*A History of Tasmania from Its Discovery in 1642 to the Present Time* James Fenton 1884 James Fenton (1820-1901) was born in Ireland and emigrated to Tasmania (then known as Van Diemen's Land) with his family in 1833. He became a pioneer settler in an area on the Forth River and published this history of the island in 1884. The book begins with the discovery of the island in 1642 and concludes with the deaths of some significant public figures in the colony in 1884. The establishment of the colony on the island, and the involvement of convicts in its building, is documented. A chapter on the native aborigines gives a fascinating insight into the attitudes of the colonising people, and a detailed account of the removal of the native Tasmanians to Flinders Island, in an effort to separate them from the colonists. The book also contains portraits of some aboriginal people, as well as a glossary of their language.

*Marginalised Communities in Higher Education* Neil Harrison 2021 "Drawing on examples from nine

countries across five continents, this book offers anyone interested in the future of higher education the opportunity to understand how communities become marginalised and how this impacts on their access to learning and their ability to thrive as students. Focusing on groups that suffer directly through discriminatory practices or indirectly through distinct forms of sociocultural disadvantage, this book brings to light communities about which little has been written and where research efforts are in their relative infancy. Each chapter documents the experiences of a group and provides insights that have a wider reach and gives voice to those that are often unheard. The book concludes with a new conceptualisation of the social forces that lead to marginalisation in higher education. This cutting-edge book is a must read for higher education researchers, policy makers, and students interested in access to education, sociology of education, development studies, and cultural studies"--

**Diatoms** Joseph Seckbach 2019-07-01 The aim of this new book series (Diatoms: Biology and Applications) is to provide a comprehensive and reliable source of information on diatom biology and applications. The first book of the series, *Diatoms Fundamentals & Applications*, is wide ranging, starting with the contributions of amateurs and the beauty of diatoms, to details of how their shells are made, how they bend light to their advantage and ours, and major aspects of their biochemistry (photosynthesis and iron metabolism). The book then delves into the ecology of diatoms living in a wide range of habitats, and look at those few that can kill or harm us. The book concludes with a wide range of applications of diatoms, in forensics, manufacturing, medicine, biofuel and agriculture. The contributors are leading international experts on diatoms. This book is for a wide audience researchers, academics, students, and teachers of biology and related disciplines, written to both act as an introduction to diatoms and to present some of the most advanced research on them.

The Territorial Air Force Frances Louise Wilkinson 2020-11-23 To date, little has been written about the Territorial Air Force as a voluntary military organization and no sustained analysis of its recruitment and social composition undertaken. Made up of three different parts, the Auxiliary Air Force, the Special Reserve and the Royal Air Force Volunteer Reserve, these three separate and different groups have not featured significantly in existing literature. Current historiography of the AAF and SR is dominated by the experiences of Nos. 600 and 601 Squadrons, which were based in London, and presents a popular image of a gentlemen's flying club, whilst that of the RAFVR presents an image of a much more egalitarian institution, intended to be a citizens' air force. This book will present the history of the Territorial Air Force from its creation in the early 1920s until 1957. It will consider the ideas behind the formation of two different types of reserve for the RAF and it will examine the way in which men were recruited for the three different groups. Woven throughout the text will be an analysis of how the volunteers joined, and what kinds of men were accepted into the organizations as both pilots and officers. It will also analyze the influences class and social status had on recruitment in the run up to the Second World War. It will explore the key differences between the Auxiliary squadrons and the SR squadrons, as well as the main reasons for the idea of merging the SR squadrons into the AAF squadrons. It will briefly discuss the newly formed University Air Squadrons which were set up to promote "air mindedness" and to stimulate an interest and research on matters aeronautical. Military voluntarism continued to play a key role in the defense of twentieth-century Britain, but the underlying tensions and weaknesses associated with a class-based voluntary culture meant that the TAF had to change in response to new pressures. Class ceased to be the key determining factor in the recruitment of officers as the organizations faced new challenges. Within both the AAF and the RAFVR the pre-war impression of a gentlemen's flying club finally gave way to a more meritocratic culture in the post-war world.

Success of Mergers and Acquisitions in the Insurance Industry: What Can We Learn From Previous Empirical Research? Sven Bach 2014-08-20 Doctoral Thesis / Dissertation from the year 2014 in the subject Business economics - Banking, Stock Exchanges, Insurance, Accounting, grade: 1,3, University of Cologne (Seminar für Allg. BWL, Risikomanagement und Versicherungslehre), language: English, abstract: Since the 20th century, the insurance industry has experienced an unprecedented wave of M&A. However, in spite of the drastic increase in insurance M&A activity, there has been little consistent empirical evidence on the value enhancement of these deals. Hence, many open questions still exist in this research area. The most fundamental questions are whether insurance M&A actually create value and what determinants influence the success of these undertakings. This thesis attempts to find answers to these questions by first examining the status quo of academic literature published in this field of research and bringing together the empirical findings on the success of insurance M&A and its influencing factors. Overall, the literature review outlines that insurance M&A on average tend to create value for shareholders of the target firms as well as for the combined entity of acquirer and target. Moreover, shareholders of acquiring US insurance firms, on average, also benefit from these corporate undertakings. However, negative short-term as well as long-term wealth effects for acquiring insurers' shareholders are the common finding in capital market studies analyzing the effects of M&A transactions in the European insurance industry. Secondly, the reliability and validity of the findings of previous research are tested in an own empirical analysis which uses a fairly new approach to evaluating the success of M&A by using the idea of stochastic dominance (SD). More precisely, using a sample of 102 transactions conducted by publicly traded Western European insurance firms between the years 1993 and 2009, this work analyzes whether investors in acquiring insurance firms benefit from M&A by comparing return distributions of acquiring firm portfolios with benchmark portfolios using the first two orders of SD. The results show that insurance M&A trigger a negative short-term capital market reaction for acquiring European insurance firms. However, this short-term underperformance diminishes over time, and over a longer period of time of up to three years after M&A announcement, there is no underperformance of acquiring European insurers. In conclusion, based on the accumulated evidence from past empirical studies as well as the empirical investigation of this thesis, it can be concluded that M&A, not only in the US insurance market but also in the European insurance market, seem to be a viable model and are likely to lead to success for all parties involved.

How to Build a Pro Streetbike Mike Seate Whether it's a big-bore, high-end custom sportbike you're after, or a naked, bare knuckles streetfighting drag racer, this book has the goods for getting you there. In three different scenarios, the nation's top builders give blow-by-blow instructions for completely rebuilding three popular streetbikes -- from performance modifications and exhaust systems to flawless finishes and detail work. Focusing on highly customized Hayabusa drag bikes, including a slammed and lowered Suzuki GSX1300R Hayabusa, John Dantzler of the Charlotte, North Carolina, shop Two Wheel Customs outlines the suspension and engine modifications that the serious street and quarter-mile racer can make. He takes a salvaged, late-model four-cylinder street machine and transforms it into the kind of machine that both professional stunt riders and corner-carving enthusiasts favor. Next, author Mike Seate covers the details on constructing and installing popular modifications -- everything from engine crash guards and wheelie bars to motocross-style handlebars and bikini fairings -- while stunt riders and streetfighter builders from the United States and Europe weigh in with tips and advice. Last but not least, the builders at Wisconsin's Patrick's Performance and South Carolina's Coastal Motorcycles provide a step-by-step account of the construction of two high-end custom sportbikes -- transforming a Yamaha YZF R-1 and a Suzuki GSX-R 1000 into the kind of machines that are eye-popping everywhere on the streets or on the motorcycle show circuit.

**Automotive Mechatronics: Operational and Practical Issues** B. T. Fijalkowski 2010-11-25 This book presents operational and practical issues of automotive mechatronics with special emphasis on the heterogeneous automotive vehicle systems approach, and is intended as a graduate text as well as a reference for scientists and engineers involved in the design of automotive mechatronic control systems. As the complexity of automotive vehicles increases, so does the dearth of high competence, multi-disciplined automotive scientists and engineers. This book provides a discussion into the type of mechatronic control systems found in modern vehicles and the skills required by automotive scientists and engineers working in this environment. Divided into two volumes and five parts, Automotive Mechatronics aims at improving automotive mechatronics education and emphasises the training of students' experimental hands-on abilities, stimulating and promoting experience among high education institutes and produce more automotive mechatronics and automation engineers. The main subject that are treated are: VOLUME I: RBW or XBW unibody or chassis-motion mechatronic control hypersystems; DBW AWD propulsion mechatronic control systems; BBW AWB dispulsion mechatronic control systems; VOLUME II: SBW AWS diversion mechatronic control systems; ABW AWA suspension mechatronic control systems. This volume was developed for undergraduate and postgraduate students as well as for professionals involved in all disciplines related to the design or research and development of automotive vehicle dynamics, powertrains, brakes, steering, and shock absorbers (dampers). Basic knowledge of college mathematics, college physics, and knowledge of the functionality of automotive vehicle basic propulsion, dispulsion, conversion and suspension systems is required.

**Encyclopedia of Canonical Ḥadīth** Gautier H.A. Juynboll 2007-09-30 This encyclopedic work on Islam comprises English translations of all canonical ḥadīths, complete with their respective chains of transmission (isnāds). By conflating the variant versions of the same ḥadīth, the repetitiveness of its literature has been kept wherever possible to a minimum. The latest methods of isnād analysis, described in the general introduction, have been employed in an attempt to identify the person(s) responsible for each ḥadīth. The book is organized in the alphabetical order of those persons. These are the so-called 'common links'. Each of them is listed with the tradition(s) for the wording of which he can be held accountable, or with which he can at least be associated.
