Finance Nico van der Wijst 2013-01-17 By providing a solid theoretical basis, this book introduces modern finance to readers, including students in science and technology, who already have a good foundation in quantitative skills. It combines the classical, decision-oriented approach and the traditional organization of corporate finance books with a quantitative approach that is particularly well suited to students with backgrounds in engineering and the natural sciences. This combination makes finance much more transparent and accessible than the definition-theorem-proof pattern that is common in mathematics and financial economics. The book's main emphasis is on investments in real assets and the real options attached to them, but it also includes extensive discussion of topics such as portfolio theory, market efficiency, capital structure and derivatives pricing. Finance equips readers as future managers with the financial literacy necessary either to evaluate investment projects themselves or to engage critically with the analysis of financial managers. Macrocosm and Microcosm Rudolf Steiner 1986-09 The human life alternates between the great, external macrocosm and the invisible inner microcosm. Steiner discusses the various paths of self-development that lead across these two thresholds and to the transformation of human soul-forces into spiritual organs of perception. A brief synopsis: The world behind the tapestry of sensory perceptions; human life between macrocosm and microcosm. The planets and their connection with our sleeping and waking life; consciousness soul, mind soul, and sentient soul. The inner path of the mystic; the cycle of the year; the ability to see through matter; the "greater guardian of the threshold." The nature and development of human soul faculties; the "lesser guardian of the threshold"; the sun at midnight; the results of "sins of omission." The Egyptian mysteries of Osiris and Isis; initiation experiences; the Rosicrucian path; mystics of the Middle Ages. Initiation in the "northern mysteries"; the necessity of suppressing the ego; conscious assent into the macrocosm and the higher worlds; the world of archetypal images. The four spheres of the higher worlds; the threshold of the spirit world; forces for developing clairvoyant consciousness in the world of archetypal images. The macrocosm mirrored in the human being; the nervous system as an inner solar system; the image of purified blood and the conquest of our lower nature in the symbol of the Rose Cross. Spiritual organs of perception and the strengthening powers of sleep; the thinking of the heart; the ego viewed from twelve perspectives. Reading the akashic record; the transition from intellect to heart thinking; four-dimensional space; intellectual questions have no meaning in relation to conditions before the intellect itself existed. Human and planetary evolution; adaptation to the different states of Earth's existence; the breathing process should not be influenced directly unless knowledge has become prayer.

field, leading to the current subsurface understanding which is described in greater detail. As such the Memoir will be an enduring reference source for those exploring for, developing, producing hydrocarbons and sequestering CO2 on the UKCS in the coming decades. It encapsulates the petroleum industry's deep subsurface knowledge accrued over more than 50 years of exploration and production.

Turkey: facing a new millennium Amikam Nachmani 2013-07-19 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. Turkey's involvement in the Gulf War in 1991 paved the way for the country's acceptance into the European Union. This book traces that process and in the first part looks at Turkey's foreign policy in the 1990s, considering the ability of the country to withstand the repercussions of the fall of communism. It focuses on Turkey's achievement in halting and minimising the effects of the temporary devaluation in its strategic importance that resulted from the waning of the Cold War and the disintegration of the Soviet Union, the skilful way in which Turkey avoided becoming embroiled in the ethnic upheavals in Central Asia, the Balkans and the Middle East, and the development of a continued policy of closer integration into the

European and western worlds. Internal politics are the focus of the second part of the book, addressing the curbing of the Kurdish revolt, the economic gains made, and the strengthening of civil society. Nachmani goes on to analyse the prospects for Turkey in the twenty-first century, in the light of the possible integration into Europe, which may leave the country's leadership free to deal effectively with domestic issues. This book will make crucial reading for anyone studying Turkish politics, or indeed European or European Union politics.

Brand Meaning Mark Batey 2012-03-12 How a company 'positions' a brand is not necessarily how the consumer perceives that brand. Brands allow marketers to add meaning to products and services, but it is consumers who ultimately determine what a brand means. The sources of brand meaning are many and varied, as are the ways in which meanings become attached to brands. Brand Meaning takes a comprehensive and holistic look at how consumers find and create meaning in brands. It explores the fundamental conscious and unconscious elements that connect people with products and brands. Traditional marketing concepts are questioned, and a new brand meaning framework is put forward. The book lays out new and fertile territory for the understanding of how brands can both assimilate and provide meaning. It will leave readers with a better appreciation of what brand means and what brands mean. Primarily intended as a supplemental reader for undergraduate, graduate and MBA courses, the book's scope should also make it rewarding and valuable reading for practitioners in the fields of marketing and advertising.
