Monk's Confession 2010-11-01 A Monk's Confession is the first completely new English translation of Guibert of Nogent's remarkable memoirs in over seventy years. Written around the year 1115, they offer an unparalleled look at the life of a monk in the Middle Ages. Guibert, who lived his entire life in northern France, called these memoirs his book of monodiae, or solitary songs. Many scholars consider them the first Latin autobiography in the West after Augustine's Confessions. Readers will be stirred and surprised by Guibert's intense preoccupation with the sinfulness of his soul, his visions of demons and necromancy, and his

frank struggle to come to terms with his sexuality. But Guibert is also a valuable witness to his age. In addition to his personal history, his memoirs give a brief chronicle of the abbey of Nogent--where he served as abbot for some twenty years--and a vivid account of the bloody uprising of the Laon Commune in 1112. His observations give precious insight into education, monastic life, and the beginnings of the great medieval towns. Paul J. Archambault's translation successfully renders Guibert's Latin--at times stylish, at times rustic--into lively, modern English. He consulted Edmond-René Labande's authoritative 1981 Latin edition with French translation. He provides a complete introduction and annotation that help situate Guibert within the history and literature of the Middle Ages while permitting readers to judge for themselves how to interpret this fascinating voice from the past.

The Borderlands of Southeast Asia National Defense University Press 2011-08 The contributors to this book emphasize a mix of heritage and history as the primary leitmotif for contemporary border rivalries and dynamics. Whether the region's 11 states want it or not, their bordered identity is falling into ever sharper definition--if only because of pressure from extraregional states. Chapters are organized by country to elicit a broad range of thought and approach as much as for the specific areas or nation-states examined in each chapter. This book aims to provide new ways of looking at the reality and illusion of bordered Southeast Asia. Edited by James Clad, Sean M. McDonald, and Bruce Vaughn, with contributions from: Zachary Abuza, Richard P. Cronin, David Lee, Rhoda Margesson, Dick K. Nanto, Patricia O'Brien, David Rosenberg, Carlyle A. Thayer, Michael Wood.

Beyond E-Learning Marc J. Rosenberg 2005-12-13 A follow-up to his best-selling E-Learning, Beyond E-Learning explains the most current thinking on how organizations learn and apply what they know to be successful, and explores the increasingly important role that technology plays, not as an end in itself but as a vital means to get there. The book also provides a clear path for helping to integrate learning—including e-learning—knowledge management, and performance support, and will help training professionals and the organizations they serve go beyond common myths and misconceptions about training and e-learning, focus training/learning activities directly on organizational know-how, and implement a framework that can (at last) be a catalyst for true organizational learning.

Man of Letters As a Man of Business William Dean Howells 2006 A brilliant piece by Howells, renowned American author and literary critic. In this essay he critically examines the weak financial state of writers. He argues that presently writers do not earn substantial amount of money from their publication of their books. However, with the increasing popularity of magazines, writers can earn more by the sale of their serial publications to various journals.

It's All About Muhammad F. W. Burleigh 2016-06-16 *It's All About Muhammad, A Biography of the World's Most Notorious Prophet*, is a comprehensive biography of the man who created a religion that he called Islam. Air Passenger Rights Michal Bobek 2016-01-28 Regulation 261/2004 on Air Passengers' Rights has been amongst the most high-profile pieces of EU secondary legislation of the past years, generating controversial judgments of the Court of Justice, from C-344/04 ex parte IATA to C-402/07 Sturgeon. The Regulation has led to equally challenging decisions across the Member States, ranging from judicial enthusiasm for passenger rights to domestic courts holding that a Regulation could not be relied upon by an individual claimant or even threatening outright to refuse to apply its provisions. The economic stakes are significant for passengers and airlines alike, and despite the European Commission's recent publication of reform proposals, controversies appear far from settled. At the same time the Regulation should, according to the Treaty, have uniform, direct and general application in all the Member States of the Union. How, then, can this diversity be explained? What implications do the diverging national interpretations have for the EU's regulatory strategy at large? This book brings together leading experts in the field to present a series of case studies from 15 different Member States as well as the extra-territorial application of Regulation 261, combined with high-level analysis from the perspectives of Aviation law and EU law.

Al-Ghazzali on Truthfulness and Sincerity Muhammad Al-Ghazzali 2003-03-21 General Description: Al-Ghazzali describes the concept of intention in great detail, its true nature and how the intention of the believer is better than his deed. He explores whisperings of the self, evil inspiration and bad thoughts and then those deeds that change according to intention and how the admirable servant does what he does for the sake of God. In regard to sincerity, he describes its true nature and then goes on to describe truthfulness.

Your Inner Hedgehog Alexander McCall Smith 2021-04-06 Welcome to the insane and rarified world of Professor Dr Dr Moritz-Maria von Igelfeld of the Institute of Romance Philology. Von Igelfeld is engaged in a never-ending quest to win the respect he feels certain he is due—a quest that has a tendency to go hilariously astray. This time Professor Dr Dr von Igelfeld will have to take on a dangerous newcomer—Deputy Librarian Dr Hilda Schreiber-Ziegler. Swept in on a wave of progressive enthusiasm, she seems determined to drag the department into the modern age. At first this is a minor nuisance, but when Dr Schreiber-Ziegler attempts to remove twenty-one of the twenty-two copies of Professor Dr Dr von Igelfeld’s seminal work, the thousand-page Portuguese Irregular Verbs . . . Well, things have gone a bit too far. As a result, von Igelfeld mounts a campaign for the exalted position of director of the Institute against none other than the upstart Dr Schreiber-Ziegler herself. But the politicking will have to wait; von Igelfeld has been offered a visiting fellowship among the ivory towers of Oxford, where he will have to stave off an MI6 recruitment attempt and the effusive attention of a young American scholar. Still, von Igelfeld has always heeded the clarion call of duty, especially when it comes with a larger office.

Lifetime Health 2003 Being healthy is much more than being physically fit and free from disease. Health is the state of well-being in which all of the components of health -- physical, emotional, social, mental, spiritual, and environmental -- are in balance. To be truly healthy, you must take care of all six components. - p. 11.

Macroeconomics Michael Parkin 2005

School Inspectors Jacqueline Baxter 2017-04-10 This book examines the role of the inspector within the context of a number of OECD member states and explores the ways in which the inspectors themselves interpret, implement and influence inspection practices and policy. Inspection policy can have various unintended consequences, some of which produce radical discrepancies between the policy intent and its implementation. A number of these discrepancies derive from the way in which the policy is articulated while others derive from the ways in which inspectors interpret and operationalise this policy. This implementation is coloured and conditioned by several factors, including the evidence on which inspectors base their judgements; what counts as evidence in different policy contexts; what counts as valid knowledge in inspection processes; the qualities needed by inspectors working in differing policy contexts and the identities that they adopt in order to successfully carry out their work. The book provides a valuable contribution to our understanding of the politics and practices which colour and shape the legitimacy and operational execution of inspection policy. The work is unique in its focus on the inspectors' role within the implementation of the inspection process— an element often overlooked in the literature. It also includes two chapters co-written by inspectors, offering unique insights into their life worlds and identities.

Essays in Physics Geoffrey Brooker 2021 Each of this book's 32 essays discusses a chosen topic, at a level that is generally within that of a four-year degree course in Physics. The essays supplement (indeed sometimes correct) treatments usually given, or supplies reasoning that tends to fall through the cracks. The author uses his life long experience of tutorial teaching at Oxford to know what topics often need such discussion, for clarification, or for avoidance of common confusions. The book contains accounts of even-standard topics, accounts that offer an unusual emphasis, or a fresh insight, or more than customary rigour, or a cross-link to apparently unrelated material. The student (and their teachers) who really wants to understand physics will find this book indispensable. Often the outcome of tutorial discussion has been an understanding that lies a little to the side of what is presented in standard texts. Such understanding is presented here in the essays. The topics covered are diverse and have something useful to say across most areas of a physics degree.

Time: A Very Short Introduction Jenann Ismael 2021-10-28 What is time? What does it mean for time to pass? Is it possible to travel in time? What is the difference between the past and future? Until the work of Newton, these questions were purely topics of philosophical speculation. Since then we've learned a great deal about time, and its study has moved from a subject of philosophical reflection to instead became part of the subject matter of physics. This Very Short Introduction introduces readers to the current physical understanding of the direction of time, from the Second Law of Thermodynamics to the emergence of complexity and life. Jenann Ismael charts the line of development in physical theory from Newton, via Einstein's Theory of Relativity, to the current day. Einstein's innovations led to a vision of time very different from the familiar time of everyday sense. In this new vision, time is one of the dimensions in which the universe is extended alongside the spatial dimensions. The universe appears as a static block of events, in which there is no more a difference between past and future than there is between east and west. Discussing the controversy and philosophical confusion which surrounded the reception of this new vision, Ismael also covers the contemporary mixture of statistical mechanics, cognitive science, and phenomenology that point the way to reconciling the familiar time of everyday sense with the vision of time presented in Einstein's theories. Very Short Introductions: Brilliant, Sharp, Inspiring ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

The Lupus Book Daniel J. Wallace 2012-11-27 Lupus, a disease of the immune system, can be quite deadly, claiming the lives of thousands of patients yearly. Dr. Daniel J. Wallace is one of the world's leading authorities on this disorder, an eminent clinician who has treated over 3000 lupus patients, the largest such practice in America. His *The Lupus Book*, originally published in 1995, immediately established itself as the most readable and helpful book on the disease. Now Dr. Wallace has once again completely revised *The Lupus Book*, incorporating a wealth of new information. This Fifth Edition discusses new drug information and newly discovered information about the pathology of the disease--all laid out in user-friendly language that any patient could understand. In particular, Wallace discusses the first drug for Lupus to be approved by the FDA--belimumab (Benlysta)--as well as other drugs in clinical trials. Readers will also discover fully updated sections on the science of lupus and breakthroughs in research. And as in past editions, the book provides absolutely lucid answers to such questions as: What causes lupus? How and where is the body affected? Can a woman with lupus have a baby? And how can one manage this disease? Indeed, Dr. Wallace has distilled his extensive experience, providing the most up-to-date information on causes, prevention, cure, exercise, diet, and many other important topics. There is also a glossary of terms and an appendix of lupus resource materials compiled by the Lupus Foundation of America. Over a million Americans have lupus. The new Fifth Edition offers these patients and their families an abundance of reliable, up-to-date information that will help them manage the disease and live a happier life.

Strategies That Influence Cost Containment in Animal Research Facilities National Research Council 2001-01-18 Care and use of animals in research are expensive, prompting efforts to contain or reduce costs. Components of those costs are personnel, regulatory compliance, veterinary medical care, and laboratory animal management, equipment, and procedures. Many efforts have been made to control and reduce personnel costs, the largest contributing factor to cost, through better facility and equipment design, more efficient use of personnel, and automation of many routine operations. However, there has been no comprehensive, recent analysis of the various cost components or examination of the strategies that have been proven or are purported to decrease the cost of animal facility operation. *Strategies that Influence Cost Containment in Animal Research Facilities* examines the current interpretation of governmental policy (Office of Management and Budget Circular A-21) concerning institutional reimbursement for overhead costs of an animal research facility and describes methods for economically operating an animal research facility. This report develops recommendations by which federal auditors and research institutions can establish what cost components of research animal facilities should be charged to institutions' indirect cost pool and what animal research facility cost components should be included in the per diem charges to investigators, and assesses the financial and scientific ramifications that these criteria would have among federally funded institutions. Further, the report determines the cost components of laboratory animal care and use in biomedical research and assesses and recommends methods of cost containment for institutions maintaining animals for biomedical research.

Jobs to Be Done Stephen Wunker 2016-11-15 In a challenging economy filled with multiple competitors, no one can afford to stagnate. Yet, innovation is notoriously difficult. How do you pinpoint the winning ideas that customers will love? Sifting through purchasing data for clues about what might sell or haphazardly brainstorming ideas are typical strategies. However, innovation expert Stephen Wunker offers the effective Jobs method: determining the drivers of customer behavior--those functional and emotional goals that people want to achieve. This simple shift in perspective opens up new insights about your customers and a wealth of hidden opportunities. For example, social media newcomer Snapchat used the Jobs process to capture the millennial demographic. By reducing functionality, the company satisfied its users' unmet need to document real life in the moment, without filters and "like" buttons. Packed with similar examples from every industry, this complete innovation guide explains both foundational concepts and a detailed action plan developed by Wunker and his team. In Jobs to Be Done, the groundbreaking Jobs Roadmap takes you step-by-step through the innovation process and reveals how to: Gather valuable customer insights Turn those insights into new product ideas Test and iterate until you find original profitable solutions And much more! Jobs to Be Done gives you a clear-cut framework for thinking about your business, outlines a roadmap for discovering new markets, new products and services, and helps you generate creative opportunities to innovate your way to success.

Metamorphic Textures Alan Spry 2013-10-22 *Metamorphic Textures* provides definitions, descriptions and illustrations of metamorphic textures, as well as the fundamental processes involved in textural development. This book is composed of 11 chapters and begins with a presentation of the metamorphic processes and the production of metamorphic minerals. The subsequent chapters describe the structural classification of grain boundaries, the metamorphic reactions, mineral transformations, and the crystallization and recrystallization of metamorphic rocks. These topics are followed by the texture examination of thermal metamorphic rocks and minerals and the preferred orientations of these rocks, particularly the dimensional and lattice preferred orientation. Other chapters survey the textures of rocks under dynamic and shock metamorphism. The final chapters describe the textures of regional and polymetamorphism. This book will be of great use to petrologists, physicists, and graduate and undergraduate petrology students.

The Seed Tree Stephen Carter 2021-09-28 When it comes to managing your money, don't be left asking, "Why didn't they teach me this in school?" Instead, take this important knowledge into your own hands in order to prepare yourself for a future of happiness, wealth, and financial freedom. In *The Seed Tree*: A

Financial Fable, high school teacher turned entrepreneur Stephen Carter details the story of sophomore Andrew Black as he navigates the world of finance alongside his instructor, Mr. Sharp. Written as a page-turning, engaging narrative, Andrew's experiences as he learns to manage his money serve as memorable lessons for the reader. From crafting a budget and obtaining his first job to setting up a Roth IRA and developing an investment plan, Andrew emerges at the end of the semester with more financial literacy than most adults attain in their lifetimes. With the power of compound interest at his back, Andrew's journey demonstrates the amazing benefits of getting an early start on the path toward financial intelligence.

The Religious Offering Thomas Cogswell Upham 1835

Life and Death Edward White 2018-04-23 Excerpt from Life and Death: A Reply to the Rev. J. Baldwin Brown's Lectures on Conditional Immortality Tells us, much Of the printed matter put forth by sundry advocates of that doctrine is Of ghastly dulness, and has' proved a weariness to his flesh. I know of no excuses for the existence Of such literature except these two: first, that every considerable movement in theology has in past ages been accompanied by a flood Of pamphlets and articles which would be very painful reading to a modern lecturer; and, secondly, that Providence seems to avenge the steady refusal Of the ablest writers to handle these questions, by permitting the literary activity Of less eloquent brethren, who, if not so learned or brilliant, are Often much more seriously in earnest than their superiors. But genuine love for truth will lead us not to be ashamed even of the most illiterate endeavours to extend its sovereignty In the world. Courageous faith also prompts us to sympathy with all who share it, even if their dialect be Galilean, and their argument how and then a little paradoxical. Yet Mr. Baldwin Brown will not forget, while honouring a few Of us beyond our deserts with SO distinguished a share Of his attention, that on the same side are a multitude Of other writers, ancient and modern, Asiatic, European, and American, whose learning and capacity it would be impertinent alike for me to extol or for him to depreciate. The Provensen Book of Fairy Tales Alice Provensen 2024-09-17 Now back in print, a beautifully illustrated collection of twelve reimagined fairy tales, including classics like "Beauty and the Beast" and literary tales like Oscar Wilde's "The Happy Prince." Alice and Martin Provensen were one of the most talented husband-and-wife author-illustrator teams of the twentieth century. A long-out-of-print cult classic first published 50 years ago, The Provensen Book of Fairy Tales is a treasury of their illustrations accompanied by fairy tales from authors such as A. A. Milne, Hans Christian Andersen, and Oscar Wilde. Here too are clever retellings and newly imagined tales: refined old favorites like Arthur Rackham's "Beauty and the Beast," feminist revisions

like Elinor Mordaunt's "The Prince and the Goose Girl," and sensitive stories by literary stylists like Henry Beston's "The Lost Half-Hour" and Katharine Pyle's "The Dreamer." Full of magic, ingenuity, and humor, The Provensen Book of Fairy Tales is a witty modern descendant of Grimm's Fairy Tales and a classic in its own right, sure to be beloved by a new generation.
