**Summer Hours at the Robbers Library** Sue Halpern 2018-02-27 From journalist and author Sue Halpern comes a wry, observant look at contemporary life and its refugees. Halpern's novel is an unforgettable tale of family...the kind you come from and the kind you create. People are drawn to libraries for all kinds of reasons. Most come for the books themselves, of course; some come to borrow companionship. For head librarian Kit, the public library in Riverton, New Hampshire, offers what she craves most: peace. Here, no one expects Kit to talk about the calamitous events that catapulted her out of what she thought was a settled, suburban life. She can simply submerge herself in her beloved books and try to forget her problems. But that changes when fifteen-year-old, home-schooled Sunny gets arrested for shoplifting a dictionary. The judge throws the book at Sunny—literally—assigning her to do community service at the library for the summer. Bright, curious, and eager to connect with someone other than her off-the-grid hippie parents, Sunny coaxes Kit out of her self-imposed isolation. They're joined by Rusty, a Wall Street high-flyer suddenly crashed to earth. In this little library that has become the heart of this small town, Kit, Sunny, and Rusty are drawn to each other, and to a cast of other offbeat regulars. As they come to terms with how their lives have unraveled, they also discover how they might knit them together again and finally reclaim their stories.

**Virgil Wander** Leif Enger 2018-10-02 The first novel in ten years from award-winning, million-copy bestselling author Leif Enger, *Virgil Wander* is an enchanting and timeless all-American story that follows the inhabitants of a small Midwestern town in their quest to revive its flagging heart Midwestern movie house owner Virgil Wander is “cruising along at medium altitude” when his car flies off the road into icy Lake Superior. Virgil survives but his language and memory are altered and he emerges into a world no longer familiar to him. Awakening in this new life, Virgil begins to piece together his personal history and the lore of his broken town, with the help of a cast of affable and curious locals—from Rune, a twinkling, pipe-smoking, kite-flying stranger investigating the mystery of his disappeared son; to Nadine, the reserved, enchanting wife of the vanished man, to Tom, a journalist and Virgil’s oldest friend; and various members of the Pea family who must confront tragedies of their own. Into this community returns a shimmering prodigal son who may hold the key to reviving their town. With intelligent humor and captivating whimsy, Leif Enger conjures a remarkable portrait of a region and its residents, who, for reasons of choice or circumstance, never made it out of their defunct industrial district. Carried aloft by quotidian pleasures including movies, fishing, necking in parked cars, playing baseball and falling in love, *Virgil Wander* is a swift, full journey into the heart and heartache of an often overlooked American Upper Midwest by a “formidably gifted” (Chicago Tribune) master storyteller.

**Heartland** Sarah Smarsh 2019-09-03 \*Finalist for the National Book Award\* \*Finalist for the Kirkus Prize\*

\*Instant New York Times Bestseller\* \*Named a Best Book of the Year by NPR, New York Post,

BuzzFeed, Shelf Awareness, Bustle, and Publishers Weekly\* An essential read for our times: an eye-opening memoir of working-class poverty in America that will deepen our understanding of the ways in which class shapes our country and “a deeply humane memoir that crackles with clarifying insight”.\*

Sarah Smarsh was born a fifth generation Kansas wheat farmer on her paternal side, and the product of generations of teen mothers on her maternal side. Through her experiences growing up on a farm thirty miles west of Wichita, we are given a unique and essential look into the lives of poor and working class Americans living in the heartland. During Sarah’s turbulent childhood in Kansas in the 1980s and 1990s, she enjoyed the freedom of a country childhood, but observed the painful challenges of the poverty around her; untreated medical conditions for lack of insurance or consistent care, unsafe job conditions, abusive relationships, and limited resources and information that would provide for the upward mobility that is the American Dream. By telling the story of her life and the lives of the people she loves with clarity and precision but without judgement, Smarsh challenges us to look more closely at the class divide in our country. Beautifully written, in a distinctive voice, Heartland combines personal narrative with powerful analysis and cultural commentary, challenging the myths about people thought to be less because they earn less. “Heartland is one of a growing number of important works—including Matthew Desmond’s Evicted and Amy Goldstein’s Janesville—that together merit their own section in nonfiction aisles across the country: America’s postindustrial decline...Smarsh shows how the false promise of the ‘American dream’ was used to subjugate the poor. It’s a powerful mantra” \*(The New York Times Book Review).

**Technology and the City** Michael Nagenborg 2021-01-25 The contributions in this volume map out how technologies are used and designed to plan, maintain, govern, demolish, and destroy the city. The chapters demonstrate how urban technologies shape, and are shaped, by fundamental concepts and principles such as citizenship, publicness, democracy, and nature. The many authors herein explore how to think of technologically mediated urban space as part of the human condition. The volume will thus contribute to the much-needed discussion on technology-enabled urban futures from the perspective of the philosophy of technology. This perspective also contributes to the discussion and process of making cities 'smart' and just. This collection appeals to students, researchers, and professionals within the fields of philosophy of technology, urban planning, and engineering.

The Glass Universe Dava Sobel 2017-10-31 From #1 New York Times bestselling author Dava Sobel, the "inspiring" (People), little-known true story of women's landmark contributions to astronomy A New York Times Book Review Notable Book Named one of the best books of the year by NPR, The Economist, Smithsonian, Nature, and NPR's Science Friday Nominated for the PEN/E.O. Wilson Literary Science Writing Award "A joy to read." –The Wall Street Journal In the mid-nineteenth century, the Harvard College Observatory began employing women as calculators, or "human computers," to interpret the observations their male counterparts made via telescope each night. At the outset this group included the wives, sisters, and daughters of the resident astronomers, but soon the female corps included graduates of the new women's colleges—Vassar, Wellesley, and Smith. As photography transformed the practice of astronomy, the ladies turned from computation to studying the stars captured nightly on glass photographic plates. The "glass universe" of half a million plates that Harvard amassed over the ensuing decades—through the generous support of Mrs. Anna Palmer Draper, the widow of a pioneer in stellar photography—enabled the women to make extraordinary discoveries that attracted worldwide acclaim.

They helped discern what stars were made of, divided the stars into meaningful categories for further research, and found a way to measure distances across space by starlight. Their ranks included Williamina Fleming, a Scottish woman originally hired as a maid who went on to identify ten novae and more than three hundred variable stars; Annie Jump Cannon, who designed a stellar classification system that was adopted by astronomers the world over and is still in use; and Dr. Cecilia Helena Payne, who in 1956 became the first ever woman professor of astronomy at Harvard—and Harvard’s first female department chair. Elegantly written and enriched by excerpts from letters, diaries, and memoirs, *The Glass Universe* is the hidden history of the women whose contributions to the burgeoning field of astronomy forever changed our understanding of the stars and our place in the universe.

*I Can't Breathe* Matt Taibbi 2017-10-24 A work of riveting literary journalism that explores the roots and repercussions of the infamous killing of Eric Garner by the New York City police—from the bestselling author of *The Divide* NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE WASHINGTON POST On July 17, 2014, a forty-three-year-old black man named Eric Garner died on a Staten Island sidewalk after a police officer put him in what has been described as an illegal chokehold during an arrest for selling bootleg cigarettes. The final moments of Garner’s life were captured on video and seen by millions. His agonized last words, “I can’t breathe,” became a rallying cry for the nascent Black Lives Matter protest movement. A grand jury ultimately declined to indict the officer who wrestled Garner to the pavement. Matt Taibbi’s deeply reported retelling of these events liberates Eric Garner from the abstractions of newspaper accounts and lets us see the man in full—with all his flaws and contradictions intact. A husband and father with a complicated personal history, Garner was neither villain nor victim, but a fiercely proud individual determined to do the best he could for his family, bedeviled by bad luck, and ultimately subdued by forces beyond his control. In America, no miscarriage of justice exists in isolation, of course, and in *I Can’t Breathe* Taibbi also examines the conditions that made this tragedy possible. Featuring vivid vignettes of life on the street and inside our Kafkaesque court system, Taibbi’s

kaleidoscopic account illuminates issues around policing, mass incarceration, the underground economy, and racial disparity in law enforcement. No one emerges unsullied, from the conservative district attorney who half-heartedly prosecutes the case to the progressive mayor caught between the demands of outraged activists and the foot-dragging of recalcitrant police officials. A masterly narrative of urban America and a scathing indictment of the perverse incentives built into our penal system, *I Can't Breathe* drills down into the particulars of one case to confront us with the human cost of our broken approach to dispensing criminal justice. "Brilliant . . . Taibbi is unsparing in his excoriation of the system, police, and courts. . . . This is a necessary and riveting work."—Booklist (starred review)

**Give Me a Fast Ship** Tim McGrath 2015-07-07 WINNER OF THE SAMUEL ELIOT MORISON AWARD FOR NAVAL LITERATURE • "A meticulous, adrenaline-filled account of the earliest days of the Continental Navy."—New York Times Bestselling Author Laurence Bergreen America in 1775 was on the verge of revolution—or, more likely, disastrous defeat. After the bloodshed at Lexington and Concord, England's King George sent hundreds of ships westward to bottle up American harbors and prey on American shipping. Colonists had no force to defend their coastline and waterways until John Adams of Massachusetts proposed a bold solution: The Continental Congress should raise a navy. The idea was mad. The Royal Navy was the mightiest floating arsenal in history, with a seemingly endless supply of vessels. More than a hundred of these were massive "ships of the line," bristling with up to a hundred high-powered cannon that could level a city. The British were confident that His Majesty's warships would quickly bring the rebellious colonials to their knees. They were wrong. Beginning with five converted merchantmen, America's sailors became formidable warriors, matching their wits, skills, and courage against the best of the British fleet. Victories off American shores gave the patriots hope—victories led by captains such as John Barry, the fiery Irish-born giant; fearless Nicholas Biddle, who stared down an armed mutineer; and James Nicholson, the underachiever who finally redeemed himself with an inspiring display of coolness and bravery. Meanwhile, along the British coastline, daring raids by handsome, cocksure John Paul Jones and the "Dunkirk Pirate," Gustavus Conyngham—who was captured and sentenced to hang but tunneled under his cell and escaped to fight again—sent fear throughout England. The adventures of these men and others on both sides of the struggle rival anything from *Horatio Hornblower* or *Lucky Jack Aubrey*. In the end, these rebel sailors, from the quarterdeck to the forecastle,

contributed greatly to American independence. Meticulously researched and masterfully told, *Give Me a Fast Ship* is a rousing, epic tale of war on the high seas—and the definitive history of the American Navy during the Revolutionary War.

*Twee* Marc Spitz 2014-06-03 New York Times, Spin, and Vanity Fair contributor Marc Spitz explores the first great cultural movement since Hip Hop: an old-fashioned and yet highly modern aesthetic that's embraced internationally by teens, twenty and thirty-somethings and even some Baby Boomers; creating hybrid generation known as Twee. Via exclusive interviews and years of research, Spitz traces Generation Twee's roots from the Post War 50s to its dominance in popular culture today. Vampire Weekend, Garden State, Miranda July, Belle and Sebastian, Wes Anderson, Mumblecore, McSweeney's, Morrissey, beards, artisanal pickles, food trucks, crocheted owls on Etsy, ukuleles, kittens and Zooey Deschanel—all are examples of a cultural aesthetic of calculated precocity known as Twee. In *Twee*, journalist and cultural observer Marc Spitz surveys the rising Twee movement in music, art, film, fashion, food and politics and examines the cross-pollinated generation that embodies it—from aging hipsters to nerd girls, indie snobs to idealistic industrialists. Spitz outlines the history of twee—the first strong, diverse, and wildly influential youth movement since Punk in the '70s and Hip Hop in the '80s—showing how awkward glamour and

fierce independence has become part of the zeitgeist. Focusing on its origins and hallmarks, he charts the rise of this trend from its forefathers like Disney, Salinger, Plath, Seuss, Sendak, Blume and Jonathan Richman to its underground roots in the post-punk United Kingdom, through the late '80s and early '90s of K Records, Whit Stillman, Nirvana, Wes Anderson, Pitchfork, This American Life, and Belle and Sebastian, to the current (and sometimes polarizing) appeal of Girls, Arcade Fire, Rookie magazine, and hellogiggles.com. Revealing a movement defined by passionate fandom, bespoke tastes, a rebellious lack of irony or swagger, the championing of the underdog, and the vanquishing of bullies, Spitz uncovers the secrets of modern youth culture: how Twee became pervasive, why it has so many haters and where, in a post-Portlandia world, can it go from here?

**The Pope of Physics** Gino Segrè 2016-10-18 Enrico Fermi is unquestionably among the greats of the world's physicists, the most famous Italian scientist since Galileo. Called the Pope by his peers, he was regarded as infallible in his instincts and research. His discoveries changed our world; they led to weapons of mass destruction and conversely to life-saving medical interventions. This unassuming man struggled with issues relevant today, such as the threat of nuclear annihilation and the relationship of science to politics. Fleeing Fascism and anti-Semitism, Fermi became a leading figure in America's most secret project: building the atomic bomb. The last physicist who mastered all branches of the discipline, Fermi was a rare mixture of theorist and experimentalist. His rich legacy encompasses key advances in fields as diverse as cosmic rays, nuclear technology, and early computers. In their revealing book, *The Pope of Physics*, Gino Segrè and Bettina Hoerlin bring this scientific visionary to life. An examination of the human dramas that touched Fermi's life as well as a thrilling history of scientific innovation in the twentieth century, this is the comprehensive biography that Fermi deserves.

Vacationland John Hodgman 2017-10-24 "I love everything about this hilarious book except the font size."

—Jon Stewart Although his career as a bestselling author and on The Daily Show With Jon Stewart was founded on fake news and invented facts, in 2016 that routine didn't seem as funny to John Hodgman anymore. Everyone is doing it now. Disarmed of falsehood, he was left only with the awful truth: John Hodgman is an older white male monster with bad facial hair, wandering like a privileged Sasquatch through three wildernesses: the hills of Western Massachusetts where he spent much of his youth; the painful beaches of Maine that want to kill him (and some day will); and the metaphoric haunted forest of middle age that connects them. *Vacationland* collects these real life wanderings, and through them you learn of the horror of freshwater clams, the evolutionary purpose of the mustache, and which animals to keep as pets and which to kill with traps and poison. There is also some advice on how to react when the people of coastal Maine try to sacrifice you to their strange god. Though wildly, Hodgmaniacally funny as usual, it is also a poignant and sincere account of one human facing his forties, those years when men in particular must stop pretending to be the children of bright potential they were and settle into the failing bodies of the wiser, weird dads that they are.

*Power Politics and the Missouri Synod* James C. Burkee 2013-09-30 Power, Politics, and the Missouri Synod follows the rise of two Lutheran clergymen - Herman Otten and J. A. O. Preus - who led different wings of a conservative movement that seized control of a theologically conservative but socially and politically moderate church denomination (LCMS) and drove "moderates" from the church in the 1970s. The schism within what was then one of the largest Protestant denominations in the United States ultimately reshaped the landscape of American Lutheranism and fostered the polarization that characterizes today's Lutheran churches.

**Quantum Aspects of Life** Derek Abbott 2008-09-12 This book presents the hotly debated question of whether quantum mechanics plays a non-trivial role in biology. In a timely way, it sets out a distinct quantum biology agenda. The burgeoning fields of nanotechnology, biotechnology, quantum technology, and quantum information processing are now strongly converging. The acronym BINS, for Bio-Info-Nano-Systems, has been coined to describe the synergetic interface of these several disciplines. The living cell

is an information replicating and processing system that is replete with naturally-evolved nanomachines, which at some level require a quantum mechanical description. As quantum engineering and nanotechnology meet, increasing use will be made of biological structures, or hybrids of biological and fabricated systems, for producing novel devices for information storage and processing and other tasks. An understanding of these systems at a quantum mechanical level will be indispensable.

**Take My Hand: A Theological Memoir** Andrew Taylor-Troutman 2013-02-13 Take My Hand is an invitation to experience a year of preaching through the eyes of a first-year pastor. Andrew Taylor-Troutman reflects on his experience of ministry as a dynamic exchange between his theological education and the people in the pews. Each chapter consists of Taylor-Troutman's reflections about a particular aspect of living as a faith community and concludes with a sermon exploring similar themes and ideas. As this book journeys through the Christian liturgical year, Taylor-Troutman considers a wide range of contemporary church issues, including the role of children in worship and the communal practice of Sabbath. He discusses topics as diverse as the Rapture, the death penalty, and church league softball. Along the way, readers will laugh at Sunday morning bloopers, study biblical texts from new perspectives, wrestle with theological questions, and discover parallels between their own experience of faith and the life of this small rural congregation. More than just a retrospective summary of events, Take My Hand poignantly illustrates how a pastor's work on Sunday morning grows out of his or her engagement with the hopes and fears of daily

life, and the inspiring faith of men, women, and children in a church. The Group Study Edition encourages people of different ages and experiences to discuss and enjoy the book, while applying insights to their own communities of faith.

*40 Sonnets* Don Paterson 2017-05-02 This collection, which won the 2015 Costa Poetry Award, is an exhibition of the Dundee-born poet's stunningly accomplished adoption of the sonnet's ancient structure. This collection from Don Paterson, his first since the Forward Prize-winning *Rain* in 2009, is a series of forty luminous sonnets. Some take a traditional form, while others experiment with the reader's conception of the sonnet, but they all share the lyrical intelligence and musical gift that has made Paterson one of our most celebrated poets. Addressed to friends and enemies, the living and the dead, children, musicians, poets, and dogs, these poems are as ambitious in their scope and tonal range as in the breadth of their concerns. Here, voices call home from the blackout and the airlock, the storm cave and the silence, the coal shed, the war, the highway, the forest, and the sea. These are voices frustrated by distance and darkness, which ring with the "sound that fades up from the hiss, / like a glass some random down draught had set ringing, / now full of its only note, its lonely call." In *40 Sonnets*, Paterson returns to some of his central themes—contradiction and strangeness, tension and transformation, the dream world, and the divided self—in some of the most powerful and formally assured poems of his career.
