Twin Cities John Garrard 2018-10-03 This dynamic international collection provides a comprehensive overview of twin cities on administrative and international borders across the world. Drawing on contemporary and historical examples, it documents constant and changing features of twinned communities over time. The chapters explore a variety of urban formations including independent cities located side-by-side; cities that have merged over decades or even centuries and those projected to merge; cities partitioned by treaties and cities duplicated in pursuit of better security, intensified trade or both between neighbouring countries. From Europe to Africa, North America to the Middle East, South America to Asia, this book focuses on relationships between cities, citizens and municipal/international borders. A cartographical contents and editorial commentary guide readers through diverse contributions. The authors ask how far cities are changing or remaining constant in the context of conurbanisation, Europeanisation and globalization. The book provides a glimpse into the variety of roles twin cities can play globally: from laboratories of integration and para-diplomatic actors to economic and cultural brokers. This is a valuable, engaging resource for researchers in the fields of geography, urban studies, border studies, international relations and global development. It will be of great use to individuals involved in twin-city initiatives and

general readers.

Zoning Elliott Sclar 2019-11-06 Zoning is at once a key technical competency of urban planning practice and a highly politicized regulatory tool. How this contradiction between the technical and political is resolved has wide-reaching implications for urban equity and sustainability, two key concerns of urban planning. Moving beyond critiques of zoning as a regulatory hindrance to local affordability or merely the rulebook that guides urban land use, this textbook takes an institutional approach to zoning, positioning its practice within the larger political, social, and economic conflicts that shape local access for diverse groups across urban space. Foregrounding the historical-institutional setting in which zoning is embedded allows planners to more deeply engage with the equity and sustainability issues related to zoning practice. By approaching zoning from a social science and planning perspective, this text engages students of urban planning, policy, and design with several key questions relevant to the realities of zoning and land regulation they encounter in practice. Why has the practice of zoning evolved as it has? How do social and economic institutions shape zoning in contemporary practice? How does zoning relate to the other competencies of planning, such as housing and transport? Where and why has zoning, an act of physical land use regulation, replaced social planning? These questions, grounded in examples and cases, will prompt readers to think critically about the potential and limitations of zoning. By reforging the important links between zoning practice and the concerns of the urban planning profession, this text provides a new framework for considering zoning in the 21st century and beyond.

The Culture Map Erin Meyer 2014-05-27 An international business expert helps you understand and navigate cultural differences in this insightful and practical guide, perfect for both your work and personal life. Americans precede anything negative with three nice comments; French, Dutch, Israelis, and Germans get straight to the point; Latin Americans and Asians are steeped in hierarchy; Scandinavians think the best boss is just one of the crowd. It's no surprise that when they try and talk to each other, chaos breaks out. In *The Culture Map*, INSEAD professor Erin Meyer is your guide through this subtle, sometimes treacherous terrain in which people from starkly different backgrounds are expected to work harmoniously together. She provides a field-tested model for decoding how cultural differences impact international business, and combines a smart analytical framework with practical, actionable advice.

Orientalism Edward W. Said 2014-10-01 More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself,

prevents true understanding. Essential, and still eye-opening, *Orientalism* remains one of the most important books written about our divided world.

Perfectly Miserable Sarah Payne Stuart 2015-06-02 A wryly comic memoir that examines the pillars of New England WASP culture—class, history, family, money, envy, perfection, and, of course, real estate—through the lens of mothers and daughters. At eighteen, Sarah Payne Stuart fled her mother and all the other disapproving mothers of her too-perfect hometown of Concord, Massachusetts, only to return years later when she had children of her own. Whether to defy the previous generation or finally earn their approval and enter their ranks, she hurled herself into upper-crust domesticity full throttle. In the twenty years Stuart spent back in her hometown—in a series of ever more magnificent houses in ever grander neighborhoods—she was forced to connect with the cultural tradition of guilt and flawed parenting of a long legacy of local, literary women from Emerson's wife, to Hawthorne's, to the most famous and imposing of them all, Louisa May Alcott's iconic, guilt-tripping Marmee. When Stuart's own mother dies, she realizes that there is no one left to approve or disapprove. And so, with her suddenly grown children fleeing as she herself once did, Stuart leaves her hometown for the final time, bidding good-bye to the cozy ideals invented for her by Louisa May Alcott so many years ago, which may or may not ever have been based in reality.

A Bridging of Faiths N. J. Demerath III 2014-07-14 Homelessness, black neighborhood development, problems of abortion and sex education--how does religion affect the politics of an American city confronting these and other concerns? And what differences have "church and state" issues made in these struggles? In answering such questions, *A Bridging of Faiths* conveys a feeling of the urgent social theater of Springfield, Massachusetts, and provides both a contemporary and historical sense of how power shapes and is shaped by the civic culture. Recalling the immediacy and provocativeness of classic community studies like *Middletown* and *Yankee City*, the work draws on the voices of Springfielders themselves, while it exposes tendencies that prevail throughout contemporary America. This is a tale of two establishments: Protestant for three centuries, Springfield has been for the last fifty years a Catholic city. In looking at its emerging demographic, political, and economic patterns, the book shows how church and state interact at the local level, where lives are actually lived, as opposed to how the law and public opinion say they ought to interact at the more abstract federal level. While religion is more politically influential than some social scientists might have expected, it does not possess the kind of power feared by many constitutionalists. Politicians are seeking to redefine themselves in relation to religion and in other ways, and religion as a whole faces subtle crises of mobility, authority, and secularization. From these complexities, new patterns of cultural and political authority have emerged in Springfield, similar to those now affecting other American communities and the nation. The Gaithers and Southern Gospel Ryan P. Harper 2017-04-26 In *The Gaithers and Southern Gospel*, Ryan P. Harper examines songwriters Bill and Gloria Gaither's Homecoming video and concert series--a gospel music franchise that, since its beginning in 1991, has outperformed all Christian and much secular popular music on the American music market. The Homecomings represent "southern gospel." Typically that means a musical style popular among white evangelical Christians in the American South and Midwest, and it sometimes overlaps in style, theme, and audience with country music. The Homecomings' nostalgic orientation--their celebration of "traditional" kinds of American Christian life--harmonize well with southern gospel music, past and present. But amidst the backward gazes, the Homecomings also portend and manifest change. The Gaithers' deliberate racial integration of their stages, their careful articulation of a relatively inclusive evangelical theology, and their experiments with an array of musical forms demonstrate that the Homecoming is neither simplistically nostalgic, nor solely "southern." Harper reveals how the Gaithers negotiate a tension between traditional and changing community norms as they seek simultaneously to maintain and expand their audience as well as to initiate and respond to shifts within their fan base. Pulling from his field work at Homecoming concerts, behind the scenes with the Gaithers, and with numerous Homecoming fans, Harper reveals the Homecoming world to be a dynamic, complicated constellation in the formation of American religious identity.

Liquid Modernity Zygmunt Bauman 2013-07-10 In this new book, Bauman examines how we have moved away from a 'heavy' and 'solid', hardware-focused modernity to a 'light' and 'liquid', software-based modernity. This passage, he argues, has brought profound change to all aspects of the human condition. The new remoteness and un-reachability of global systemic structure coupled with the unstructured and under-defined, fluid state of the immediate setting of life-politics and human togetherness, call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history. This book is dedicated to this task. Bauman selects five of the basic concepts which have served to make sense of shared human life - emancipation, individuality, time/space, work and community - and traces their successive incarnations and changes of meaning. *Liquid Modernity* concludes the analysis undertaken in Bauman's two previous books *Globalization: The Human Consequences* and *In Search of Politics*. Together these volumes form a brilliant analysis of the changing conditions of social and political life by one of the most original thinkers writing today.

The ARML Power Contest Thomas Kilkelly 2015-01-02 The ARML (American Regions Math League) Power Contest is truly a unique competition in which a team of students is judged on its ability to discover a pattern, express the pattern in precise mathematical language, and provide a logical proof of its conjectures. Just as a team of students can be self-directed to solve each problem set, a teacher, math team coach, or math circle leader could take these ideas and questions and lead students into problem solving and mathematical discovery. This book contains thirty-seven interesting and engaging problem sets from the ARML Power Contests from 1994 to 2013. They are generally extensions of the high school mathematics classroom and often connect two remote areas of mathematics. Additionally, they provide meaningful problem situations for both the novice and the veteran mathlete. Thomas Kilkelly has been a mathematics

teacher for forty-three years. During that time he has been awarded several teaching honors and has coached many math teams to state and national championships. He has always been an advocate for more discovery, integration, and problem solving in the mathematics classroom. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents and teachers, and the mathematics profession. Titles in this series are co-published with the Mathematical Sciences Research Institute (MSRI).

The Topeka School Ben Lerner 2019-10-01 A NEW YORK TIMES, TIME, GQ, Vulture, and WASHINGTON POST TOP 10 BOOK OF THE YEAR ONE OF BARACK OBAMA'S FAVOURITE BOOKS OF THE YEAR Finalist for the Los Angeles Times Book Prize, and the National Book Critics Circle Award Shortlisted for the Rathbones Folio Prize Winner of the Hefner Heitz Kansas Book Award From the award-winning author of 10:04 and Leaving the Atocha Station, a tender and expansive family drama set in the American Midwest at the turn of the century, hailed by Maggie Nelson as Ben Lerner's "most discerning, ambitious, innovative, and timely novel to date." Adam Gordon is a senior at Topeka High School, class of '97. His mother, Jane, is a famous feminist author; his father, Jonathan, is an expert at getting "lost boys" to open up. They both work at a psychiatric clinic that has attracted staff and patients from around the world. Adam is a renowned debater, expected to win a national championship before he heads to college. He is one of the cool kids, ready to fight or, better, freestyle about fighting if it keeps his peers from thinking of him as weak. Adam is also one of the seniors who bring the loner Darren Eberheart--who is, unbeknownst to Adam, his father's patient--into the social scene, to disastrous effect. Deftly shifting perspectives and time periods, *The Topeka School* is the story of a family, its struggles and its strengths: Jane's reckoning with the legacy of an abusive father, Jonathan's marital transgressions, the challenge of raising a good son in a culture of toxic masculinity. It is also a riveting prehistory of the present: the collapse of public speech, the trolls and tyrants of the New Right, and the ongoing crisis of identity among white men.

Friends of Freedom Micah Alpaugh 2021-11-11 From the Sons of Liberty to British

reformers, Irish patriots, French Jacobins, Haitian revolutionaries and American Democrats, the greatest social movements of the Age of Atlantic Revolutions grew as part of a common, interrelated pattern. In this new transnational history, Micah Alpaugh demonstrates the connections between the most prominent causes of the era, as they drew upon each other's models to seek unprecedented changes in government. As Friends of Freedom, activists shared ideas and strategies internationally, creating a chain of broad-based campaigns that mobilized the American Revolution, British Parliamentary Reform, Irish nationalism, movements for religious freedom, abolitionism, the French Revolution, the Haitian Revolution, and American party politics. Rather than a series of distinct national histories, Alpaugh shows how these movements jointly responded to the Atlantic trends of their era to create a new way to alter or overthrow governments: mobilizing massive social movements.

Direct Jurisdiction Anselmo Reyes 2021-08-26 The second thematic volume in the series *Studies in Private International Law – Asia* looks into direct jurisdiction, that is, the situations in which the courts of 15 key Asian states (Mainland China, Hong Kong, Taiwan, Japan, South Korea, Malaysia, Singapore, Thailand, Vietnam, Cambodia, Myanmar, the Philippines, Indonesia, Sri Lanka, and India) are prepared to hear a case involving cross-border elements. For instance, where parties are habitually resident abroad and a dispute has only some, little or no connection with an Asian state, will the courts of that state accept jurisdiction and hear the case and (if so) on what conditions? More specifically, the book's chapters explore the circumstances in which different Asian states assume or decline jurisdiction not just in commercial matters, but also in other types of action (such as family, consumer and employment disputes). The Introduction defines terminology and identifies similarities in the approaches to direct jurisdiction taken by the 15 Asian states in civil and commercial litigation. Taking its cue from this, the Conclusion assesses whether there should be a multilateral convention or soft law instrument articulating principles of direct jurisdiction for Asia. The Conclusion also discusses possible trajectories that Asian states may be taking in respect of direct jurisdiction in light of the COVID-19 pandemic and the political tensions currently besetting the world. The book suggests that enacting suitable rules of direct jurisdiction requires an Asian state to strike a delicate balance between affording certainty and protecting its nationals. At heart, direct jurisdiction involves sometimes difficult policy considerations and is not just about drawing up lists of jurisdictional grounds and exceptions to them.

Identity in Post-Socialist Public Space Bohdan Cherkes 2021-11-30 This book is a comparative analysis of the architecture of central public spaces of capital cities in Central and Eastern Europe during the period of their authoritarian and post-authoritarian development. It demonstrates that national identity transformations cause structural changes in urban public spaces, and theorises identity and national identity within urban planning in order to explain the influence of historical, cultural, mental, social as well as ideological and political conditions on the processes of shaping and perceiving the architecture of public space. The book addresses the process of shaping and restructuring historic centres of European capital cities of Kiev, Moscow, Berlin, and Warsaw, which developed under authoritarian regime conditions throughout the 20th century and were characterised by ideological determinism and the influence of state ideology and politics on the architecture of public

spaces. The book will be useful for urban planners, architects, land management specialists, art historians, political scientists, and readers interested in the theory and history of cities, the fundamentals of urban planning and architecture, and the planning of cities and public spaces.

Subjects unto the Same King Jenny Hale Pulsipher 2014-01-14 Selected by Choice magazine as an Outstanding Academic Title Land ownership was not the sole reason for conflict between Indians and English, Jenny Pulsipher writes in

Subjects unto the Same King, a book that cogently redefines the relationship between Indians and colonists in seventeenth-century New England. Rather, the story is much more complicated—and much more interesting. It is a tale of two divided cultures, but also of a host of individuals, groups, colonies, and nations, all of whom used the struggle between and within Indian and English communities to promote their own authority. As power within New England shifted, Indians appealed outside the region—to other Indian nations, competing European colonies, and the English crown itself—for aid in resisting the overbearing authority of such rapidly expanding societies as the Massachusetts Bay Colony. Thus Indians were at the center—and not always on the losing end—of a contest for authority that spanned the Atlantic world. Beginning soon after the English settled in Plymouth, the power struggle would eventually spawn a devastating conflict—King Philip's War—and draw the intervention of the crown, resulting in a dramatic loss of authority for both Indians and colonists by century's end. Through exhaustive research, Jenny Hale Pulsipher has rewritten the accepted history of the Indian-English relationship in colonial New England, revealing it to be much more complex and nuanced than previously supposed.
