*From Novice to Expert* Patricia Benner 2001 This coherent presentation of clinical judgement, caring practices and collaborative practice provides ideas and images that readers can draw upon in their interactions with others and in their interpretation of what nurses do. It includes many clear, colorful examples and describes the five stages of skill acquisition, the nature of clinical judgement and experiential learning and the seven major domains of nursing practice. The narrative method captures content and contextual issues that are often missed by formal models of nursing knowledge. The book uncovers the knowledge embedded in clinical nursing practice and provides the Dreyfus model of skill acquisition applied to nursing, an interpretive approach to identifying and describing clinical knowledge, nursing functions, effective management, research and clinical practice, career development and education, plus practical applications. For nurses and healthcare professionals.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

**The Scavengers** Gen Griffin 2015-09-22 It has been 28 years, 14 weeks and 9 days since a virus turned more than half of the world's human population into zombies. More than 95 percent of the population died within 6 months of the initial infection. Those who survived holed up wherever they could find safety. My parents found safety in the Cube, a building that was originally built as a prison for violent criminals. Mom and Dad always told me the sacrifices we made to live in the Cube were worth it because we were safe. Its been 13 days, 12 hours and 42 minutes since my parents disappeared without a trace from our apartment inside the Cube. I'm going to leave the Cube for the first time today. Maybe I'll find my parents. Maybe, I'll be eaten by the zombies.

**Nursing Student Retention** Marianne R. Jeffreys, EdD, RN 2012-03-27 This is the only book to offer an evidence-based model for retaining students and ensuring success across the nursing education spectrum. It is designed to assist faculty in creating, implementing, and evaluating student retention and academic success strategies. This model, Nursing Undergraduate Retention and Success (NURS), can be used effectively with all kinds of nursing programs, both traditional and nontraditional, including diploma, ADN, RN-BS, and accelerated BS. The book features the Nursing Student Retention Toolkit, an easy-to-use digital toolkit for assessment and planning that is thoroughly cross-referenced and integrated into the text. Together, these complementary resources offer a wide selection of educational

activities and support strategies for diverse learners and settings. The text provides guidelines for maximizing educational strengths, identifying and assessing at-risk students, facilitating student retention, and revitalizing teaching methods. It examines the multidimensional factors that must be considered, including cultural values and beliefs, and describes proven strategies for promoting retention and academic success such as faculty advisement, promoting professional events and membership, peer partnerships, and enrichment programs. *Nursing Student Retention*, with its breadth of information and one-of-a-kind digital toolkit, will be of great value to nurse educators, administrators, and graduate students. This new edition features: An easy-to-use format that includes the *Nursing Student Retention Toolkit*, a digital adjunct containing assessment tools, and templates for designing, implementing, and evaluating retention strategies. Chapters updated to provide a wealth of new information and evidence-based strategies. Real-life scenarios featuring diverse learners and settings. Vignettes to synthesize and demonstrate application of learning.

*How to Get Families More Involved in the Nursing Home* Tammy La Brake 2014-04-23 Health care providers and social workers at nursing homes may feel they have little time to design programs for the family members of their residents, yet you will learn in *How to Get Families More Involved in the Nursing Home* that the benefits of such programs are immense and the time investment will pay off. You learn of four family programs that can be put into use immediately or can be changed or expanded to fit the needs of an individual setting. In addition, you will witness how educational workshops, support groups, family councils, and holiday socials increase family involvement in the nursing home, which in turn improves the quality of care and life that long-term residents experience. In the daily bustle of trying to meet the needs of all residents, staff members do not generally have time to devote to family members who often feel awkward during their visits and do not realize their help would be welcomed. Nursing home coordinators and social workers can use the model support groups and workshops this book provides to open the lines of communication between staff and families and enable them to work together to assess and meet residents' needs. Implementation of these programs encourages families to take an active role in the operation of the nursing home and to participate in the decisions and events that affect the residents' lives. *How to Get Families More Involved in the Nursing Home* provides easy, step-by-step procedures for the installation of family programs without overtaxing social workers and directors already under pressure. In addition to the four model programs developed and presented by author Tammy LaBrake, a Public Health Social Work Consultant, this book examines research findings on the lack of family participation in nursing homes despite the offering of family programs. You learn how to overcome barriers to communication and collaboration between staff members and family members and capitalize on the amount of participation that does exist within a nursing home. You also learn how to convey to families that they are equally responsible for the well-being of their resident and that their input and assistance are necessary to correct problems that cannot be remedied by staff members alone. Finally, *How to Get Families More Involved in the Nursing Home* demonstrates that workshops, social gatherings, and councils do contribute to the formation of a community where family members and staffers find the mutual support necessary to provide excellent health care and soften the institutional atmosphere.

**The Most Dangerous Game by Richard Connell or The Hounds of Zaroff | Alltime Bestseller Book From the Author of Books Like: The Sin of Monsieur Pettipon, and Other Humorous Tales / El malvado Zaroff / Delitto in mare / What Ho!** Richard Connell 2021-01-01 From the Author of Books Like: 1. From Observables to Unobservables in Science and Philosophy 8. The Mad Lover About the Book: The Most Dangerous Game, also published as The Hounds of Zaroff, is a short story by Richard Connell first published in Collier's magazine on January 19, 1924. It features a big-game hunter from New York who falls off a yacht and swims to an isolated island in the Caribbean where he is hunted by a Cossack aristocrat. The story is an adaptation of the big-game hunting safaris in Africa and South America that were fashionable among wealthy Americans in the 1920s. Big-game hunter Sanger Rainsford and his friend, Whitney, are traveling to the Amazon rainforest for a jaguar hunt. After a discussion about how they are "the hunters" instead of "the hunted," Whitney goes to bed and Rainsford hears gunshots. He climbs onto the yacht's rail and accidentally falls overboard, swimming to Ship-Trap Island, which is notorious for shipwrecks. On the island, he finds a palatial chateau inhabited by two Cossacks: the owner, General Zaroff, and his gigantic deaf-mute servant, Ivan. Zaroff, another big-game hunter, knows of Rainsford from his published account of hunting snow leopards in Tibet. Over dinner, the middle-aged Zaroff explains that although he has been hunting animals since he was a boy, he has decided that killing big-game has become boring for him, so after escaping the Russian Revolution he moved to Ship-Trap Island and set it up to trick ships into wrecking themselves on the jagged rocks that surround it. He takes the survivors captive and hunts them for sport, giving them food, clothing, a knife, and a three-hour head start, and using only a small-caliber pistol for himself. Any captives who can elude Zaroff, Ivan, and a pack of hunting dogs for three days are set free. He reveals that he has won every hunt to date. Captives are offered a choice between being hunted or turned over to Ivan, who once served as official knouter for The Great White Czar. Rainsford denounces the hunt as barbarism, but Zaroff replies by claiming that "life is for the strong." Realizing he has no way out, Rainsford reluctantly agrees to be hunted. During his head start, Rainsford lays an intricate trail in the forest and then climbs

a tree. Zaroff finds him easily, but decides to play with him as a cat would with a mouse, standing underneath the tree Rainsford is hiding in, smoking a cigarette, and then abruptly departing. After the failed attempt at eluding Zaroff, Rainsford builds a Malay man-catcher, a weighted log attached to a trigger. This contraption injures Zaroff's shoulder, causing him to return home for the night, but he shouts his respect for the trap before departing. The next day Rainsford creates a Burmese tiger pit, which kills one of Zaroff's hounds. He sacrifices his knife and ties it to a sapling to make another trap, which kills Ivan when he stumbles into it. To escape Zaroff and his approaching hounds, Rainsford dives off a cliff into the sea; Zaroff, disappointed at Rainsford's apparent suicide, returns home. Zaroff smokes a pipe by his fireplace, but two issues keep him from the peace of mind: the difficulty of replacing Ivan and the uncertainty of whether Rainsford perished in his dive. About the Author : Richard Edward Connell, Jr. was an American author and journalist, best known for his short story "The Most Dangerous Game." Connell was one of the best-known American short story writers of his time and his stories appeared in the Saturday Evening Post and Collier's Weekly. Connell had equal success as a journalist and screenwriter. He was nominated for an Academy Award in 1942 for best original story for the film Meet John Doe.
