Ink Amanda Sun 2013-07-01 Ink is in their blood. On the heels of a family tragedy, Katie Greene must move halfway across the world. Stuck with her aunt in Shizuoka, Japan, Katie feels lost. Alone. She doesn't know the language, she can barely hold a pair of chopsticks and she can't seem to get the hang of taking her shoes off whenever she enters a building. When Katie meets aloof but gorgeous Tomohiro, the star of the school's kendo team, she is intrigued by him...and a little scared. His tough attitude seems meant to keep her at a distance, and when they're near each other, strange things happen. Pens explode. Ink drips from nowhere. And unless Katie is seeing things, drawings come to life. Somehow Tomo is connected to the kami, powerful ancient beings who once ruled Japan—and as feelings develop between Katie and Tomo, things begin to spiral out of control. The wrong people are starting to ask questions, and if they discover the truth, no one will be safe.

The British Book Trade and Spanish American Independence Eugenia Roldán Vera 2017-03-02 The British Book Trade and Spanish American Independence is a pioneering study of the export of books from Britain to early-independent Spanish America, which considers all phases of production, distribution, reading, and re-writing of British books in the region, and explores the role that these works played in the formation of national identities in the new countries. Analysing in particular the publishing house of Rudolph Ackermann, which dominated the export of British books in Spanish to the former colonies in the 1820s, it discusses the ways in which the printed form of these publications affected the knowledge conveyed by them. After a survey of the peculiar characteristics of print culture in early-independent Spanish America and the trends in

the import of European books in the region, the author examines the operation of Ackermann's publishing enterprise. She shows how the collaborative nature of this enterprise, involving a number of Spanish American diplomats as sponsors and Spanish exiles as writers and translators, shaped the characteristics of its publications, and how the notion of 'useful knowledge' conveyed by them was deployed in the service of both commercial and educational concerns. The hitherto unexplored mechanisms of book import, distribution, wholesale and retailing in Spanish America in the 1820s are also analysed as is the way in which the significance of the knowledge transmitted by those books shifted in the course of their production and distribution. The author examines how the question-and-answer form of Ackermann's textbooks constrained both publishers and writers and oriented their readers' relation with the texts. She then looks at the various ways in which foreign knowledge was appropriated in the construction of individual, social, national, and continental identities; this is done through the study of a number of individual reading experiences and through the analysis of the editions and adaptations of Ackermann's textbooks during the nineteenth century.

Into the Archive Kathryn Burns 2010-09-27 Writing has long been linked to power. For early modern people on both sides of the Atlantic, writing was also the province of notaries, men trained to cast other people's words in official forms and make them legally true. Thus the first thing Columbus did on American shores in October 1492 was have a notary record his claim of territorial possession. It was the written, notarial word—backed by all the power of Castilian enforcement—that first constituted Spanish American empire. Even so, the Spaniards who invaded America in 1492 were not fond of their notaries, who had a dismal reputation for falsehood and greed. Yet Spaniards could not do without these men. Contemporary scholars also rely on the vast paper trail left by notaries to make sense of the Latin American past. How then to approach the question of notarial truth? Kathryn Burns argues that the archive itself must be historicized. Using the case of colonial Cuzco, she examines the practices that shaped document-making. Notaries were businessmen, selling clients a product that conformed to local “custom” as well as Spanish templates. Clients, for their part, were knowledgeable consumers, with strategies of their own for getting what they wanted. In this inside story of the early modern archive, Burns offers a wealth of possibilities for seeing sources in fresh perspective.

My intended goal is to provide solace and comfort to those individuals who feel lonely and insecure. It is through informal lyrical rhyme in the poems which are inspired from the middle ages short verse that I bring forth my poetry. For I myself am suffering from an illness in which I search for support in others through readings or any other source that is a fountain of positive affirmations.

Franciscan Spirituality and Mission in New Spain, 1524-1599 Dr Steven E Turley 2014-02-28 Franciscans in sixteenth-century New Spain were deeply ambivalent about their mission work. Fray Juan de Zumárraga, the first archbishop of Mexico, begged the king to find someone else to do his job so that he could go home. Fray Juan de Ribas, one of the original twelve 'apostles of Mexico' and a founding pillar of the church in New Spain, later fled with eleven other friars into the wilderness to escape the demands of building that church. Fray Jerónimo de Mendieta, having returned from an important preaching tour in New Spain, wrote to his superior that he did not want to enlist again, and that the only way he would return to the mission field was if God dragged him by the hair. This discontent was widespread, grew stronger with time, and carried important consequences for the friars' interactions with indigenous peoples, their Catholic co-laborers, and colonial society at large. This book examines that discontent and seeks to explain why the exhilaration of joining such a 'glorious' enterprise so often gave way to grinding discontent. The core argument is that, despite St. Francis's own longing to do mission work, his followers in New Spain found that effective evangelization in a frontier context was fundamentally incompatible with their core spirituality. Bringing together two streams of historiography that have rarely overlapped - spirituality and missions - this book marks a strong contribution to the history of spirituality in both Latin America and Europe, as well as to the growing fields of transatlantic and world history.

Missionary Linguistics V / Lingüística Misionera V Otto Zwartjes 2014-04-15 The object of this volume is the study of missionary translation practices which occur within a colonial context of political domination and spiritual conquest. Missionary translation becomes especially manifest in bilingual ethnographic descriptions, in (bilingual) catechisms and in the missionaries' lexicographic condensation of bilingual dictionaries. The study of these instances permits the analysis and interpretation of their guiding principles, their translation practice and underlying reasoning. It also permits the modern linguist to discern semantic changes that can be revealed in these missionary translations over certain periods. Up to now there has hardly been any study available that focuses on translation in missionary sources, of the different traditions in the Americas or Asia. This book will

fill this gap, addressing the legacy of missionary translation practices and theories, the role of translation in evangelization and its particular form in the context of colonialism, the creation of loans from Spanish or Latin or equivalents or paraphrases in the indigenous languages in texts and dictionaries as translation strategies followed in bilingual editions. The process of acculturation and transculturation imposed by European religious systems is noted. This volume presents research on languages such as Nahuatl, Tarascan (Pur'épecha), Zapotec, Tamil, Chinese, Japanese, Pangasinán, and other Austronesian languages from the Philippines.
