**Therapeutic Nursing** Dawn Freshwater 2002-09-10 'I found the book to be fascinating and so thought provoking that it made me consider more carefully the text and prose to really understand what the author said. It is skilfully written, very readable and has implications for a wide range of people such as the undergraduate, practitioner, lecturer and researcher' - Accident and Emergency Nursing Gaining self-awareness is a vital aspect of professional development for all who work in the caring professions. In nursing especially, the ability to evaluate oneself affects all areas of practice, including direct patient care, working relationships with colleagues and maintaining one's own well-being in the often pressured environment of health care. This is an innovative text which explores the ways in which self-awareness can be used as a practical tool for continuing professional development and practice improvement. Divided into three parts, the book examines the role of the nurse as therapeutic practitioner, reflective learner and reflexive researcher. For all those wishing to develop their skills as autonomous, reflective, accountable practitioners, this book will be an inspiring read. It will be of immense use to those who teach and supervise nurses at all levels.

**Teaching for Quality Learning at University 5e** John Biggs 2022-11-10 "Biggs and Tang, now with Kennedy, have ensured this new edition remains an international leader for university teaching for the next decade." Denise Chalmers AM, Emeritus Professor, University of Western Australia, Australia "This book, a fifth edition, can truly be called a "classic" on the topic of teaching, learning and curriculum design in higher education." Michael Prosser, Honorary Professorial Fellow, Centre for the Study of Higher Education, University of Melbourne, Australia "You should be inspired to increase the quality of your teaching, your learning, and your learning about teaching." John R. Kirby, Professor Emeritus of Educational Psychology, Queen's University, Canada The concept of constructive alignment has supported generations of students and teachers within higher education. It is a 'backward design' method of teaching where the student outcomes are identified first and the teacher then designs teaching activities to enable students to achieve those outcomes, assessing how well they have been achieved. Each chapter outlines how to design the learning outcomes, teaching and assessments for success in learning. This updated edition of Teaching for Quality Learning at University: • Provides a comprehensive, research-based theory of teaching for teacher reflection • Outlines how educational technology can be used in constructively aligned teaching • Helps staff developers to provide support for staff and departments in line with institutional policies • Offers a framework for quality assurance and quality enhancement across a whole institution Teaching for Quality Learning at University continues to be used as a framework for designing higher education teaching systems globally and is essential reading for those in the field. John Biggs has held Chairs in Education in Canada, Australia, and Hong Kong. He has published extensively on student learning and the implications of his research for teaching. He developed his concept of constructive alignment at the University of Hong Kong, first outlined in Teaching for Quality Learning at University in 1999. Catherine Tang has over 15 years of teaching experience in tertiary education and is the former Head of the Centre for Learning, Teaching and Supervision at the Education University of Hong Kong (the then Hong Kong Institute of Education) and the Educational Development Centre at the Hong Kong Polytechnic University. Gregor Kennedy is the Deputy Vice-Chancellor (Academic) at the University of Melbourne, Australia and a Professor of Higher Education in the Melbourne Centre for the Study of Higher Education.

**Fundamentals of Nursing E-Book** Barbara L Yoost 2021-12-07 Build a solid foundation in the knowledge and skills you need to succeed as a nurse! Designed specifically for today's students, Fundamentals of Nursing, 3rd Edition takes a fresh, conversational approach that is friendlier than typical books on nursing fundamentals. To make understanding easier, the book introduces basic information first and then follows with progressively more nuanced and complex nursing concepts. Practical exercises provide a unique kind of active learning, allowing you to apply concepts to actual patient care. Even care planning is different, as authors Barbara L. Yoost and Lynne R. Crawford are pioneers of conceptual care mapping — a visual, holistic way of making clinical judgments and planning patient care. Essentially, this text offers an easier, fundamentally different way to learn the nursing profession! UNIQUE! Building-block approach uses review questions and exam questions tied to learning objectives, starting at lower Bloom's taxonomy levels in the early chapters and building to more complex levels as you acquire more knowledge. UNIQUE! Warm, friendly writing style introduces concepts and terms more slowly, giving you time to practice, think critically, and gain mastery. Case studies open each chapter with real-world scenarios, helping you build analytical, critical thinking, and clinical judgment skills. Coverage of complementary therapies is integrated throughout the text, reflecting changes to the NCLEX® exam. Emphasis on assignment and delegation describes the differences between the two skills, and how and when they are appropriate for an RN. UNIQUE! Objective-driven approach presents clearly defined, numbered learning objectives that coordinate with all content and then wrap up with Objective Summaries. UNIQUE! Active learning activities help you apply chapter content to broader nursing concepts and realistic patient scenarios. UNIQUE! Conceptual care mapping is used throughout the text in conjunction with the Conceptual Care Map creator to help you develop clinical judgment and plans of care. Boxed features cover the areas of interprofessional collaboration and delegation, ethical and legal practice, patient education and healthy literacy, health assessment questions, diversity considerations, evidence-based practice and informatics, home care considerations, QSEN, and safe practice alerts. NEW! Clinical Judgment in Nursing chapter introduces the concept of clinical judgment and the six NCSBN Clinical Judgment Measurement Model Skills. NEW! Clinical judgment steps are integrated within the nursing process.

**Guided Reflection** Christopher Johns 2009-02-12 Reflection is widely recognised as an invaluable tool in health care, providing fresh insights which enable practitioners to develop their own practice and improve the quality of their care. This book introduces the practitioner to the concept of 'Guided reflection', an innovative research process in which the practitioner is assisted by a mentor (or 'guide') in a process of self-enquiry, development, and learning through reflection, in order to become fully effective. Guided reflection is grounded in individual practice, and can provide deeply meaningful insights into self-development and professional care. The process results in a reflexive narrative, which highlights key issues for

enhancing health care practice and professional care. This book uses a collection of such narratives from everyday clinical practice in nursing, health visiting and midwifery to demonstrate the theory and practicalities of guided reflection and narrative construction. These narratives portray the values inherent in caring, highlight key issues in clinical practice, reveal the factors that constrain the quest to realise practice, and examine the ways practitioners work towards overcoming these constraints.

*Nursing Education in the Clinical Setting* Roberta J. Emerson 2006-09-19 2007 AJN Book of the Year Award Winner Nursing Education in the Clinical Setting provides a practical approach to clinical nursing instruction. Although grounded in adult learning theory, this unique resource provides practical suggestions and addresses common questions and issues. The text incorporates illustrative scenarios, discussion questions, and reflection exercises designed to facilitate thoughtful application of the content. Addresses the role transition for a nurse with clinical expertise to that of clinical nursing instructor. Provides important tips for effectively appraising student performance such as student involvement in self-evaluation and goal setting, and suggestions for how evaluation and appraisal are shared with the student. Incorporates sample scenarios to illustrate concepts and allow the reader to apply them. Integrates discussion questions and exercises designed to facilitate thoughtful application and critical thinking skills. Addresses all aspects of learning, including "cognitive" (e.g., critical thinking), "affective" (e.g., caring), and "psychomotor" (e.g., technical skills). Provides actual examples of tools to be used for documenting student performance and approaches for stimulating student involvement and critical thinking. Includes a separate chapter on Clinical Faculty as Clinical Coach that discusses how learning is facilitated in the clinical setting with the guidance of an effective teacher. Features a Clinical Toolbox that contains a variety of supplemental resources, including sample approaches for teaching and evaluation, suggestions for preparing anecdotal notes, and relevant reference material. Incorporates issues related to computer access of patient data banks for students, and the federal regulations mandated by HIPAA and their clinical education implications.

Introduction to Concept Mapping in Nursing Patricia Schmehl 2014 Introduction to Concept Mapping in Nursing provides the foundation for what a concept map is and how to create a map that applies theory to practice. This excellent resource addresses how students will think about applying nursing theory as it relates to concept mapping. This book is unique because it focuses on a broad application of concept mapping, and ties concept mapping closely to critical thinking skills. Furthermore, this book will prepare nursing students to learn how to map out care plans for patients as they talk with patients. Becoming a Reflective Practitioner Christopher Johns 2013-03-19 From Reviews of the second edition: 'Christopher Johns is an internationally recognised pioneer of reflective practice in nursing and health care. The first edition of this book was an excellent resource and this updated version is equally impressive. This is a superb resource for nurses and all

those eager to enhance their knowledge and skills in reflective practice. It is well presented, user-friendly and stimulating.' Nursing Standard Becoming a Reflective Practitioner is a practical guide to using reflection in every day clinical practice. It explores the value of using models of reflection, with particular reference to Christopher Johns' own model for structured reflection. Becoming a Reflective Practitioner includes accounts of everyday practice to guide the reader through the stages of reflective practice within the context of care, 'desirable practice', and the caring relationship. This third edition reflects significant developments in reflective theory and gives greater attention to different approaches to reflection including the use of narrative dialogue. New chapters are included on ensuring quality and managing conflict. Exemplars are included throughout and further references and reflected reading are included at the end of each chapter. Reflective practice is acknowledged as an effective approach to developing nursing care which evolves as the practitioner develops his or her own practice. This book will therefore be of interest to all nurses involved in developing their clinical practice. A practical guide to developing reflective practice Reflects significant developments in reflective theory Examines Christopher Johns' own model for structured reflection Centred on care and the caring relationship Challenges practitioners to question their practice

**Research and Study Skills for Veterinary Nurses** Jane Davidson 2019-04-30 With developments in skills and knowledge level, more and more academic rigour is expected of veterinary nurses. Exams, CPD and repeated testing and study throughout the nurse's career are now requirements. Aimed at veterinary nurses and technicians, this book will guide the reader through the various research and study disciplines required of them. Research and Study Skills for Veterinary Nurses discusses why these academic skills are now required of the veterinary nurse, different types of source material, how to complete written assignments, how to reference properly, how to approach different test questions, how to respond to oral exams, how to complete OSCEs, CPD training, and work-based practical assessments. Research and Study Skills for Veterinary Nurses provides information and advice for student vet nurses who need a reliable resource to guide them through their course.

**Becoming a Reflective Practitioner** Christopher Johns 2017-04-24 'Christopher Johns is an internationally recognised pioneer of reflective practice in nursing and health care.' - Nursing Standard Becoming a Reflective Practitioner provides a unique insight into reflective practice, exploring the value of using models of reflection, with particular reference to Christopher Johns' own model for structured reflection. Now in its fifth edition, this book has been completely revised and updated to include up-to-date literature and reflective extracts. Contemporary in approach, this definitive text contains a variety of rich and insightful reflective extracts that support the main issues being raised in each chapter, and challenges practitioners and students to question their own practice. Now with further scenarios and case studies included throughout, these extracts provide the reader with access to the experience of reflective representation helping to explicate the way in which reflective practice can inform the wider notion of professional practice. With an increase in professional registration requiring reflective evidence, this new edition of Becoming a Reflective Practitioner is an essential guide to all those using reflection in everyday clinical practice.

**Game-Based Teaching and Simulation in Nursing and Health Care** Eric B. Bauman, PhD, RN 2012-07-27 "This is a comprehensive resource for anyone interested in integrating gaming and simulation into a course or the entire curricula. It presents the theory and the associated practical application. The extensive reference list and resource/product list encourage and support readers with implementation." Score: 98, 5 Stars.--Doody's Medical Reviews "Game-Based Teaching and Simulation in Nursing and Healthcare is a timely, exhaustive look at how emerging technologies are transforming clinical education. Anyone looking for firsthand, direct account of how game-based learning technologies are reshaping clinical practice needs this book." Kurt Squire, PhD Associate Professor Games+Learning+Society [GLS] School of Education University Of Wisconsin - Madison This innovative text provides practical strategies for developing, integrating, and evaluating new and emerging technology, specifically game-based learning methods, useful in nursing and clinical health sciences education. The text draws upon existing models of experiential learning such as Benner's "thinking-in-action" and "novice-to-expert" frameworks, and introduces current theories supporting the phenomenon of the created learning environment. Chapters explain how simulation and game-based learning strategies can be designed, implemented, and evaluated to improve clinical educational thinking and outcomes and increase exposure to critical experiences to inform clinicians during the journey from novice to expert. The text also describes how game-based learning methods can support the development of complex decision-making and critical thinking skills. Case studies throughout demonstrate the practical application of harnessing technology as a teaching/learning device. Key Features: Provides strategies for developing, integrating, and evaluating game-based learning methods for nursing and healthcare educators Prepares teachers for the paradigm shift from static "e-learning" to dynamic distance experiential learning in virtual and game-based environments Illustrates how to integrate game-based learning into existing curricula Offers theoretical and practical examples of how game-based learning technologies can be used in nursing and clinical education

increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Beginner's Guide to Reflective Practice in Nursing Catherine Delves-Yates 2021-03-24 What is reflective practice and why is it important? How do I write my first reflection? Learn how to carry out reflective practice quickly and easily with this beginner's guide for nurses. Written for nursing students and registered nurses, this book helps build confidence in writing reflectively by using clear step-by-step guidance, insightful case studies, learning activities, and by addressing commonly asked questions from nurses and nursing students. The book has three sections; the first starts with a simple model to help students practice a first reflection and explains how to use reflection as part of assessed work at university. The second section focuses on reflecting in practice and finding the time to do it in busy work situations. The final section helps students to think more deeply about models and theories of reflection, to develop the skills they will need to pass the final year of their course. Essential reading for any nursing student new to reflective practice or registered nurse wanting to improve their reflective writing skills.
