Musicians' Mobilities and Music Migrations in Early Modern Europe Gesa zur Nieden 2016-10-31 During the 17th and 18th century musicians' mobilities and migrations are essential for the European music history and the cultural exchange of music. Adopting viewpoints that reflect different methodological approaches and diversified research cultures, the book presents studies on central scopes, strategies and artistic outcomes of mobile and migratory musicians as well as on the transfer of music. By looking at elite and non-elite musicians and their everyday mobilities to major and minor centers of music production and

practice, new biographical patterns and new stylistic paradigms in the European East, West and South emerge.

A Historical-Critical Study of the Book of Zephaniah Ehud Ben Zvi 1991-01-01 The series Beihefte zur Zeitschrift für die alttestamentliche Wissenschaft (BZAW) covers all areas of research into the Old Testament, focusing on the Hebrew Bible, its early and later forms in Ancient Judaism, as well as its branching into many neighboring cultures of the Ancient Near East and the Greco-Roman world.

Priests and Cults in the Book of the Twelve Lena-Sofia Tiemeyer 2016-04-01 This book discusses the depictions of the cult and its personnel in the twelve prophetic books commonly referred to as "The Book of the Twelve" or "The Minor Prophets." The articles in the volume explore the following questions: How did these prophetic writers envision the priests and the Levites? What did they think about the ritual aspects of ancient Israelite faith, including not only the official temple cult in Jerusalem but also cultic expressions outside the capital? What, in their views, characterized a faithful priest and what should the relationship be between his cultic performance and the ways in which he lived his life? How does the message of each individual author fit in with the wider Israelite traditions? Finally, who were these prophetic authors, in which historical contexts did they live and work, and what stylistic tools did they use to communicate their message?

Language, Counter-Memory, Practice Michel Foucault 2019-06-30 Because of their range, brilliance, and singularity, the ideas of the philosopher-critic-historian Michel Foucault have gained extraordinary currency throughout the Western intellectual community. This book offers a selection of seven of Foucault's most important published essays, translated from the French, with an introductory essay and notes by Donald F. Bouchard. Also included are a summary of a course given by Foucault at College de France; the transcript of a conversation between Foucault and Gilles Deleuze; and an interview with Foucault that appeared in the journal Actuel. Professor Bouchard has divided the book into three closely related sections. The four essays in Part One examine language as a "perilous limit" of what we know and what

we are. The essays in the second part suggest the methodological guidelines to which Foucault subscribes, and they record, in the editor's words, "the penetration of the language of literature into the domain of discursive thought." The material in the last section is more obviously political than the essays. It treats language in use, language attempting to impart knowledge and power. Translated by the editor and Sherry Simon into fluent and lucid English, these essays will appeal primarily to students of literature, especially those interested in contemporary continental structuralist criticism. But because of the breadth of Foucault's interests, they should also prove valuable to anthropologists, linguists, sociologists, and psychologists.

Linear Systems Theory João P. Hespanha 2018-02-13 A fully updated textbook on linear systems theory
Linear systems theory is the cornerstone of control theory and a well-established discipline that focuses on linear differential equations from the perspective of control and estimation. This updated second edition of Linear Systems Theory covers the subject's key topics in a unique lecture-style format, making the book easy to use for instructors and students. João Hespanha looks at system representation, stability, controllability and state feedback, observability and state estimation, and realization theory. He provides the background for advanced modern control design techniques and feedback linearization and examines advanced foundational topics, such as multivariable poles and zeros and LQG/LQR. The textbook presents only the most essential mathematical derivations and places comments, discussion, and terminology in sidebars so that readers can follow the core material easily and without distraction. Annotated proofs with sidebars explain the techniques of proof construction, including contradiction, contraposition, cycles of implications to prove equivalence, and the difference between necessity and sufficiency. Annotated theoretical developments also use sidebars to discuss relevant commands available in MATLAB, allowing students to understand these tools. This second edition contains a large number of new practice exercises with solutions. Based on typical problems, these exercises guide students to succinct and precise answers, helping to clarify issues and consolidate knowledge. The book's balanced chapters can each be covered in approximately two hours of lecture time, simplifying course planning and student review. Easy-to-use textbook in unique lecture-style format Sidebars explain topics in further detail Annotated proofs and discussions of MATLAB commands Balanced chapters can each be taught in two hours of course lecture New practice exercises with solutions included

A Grammar of the Eastern European Hasidic Hebrew Tale Lily Kahn 2014-10-16 This volume constitutes the first reference grammar of the Hasidic Hebrew hagiographic tales composed in late nineteenth- and early twentieth-century Eastern Europe. It presents a thorough survey of Hasidic Hebrew orthography, morphology, syntax, and lexis illustrated with extensive examples.

Aristotle's Animals in the Middle Ages and Renaissance Emeritus Professor for Ancient & Medieval Philosophy Carlos Steel 1999 Aristotle's zoological writings with their wealth of detailed investigations on diverse species of animals have fascinated medieval and Renaissance culture. This volume explores how these texts have been read in various traditions (Arabic, Hebrew, Latin), and how they have been incorporated in different genres (in philosophical and scientific treatises, in florilegia and encyclopedias, in theological symbolism, in moral allegories, and in manuscript illustrations). This multidisciplinary and multilinguistic approach highlights substantial aspects of Aristotle's animals.

Orthographies in Early Modern Europe Susan Baddeley 2012-07-30 This volume provides, for the first time, a pan-European view of the development of written languages at a key time in their history: that of the 16th century. The major cultural and intellectual upheavals that affected Europe at the time - Humanism, the Reformation and the emergence of modern nation-states - were not isolated phenomena, and the evolution of the orthographical systems of European languages shows a large number of convergences, due to the mobility of scholars, ideas and technological innovations throughout the period.

The Original Verses of Apollodorus' ›Chronica‹ Kilian Fleischer 2020-07-20 The Chronica by the grammarian Apollodorus of Athens (2nd century BC) was an exemplary chronographical reference work. It was composed in trimeters and represents the first iambic didactic poem ever. So far, the surviving original verses have hardly been appreciated and analyzed in their own terms. Therefore a comprehensive collection of these verses is provided, including an introduction, edition, translation and commentary. Most verses stem from Philodemus' Index Academicorum, a Herculanean papyrus. Through the use of new imaging techniques and cutting-edge editing methods, enormous textual progress has been made. Many verses have been newly restored or significantly improved. They often reveal new hard facts about Academic philosophers and also bear some relevance for the dating of the Chronica and for

Apollodorus' biography. In short, this collection guarantees easy access to the genuine verses of the *Chronica*, as originally drafted by Apollodorus, and thereby facilitates a contextualization or comparison with other (Iambic) didactic poems on a dramatically changed textual basis. The scope of the book fulfills various scholarly desiderata from a historical, philosophical, philological and literary-critical standpoint.

Systematic Theology Wayne A. Grudem 2009-05-18 The Christian church has a long tradition of systematic theology, that is, of studying biblical teaching on centrally important doctrines such as the Word of God, redemption, and Jesus Christ. Wayne Grudem's bestselling *Systematic Theology* has several distinctive features: A strong emphasis on the scriptural basis for each doctrine Clear writing, with technical terms kept to a minimum A contemporary approach, treating subjects of special interest to the church today A friendly tone, appealing to the emotions and the spirit as well as the intellect Frequent application to life Resources for worship within each chapter Bibliographies in each chapter that cross-reference subjects to a wide range of other systematic theologies.

The Composition and Redaction of the Book of Amos Tchavdar S. Hadjiev 2009 ThisOxford dissertation offers a detailed analysis of the text of the Old Testament book of the prophet Amos and attempts to reconstruct the process of its composition. It looks into the probable historical circumstances in which the prophetic oracles were collected and edited and seeks to show how the prophetic message lived on and spoke to the various communities which preserved and transmitted it.

Job's Body and the Dramatised Comedy of Moralising Katherine E. Southwood 2020-09-02 This book focuses on the expressions used to describe Job's body in pain and on the reactions of his friends to explore the moral and social world reflected in the language and the values that their speeches betray. A key contribution of this monograph is to highlight how the perspective of illness as retribution is powerfully refuted in Job's speeches and, in particular, to show how this is achieved through comedy. Comedy in Job is a powerful weapon used to expose and ridicule the idea of retribution. Rejecting the approach of retrospective diagnosis, this monograph carefully analyses the expression of pain in Job focusing specifically on somatic language used in the deity attack metaphors, in the deity surveillance metaphors and in the language connected to the body and social status. These metaphors are analysed in a comparative way using research from medical anthropology and sociology which focuses on illness narratives and expressions of pain. *Job's Body and the Dramatised Comedy of Moralising* will be of interest to anyone working on the Book of Job, as well as those with an interest in suffering and pain in the Hebrew Bible more broadly.

The Birth of Hedonism Kurt Lampe 2017-05-09 According to Xenophon, Socrates tried to persuade his associate Aristippus to moderate his excessive indulgence in wine, women, and food, arguing that only hard work can bring happiness. Aristippus wasn't convinced. Instead, he and his followers espoused the most radical form of hedonism in ancient Western philosophy. Before the rise of the better known but comparatively ascetic Epicureans, the Cyrenaics pursued a way of life in which moments of pleasure, particularly bodily pleasure, held the highest value. In *The Birth of Hedonism*, Kurt Lampe provides the most comprehensive account in any language of Cyrenaic ideas and behavior, revolutionizing the understanding of this neglected but important school of philosophy. *The Birth of Hedonism* thoroughly and sympathetically reconstructs the doctrines and practices of the Cyrenaics, who were active between the fourth and third centuries BCE. The book examines not only Aristippus and the mainstream Cyrenaics, but also Hegesias, Anniceris, and Theodorus. Contrary to recent scholarship, the book shows that the Cyrenaics, despite giving primary value to discrete pleasurable experiences, accepted the dominant Greek philosophical belief that life-long happiness and the virtues that sustain it are the principal concerns of

ethics. The book also offers the first in-depth effort to understand Theodorus's atheism and Hegesias's pessimism, both of which are extremely unusual in ancient Greek philosophy and which raise the interesting question of hedonism's relationship to pessimism and atheism. Finally, the book explores the "new Cyrenaicism" of the nineteenth-century writer and classicist Walter Pater, who drew out the enduring philosophical interest of Cyrenaic hedonism more than any other modern thinker.

The Square of Opposition: A Cornerstone of Thought Jean-Yves Béziau 2017-03-10 This is a collection of new investigations and discoveries on the theory of opposition (square, hexagon, octagon, polyhedra of opposition) by the best specialists from all over the world. The papers range from historical considerations to new mathematical developments of the theory of opposition including applications to theology, theory of argumentation and metalogic.

Matthew's Messianic Shepherd-King Joel Willitts 2007-01-01 In two places in the First Gospel (Matt 10:5b-6; 15:24) the Messianic mission of Jesus and his disciples is limited to a group called 'the lost sheep of the house of Israel'. In light of Matthew's intense interest in Jesus' Davidic Messiahship and the Jewish Shepard-King traditions surrounding King David it is argued that the 'lost sheep of the house of Israel' refers to remnants of the former northern kingdom of Israel who continued to reside in the northern region of the ideal Land of Israel.

A Phoenician-Punic Grammar Charles R. The SAGE Handbook of Television Studies Manuel Alvarado 2014-12-09 "Genuinely transnational in

content, as sensitive to the importance of production as consumption, covering the full range of approaches from political economy to textual analysis, and written by a star-studded cast of contributors" - Emeritus Professor Graeme Turner, University of Queensland "Finally, we have before us a first rate, and wide ranging volume that reframes television studies afresh, boldly synthesising debates in the humanities, cultural studies and social sciences...This volume should be in every library and media scholar's bookshelf." - Professor Ravi Sundaram, Centre for the Study of Developing Societies Bringing together a truly international spread of contributors from across the UK, US, South America, Mexico and Australia, this Handbook charts the field of television studies from issues of ownership and regulation through to reception and consumption. Separate chapters are dedicated to examining the roles of journalists, writers, cinematographers, producers and manufacturers in the production process, whilst others explore different formats including sport, novella and soap opera, news and current affairs, music and reality TV. The final section analyses the pivotal role played by audiences in the contexts of gender, race and class, and spans a range of topics from effects studies to audience consumption. The SAGE Handbook of Television Studies is an essential reference work for all advanced undergraduates, graduate students and academics across broadcasting, mass communication and media studies.

Comparative Climate Change Litigation: Beyond the Usual Suspects Francesco Sindico 2021-01-21 This book is based on the acknowledgment that climate change is a multifaceted challenge that requires action on the part of all stakeholders, including civil society, and the notion that climate change is at a tipping point with urgent measures needed in the next decade. Against this background, civil society is turning its attention to the courts as a means to directly influence climate action, partly because of the global scepticism towards the progress of global climate action, despite the ongoing implementation of the Paris Agreement. Focusing on the individual, broadly representing civil society, the book offers fresh perspectives on climate change litigation. While most of the literature on climate change litigation examines the same specific jurisdictions, mostly common law countries (US and Australia in particular), this book also considers specific countries in Asia, Africa and Latin America with little or no climate change litigation. It explores the reasons for the lack of litigation and discusses what measures should or could be taken to change this situation and push forward climate action. Unlike other literature on the subject, this book analyses climate change litigation using a scenario-based methodology. Combining

rigorous academic analysis with a practical policy-oriented focus, the book provides valuable insights for a wide range of stakeholders interested in climate change litigation. It appeals to civil society organisations around the world, international organisations and law firms interested in climate change litigation.

Against Method Paul Feyerabend 1993 Modern philosophy of science has paid great attention to the understanding of scientific 'practice', in contrast to concentration on scientific 'method'. Paul Feyerabend's acclaimed work, which has contributed greatly to this new emphasis, shows the deficiencies of some widespread ideas about the nature of knowledge. He argues that the only feasible explanations of scientific successes are historical explanations, and that anarchism must now replace rationalism in the theory of knowledge. The third edition of this classic text contains a new preface and additional reflections at various points in which the author takes account both of recent debates on science and on the impact of scientific products and practices on the human community. While disavowing populism or relativism, Feyerabend continues to insist that the voice of the inexpert must be heard. Thus many environmental perils were first identified by non-experts against prevailing assumptions in the scientific community. Feyerabend's challenging reassessment of scientific claims and understandings are as pungent and timely as ever.

Middle Indo-Aryan and Jaina Studies Colette Caillat 1991 The VIIIth World Sanskrit Conference was held in August 1987, at the Kern Institute in Leiden. Panels constituted one of its special features. More than half of these panels will be published in the present series. The titles of the first ten volumes are: "The Sanskrit Tradition and Tantrism", "Earliest Buddhism and Madhyamaka", "The History of Sacred Places in India as Reflected in Traditional Literature", "Sense and Syntax in Vedic", "Pāṇini and the Veda", "Middle Indo-Aryan and Jaina Studies", "Sanskrit Outside India", "Medical Literature from India, Sri Lanka and Tibet", "Indian Art and Archaeology", "Rules and Remedies in Classical Indian Law". Each volume contains contributions by several specialists, and has one or more editors of international reputation in the field concerned.

Preface to Plato Eric A. HAVELOCK 2009-06-30 Plato's frontal attack on poetry has always been a problem for sympathetic students, who have often minimized or avoided it. Beginning with the premise

that the attack must be taken seriously, Mr. Havelock shows that Plato's hostility is explained by the continued domination of the poetic tradition in contemporary Greek thought. The reason for the dominance of this tradition was technological. In a nonliterate culture, stored experience necessary to cultural stability had to be preserved as poetry in order to be memorized. Plato attacks poets, particularly Homer, as the sole source of Greek moral and technical instruction--Mr. Havelock shows how the Illiad acted as an oral encyclopedia. Under the label of mimesis, Plato condemns the poetic process of emotional identification and the necessity of presenting content as a series of specific images in a continued narrative. The second part of the book discusses the Platonic Forms as an aspect of an increasingly rational culture. Literate Greece demanded, instead of poetic discourse, a vocabulary and a sentence structure both abstract and explicit in which experience could be described normatively and analytically: in short a language of ethics and science.

Gilgamesh Epic and Old Testament Parallels Alexander Heidel 1949 Cuneiform records made some three thousand years ago are the basis for this essay on the ideas of death and the afterlife and the story of the flood which were current among the ancient peoples of the Tigris-Euphrates Valley. With the same careful scholarship shown in his previous volume, *The Babylonian Genesis*, Heidel interprets the famous Gilgamesh Epic and other related Babylonian and Assyrian documents. He compares them with corresponding portions of the Old Testament in order to determine the inherent historical relationship of Hebrew and Mesopotamian ideas.
