In Praise of Commercial Culture Tyler COWEN 2009-06-30 Does a market economy encourage or discourage music, literature, and the visual arts? Do economic forces of supply and demand help or harm the pursuit of creativity? providing a steady stream of new and satisfying creations, supporting both high and low culture, helping consumers and artists refine their tastes, and paying homage to the past by capturing, reproducing, and disseminating it. Contemporary culture, Cowen argues, is flourishing in its various manifestations, including the visual arts, literature, music, architecture, and the cinema. Successful high culture usually comes out of a healthy and prosperous popular culture. Shakespeare and Mozart were highly popular in their own time. Beethoven's later, less accessible music was made possible in part by his early popularity. Today, consumer demand ensures that archival blues recordings, a wide array of past and current symphonies, and this week's Top 40 hit sit side by side in the music megastore. High and low culture indeed complement each other. Cowen's philosophy of cultural optimism stands in opposition to the many varieties of cultural pessimism found among conservatives, neo-conservatives, the Frankfurt School, and some versions of the political correctness and multiculturalist movements, as well as historical figures, including Rousseau and Plato. He shows that even when contemporary culture is thriving, it appears degenerate, as evidenced by the widespread acceptance of pessimism. He ends by considering the reasons why cultural pessimism has such a powerful hold on intellectuals and opinion-makers.

Managing Electronic Media Joan Van Tassel 2012-09-10 This college-level media management textbook reflects the changes in the media industries that have occurred in the past decade. Today's managers must address new issues that their predecessors never faced, from the threats of professional piracy and casual copying of digital media products, to global networks, on-demand consumption, and changing business models. The book explains the new new vocabulary of media moguls, such as bandwidth, digital rights management, customer relations management, distributed work groups, centralized broadcast operations, automated playlists, server-based playout, repurposing, mobisodes, TV-to-DVD, and content management. The chapters logically unfold the ways that managers are evolving their practices to make content, market it, and deliver it to consumers in a competitive, global digital marketplace. In addition to media companies, this book covers management processes that extend to all content-producing organizations, because today's students are as likely to produce high-quality video and Web video for ABC Computer Sales as they are for the ABC Entertainment Television Network.
