**A Brief History of Neoliberalism** David Harvey 2007-01-04 Neoliberalism - the doctrine that market exchange is an ethic in itself, capable of acting as a guide for all human action - has become dominant in both thought and practice throughout much of the world since 1970 or so. Its spread has depended upon a

reconstitution of state powers such that privatization, finance, and market processes are emphasized. State interventions in the economy are minimized, while the obligations of the state to provide for the welfare of its citizens are diminished. David Harvey, author of 'The New Imperialism' and 'The Condition of Postmodernity', here tells the political-economic story of where neoliberalization came from and how it proliferated on the world stage. While Thatcher and Reagan are often cited as primary authors of this neoliberal turn, Harvey shows how a complex of forces, from Chile to China and from New York City to Mexico City, have also played their part. In addition he explores the continuities and contrasts between neoliberalism of the Clinton sort and the recent turn towards neoconservative imperialism of George W. Bush. Finally, through critical engagement with this history, Harvey constructs a framework not only for analyzing the political and economic dangers that now surround us, but also for assessing the prospects for the more socially just alternatives being advocated by many oppositional movements.

**Platonic Political Art** John R. Wallach 2010-11-01 In this first comprehensive treatment of Plato's political thought in a long time, John Wallach offers a "critical historicist" interpretation of Plato. Wallach shows how Plato's theory, while a radical critique of the conventional ethical and political practice of his own era, can be seen as having the potential for contributing to democratic discourse about ethics and politics today. The author argues that Plato articulates and "solves" his Socratic Problem in his various dialogues in different but potentially complementary ways. The book effectively extracts Plato from the straightjacket of Platonism and from the interpretive perspectives of the past fifty years—principally those of Karl Popper, Leo Strauss, Hannah Arendt, M. I. Finley, Jacques Derrida, and Gregory Vlastos. The author's distinctive approach for understanding Plato—and, he argues, for the history of political theory in general—can inform contemporary theorizing about democracy, opening pathways for criticizing democracy on behalf of virtue, justice, and democracy itself.

**The Dare** Harley Laroux 2021-01-26 Warning: This erotica contains scenes and elements that may be disturbing to some readers. Please review the full content warning below. Jessica Martin is not a nice girl. As Prom Queen and Captain of the cheer squad, she'd ruled her school mercilessly, looking down her nose at everyone she deemed unworthy. The most unworthy of them all? The "freak," Manson Reed: her favorite victim. But a lot changes after high school. A freak like him never should have ended up at the same Halloween party as her. He never should have been able to beat her at a game of Drink or Dare. He never should have been able to humiliate her in front of everyone. Losing the game means taking the dare: a dare to serve Manson for the entire night as his slave. It's a dare that Jessica's pride - and curiosity - won't allow her to refuse. What ensues is a dark game of pleasure and pain, fear and desire. Is it only a game? Only revenge? Only a dare? Or is it something more? This book contains intense fantasy scenes of hard kinks/edgeplay, graphic sex, and harsh language. It is intended only for an adult audience. Beware: this is a dark, weird, kinky read. The activities depicted therein are dangerous and are not meant to be an

example of realistic BDSM. Reader discretion is advised. Kinks/Fetishes within: erotic humiliation, fearplay, painplay, knifeplay, consensual non-consent (CNC), orgasm denial, boot worship, spanking, crying, blowjobs, clowns, group sexual activities, spit, bondage, public play, bloodplay.

**How It Is** Samuel Beckett 2007-12-01 "It is one thing to be informed by Shakespeare that life "is a tale told by an idiot signifying nothing"; it is something else to encounter the idea literally presented in a novel by Samuel Beckett. But I am reasonably certain that a sensitive reader who journeys through *How It Is* will leave the book convinced that Beckett says more that is relevant to experience in our time than Shakespeare does in *Macbeth*. It should come as no surprise if a decade or so hence *How It Is* is appraised as a masterpiece of modern literature. This poetic novel is Beckett at his height." – Webster Schott "A wonderful book, written in the sparest prose. . . . Beckett is one of the rare creative minds in our times." – Alan Pryce-Jones "What is novel is the absolute sureness of design. . . built phrase by phrase into a beautifully and tightly wrought structure – a few dozen expressions permuted with deliberate redundancy accumulate meaning even as they are emptied of it, and offer themselves as points of radiation in a strange web of utter illusion." – Hugh Kenner

*The Nature of Space* Milton Santos 2021-08-06 In *The Nature of Space*, pioneering Afro-Brazilian geographer Milton Santos attends to globalization writ large and how local and global orders intersect in the construction of space. Santos offers a theory of human space based on relationships between time and ontology. He argues that when geographers consider the inseparability of time and space, they can then transcend fragmented realities and partial truths without trying to theorize their way around them. Based on these premises, Santos examines the role of space, which he defines as indissoluble systems of objects and systems of actions in social processes, while providing a geographic contribution to the production of a critical social theory.

**Plato on God as Nous** Stephen Menn 1995 This book is the first sustained modern investigation of Plato's theology. A central thesis of the book is that Plato had a theology--not just a mythology for the ideal city, not just the theory of forms or the theory of cosmic souls, but also, irreducible to any of these, an account of God as Nous (Reason), the source of rational order both to souls and the world of bodies. The understanding of God as Reason, and of the world as governed directly or indirectly by Reason, is worked out in the dialogues of Plato's last period, the *Statesman*, *Philebus*, *Timaeus*, and *Laws*. These dialogues offer a strategy for explaining the physical world that goes beyond anything in the middle dialogues, and gives the best starting point for understanding the cosmologies and theologies of Aristotle, the Stoics, and later ancient thinkers. Menn focuses on the *Timaeus* as Plato's most sustained effort to provide what (according to the *Phaedo*) Anaxagoras had failed to deliver: an explanation of the world through Reason, showing that things are as they are because it is best, or because it best serves the order of the world as a whole. Anaxagoras was disappointed because he explained things through their material constituents, without explaining why the constituents are ordered as they are; but the theory of forms has the same defect, since it cannot explain why different parts of the universe participate in different forms according to a particular order. The *Timaeus* and other late dialogues attempt to supply the missing explanation of the ordering of the physical world. These dialogues do not retreat from the middle dialogue theory of forms, nor do they escape into an esoteric theory of numbers; but they add to the middle dialogues an analysis of the principles necessary to account for the existence and partial intelligibility of the sensible world--not only forms and a material substance but also Nous and souls. Although the demiurge of the *Timaeus* (and his counterpart the Nous of *Philebus*) is represented as a cause both to souls and bodies, most scholars have been reluctant to identify the demiurge as a being separate from and superior to souls, because they think that both the meaning of the Greek word nous and Plato's own statements require that Nous is either a kind of soul (mind or rational soul) or something inseparable from souls (rational mental activity). Reexamining the linguistic evidence and the Platonic texts, Menn argues that nous can mean something separate from souls, namely the virtue of rationality or intelligence that souls participate in. Menn argues that Anaxagoras' Nous should be construed as

such a virtue; then he examines what status this virtue has in the context of the Platonic theory of forms, and how it is a cause both to souls and to bodies. Soul plays a crucial role in mediating the causality of Nous and introducing rational order into the world of bodies, but neither soul in general nor the world-soul in particular can be identified with Nous. Menn stresses the pre-Socratic context for the cosmology and theology of Plato's late dialogues; he argues for the importance of Diogenes of Appolonia in particular, and he reconstructs a possible new fragment of Diogenes from the *Timaeus* and from the Hippocratic treatise *On Breaths*. In the *Timaeus* and other late dialogues Plato attempts to do better than his predecessors by standards implicit in Socrates' critique of Anaxagoras in the *Phaedo*, but what Plato offers remains consciously provisional. Aristotle argues that the *Timaeus* remains liable to some of the same criticisms that Socrates had leveled against Anaxagoras, and Aristotle's own cosmology and theology take up Plato's challenge to carry out Anaxagoras' promise of an explanation of the world through Nous, and attempt to improve on the *Timaeus* as Plato had improved on Anaxagoras. In this way the *Timaeus* serves as an essential starting point, not only for those later ancient philosophers who took it as an authoritative statement on the world and on God but also for those who took it as a challenge to do better.

**A Place in History** Michael Herzfeld 1991-10-27 Michael Herzfeld describes what happens when a bureaucracy charged with historic conservation clashes with a local populace hostile to the state and suspicious of tourism. Focusing on the Cretan town of Rethemnos, once a center of learning under Venetian rule and later inhabited by the Turks, he examines major questions confronting conservators and citizens as they negotiate the "ownership" of history: Who defines the past? To whom does the past belong? What is "traditional" and how is this determined? Exploring the meanings of the built environment for Rethemnos's inhabitants, Herzfeld finds that their interest in it has more to do with personal histories and the immediate social context than with the formal history that attracts the conservators. He also investigates the inhabitants' social practices from the standpoints of household and kin group, political association, neighborhood, gender ideology, and the effects of these on attitudes toward home ownership. In the face of modernity, where tradition is an object of both reverence and commercialism, Rethemnos emerges as an important ethnographic window onto the ambiguous cultural fortunes of Greece.

**Shaping Technology / Building Society** Wiebe E. Bijker 1994-09-29 Building on the influential book *The Social Construction of Technological Systems*, this volume carries forward the project of creating a theory of technological development and implementation that is strongly grounded in both sociology and history. Technology is everywhere, yet a theory of technology and its social dimension remains to be fully developed. Building on the influential book *The Social Construction of Technological Systems*, this volume carries forward the project of creating a theory of technological development and implementation that is strongly grounded in both sociology and history. The 12 essays address the central question of how technologies become stabilized, how they attain a final form and use that is generally accepted. The essays are tied together by a general introduction, part introductions, and a theoretical conclusion. The first part of the book examines and criticizes the idea that technologies have common life cycles; three case studies cover the history of a successful but never produced British jet fighter, the manipulation of patents by a French R&D company to gain a market foothold, and the managed development of high-intensity fluorescent lighting to serve the interests of electricity suppliers as well as the producing company. The second part looks at broader interactions shaping technology and its social context: the question of who was to define "steel," the determination of what constitutes radioactive waste and its proper disposal, and the social construction of motion pictures as exemplified by Thomas Edison's successful development of the medium and its commercial failure. The last part offers theoretical studies suggesting alternative approaches to sociotechnologies; two studies argue for a strong sociotechnology in which artifact and social context are viewed as a single seamless web, while the third looks at the ways in which a social program is a technology.

The Sacred Embrace of Jesus and Mary Jean-Yves Leloup 2006-02-24 An examination of how the teachings of Jesus reveal the essential role of sexuality in spiritual growth and transformation • Shows that Jesus did not come to redeem humanity from the life of the flesh, but to honor it as a spiritual path • Uses Hebrew, gnostic, and early Christian source texts to reveal the true context of the words attributed to Jesus • Explores the spiritual and physical relationship shared by Jesus and Mary Magdalene Of all the major religions, Christianity is the only one that has utterly rejected sexuality as one of the many paths that can lead to enlightenment and salvation. But if Jesus was indeed “the Word made flesh” and serious consideration is given to the mystery of his Incarnation, is it reasonable that physical love would have been prohibited to him? Drawing from the canonical and apocryphal gospels, the Hebrew esoteric tradition, and gnosticism, Jean-Yves Leloup shows that Jesus did not come to save humanity from the life of the flesh but to save the life of the flesh so that it would truly transfigure all people. Leloup explains that when Saint Paul said it was good to be without women, he did not cite any words of Jesus in support of this contention. In fact, Paul’s statement utterly contradicts the words of God in Genesis: “It is not good that man should be alone.” Leloup argues that the elimination of the divine feminine and sacred sexuality set in motion by Paul’s words does not reflect the true teachings of Christ, and that the transformation of Jesus into a celibate is the true heresy. His research restores Christ’s true human sexuality and shows it to be a vital part of humanity’s spirituality. Leloup contends that by understanding the sacred nature of the embrace shared by man and woman as a true reflection of humanity made in God’s image, Christianity can again become the powerful path of transfiguration Christ intended.

*Cultural Property Risk Analysis Model* R. Robert Waller 2003-01-01 "Preventive conservation seeks to minimize needless deterioration, damage, and loss to cultural property. This requires a comprehensive understanding of all hazards that might affect property and all values needing protection from those hazards. The past effects of hazards must be apprehended, the efficacy of current conservation practices must be calculated, and the predictability of future changes must be judged. Risks may manifest gradually or sporadically. In either case, the time scale over which risks to cultural properties must be considered is measured in centuries. Feedback on the consequences of preventive conservation decisions taken is too slow and too confounded to support meaningful experience-based learning. A risk-based approach to decision-making is necessary."
