From Market-Places to a Market Economy Winifred Barr Rothenberg 1992-11-15 Through innovative use of little used archival material, Rothenberg finds that the relevant economic magnitudes - farm commodity prices, wages for day and monthly farm labor, and the determinants of rural wealth holding - behaved as if they had been formed in a market. This ground breaking discovery reveals how an agricultural economy that lacked both an important export staple and technological change could experience market-led growth. To understand this impressive economic development, Rothenberg discusses a number of provocative questions.

The Routledge Handbook of Animal Ethics Bob Fischer 2019-12-06 There isn't one conversation about animal ethics. Instead, there are several important ones that are scattered across many disciplines. This volume both surveys the field of animal ethics and draws professional philosophers, graduate students, and undergraduates more deeply into the discussions that are happening outside of philosophy departments. To that end, the volume contains more nonphilosophers than philosophers, explicitly inviting scholars from other fields—such as animal science, ecology, economics, psychology, law, environmental science, and applied biology, among others—to bring their own disciplinary resources to bear on matters that affect animals. The Routledge Handbook of Animal Ethics is composed of 44 chapters, all appearing in print here for the first time, and organized into the following six sections: I. Thinking About Animals II. Animal Agriculture and Hunting III. Animal Research and Genetic Engineering IV. Companion Animals V. Wild Animals: Conservation, Management, and Ethics VI. Animal Activism The chapters are brief, and they have been written in a way that is accessible to serious undergraduate students, regardless of their field of study. The volume covers everything from animal cognition to the state of current fisheries, from genetic modification to intersection animal activism. It is a resource designed for anyone interested in the moral issues that emerge from human interactions with animals.

Heaton's Commercial Handbook of Canada ... Ernest Heaton 1916

The Political Economy of Sugar Production in Colonial Kenya Godriver Wanga-Odhiambo 2016-07-29 This study of Asian agency in colonial Nyanza provides a blueprint to understand the persistent insufficiency in sugar production in post-independence Kenya. This book brings to light issues in broader Kenyan economic history, such as the undercapitalization of peasant farmers and lack of political will to spur agricultural economic development due to the politics of special interest groups.

Fields of Gold Madeleine Fairbairn 2020-07-15 *Fields of Gold* critically examines the history, ideas, and political struggles surrounding the financialization of farmland. In particular, Madeleine Fairbairn focuses on developments in two of the most popular investment locations, the US and Brazil, looking at the implications of financiers' acquisition of land and control over resources for rural livelihoods and economic justice. At the heart of *Fields of Gold* is a tension between efforts to transform farmland into a new financial asset class, and land's physical and social properties, which frequently obstruct that transformation. But what makes the book unique among the growing body of work on the global land grab is Fairbairn's interest in those acquiring land, rather than those affected by land acquisitions. Fairbairn's work sheds ethnographic light on the actors and relationships—from Iowa to Manhattan to São Paulo—that have helped to turn land into an attractive financial asset class.

The Statesman's Year-Book 1979-80 J. Paxton 2016-12-23 The classic reference work that provides annually updated information on the countries of the world.

Syria's Peasantry, the Descendants of Its Lesser Rural Notables, and Their Politics Hanna Batatu 1999-07-21 In this book, the distinguished scholar Hanna Batatu presents a comprehensive analysis of the recent social, economic, and political evolution of Syria's peasantry, the segment of society from which the current holders of political power stem. Batatu focuses mainly on the twentieth century and, in particular, on the Ba`th movement, the structures of power after the military coup d'état of 1963, and the era of ḥfīz al-Asad, Syria's first ruler of peasant extraction. Without seeking to prove any single theory about Syrian life, he offers a uniquely rich and detailed account of how power was transferred from one demographic group to another and how that power is maintained today. Batatu begins by examining social differences among Syria's peasants and the evolution of their mode of life and economic circumstances. He then scrutinizes the peasants' forms of consciousness, organization, and behavior in Ottoman and Mandate times and prior to the Ba`thists' rise to power. He explores the rural aspects of Ba`thism and shows that it was not a single force but a plurality of interrelated groups--prominent among them the descendants of the lesser rural notables--with different social goals and mental horizons. The book also provides a perceptive account of President Asad, his personality and conduct, and the characteristics and power structures of his regime. Batatu draws throughout on a wide range of socioeconomic and biographical information and on personal interviews with Syrian peasants and political leaders, offering invaluable insights into the complexities of a country and a regime that have long been poorly understood by outsiders.

Towards Sustainable Livelihoods and Ecosystems in Mountain Regions Vishwambhar Prasad Sati 2013-12-21 Sustainable livelihoods and ecosystems are far-reaching and burning issues in the wake of high growth of population, low production and per ha yield of crops and depletion of biodiversity resources. Mountainous regions of the world are facing the menace of poverty, food insecurity and malnutrition. Further, tremendous growth in population and slow pace of development have together forced most of the population to live below poverty line. Traditionally depending upon cultivating subsistence crops for food requirement, the people living in mountainous region are unable to produce

sufficient food grains to run their livelihood smoothly. The Himalayas is one of the world's biodiversity hotspots and has an abundance of natural resources: land, water and forest – life sustaining factors. The geo-environmental conditions – climate and landscape further enhance the possibility of sustainable livelihoods through eco-tourism, harnessing water resources and utilizing forests and their products sustainably. Diversifying agricultural practices through cultivating cash and cereal crops and enhancing livelihood options through extensive use of timber and non-timber based forestry products can help to eradicate poverty and provide food security. This book consists of an introduction and nine chapters, covering geo-environmental setting, socio-economy and population profile, sustainable livelihoods: diversification and enhancement, livelihood analysis, development of tourism and hydroelectricity, case studies, mountain ecosystems, sustainable mountain development and also presents a conclusion.

The Statesman's Year-Book 1982-83 J. Paxton 2016-12-15 The classic reference work that provides annually updated information on the countries of the world.

The American Economy: A Historical Encyclopedia, 2nd Edition [2 volumes] Cynthia L.
