Red Star Over Russia Natalia Sidlina 2018-04-24 In exploring the intersection of art, politics and society, few collections in the world can compare with the David King collection. David King (1943?2016) was not only a passionate collector, but also an artist, designer and historian. Over a lifetime he amassed one of the world's largest collections of Soviet political art and photographs. Every step of the Soviet journey is documented in visual media, photomontage, photographs, paintings, handwritten notes, books (signed with annotations and marginalia), enclosures and ephemera. The collection is also unique in examples of image manipulation techniques, erasures and deletions, and in the survival, despite the purges, of extremely rare books and manuscripts by the early revolutionaries who died in the?Show Trials? of 1936?38.00Exhibition: Tate Modern, London, United Kingdom (08.11.2017 - 18.02.2018).

Red Star Over the Third World Viajy Prashad 2020-03 'Like the brilliant sun, the October Revolution shone over all five continents, awakening millions of oppressed and exploited people around the world. There has never existed such a revolution of such significance and scale in the history of humanity'. - Hồ Chí Minh// From Cuba to Vietnam, from China to South Africa, the October Revolution remains as an inspiration. After all, that Revolution proved that the working class and the peasantry could not only overthrow an autocratic government

but that it could form its own government, in its image. It proved decisively that the working class and the peasantry could be allied. It proved as well the necessity of a vanguard party that was open to spontaneous currents of unrest, but which could guide a revolution to completion. This book explains the power of the October Revolution for the Third World. It is not a comprehensive study, but a small book with a large hope - that a new generation will come to see the importance of this revolution for the working class and peasantry in that part of the world that suffered under the heel of colonial domination.

Edgar Snow John Maxwell Hamilton 2003-09-25 Edgar Snow (1905--1972) was one of the most notable Western journalists to report on China in both the revolutionary and postrevolutionary periods. He first became famous in the mid-1930s when he broke through a Nationalist blockade and reached the Communists in northwest China. For nearly a decade, no foreign reporter had seen the Communists, who were widely regarded as a ragtag bandit army. Snow took them seriously as a national movement. His reporting in the now-famous book *Red Star over China* was major news, even to the Chinese, thousands of whom joined the Communists after reading it. It has remained a seminal reference on the early Chinese Communist movement. In this award-winning biography, journalist John Maxwell Hamilton follows Snow from his birth in Kansas City to his rise as a celebrated foreign correspondent for the *Saturday Evening Post*, his ostracism during the cold war, and his role as a singular journalistic bridge between Communist China and the United States. With a new preface by the author, this revealing portrait of the widely misunderstood Snow firmly establishes him as a model for the kind of committed reporting that is crucial to understanding our interdependent world.

Dancing Under the Red Star Karl Tobien 2010-04-07 The shocking and inspirational saga of Margaret Werner and her miraculous survival in the Siberian death camps of Stalinist Russia. Between 1930 and 1932, Henry Ford sent 450 of his Detroit employees plus their families to live in Gorky, Russia, to operate a new manufacturing facility. This is the true story of one of those families—Carl and Elisabeth Werner and their young daughter Margaret—and their terrifying life in Russia under brutal dictator Joseph Stalin. Margaret was seventeen when her father was arrested on trumped-up charges of treason. Heartbroken and

afraid, she and her mother were left to withstand the hardships of life under the oppressive Soviet state, an existence marked by poverty, starvation, and fear. Refusing to comply with the Socialist agenda, Margaret was ultimately sentenced to ten years of hard labor in Stalin's Gulag. Filth, malnutrition, and despair accompanied merciless physical labor. Yet in the midst of inhumane conditions came glimpses of hope and love as Margaret came to realize her dependence upon "the grace, favor, and protection of an unseen God." In all, it would be thirty long years before Margaret returned to kiss the ground of home. Of all the Americans who made this virtually unknown journey—ultimately spending years in Siberian death camps—Margaret Werner was the only woman who lived to tell about it. Written by her son, Karl Tobien, *Dancing Under the Red Star* is Margaret's unforgettable true story: an inspiring chronicle of faith, defiance, and personal triumph

To Run for Life from Swastika and Red Star A. Reinfeld 2002 When the Germans invaded Poland in September 1939, the author and his father were drafted into the Polish Army. After a few days of hopeless fighting, the brigade in which the author served was routed and dispersed. This precipitated a headlong flight of soldiers and civilians alike, anxious to escape the murderous attack of the rapidly advancing enemy armored columns and their attendant aircraft, which ceaselessly bombed and strafed roads and villages. For some three weeks, Aaron Reinfeld and his father desperately sought to escape the Nazi onslaught by fleeing eastward to the Russian border and the perceived safety that country offered. It was a harrowing ordeal covering hundreds of kilometers, during which the Reinfelds endured hunger, exposure, bombing, shelling and countless dangers on roads clogged with millions of terrified, escaping refugees. At the outbreak of war, the author lived a comfortable life in a reasonably affluent home in the town of Lodz, and was about to complete his last year of high school. Little did he know it would be more than a decade before he could complete his education and obtain a degree in textile engineering from Nottingham College in England. In that decade, the author survived many trials by fire and mortal danger, first in escaping from the Nazis, then fighting the Germans in North Africa as a soldier in the British Army, and finally serving in the Israeli Army in that country's bloody war for independence. While he managed to escape the fires of the Holocaust, his mother, sister and most members of his extended family were consumed in it along with six million Jews and untold numbers of gentiles. Running from the advancing Nazis, the author and his father, through sheer determination, willpower to survive and luck, managed to reach the Russian Zone of Occupation and its temporary safety. Soon, however, they found they had to flee from the Russians as well when they began deporting into the Siberian hinterland capitalists, professionals and the intelligentsia, who were unlikely to hew to the Soviet ideology and order. Fleeing the Russians, the Reinfelds brought off another harrowing escape, this time by crossing a raging river in the middle of a cold, wintry night into Romania, where they hoped to find a temporary haven. Because they had crossed illegally into the country, the author and his father were apprehended by the Romanian police and forced to serve a brief jail sentence before being set free and allowed to stay in that country. From their base in Bucharest, Reinfeld's father tried to arrange for his mother's and sister's escape from Nazi occupied Poland. Such arrangements were difficult to make, but possible by bribing the right police and Nazi officials. Reinfeld's father succeeded in making those arrangements, and his mother and sister were set to travel to then neutral Italy from where they could continue on

to Palestine. But just as they were about to depart, Italy entered the war on Germany's side, thus trapping them in Poland and sealing their doom. The security they found in Romania did not last as both Germany and the Soviets were poised to march into Romania and partition the country between them. The Reisfelds had to flee once again before they could be overtaken by their dreaded enemies. They managed to book passage on one of the last passenger ships to leave Romania, barely days ahead of the German occupation. After a tour of eastern Mediterranean ports, the Reisfelds finally landed in Haifa where they were taken in by family members already established in Palestine. Yet, this was hardly the end of the author's peregrinations. With the war raging in North Africa and creeping closer to Palestine, Aaron joined the British Army's Corp of Royal Engineers as a sapper lifting and planting mines, blowing up fortifications, and building and destroying bridges, among ot

The Red Star and the Crescent James Reardon-Anderson 2018-04-01 The Red Star and the Crescent provides an in-depth and multi-disciplinary analysis of the evolving relationship between China and the Middle East. Despite its increasing importance, very few studies have examined this dynamic, deepening, and multi-faceted nexus. James Reardon- Anderson has sought to fill this critical gap. The volume examines the "big picture" of international relations, then zooms in on case studies and probes the underlying domestic factors on each side. Reardon- Anderson tackles topics as diverse as China's security strategy in the Middle East, its military relations with the states of the region, its role in the Iran nuclear negotiations, the Uyghur question, and the significance and consequences of the Silk Road strategy. A comprehensive study of the changing forces driving one of the world's most important strategic, economic and cultural relationships

inside view of the ruthless war in the air on the Eastern Front gives a rare insight into the reality of fighting and tactics of the Red Army Air Force. In his own words, and with a remarkable clarity of recall, Evgeniy Mariinskiy describes what combat was like in the air, face to face with a skilled, deadly and increasingly desperate enemy. The reader can follow his career from an unskilled novice who has just arrived at his regiment through to him becoming an ace, and Hero of the Soviet Union, under the leadership of experienced commanders. The terrifying moments of action, engagements with enemy fighters, forced landings, nervous strain before attacks, loss of comrades and everyday life of pilots - all these aspects of a Soviet fighter pilot's experience during the Great Patriotic War are brought dramatically to life in his memoirs. In his memoirs Mariinskiy describes tactics which enabled him to have an upper hand in dogfights against experienced German pilots. The grand strategy of the campaigns across the Eastern Front is less important here than the sequence of engagements that were the firsthand experience of the author. It is this close-up view of combat that makes Evgeniy Mariinskiy's reminiscences of such value. Key sales points: A gripping and superbly readable memoir of the war in the air over the Eastern Front 1943-45, penned by a Hero of the Soviet Union and air ace credited with 20 victories / Covers the author's full aviation career including training and his initial experiences over the front, as well as his increasingly successful combat with a skilled enemy / Evgeniy Mariinskiy served with the 129th Guards Fighter Regiment 1943-45, undertaking 210 sorties, participating in 60 air-to-air engagements and shooting down 20 enemy aircraft. White Eagle, Red Star Norman Davies 2011-04-30 Surprisingly little known, the Polish-Soviet War of 1919-20 was to change the course of twentieth-century history. In *White Eagle, Red Star*, Norman Davies gives a full account of the War, with its dramatic climax in August 1920 when the Red Army - sure of victory and pledged to carry the Revolution across Europe to 'water our horses on the Rhine' - was crushed by a devastating Polish attack. Since known as the 'miracle on the Vistula', it remains one of the most decisive battles of the Western world. Drawing on both Polish and Russian sources, Norman Davies illustrates the narrative with documentary material which hitherto has not been readily available and shows how the War was far more an 'episode' in East European affairs, but largely determined the course of European history for the next twenty years or more.

Yellow Star, Red Star Jelena Subotić 2019-12-15 Yellow Star, Red Star asks why Holocaust memory continues to be so deeply troubled—ignored, appropriated, and obfuscated—throughout Eastern Europe, even though it was in those lands that most of the extermination campaign occurred. As part of accession to the European Union, Jelena Subotić shows, East European states were required to adopt, participate in, and contribute to the established Western narrative of the Holocaust. This requirement created anxiety and resentment in post-communist states: Holocaust memory replaced communist terror as the dominant narrative in Eastern Europe, focusing instead on predominantly Jewish suffering in World War II. Influencing the European Union's own memory politics and legislation in the process, post-communist states have attempted to reconcile these two memories by pursuing new strategies of Holocaust remembrance. The memory, symbols, and imagery of the Holocaust have been appropriated to represent crimes of communism. Yellow Star, Red Star presents in-depth accounts of Holocaust remembrance practices in Serbia, Croatia, and Lithuania, and extends the discussion to other East European states. The book demonstrates how countries of the region used Holocaust remembrance as a political strategy to resolve their contemporary "ontological insecurities"—insecurities about their identities, about their international status, and about their relationships with other international actors. As Subotić concludes, Holocaust memory in Eastern Europe has never been about the Holocaust or about the desire to remember the past, whether during communism or in its aftermath. Rather, it has been about managing national identities in a precarious and uncertain world.

Red Star on the Nile Alvin Z. Rubinstein 1977 The Soviet-Egyptian relationship after the June War of 1967 was a new one for both countries, and its consequences were of global importance. Drawing on all available Soviet and Arab materials, Alvin Rubinstein develops the concept of influence as an analytical tool and explores in comprehensive fashion the diplomatic, military, political, and economic aspects of the influence relationship between the two nations in recent years. The author's approach is chronological, analytical, and oriented toward the issues. He finds that the relationship has been fundamentally asymmetrical in aims and accomplishments. Egypt's remarkable comeback after the June War would not have

been possible without Soviet aid, but Moscow benefited primarily in the context of the Soviet-American strategic rivalry in the Middle East, and only peripherally in terms of influence over Egypt. Considering broader Soviet-Third World relationships, the author shows that there is no demonstrable correlation between intensified interactions and influence, that an extensive presence is no assurance of influence, and that Soviet influence can seldom be exercised at will in the absence of an ability to project Soviet military power directly. Living Soviet in Ukraine from Stalin to Maidan Michael T. Westrate 2016-04-29 What the world is now witnessing in Ukraine is the cumulative effect of history and memory in the lives of the people of the region—and this book directly addresses those subjects. Although the majority of scholarship on the Soviet Union focuses on top-level political and intellectual elites, these groups were only tiny minorities. What was life like for the rest of society? What was it like for the vast population that usually supported the regime, mostly accepted the rules, essentially internalized the ideology, and generally made the same choices as their neighbors and friends? What was it like to live Soviet as the USSR hit its peak as a superpower and then fell apart? What was it like to live Soviet in Ukraine in the decade after independence? This book answers those questions. It is an oral history of a group of military colonels and their wives, children, and contemporaries, covering their lives from childhood to the present. During this period, these military families went from comfortable economic circumstances, professional prestige, and political influence as part of the Soviet upper stratum, to destitution and disgrace in the 1990s. Today, many of them are part of Europe's largest ethnic minority—Russians in Ukraine. The geographic focus is Kharkiv, the second-largest city in Europe's second-largest country, a Russian-speaking city in eastern Ukraine. Based on 3,000+ pages of interview transcripts and supplemented with materials gleaned from unprecedented access to personal, family, and institutional archives, the book investigates how families endured shifting social, cultural, and political realities. By analyzing the lives of individuals in context, Westrate provides insights at the grassroots level. He reveals how ideological, professional, gender, ethnic, and national imperatives—as developed and transmitted by elites—were internalized, transformed, or rejected by the rank and file. He reveals how the subjective identities of individuals and small groups developed and changed over time, and how that process relates to the parallel projects pursued by the leaders of their countries. In the process, he shows what those experiences have to offer the study of Soviet, post-Soviet, and transnational history, bridging the boundaries created by the collapse of the USSR and exploring the foundations of both twenty-first-century Ukraine and today's conflicts.

Red Star Tales Yvonne Howell 2015-10-01 For over a century, most of the science fiction produced by the world's largest country has been beyond the reach of Western readers. This new collection aims to change that, bringing a large body of influential works into the English orbit. A scientist keeps a severed head alive, and the head lives to tell the tale... An explorer experiences life on the moon, in a story written six decades before the first moon landing... Electrical appliances respond to human anxieties and threaten to crash the electrical grid... Archaeologists discover strange powers emanating from a Central Asian excavation site... A teleporting experiment goes awry, leaving a subject to cope with a bizarre sensory swap... A boy discovers the explosive truth of his father's "antiseptic" work, stamping out dissent on distant worlds... The last 100 years in Russia have seen an astonishing diversity and depth of literary works in the science fiction genre, by authors with a dizzying array of styles and subject matter. This volume brings together 18 such works, translated into English for the first time, spanning from path-breaking, pre-revolutionary works of the 1890s, through the difficult Stalinist era, to post-Soviet stories published in the 1980s and 1990s.

But she searches the grain store and the hay barn and can't find him anywhere. Panic sets in - if Red Star took off into the mountains, there are dangers out there for a lone pony - coyotes, bears, even mountain lions. Anyway, he's too smart to get himself into that kind of fix. 'Maybe somebody stole him!' Brooke suggests. So Keira and her family turn detective to track Red Star down.

Red Star Alexander Bogdanov 1984-06-22 "An Earth-man's journey to the planet Mars, where he is treated to a wondrous vision of a communist future, complete with flying cars and 3D color movies." —Wonders & Marvels A communist society on Mars, the Russian revolution, and class struggle on two planets is the subject of this arresting science fiction novel by Alexander Bogdanov (1873–1928), one of the early organizers and prophets of the Russian Bolshevik party. The red star is Mars, but it is also the dream set to paper of the society that could emerge on earth after the dual victory of the socialist and scientific-technical revolutions. While portraying a harmonious and rational socialist society, Bogdanov sketches out the problems that will face industrialized nations, whether socialist or capitalist. "[A] surprisingly moving story." —The New Yorker "The contemporary reader will marvel at [Bogdanov's] foresight: nuclear fusion and propulsion, atomic weaponry and fallout, computers, blood transfusions, and (almost) unisexuality." —Choice "Bogdanov's novels reveal a great deal about their fascinating author, about his time and, ironically, ours, and about the genre of utopia as well as his contribution to it." —Slavic Review

Red Star Against The Swastika Vasily Emelianenko 2005-12-01 This is the extraordinary story of Vasily B. Emelianenko, the veteran pilot of one of the Soviet Union's most contradictory planes of WWII - the I1-2. This heavily armoured aircraft was practically unrivalled in terms of fire power, but it was slow to manoeuvre and an easy target for fighters. I1-2 had to attack enemy flak columns at extremely low altitudes, which led to enormous tolls both in equipment and personnel.
