In the last decade, ultrasound-guided PICCs and Midline catheters - inserted by adequately trained physicians or nurses - have suddenly and widely spread in the field of venous access devices all over the world. The introduction and diffusion of PICCs in Italy has been historically linked to the GAVeCeLT association (the Italian Group of Long Term Venous Access Devices) and particularly to the authors' scientific and didactic activity. Furthermore, all the specifications regarding the materials to use and all the aspects related to device removal and replacement, as well as the different strategies for complications prevention, are thoroughly discussed.

Written in collaboration with certified nurse midwives, clinical nurse specialists, nurse practitioners, nutritionists, pharmacists, and physicians, it fosters a team approach to health care. Additionally, the authors explore complex chronic disease management, health promotion across the lifespan, and professional and legal issues such as reimbursement, billing, and the legal scope of practice. The Third Edition has a keen focus on gerontology to accommodate the AGNP specialty and to better assist the student or clinician in caring for the aging population.
