Health and Health Care in South Africa H. C. J. Van Rensburg 2004 Health and healthcare in South Africa attempts to capture the essence of transformation and trends in the South African health sector. It offers, on the one hand, an overview of recent and current developments in the South African health care system, and on the other, of trends in the health status of the South African population. The book is a follow-up to the well-known Health care in South Africa - structure and dynamics (Van Rensburg, Fourie & Pretorius 1992), published just before the transition to a democratic society. The book retains a strong historical thread, but the focus is generally on the nature of the transformation process, gains made and failures encountered.

Violence, Inequality and Transformation Jasmina Brankovic 2020 Despite its lauded political transition in 1994, South Africa continues to have among the highest levels of violence and inequality in the world. Organised survivors of apartheid violations have long maintained that we cannot adequately address violence in the country, let alone achieve full democracy, without addressing inequality. This book is built around extensive quotes from members of Khulumani Support Group, the apartheid survivors' social movement, and young people growing up in Khulumani families. It shows how these survivors, who bridge the past and the present through their activism, understand and respond to socioeconomic drivers of violence. Pointing to the continuities between apartheid oppression and post-apartheid marginalisation in

everyday life, the narratives detail ways in which the democratic dispensation has strengthened barriers to social transformation and helped enable violence. They also present strategies for effecting change through collaboration, dialogue and mutual training and through partnerships with diverse stakeholders that build on local-level knowledge and community-based initiatives. The lens of violence offers new and manageable ways to think about reducing inequality, while the lens of inequality shows that violence is a complex web of causes, pathways and effects that requires a big-picture approach to unravel. The survivors' narratives suggest innovative strategies for promoting a just transition through people-driven transformation that go well beyond the constraints of South Africa's transitional justice practice to date. A result of participatory research conducted in collaboration with and by Khulumani members, this book will be of interest to activists, students, researchers and policy makers working on issues of transitional justice, inequality and violence.

Global Tuberculosis Report 2017 World Health Organization 2017-12-13 WHO's Global Tuberculosis Report provides a comprehensive and up-to-date assessment of the TB epidemic and of progress in care and prevention at global, regional and country levels. This is done in the context of recommended global TB strategies and associated targets, and broader development goals. For the period 2016-2035, these are WHO's End TB Strategy and the United Nations' (UN) Sustainable Development Goals (SDGs), which share a common aim: to end the global TB epidemic. The main data sources for the report are annual rounds of global TB data collection implemented by WHO's Global TB Program since 1995 and databases maintained by other WHO departments, UNAIDS and the World Bank. In WHO's 2017 round of global TB data collection, 201 countries and territories that account for over 99% of the world's population and TB cases reported data.

Reason & Rigor Sharon M. Ravitch 2016-01-04 Designed for novice as well as more experienced researchers, *Reason & Rigor* by Sharon M. Ravitch and Matthew Riggan presents conceptual frameworks as a mechanism for aligning literature review, research design, and methodology. The book explores the conceptual framework—defined as both a process and a product—that helps to direct and ground researchers as they work through common research challenges. Focusing on published studies on a range of topics and employing both quantitative and qualitative methods, the updated Second Edition features two new chapters and clearly communicates the processes of developing and defining conceptual frameworks.

Dr T Tlaleng Mofokeng 2021-02 The indomitable Dr Tlaleng Mofokeng - affectionately known as Dr T - is passionate about making sexual health and well-being services available to all, regardless of their sexual and gender identities and their economic status. This updated edition of her bestselling book is filled with the specifics of sexual anatomy and health as well as advice and facts about pleasure and sexual rights, and includes additional resources along with new sections on coercive control as well as sex and pleasure during the time of COVID. A Change of Tongue Antjie Krog 2012-04-13 Identity, belonging and voyages of personal discovery are but some of the themes inventively explored in Antjie Krog's first full-length work to appear in English since the publication of *Country of My Skull*. In times of fundamental change, people tend to find a space, lose it and then find another space as life and the world transform around them. What does this metamorphosis entail and in what ways are we affected by it? How do we live through it and what may we become on our journey towards each other, particularly when the space and places from which we depart are – at least on the surface – vastly different? Ranging freely and often wittily across many terrains, this brave book by one of South Africa's foremost writers and poets provides a unique and compelling discourse on living creatively in South Africa.

Beyond Memory Max Mojapelo 2008 "South Africa possesses one of the richest popular music traditions in the world - from marabi to mbaqanga, from boeremusiek to bubblegum, from kwela to kwaito. Yet the risk that future generations of South Africans will not know their musical roots is very real. Of all the recordings made here since the 1930s, thousands have been lost for ever, for the powers-that-be never deemed them worthy of preservation. If one peruses the books that exist on South African popular music, one still finds that their authors have on occasion jumped to conclusions that were not as foregone as they had assumed. Yet the fault lies not with them, rather in the fact that there has been precious little documentation in South Africa of who played what, or who recorded what, with whom, and when. This is true of all music-making in this country, though it is most striking in the music of the black communities. Beyond memory: recording the history, moments and memories of South African music is an invaluable

publication because it offers a first-hand account of the South African music scene of the past decades from the pen of Max Thamagana Mojapelo, who was situated in the very thick of things, thanks to his job as a DJ at the South African Broadcasting Corporation. This book -astonishing for the breadth of its coverage - is based on his diaries, on interviews he conducted and on numerous other sources, and we find in it not only the well-known names of recent South African music but a countless host of others whose contribution must be recorded if we and future generations are to gain an accurate picture of South African music history of the late 20th and early 21st centuries"--Publisher's description.

Female Urinary Incontinence Anne P. Cameron 2022 This book provides a comprehensive review of the etiology, anatomy, diagnosis, treatments, and future directions of care for female incontinence. It includes a historical review of past treatments many women have undergone and resultant altered anatomy. This book discusses conservative treatments such as patient and provider handouts on behavioral modification and how to perform pelvic floor exercises. It also covers medical therapy from minimally invasive treatments to radical surgical approaches and management of treatment failures. Addressing the treatment of stress incontinence with chapters progressing from least invasive to most invasive therapies, it also describes mesh complications and treatment failures. The book illuminates the intersection of prolapse with female incontinence, incontinence diagnosis and management after major reconstructions such as neobladder or penile inversion, vaginoplasty, and incontinence due to rarer conditions such as fistulas. Further chapters explore female urinary incontinence in special populations including pediatric patients, the elderly, and women with neurogenic lower urinary tract dysfunction, as well as poorly understood populations such as older children, women post-reconstruction, and trans-women. It also addresses research needs and the ever-expanding horizon of new developments in the field of incontinence in women. Female Urinary Incontinence provides a comprehensive text directed towards urologists, gynecologists, and those trained in female pelvic medicine and reconstructive surgery (FPMRS). Given the

topic of incontinence specifically in women and the burgeoning rise of women in the field of FPMRS, the book features an all-female author list comprised of an international group of female urologists and urogynecologists selected to author chapters on their particular expertise.

Rethinking White Societies in Southern Africa Duncan Money 2020-02-12 This book showcases new research by emerging and established scholars on white workers and the white poor in Southern Africa. Rethinking White Societies in Southern Africa challenges the geographical and chronological limitations of existing scholarship by presenting case studies from Angola, Mozambique, South Africa, Zambia and Zimbabwe that track the fortunes of nonhegemonic whites during the era of white minority rule. Arguing against prevalent understandings of white society as uniformly wealthy or culturally homogeneous during this period, it demonstrates that social class remained a salient element throughout the twentieth century, how Southern Africa's white societies were often divided and riven with tension and how the resulting social, political and economic complexities animated white minority regimes in the region. Addressing themes such as the class-based disruption of racial norms and practices, state surveillance and interventions – and their failures – towards nonhegemonic whites, and the opportunities and limitations of physical and social mobility, the book mounts a forceful argument for the regional consideration of white

societies in this historical context. Centrally, it extends the path-breaking insights emanating from scholarship on racialized class identities from North America to the African context to argue that race and class cannot be considered independently in Southern Africa. This book will be of interest to scholars and students of southern African studies, African history, and the history of race.
