Reading Lyrics Robert Gottlieb 2000-11-21 A comprehensive anthology bringing together more than one thousand of the best American and English song lyrics of the twentieth century; an extraordinary celebration of a unique art form and an indispensable reference work and history that celebrates one of the twentieth century's most enduring and cherished legacies. *Reading Lyrics* begins with the first masters of the colloquial phrase, including George M. Cohan ("Give My Regards to Broadway"), P. G. Wodehouse ("Till the Clouds Roll By"), and Irving Berlin, whose versatility and career span the period from "Alexander's Ragtime Band" to "Annie Get Your Gun" and beyond. The Broadway musical emerges as a distinct dramatic form in the 1920s and 1930s, its evolution propelled by a trio of lyricists—Cole Porter, Ira Gershwin, and Lorenz Hart—whose explorations of the psychological and emotional nuances of falling in and out of love have lost none of their wit and sophistication. Their songs, including "Night and Day," "The Man I Love," and "Bewitched, Bothered and Bewildered," have become standards performed and recorded by generation after generation of singers. The lure of Broadway and Hollywood and the performing genius of such artists as Al Jolson, Fred Astaire, Ethel Waters, Judy Garland, Frank Sinatra, and Ethel Merman inspired a remarkable array of talented writers, including Dorothy Fields ("A Fine Romance," "I Can't Give You Anything but Love"), Frank Loesser ("Guys and Dolls"), Oscar Hammerstein II (from the groundbreaking "Show Boat" of 1927 through his extraordinary collaboration with Richard Rodgers), Johnny Mercer, Yip Harburg, Andy Razaf, Noël Coward, and Stephen Sondheim. *Reading Lyrics* also celebrates the work of dozens of superb craftsmen whose songs remain known, but who today are themselves less known—writers like Haven Gillespie (whose "Santa Claus Is Coming to Town" may be the most widely recorded song of its era); Herman Hupfeld (not only the composer/lyricist of "As Time Goes By" but also of "Are You Makin' Any Money?" and "When Yuba Plays the Rumba on the Tuba"); the great light versifier Ogden Nash ("Speak Low," "I'm a Stranger Here Myself," and, yes, "The Sea-Gull and the Ea-Gull"); Don Raye ("Boogie Woogie Bugle Boy," "Mister Five by Five," and, of course, "Milkman, Keep Those Bottles Quiet"); Bobby Troup ("Route 66"); Billy Strayhorn (not only for the omnipresent "Lush Life" but for "Something to Live For" and "A Lonely Coed"); Peggy Lee (not only a superb singer but also an original and appealing lyricist); and the unique Dave Frishberg ("I'm Hip," "Peel Me a

Grape,” “Van Lingo Mungo”). The lyricists are presented chronologically, each introduced by a succinct biography and the incisive commentary of Robert Gottlieb and Robert Kimball.

Good and Cheap Leanne Brown 2015-07-14 A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master’s candidate at NYU, Leanne Brown asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government’s Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to make fundamentally smart, healthful food choices. The idea for Good and Cheap is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who retweeted the link to the campaign; Francis Lam, who called it “Terrific!”; and Michael Pollan, who cited it as a “cool kickstarter.” In the same way that TOMS turned inexpensive, stylish shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace.

Neurotribes Steve Silberman 2016-08-23 This New York Times–bestselling book upends conventional thinking about autism and suggests a broader model for acceptance, understanding, and full participation in society for people who think differently. What is autism? A lifelong disability, or a naturally occurring form of cognitive difference akin to certain forms of genius? In truth, it is all of these things and more—and the future of our society depends on our understanding it. Wired reporter Steve Silberman unearths the secret history of autism, long suppressed by the same clinicians who became famous for discovering it, and finds surprising answers to the crucial question of why the number of diagnoses has soared in recent years. Going back to the earliest days of autism research, Silberman offers a gripping narrative of Leo Kanner and Hans Asperger, the research pioneers who defined the scope of autism in profoundly different ways; he then goes on to explore the game-changing concept of neurodiversity. *NeuroTribes* considers the idea that neurological differences such as autism, dyslexia, and ADHD are not errors of nature or products of the toxic modern world, but the result of natural variations in the human genome. This groundbreaking book will reshape our understanding of the history, meaning, function, and implications of neurodiversity in our world.

Berry & Kohn's Operating Room Technique, 12/e Nancymarie Fortunato Phillips 2016 For over 50 years, *Berry & Kohn's Operating Room Technique, 13th Edition* has been the text of choice for understanding basic surgical principles and techniques. The Other Wes Moore Wes Moore 2011-01-11 NEW YORK TIMES BESTSELLER • The “compassionate” (People), “startling” (Baltimore Sun), “moving” (Chicago Tribune) true story of two kids with the same name from the city: One went on to be a Rhodes Scholar, decorated combat veteran, White House Fellow, and business leader. The other is serving a life sentence in prison. In development as a feature film executive produced by Stephen Curry, who selected the book as his “Underrated” Book Club Pick with Literati The chilling truth is that his story could have been mine. The tragedy is that my story could have been his. In December 2000, the Baltimore Sun ran a small piece about Wes Moore, a local student who had just received a Rhodes Scholarship. The same paper also ran a series of articles about four young men who had allegedly killed a police officer in a spectacularly botched armed robbery. The police were still hunting for two of the suspects

who had gone on the lam, a pair of brothers. One was named Wes Moore. Wes just couldn't shake off the unsettling coincidence, or the inkling that the two shared much more than space in the same newspaper. After following the story of the robbery, the manhunt, and the trial to its conclusion, he wrote a letter to the other Wes, now a convicted murderer serving a life sentence without the possibility of parole. His letter tentatively asked the questions that had been haunting him: Who are you? How did this happen? That letter led to a correspondence and relationship that have lasted for several years. Over dozens of letters and prison visits, Wes discovered that the other Wes had had a life not unlike his own: Both had had difficult childhoods, both were fatherless; they'd hung out on similar corners with similar crews, and both had run into trouble with the police. At each stage of their young lives they had come across similar moments of decision, yet their choices would lead them to astonishingly different destinies. Told in alternating dramatic narratives that take readers from heart-wrenching losses to moments of surprising redemption, *The Other Wes Moore* tells the story of a generation of boys trying to find their way in a hostile world.

My Life and Work Henry Ford 2018-06-25 Henry Ford (July 30, 1863 – April 7, 1947) was an American industrialist, the founder of the Ford Motor Company, and sponsor of the development of the assembly line technique of mass production. Although Ford did not invent the automobile or the assembly line, he

developed and manufactured the first automobile that many middle class Americans could afford. This is his story in his own words.

The Gentle Art of Swedish Death Cleaning Margareta Magnusson 2018-01-02 A charming, practical, and unsentimental approach to putting a home in order while reflecting on the tiny joys that make up a long life. In Sweden there is a kind of decluttering called döstädning, dö meaning “death” and städning meaning “cleaning.” This surprising and invigorating process of clearing out unnecessary belongings can be undertaken at any age or life stage but should be done sooner than later, before others have to do it for you. In *The Gentle Art of Swedish Death Cleaning*, artist Margareta Magnusson, with Scandinavian humor and wisdom, instructs readers to embrace minimalism. Her radical and joyous method for putting things in order helps families broach sensitive conversations, and makes the process uplifting rather than overwhelming. Margareta suggests which possessions you can easily get rid of (unworn clothes, unwanted presents, more plates than you’d ever use) and which you might want to keep (photographs, love letters, a few of your children’s art projects). Digging into her late husband’s tool shed, and her own secret drawer of vices, Margareta introduces an element of fun to a potentially daunting task. Along the way readers get a glimpse into her life in Sweden, and also become more comfortable with the idea of letting go.

The Billionaire Murders Kevin Donovan 2019-10-29 NATIONAL BESTSELLER A top journalist crosses the yellow tape to investigate a shocking high-society crime. Billionaires, philanthropists, socialites . . . victims. Barry and Honey Sherman appeared to lead charmed lives. But the world was shocked in late 2017 when

their bodies were found in a bizarre tableau in their elegant Toronto home. First described as murder-suicide — belts looped around their necks, they were found seated beside their basement swimming pool — police later ruled it a staged, targeted double murder. Nothing about the case made sense to friends of the founder of one of the world's largest generic pharmaceutical firms and his wife, a powerhouse in Canada's charity world. Together, their wealth has been estimated at well over \$4.7 billion. There was another side to the story. A strategic genius who built a large generic drug company — Apotex Inc. — Barry Sherman was a self-described workaholic, renowned risk-taker, and disruptor during his fifty-year career. Regarded as a generous friend by many, Sherman was also feared by others. He was criticized for stifling academic freedom and using the courts to win at all costs. Upset with building issues at his mansion, he sued and recouped millions from tradespeople. At the time of his death, Sherman had just won a decades-old legal case involving four cousins who wanted 20 percent of his fortune. Toronto Star investigative journalist Kevin Donovan chronicles the unsettling story from the beginning, interviewing family members, friends, and colleagues, and sheds new light on the Shermans' lives and the disturbing double murder. Deeply researched and authoritative, *The Billionaire Murders* is a compulsively readable tale of a strange and perplexing crime.

How Organizations Develop Activists Hahrie Han 2014 Why are some civic associations better than others at getting--and keeping--people involved in activism? From MoveOn.org to the National Rifle Association, Health Care for America Now to the Sierra Club, membership-based civic associations constantly seek to engage

people in civic and political action. What makes some more effective than others? Using in-person observations, surveys, and field experiments, this book compares organizations with strong records of engaging people in health and environmental politics to those with weaker records. To build power, civic associations need quality and quantity (or depth and breadth) of activism. They need lots of people to take action and also a cadre of leaders to develop and execute that activity. Yet, models for how to develop activists and leaders are not necessarily transparent. This book provides these models to help associations build the power they want and support a healthy democracy. In particular, the book examines organizing, mobilizing, and lone wolf models of engagement and shows how highly active associations blend mobilizing and organizing to transform their members' motivations and capacities for involvement. This is not a simple story about the power of offline versus online organizing. Instead, it is a story about how associations can blend both online and offline strategies to build their activist base. In this compelling book, Hahrie Han explains how civic associations can invest in their members and build the capacity they need to inspire action.

Planning with Kids Nicole Avery 2011-05-04 The ultimate guide for parents who dream of having a little less chaos and a lot more time for the good things in life. Written by mother of five, Nicole Avery, this book shows harried parents how, with just a bit of planning, family life can become easier to manage, less stressful, and decidedly more fun. "Dream on," you say? "I might as well try to herd cats as to get my kids to follow a lot of arbitrary rules!" And Nicole would agree, which is why *Planning with Kids* isn't like any other parenting guide out there. It was inspired by Nicole's blog of the same name, which, over the past three years, has garnered a huge audience of likeminded parents who have achieved nothing short of miraculous results following her advice. While other prescriptive guides offer mums and dads cook-cutter solutions to the challenges of raising kids, this handbook focuses on one simple, straightforward idea: by implementing a few simple strategies for how you do things, you'll make more time for you to be you and your kids to be kids. You'll find strategies for streamlining and enhancing everything from the routines of daily life, to family relationships, to budgeting and finances, playtime and much more! Contains a full section on menus and cooking, including recipes, supported online by a planning-with-family meal planner. Divided into sections so that readers can dip-in and dip-out for information as they need it as their family expands and grows up!

Miracle in the Mountains Harnett Thomas Kane 1956 A biography of Martha Berry and the story of how she built the Berry Schools.

Banana Dan Koeppel 2008 From its early beginnings in Southeast Asia, to the machinations of the United Fruit Company in Costa Rica and Central America, the banana's history and its fate as a victim of fungus are explored.

Parenting Matters National Academies of Sciences, Engineering, and Medicine 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Collecting: An Unruly Passion Werner Muensterberger 2014-07-14 From rare books, valuable sculpture and paintings, the relics of saints, and porcelain and other precious items, through stamps, textiles, military ribbons, and shells, to baseball cards, teddy bears, and mugs, an amazing variety of objects have engaged and even obsessed collectors through the ages. With this captivating book the psychoanalyst Werner Muensterberger provides the first extensive psychological examination of the emotional sources of the never-ending longing for yet another collectible. Muensterberger's roster of driven acquisition-hunters includes the dedicated, the serious, and the infatuated, whose chronic restlessness can be curbed--and then merely temporarily--only by purchasing, discovering, receiving, or even stealing a new "find." In an easy, conversational style, the author discusses the eccentricities of heads of state, literary figures, artists, and psychoanalytic patients, all possessed by a need for magic relief from despair and helplessness--and for the self-healing implied in the phrase "I can't

live without it!" The sketches here are diverse indeed: Walter Benjamin, Mario Praz, Catherine the Great, Poggio Bracciolini, Brunelleschi, and Jean de Berry, among others. The central part of the work explores in detail the personal circumstances and life history of three individuals: a contemporary collector, Martin G; the celebrated British book and manuscript collector Sir Thomas Phillipps, who wanted one copy of every book in the world; and the great French novelist Honoré de Balzac, a compulsive collector of bric-a-brac who expressed his empathy for the acquisitive passions of his collector protagonist in *Cousin Pons*. In addition, Muensterberger takes the reader on a charming tour of collecting in the Renaissance and looks at collecting during the Golden Age of Holland, in the seventeenth century. Throughout, we enjoy the author's elegant variations on a complicated theme, stated, much too simply, by John Steinbeck: "I guess the truth is that I simply like junk." Originally published in 1993. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Although Of Course You End Up Becoming Yourself David Lipsky 2010-04-13 NOW A MAJOR MOTION PICTURE, STARRING JASON SEGAL AND JESSE EISENBERG, DIRECTED BY JAMES PONSOLDT An indelible portrait of David Foster Wallace, by turns funny and inspiring, based on a five-day trip with award-winning writer David Lipsky during Wallace's *Infinite Jest* tour In David Lipsky's view, David Foster Wallace was the best young writer in America. Wallace's pieces for Harper's magazine in the '90s were, according to Lipsky, "like hearing for the first time the brain voice of everybody I knew: Here was how we all talked, experienced, thought. It was like smelling the damp in the air, seeing the first flash from a storm a mile away. You knew something gigantic was coming." Then Rolling Stone sent Lipsky to join Wallace on the last leg of his book tour for *Infinite Jest*, the novel that made him internationally famous. They lose to each other at chess. They get iced-in at an airport. They dash to Chicago to catch a make-up flight. They endure a terrible reader's escort in Minneapolis. Wallace does a reading, a signing, an NPR appearance. Wallace gives in and imbibes titanic amounts of hotel television (what he calls an "orgy of spectation"). They fly back to Illinois, drive home, walk Wallace's dogs. Amid these everyday events, Wallace tells Lipsky remarkable things—everything he can about his life, how he feels, what he thinks, what terrifies and fascinates and confounds him—in the writing voice Lipsky had come to love. Lipsky took notes, stopped envying him, and came to feel about him—that grateful, awake feeling—the same way he felt about *Infinite Jest*. Then Lipsky heads to the airport, and Wallace goes to a dance at a Baptist church. A biography in five days, *Although Of Course You End Up Becoming Yourself* is David Foster Wallace as few experienced this great American writer. Told in his own words, here is Wallace's own story, and his astonishing, humane, alert way of looking at the world; here are stories of being a young writer—of being young generally—trying to knit together your ideas of who you should be and who other people expect you to be, and of being young in March of 1996. And of what it was like to be with and—as he tells it—what it was like to become David Foster Wallace. "If you can think of times in your life that you've treated people with extraordinary decency and love, and pure uninterested concern, just because they were valuable as human beings. The ability to do that with ourselves.

To treat ourselves the way we would treat a really good, precious friend. Or a tiny child of ours that we absolutely loved more than life itself. And I think it's probably possible to achieve that. I think part of the job we're here for is to learn how to do it. I know that sounds a little pious." —David Foster Wallace

Don't Leave the Story in the Book Mary Hynes-Berry 2015-04-24 Drawing from 30 years of teaching and professional development experience, this book offers a roadmap for using children's literature to provide authentic learning. Featuring a storytellers voice, each chapter includes a case study about how a particular fiction or nonfiction work can be used in an early childhood classroom; a series of open-ended questions to help readers construct their own inquiry units; and a bibliography of childrens literature. This book provides a unique synthesis of ideas based on constructivist approaches to learning, including the importance of positive dispositions and learning communities, the nature of higher order thinking, and the relationship between methods such as guided inquiry in the sciences and balanced literacy.

American Entrepreneur Larry Schweikart 2009-09-23 Ever since the first colonists landed in the New World, Americans have forged ahead in their quest to make good on promises of capitalism and independence. *American Entrepreneur* vividly illustrates the history of business in the United States from the point of view of the enterprising men and women who made it happen. Weaving stirring narrative with economic analysis, this historical deep dive recounts the successes and failures of some of the most iconic business people to grace our history books--from the founding of our country to the present day. You'll learn about how Eli Whitney changed the shape of the American business landscape; how the Civil War impacted the economy, and how it was renewed by the subsequent dominance of Andrew Carnegie and J. P. Morgan; how Asa Candler, W. K. Kellogg, Henry Ford, and J.C. Penney led the rise of the consumer marketplace; and what Warren Buffett's, Michael Milken's, and even Martha Stewart's experience in the "New Economy" was like in the 1990s--and how that economy continues today. It is an adventure to start a business, and the greatest risk takers in that adventure are entrepreneurs. This is the epic story of America's entrepreneurs and how they created the economy we enjoy today.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this

book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Bookish and the Beast Ashley Poston 2020-08-04 A tale as old as time is made new in Ashley Poston's fresh, geeky retelling of *Beauty and the Beast*—now with a bonus *Starfield* story! Rosie Thorne is feeling stuck—on her college application essays, in her small town, and on that mysterious General Sord cosplayer she met at *ExcelsiCon*. Most of all, she's stuck in her grief over her mother's death. Her only solace was her late mother's library of rare *Starfield* novels, but even that disappeared when they sold it to pay off hospital bills. On the other hand, Vance Reigns has been Hollywood royalty for as long as he can remember—with all the privilege and scrutiny that entails. When a tabloid scandal catches up to him, he's forced to hide out somewhere the paparazzi would never expect to find him: *Small Town USA*. At least there's a library in the house. Too bad he doesn't read. When Vance's and Rosie's paths collide, sparks do not fly. But as they begrudgingly get to know each other, their careful masks come off—and they may just find that there's more risk in shutting each other out than in opening their hearts.

Once in a Great City David Maraniss 2015 "As David Maraniss captures it with power and affection, Detroit summed up America's path to music and prosperity that was already past history. It's 1963 and Detroit is on top of the world. The city's leaders are among the most visionary in America. It was the American auto makers' best year; the revolution in music and politics was underway. Reuther's UAW had helped lift the middle class. The time was full of promise. *Once in a Great City* shows that the shadows of collapse were evident even then. Detroit at its peak was threatened by its own design. It was being abandoned by the new world. Yet so much of what Detroit gave America lasts."--

A Revolution Down on the Farm Paul K. Conkin 2008-09-01 At a time when food is becoming increasingly scarce in many parts of the world and food prices are skyrocketing, no industry is more important than agriculture. Humans have been farming for thousands of years, and yet agriculture has undergone more fundamental changes in the past 80 years than in the previous several centuries. In 1900, 30 million American farmers tilled the soil or tended livestock; today there are fewer than 4.5 million farmers who feed a population four times larger than it was at the beginning of the century. Fifty years ago, the planet could not have sustained a population of 6.5 billion; now, commercial and industrial agriculture ensure that millions will not die from starvation. Farmers are able to feed an exponentially growing planet because the greatest industrial revolution in history has occurred in agriculture since 1929, with U.S. farmers leading the way. Productivity on American farms has increased tenfold, even as most small farmers and tenants have been forced to find other work. Today, only 300,000 farms produce approximately ninety percent of the total output, and overproduction, largely subsidized by government programs and policies, has become the hallmark of modern agriculture. *A Revolution Down on the Farm: The Transformation of American Agriculture since 1929* charts the profound changes in farming that have occurred during author Paul K. Conkin's lifetime. His personal experiences growing up on a small Tennessee farm complement compelling statistical data as he explores America's vast agricultural transformation and considers its social, political, and economic consequences. He examines the history of American agriculture, showing how New Deal innovations evolved into convoluted commodity programs following World War II. Conkin assesses the skills, new technologies, and government policies that helped transform farming in America and suggests how new legislation might affect farming in decades to come. Although the increased production and mechanization of farming has been an economic success story for Americans, the costs are becoming increasingly apparent. Small farmers are put out of business when they cannot compete with giant, non-diversified corporate farms. Caged chickens and hogs in factory-like facilities or confined dairy cattle require massive amounts of chemicals and hormones ultimately ingested by consumers. Fertilizers, new organic chemicals, manure disposal, and genetically modified seeds have introduced environmental problems that are still being discovered. *A Revolution Down on the Farm* concludes with an evaluation of farming in the twenty-first century and a distinctive meditation on alternatives to our present large scale, mechanized, subsidized, and fossil fuel and chemically dependent system.
