners as they grow into their task of developing the students entrusted to them. All contributors are South Africans with a great deal of experience in student affairs, and all are committed to the advancement of student affairs in South Africa. The editors are former heads of student affairs portfolios at two leading South African universities.

**Financing Higher Education in Africa** World Bank 2010-04-21 The training and development of human capital in Sub-Saharan Africa (SSA) will help countries in the region diversify their economies, carry out economic transformation, and support sustainable growth. Higher education plays a key role in training qualified individuals who will be able to implement new technologies and use innovative methods to establish cost-efficient and effective enterprises and institutions. However, in order for SSA to reap the benefits of this investment in human capital, higher education institutions must secure financing to provide quality training and sound professional prospects to their students. Currently, tertiary education development is unsustainable resources per student are declining and the quality of education is affected. These issues are particularly pressing in times of financial global crisis, when available resources for tertiary education tend to diminish. The impact of the crisis that started in 2008 provides a clear illustration of the need to explore innovative ways to diversify and secure financing for higher education in SSA. 'Financing Higher Education in Africa' provides a comprehensive overview of higher education financing in SSA. The book begins with an explanation of the fundamental problems faced by higher education institutions and students in SSA, namely the combined pressure of a rapid growth in demand and a growing scarcity of public resources, and it presents the dramatic

consequences of these trends on quality. The book then turns to analyzing and comparing the current funding policies in SSA countries and it provides recommendations for improvement. Finally, the book examines the alternatives to the status quo and the policy tools needed to both diversify resources and allocate them based on performance. It will be of great interest to governments, universities, research institutions, and international organizations throughout the region.

Media Piracy in Emerging Economies Joe Karaganis 2011

**Shadow Libraries** Joe Karaganis 2018-05-04 How students get the materials they need as opportunities for higher education expand but funding shrinks. From the top down, *Shadow Libraries* explores the institutions that shape the provision of educational materials, from the formal sector of universities and publishers to the broadly informal ones organized by faculty, copy shops, student unions, and students themselves. It looks at the history of policy battles over access to education in the post-World War II era and at the narrower versions that have played out in relation to research and textbooks, from library policies to book subsidies to, more recently, the several “open” publication models that have emerged in the higher education sector. From the bottom up, *Shadow Libraries* explores how, simply, students get the materials they need. It maps the ubiquitous practice of photocopying and what are—in many cases—the more marginal ones of buying books, visiting libraries, and downloading from unauthorized sources. It looks at the informal networks that emerge in many contexts to share materials, from face-to-face student networks to Facebook groups, and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online—the shadow libraries of the title. If Alexandra Elbakyan's Sci-Hub is the largest of these efforts to date, the more characteristic part of her story is the prologue: the personal struggle to participate in global scientific and educational communities, and the recourse to a wide array of ad hoc strategies and networks when formal, authorized means are lacking. If Elbakyan's story has struck a chord, it is in part because it brings this contradiction in the academic project into sharp relief—universalist in principle and unequal in practice. *Shadow Libraries* is a study of that tension in the digital era. Contributors Balázs Bodó, Laura Czerniewicz, Mirosław Filiciak, Mariana Fossatti, Jorge Gemetto, Eve Gray, Evelin Heidel, Joe Karaganis, Lawrence Liang, Pedro Mizukami, Jhessica Reia, Alek Tarkowski

**Planning, Implementing, and Assessing Micro-credentialing for Higher Education Institutions**

Julie Ann Steuber 2020 "This book explores the current research and practices of micro-credentials in higher education institutions"--

**Faculty Perspectives on Vocational Training in South Africa** Eunice N. Ivala 2019-03-06 The Cape Peninsula University of Technology (CPUT) is one of four Universities of Technology established by the South African government in 2005 with a focus on vocational training. This book presents faculty experiences of CPUT's innovative, work-integrated learning and teaching model, as well as findings from practice-based research being done in the institution. The purpose of this volume is to be a resource for other institutions in South Africa that wish to try similar strategies, as well as a to trigger a community of practice with vocationally oriented institutions outside of South Africa.

Scholars in the Marketplace. The Dilemmas of Neo-Liberal Reform at Makerere University, 1989-2005 Mahmood Mamdani 2007-09-15 *Scholars in the Marketplace* is a case study of market-based reforms at Uganda's Makerere University. With the World Bank heralding neoliberal reform at Makerere as the model for the transformation of higher education in Africa, it has implications for the whole continent. At the global level, the Makerere case exemplifies the fate of public universities in a market-oriented

Downloaded from [avenza-dev.avenza.com](https://avenza-dev.avenza.com)  
on September 27, 2022 by guest

and capital friendly era. The Makerere reform began in the 1990s and was based on the premise that higher education is more of a private than a public good. Instead of pitting the public against the private, and the state against the market, this book shifts the terms of the debate toward a third alternative than explores different relations between the two. The book distinguishes between privatisation and commercialisation, two processes that drove the Makerere reform. It argues that whereas privatisation (the entry of privately sponsored students) is compatible with a public university where priorities are publicly set, commercialisation (financial and administrative autonomy for each faculty to design a market-responsive curriculum) inevitably leads to a market determination of priorities in a public university. The book warns against commercialisation of public universities as the subversion of public institutions for private purposes.

**South Africa Can Work** Frans Rautenbach 2017-08-18 What will it take to turn South Africa around? In this insightful and provocative book, Frans Rautenbach proposes a complete overhaul of policy thinking, and provides fresh arguments that effectively address South Africa's unemployment, race problems and lack of education. Rautenbach examines the fundamental problem of rent-seeking, to which he proposes two antidotes: the free market and decentralisation of government. Along the way he tackles holy cows such as affirmative action, trade unions, labour law and welfare payments. He also addresses contentious topics such as racism, white privilege, political correctness, state funding of higher education and mounting evidence that trade unions substantially suppress employment growth. Written by a labour lawyer with a proven track record in a range of policy issues, *South Africa Can Work* speaks effectively to a cross-section of readers of all disciplines, and brings sorely needed good news.

**Comparative and International Education** C. C. Wolhuter 2019-08-26 This book explores the evolution and current state of the scholarly field of comparative and international education over 200 years of development. Experts in the field explore comparative and international education in each of the major world regions.

**Golf Business and Management** Tim Breitbarth 2017-07-20 Golf is big business around the world. With high profile series such as the PGA, LPGA and European tours to the re-introduction of golf to the Olympics at Rio 2016, golf occupies a prominent place in the global sport community. This is the first book to introduce the fundamentals of golf business and management from a truly international perspective, covering key topics such as media, club management, sponsorship and retail, at elite and non-elite levels. With sections exploring the development of golf on every continent, including North America, South America, Europe, the Middle East, Africa and Asia, this book presents the latest thinking on current issues in golf, ranging from sustainability and innovation to global governance. Each chapter incorporates helpful features for students including learning objectives, discussion questions, guides to further reading, recommended websites and insights from industry voices. This book is essential reading for students of any golf-related degree course or professional accreditation programme, and will also be of interest to those studying or working in sport business, sport management and sport tourism. Underpinned by up-to-date literature, golf researchers will also find the book a useful starting point.

**Race for Education** Mark Hunter 2019-01-31 An examination of families and schools in South Africa, revealing how the marketisation of schooling works to uphold the privilege of whiteness.

**Vocational Education and Training in Times of Economic Crisis** Matthias Pilz 2016-12-20 This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training (VET). Revealing how youth in transition is affected by

economic crises, it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe, (e.g. Spain, Germany or the UK) to Asia (such as China, Thailand and India). Though each country examined in this volume is affected by the economic crisis in a different way, the effects are especially apparent for the young generation. In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best. The contributions in this volume demonstrate that VET alone cannot solve these problems, but can be used to support a smooth transition from school to work. If the quality of VET is high and the status and job expectations are good, VET can help to fill the skills gap, especially at the intermediate skill level. Furthermore, VET can also offer a realistic alternative to the university track for young people in many countries.

**Low-Income Students, Human Development and Higher Education in South Africa** Melanie Walker 2022-07-15 This book explores learning outcomes for low-income rural and township youth at five South African universities. The book is framed as a contribution to southern and Africa-centred scholarship, adapting Amartya Sen's capability approach and a framework of key concepts: capabilities, functionings, context, conversion factors, poverty and agency to investigate opportunities and obstacles to achieved student outcomes. This approach allows a reimagining of 'inclusive learning outcomes' to encompass the multi-dimensional value of a university education and a plurality of valued cognitive and non-cognitive outcomes for students from low-income backgrounds whose experiences are strongly shaped by hardship. Based on capability theorising and student voices, the book proposes for policy and practice a set of contextual higher education capability domains and corresponding functionings orientated to more justice and more equality for each person to have the opportunities to be and to do what they have reason to value. The book concludes that sufficient material resources are necessary to get into university and flourish while there; the benefits of a university education should be rich and multi-dimensional so that they can result in functionings in all areas of life as well as work and future study; the inequalities and exclusion of the labour market and pathways to further study must be addressed by wider economic and social policies for 'inclusive learning outcomes' to be meaningful; and that universities ought to be doing more to enable black working-class students to participate and succeed. *Low-Income Students, Human Development and Higher Education in South Africa* makes an original contribution to capability scholarship: conceptually in theorising a South-based multi-dimensional student well-being higher education matrix and a rich reconceptualisation of learning outcomes, as well as empirically by conducting rigorous, longitudinal in-depth mixed-methods research on students' lives and experiences in higher education in South Africa. The audience for the book includes higher education researchers, international capability scholars, practitioners and policy-makers.

**African Universities in the Twenty-first Century: Knowledge and society** Paul Tiyambe Zeleza 2004 As the twenty-first century unfolds, African universities, and indeed universities everywhere, are undergoing unprecedented change and confronting multiple challenges brought about by the vast and complex processes of globalisation and technological change. Powerful internal and external forces - political, pecuniary and paradigmatic - are reconfiguring all aspects of university life constituted around the triple mission of teaching, research and service. The need for redefining the role and defending the importance of universities has never been greater. How are African universities trying to balance the demands of autonomy and accountability, expansion and excellence, equity and efficiency, diversification and differentiation, internationalisation and indigenisation in the face of liberalisation and privatisation, and as they address the new challenges of knowledge production and dissemination, of Africanising global scholarship and globalising African scholarship? What innovative approaches can they adopt to facilitate the sustainable development of African economies, societies and polities? The

two volumes in the Codesria Book Series address these issues. They articulate new values and missions for African universities, and define effective strategies to meet the challenges. Written by some of Africa's leading educators, Volume I examines the implications of the neo-liberal reforms and the new information technologies on African higher education, while Volume II interrogates the changing social dynamics of knowledge production, university organisation, and public service and engagement.

**Homeschooling High School** Shirley Erwee 2014-08-28 Prospective homeschoolers are parents looking for an alternative to the mainstream educational system for their offspring. But homeschooling children at high school level strikes fear into even the most dedicated of homeschoolers. They need information and answers to their questions. And with the current educational and unemployment problems in South Africa, young people need clear direction and guidance to help them achieve their goals. In addition to exploring the popular ways to gaining a recognised matric certificate outside the formal school system, Homeschooling High School also challenges readers to rethink their values, particularly the value they place on certification, and to consider some unconventional or alternative paths to success. In a clearly presented format, the book includes advice on legal matters, identifying appropriate courses, sourcing study material, tips on entrepreneurship, financing tertiary studies and the testimonies of successful homeschooled graduates. Homeschooling High School is a comprehensive guide to plotting a path through high school and beyond.

*#Feesmustfall and Youth Mobilisation in South Africa* Musawenkosi W Ndlovu 2017-07-04 This book examines the historical FeesMustFall (FMF) university student protests that took place in South Africa and shows how the enduring historical construction, representation and conceptualisation of South African youth (as typically radical and political) contributed to the (mis)interpretation of FMF protests, and led to a discourse on an African National Congress-toppling revolution. Arguing that the student protests were not the revolutionary movement they have been represented as, Ndlovu demonstrates that ideological divisions amongst the protestors, the declining economy, and reduced youth participation in the political public sphere cannot lead to a new revolution in South African politics. This book will be of interest to students and scholars interested in South African politics, higher education, democracy and protest movements.

Skills Beyond School Oecd 2014 Higher level vocational education and training (VET) programmes are facing rapid change and intensifying challenges. What type of training is needed to meet the needs of changing economies? How should the programmes be funded? How should they be linked to academic and university programmes? How can employers and unions be engaged? This report synthesises the findings of the series of country reports done on skills beyond school. Chapters cover the following areas: Chapter 1. The hidden world of professional education and training; Chapter 2. Enhancing the profile of professional education and training; Chapter 3. Three key elements of high-quality post-secondary programmes; Chapter 4. Transparency in learning outcomes; Chapter 5. Clearer pathways for learners; Chapter 6. Key characteristics of effective vocational systems

**Using Evidence in Policy and Practice** Ian Goldman 2020-06-10 This book asks how governments in Africa can use evidence to improve their policies and programmes, and ultimately, to achieve positive change for their citizens. Looking at different evidence sources across a range of contexts, the book brings policy makers and researchers together to uncover what does and doesn't work and why. Case studies are drawn from five countries and the ECOWAS (west African) region, and a range of sectors from education, wildlife, sanitation, through to government procurement processes. The book is supported by a range of policy briefs and videos intended to be both practical and critically rigorous. It uses evidence sources such as evaluations, research synthesis and citizen engagement to show how

these cases succeeded in informing policy and practice. The voices of policy makers are key to the book, ensuring that the examples deployed are useful to practitioners and researchers alike. This innovative book will be perfect for policy makers, practitioners in government and civil society, and researchers and academics with an interest in how evidence can be used to support policy making in Africa. **Global Education Digest 2009** Scientific United Nations Educational 2009 This 2009 edition presents a wide range of educational indicators to assess progress towards Education for All Millennium Development Goals. These cross-nationally comparable indicators also provide benchmarks for the performance of national education systems. The special of this 2009 global education digest is the analysis of emerging global trends in tertiary education, highlighting the rapid growth of tertiary education systems since 1970, changing patterns in tertiary education graduates by field of study, and in particular, the changing landscape of international student mobility.
