Coordinate Metrology Jerzy A. Sładek 2015-12-22 This book focuses on effective methods for assessing the accuracy of both coordinate measuring systems and coordinate measurements. It mainly reports on original research work conducted by Sładek's team at Cracow University of Technology's Laboratory of Coordinate Metrology. The book describes the implementation of different methods, including artificial neural networks, the Matrix Method, the Monte Carlo method and the virtual CMM (Coordinate Measuring Machine), and demonstrates how these methods can be effectively used in practice to gauge the accuracy of coordinate measurements. Moreover, the book includes an introduction to the theory of measurement uncertainty and to key techniques for assessing measurement accuracy. All methods and tools are presented in detail, using suitable mathematical formulations and illustrated with numerous examples. The book fills an important gap in the literature, providing readers with an advanced text on a topic that has been rapidly developing in recent years. The book is intended for master and PhD students, as well as for metrology engineers working at industrial and research laboratories. It not only provides them with a solid background for using existing coordinate metrology methods; it is also meant to inspire them to develop the state-of-the-art technologies that will play an important role in supporting quality growth and innovation in advanced manufacturing.

*Hybrid Diplomacy with NGOs* Raffaele Marchetti 2021 Marchetti offers an original reading of Italian foreign policy as hybrid diplomacy grounded in an extensive analysis of eight relevant case studies where partnerships between government (in particular the MFA) and civil society have been crucial in producing a successful human rights or humanitarian outcome. The list of

interviewees makes for a who's who of Italian foreign policy and is a testimony to the original quality of the research. No doubts in the land of Machiavelli many would be sceptical of Marchetti's argument, but this is a must-read nevertheless for all those interested in the changing nature of foreign policy and IR and the unexpected surprising resources of the Bel Paese! Fabio Petito, University of Sussex, UK, and ISPI, Italy Marchetti's book is an admirable dissection of the relationship between non-state actors (NSAs) and Italian foreign policy. The theoretical focus is the growing presence of non-state actors in IR, and the hybrid quality of their relations with state actors. Specifically, and with particular reference to Italy, he emphasises that the relationship is not one-sided, but hybrid, with gains for both states, for which NSAs act as force-multipliers, and for NSAs which receive greater access to policy-making. The argument that these relations are synergistic is a welcome corrective to the general assumption that these relations are antagonistic. Neil MacFarlane, University of Oxford, UK This book explores a new way of doing diplomacy through the engagement with non-governmental organizations, here referred to as hybrid diplomacy. Today's global politics is played out most successfully by the combined actions of different actors. A specific type of partnership is that between governments and civil society organizations, which is particularly effective in advancing new issues and promoting the norm changes that have been discussed at length in IR and sociological literatures. Italy, as a middle power with a strong non-profit sector, is well positioned to take advantage of this diplomatic mode. Raffaele Marchetti is Deputy Rector for Internationalization and Professor of International Relations in the Department of Political Science and the School of Government at LUISS Guido Carli, Italy.

**Advanced Training for Trainers in Europe (ATTE).** Lynne Chisholm 2006-01-01 Advanced Training for Trainers in Europe (ATTE) has been developed and organised within the Partnership Programme on European Youth Worker Training run by the European Commission and the Council of Europe, and it is innovative in its approach, methodology, structure, long-term perspective and intensity. The Partnership Programme aims to contribute to quality in youth-worker training at European level, with an emphasis on integrating European Citizenship in youth work. The second volume of this publication sets out an external evaluation of the pilot course which ran from November 2001 to October 2003. The first volume of this title on curriculum description is available separately (ISBN 9789287157928).

Crunchy Cons Rod Dreher 2010-03-31 When a National Review colleague teased writer Rod Dreher one day about his visit to the local food co-op to pick up a week's supply of organic vegetables ("Ewww, that's so lefty"), he started thinking about the ways he and his conservative family lived that put them outside the bounds of conventional Republican politics. Shortly thereafter Dreher wrote an essay about "crunchy cons," people whose "Small Is Beautiful" style of conservative politics often put them at odds with GOP orthodoxy, and sometimes even in the same camp as lefties outside the Democratic mainstream. The response to the article was impassioned: Dreher was deluged by e-mails from conservatives across America—everyone from a pro-life vegetarian Buddhist Republican to an NRA staffer with a passion for organic gardening—who responded to say, "Hey, me too!" In Crunchy Cons, Dreher reports on the amazing depth and scope of this phenomenon, which is redefining the taxonomy of America's political and cultural landscape. At a time when the Republican party, and the conservative movement in general, is bitterly divided over what it means to be a conservative, Dreher introduces us to people who are pioneering a way back to the future by reclaiming what's best in conservatism—people who believe that being a truly committed conservative today means protecting the environment, standing against the depredations of

big business, returning to traditional religion, and living out conservative godfather Russell Kirk's teaching that the family is the institution most necessary to preserve. In these pages we meet crunchy cons from all over America: a Texas clan of evangelical Christian free-range livestock farmers, the policy director of Republicans for Environmental Protection, homeschooling moms in New York City, an Orthodox Jew who helped start a kosher organic farm in the Berkshires, and an ex-sixties hippie from Alabama who became a devout Catholic without losing his antiestablishment sensibilities. Crunchy Cons is both a useful primer to living the crunchy con way and a passionate affirmation of those things that give our lives weight and measure. In chapters dedicated to food, religion, consumerism, education, and the environment, Dreher shows how to live in a way that preserves what Kirk called "the permanent things," among them faith, family, community, and a legacy of ancient truths. This, says Dreher, is the kind of roots conservatism that more and more Americans want to practice. And in Crunchy Cons, he lets them know how far they are from being alone. A Crunchy Con Manifesto 1. We are conservatives who stand outside the conservative mainstream; therefore, we can see things that matter more clearly. 2. Modern conservatism has become too focused on money, power, and the accumulation of stuff, and insufficiently concerned with the content of our individual and social character. 3. Big business deserves as much skepticism as big government. 4. Culture is more important than politics and economics. 5. A conservatism that does not practice restraint, humility, and good stewardship—especially of the natural world—is not fundamentally conservative. 6. Small, Local, Old, and Particular are almost always better than Big, Global, New, and Abstract. 7. Beauty is more important than efficiency. 8. The relentlessness of media-driven pop culture deadens our senses to authentic truth, beauty, and wisdom. 9. We share Russell Kirk's conviction that "the institution most essential to conserve is the family."

Piracy and Maritime Crime: Historical and Modern Case Studies Bruce A. Ellerman 2010 Piracy is a basic and fundamental concern for all navies. From almost the beginning of state-sponsored navies, piracy suppression has been one of their major responsibilities -- when Julius Caesar was captured by pirates in 76 BCE, the first thing he did after paying the pirates' ransom and being released was to fit "out a squadron of ships to take his revenge." Despite piracy's importance and the continued frequency of piratical attacks, however, relatively few scholarly works have been written analyzing cases of modern piracy and piracy suppression in terms of varying strategic, policy, and operational decisions. This edited collection of case studies attempts to fill this gap. There have been a number of important historical studies that have dealt with the subjects of piracy and piracy suppression. Books written from the point of view of those wishing to end piracy have tended to focus on legal issues, including the rights of victims, the procedures and decisions of Admiralty courts in punishing pirates, and the capture of piracy ships as prizes. Others have looked at the existence of piracy in terms of one particular place or time period, with the Barbary Coast and the Caribbean Sea claiming disproportionate shares of attention. Pirates are often romanticized; Forbes magazine has recently listed history's top-earning pirates, including Samuel "Black Sam" Bellamy at US\$120 million (2008 dollars), Sir Francis Drake at US\$115 million, and Thomas Tew at US\$103 million. More famous pirates, like Edward Teach (Blackbeard), came in far down the list, at tenth place, with only US\$12.5 million.

*Human Lymphoma: Clinical Implications of the REAL Classification* David Y. Mason 2013-12-20  
*Human Lymphoma: The Clinical Implications of the REAL Classification* is a unique volume. It is based on the recent developments in classification and overall understanding of human lymphoid neoplasms which are relatively common neoplasms and which epidemiological evidence suggests are increasing in frequency. This field has been the cause of confusion in the past as a result of conflicting ideas on the classification of lymphoma and related diseases. However a new vision of the field has emerged and the is encapsulated in the pioneering REAL classification and in a forthcoming WHO scheme, both of which are covered in the book. The volume will appeal to hematologists, pathologists and oncologists and will, thanks to a diverse and expert authorship, serve to increase the working knowledge of all three groups.

Language Testing Tim McNamara 2006-11-10 Winner of the SAGE/ILTA Award for Best Book on Language Testing 2009 This volume focuses on the social aspects of language testing, including assessment of socially situated language use and societal consequences of language tests. The authors argue that traditional approaches to ensuring social fairness in tests go some way to addressing social concerns, but a broader perspective is necessary to examine the functions of tests on a societal scale. Considers these issues in relation to language assessment in oral proficiency interviews, and to the assessment of second language pragmatics. Argues that traditional approaches to ensuring social fairness in tests go some way to addressing social concerns, but a broader perspective is necessary if we are to fully understand the social dimension of language assessment.

**European Identity** Inés María Gómez-Chacón 2003-01-01 This book on European Identity aims to «promote reflection on the mutual relationship between educational processes and European construction». It attempts to get down to what this means at the everyday level, the notion of European Identity for all citizens, specially in the educational field, and identify elements for the promotion and anchorage of this concept. To this end the authors have contemplated articulating the topic around the axis «individual - group - society», and the content has been distributed in two blocks: europe read from an educational perspective, and European Identity, new challenges for the school.

**Fletch Won** Gregory Mcdonald 2018-11-20 Young Irwin Maurice Fletcher, a.k.a. Fletch, the eager and inventive new reporter for the News-Tribune, is having a hard time finding his place at the newspaper. After a few "mishaps" writing questionable headlines and creatively worded obituaries, Managing Editor Frank Jaffe appoints Fletch to the society pages, where he's assigned to cover a generous yet surprising donation to an art museum from a high-powered defense attorney. But before he can secure an interview, the attorney is shot dead in the newspaper's parking lot, no witnesses in sight. To Fletch's chagrin, the story is reassigned to the boorish lead investigative reporter Biff Wilson, and he's placed on a seemingly unrelated story, some society pages fluff piece about an all-women-trainers health club that's rumored to offer a lot of "extras." Undeterred by Biff's threatening nature and determined to dig up the dirt on both stories, Fletch collects a cast of engaging characters and strings together the scandalous clues that lead to an eventful and unexpected conclusion.

**International Organization Participation** Union of International Associations 2007-07-10  
The latest edition of this definitive international resource provides detailed information for more than 29,000 organizations active in 289 countries, and is exhaustively cross-referenced to help you: -- Locate international aid groups, business and commercial associations, religious orders, national bodies, fraternities, conferences, and more -- Help patrons find the right contacts in the organizations they need to reach, and identify organizations with similar concerns worldwide -- Facilitate research into any organization's structure, financing, membership, aims and activities, publications, geographic scope, and more. Alphabetically arranged and now in two parts, Volume 1: Organization Descriptions and Cross-References is the most current and far-reaching reference work available on international bodies. Over 32,000 listings -- including in-depth profiles for some 12,000 major organizations -- cover everything from inter-governmental bodies and conferences to religious orders and fraternities. Volume 2: International Organization Participation makes possible systematic identification of each country's range of direct or indirect international activity. Designed for use by national and international agencies, embassies, ministries, and university and law libraries, its alphabetical arrangement offers a comprehensive picture of national involvement in international concerns. Volume 3: Global Action Networks is a comprehensive overview of the range and network of activities of the international organizations themselves -- organized alphabetically by subject and by region. Similar to a "yellow pages", it groups international and regional bodies under 4,300 categories of common ideas, aims, and activities. Volume 4: International Organization Bibliography and Resources provides a Title/Author Index and separate Subject Index to some 33,000 entries reflecting current publications of IGOs and NGOs, secondary literature of NGOs, and more, From K. G. Saur.

**Palliative Care in Pediatric Oncology** Joanne Wolfe 2017-12-20 This textbook is the first to focus on comprehensive interdisciplinary care approaches aimed at enhancing the wellbeing of children with cancer and their families throughout the illness experience. Among the topics addressed are the epidemiology of pediatric cancer distress, including physical, emotional, social, and spiritual dimensions; the role of the interdisciplinary team; communication and

advance care planning; symptom prevention and management; care at the end of life; family bereavement care; and approaches to ease clinician distress. The contributing authors are true experts and provide guidance based on the highest available level of evidence in the field. The book has not only an interdisciplinary but also an international perspective; it will appeal globally to all clinicians caring for children with cancer, including physicians, nurses, psychosocial clinicians, and chaplains, among others.

This series (also known as the WHO Blue Books) is regarded as the gold standard for the diagnosis of tumours and comprises a unique synthesis of histopathological diagnosis with digital and molecular pathology. These authoritative and concise reference books provide indispensable international standards for anyone involved in the care of patients with cancer or in cancer research, underpinning individual patient treatment as well as research into all aspects of cancer causation, prevention, therapy, and education. This volume will be of particular interest to pathologists, oncologists, surgeons, and epidemiologists who manage or research soft tissue and bone tumours. Sections are included on all recognized neoplasms of the soft tissue and bone, as well as on genetic tumour syndromes affecting these sites. Since the previous edition, there have been changes based on recent molecular and genetic information, with impact on clinical practice.

*Queen Victoria's Bomb* Ronald Clark 2013-05-14 A sudden intolerably bright fireball lights up a remote and deserted Indian plateau. Searing heat melts rock into incandescent pools of glowing liquid. The earth heaves. A monstrous thunderclap of sound reverberates over the land. An ominous mushroom-shaped cloud boils skywards. For years afterwards, strange plants and even stranger human mutants are discovered in the area, warped spawn of a mysterious and deadly force. Just another atomic test? Not exactly. Because it was Professor Huxtable's brainchild. And the professor is one of the most devoted and loyal servants of Queen Victoria?
