Henry Stephens's Book of the Farm Alex Langlands 2013-07-10 The Book of the Farm, written by the 19th-century farming expert Henry Stephens, was the indispensable farming 'bible' referred to by the historians living and working on the BBC series Victorian Farm. This brand new version has been fully revised and edited by Alex Langlands, who starred on the programme, to bring its timeless wisdom to a fresh audience. Beautifully illustrated throughout with both black-and-white and colour illustrations, the book is a complete guide to the farming year, from planting thorn hedges in winter to pulling up potatoes in autumn. Along the way it gives fascinating information about every aspect of farming, from sheep shearing to bringing in the harvest, and practical instructions for skills such as cheese-making, animal husbandry, sheepdog training and other traditional country pastimes. Although farming has changed irrevocably since the 19th century, there are some aspects that remain timeless, and this exquisite book is a nostalgic celebration of our rural past.

Field Guide to the Frogs of Australia Michael J Tyler 2011-10-01 Throughout much of the world, frog populations are declining and some species are disappearing totally. In Australia, several species have become extinct in the past 25 years. This revised and updated guide provides concise accounts of all the known frogs of Australia. There are 230 species within the five native frog families: Hylidae, Limnodynastidae, Microhylidae, Myobatrachidae and Ranidae. Also included are the introduced Cane Toad and nine 'stowaway' species that have arrived in Australia. The text for each species includes details of size, status, distribution, habitat, behaviour and advertisement call. Each species is accompanied by a map of Australia showing its known distribution, and a full-colour painted illustration. Closely related frogs are shown in identical poses so that comparisons can be made readily. The introductory section of the book covers frog biology and habitats and includes notes on families and genera.
