*La Decadencia De La Mentira / the Decay of Lie* Oscar Wilde 2015-02-02 La decadencia de la mentira es un diálogo que se torna en debate sobre el valor del arte. Dos opiniones enfrentadas, que el arte renuncie a la belleza a favor de la verdad, sacrificando algo tan humano y maravilloso como el arte. Wilde presents the essay in a Socratic dialogue, with the characters of Vivian and Cyril having a conversation throughout. The conversation, although playful and whimsical, promotes Wilde's view of Romanticism over Realism. Vivian tells Cyril of an article he has been writing called "The Decay Of Lying: A Protest". In the article Vivian defends Aestheticism and "Art for Art's sake". As summarized by Vivian, it contains four doctrines: Art never expresses anything but itself. All bad art comes from returning to Life and Nature, and elevating them into ideals. Life imitates Art far more than Art imitates Life. Lying, the telling of beautiful untrue things, is the proper aim of Art. The essay ends with the two characters going outside, as Cyril asked Vivian to do at the beginning of the essay. Vivian finally complies, saying that twilight nature's "chief use" may be to "illustrate quotations from the poets."

**Natural History** Carlos Fonseca 2020-07-14 From Carlos Fonseca comes a dazzling, kaleidoscopic epic of art, politics, and hidden realities Just before the dawn of the new millennium, a curator at a New Jersey museum of natural history receives an unusual invitation from a celebrated fashion designer. She shares the curator's fascination with the secrets of the animal kingdom—with camouflage and subterfuge—and she proposes that they collaborate on an exhibition, the nature of which remains largely obscure, even as they enter into a strange relationship marked by evasion and elision. Seven years later, after the designer's death, the curator recovers the archive of their never-completed project. During a long night of insomnia, he finds within the archive a series of clues about the true history of the designer's family, a mind-bending puzzle that winds from Haifa, Israel, to bohemian 1970s New York to the Latin American

jungles. As he follows this trail, the curator discovers a cast of characters whose own fixations interrogate the unstable frontiers between art, science, politics, and religion. An aging photographer, living nearly alone in an abandoned mining town where subterranean fires rage without end, creates miniature replicas of ruined cities. A former model turned conceptual artist becomes the star defendant in a trial over the very soul and purpose of art. A young indigenous boy receives a vision of the end of the world. Reality is a curtain, the curator realizes, and to draw it back is to reveal the theater of the obsessed. *Natural History* is a portrait of a world trapped between faith and irony, tragedy and farce. An urgent and impressively ambitious novel in the tradition of Italo Calvino and Ricardo Piglia, it confirms Carlos Fonseca as one of the most daring writers of his generation.
