A Purrfect Match Chris T. Kat 2012-12 When a bad day at work culminates in losing out on a promotion, Jim Sanders shifts into his animal form to let off steam. Then his bad day turns into a bad night-while prowling his Atlantic City neighborhood as a large gray house cat, he's caught in a torrential downpour. What little luck he has washes down the gutter when his new boss, Andrew Wright, catches him taking shelter on his porch, brings him inside, and starts calling him Mr. Frosty. As a feline, Jim becomes the inadvertent confessor for his boss's lonely son, Tony, a victim of schoolyard bullying. As a human, he feels drawn to Andrew, a man he wanted to resent. Finding love was never part of Jim's plan for the future-not with his bizarre secret-yet suddenly he finds himself navigating that minefield anyway. But not everything is easy, especially for an interracial gay couple dealing with prejudice in the workplace, at Tony's school, and even within their own families.

The Asian Financial Crisis and the Ordeal of Hong Kong Y. C. Jao 2001 Victim, not instigator of the Asian Financial Crisis, Hong Kong was the only economy that succeeded in defending its fully convertible currency, indeed its entire financial system, against speculators, but the price Hong Kong paid for success has been deep recession. Jao gives an objective, even-handed account and analysis of what happened to one of the world's most open economies during that world-roiling event. As an important study of financial events in a globalized economy, Jao's book will be engrossing, cautionary reading for professionals and academics alike, and a major work in the literature on international business, economics, finance, banking, and investment.

Introduction to Radar Using Python and MATLAB Lee Andrew (Andy) Harrison 2019-10-31 This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.

Agile Competitors and Virtual Organizations Steven L. Goldman 1995 It is becoming clear today that most of the management truisms that have guided executives and business educators for two generations no longer work. This book, written by three internationally recognized authorities on global competitiveness, is designed to help any business - large or small - come to terms with change and develop effective, profit-centered strategies. Clear, real-world examples are used to describe what it takes for companies and individuals to become "agile" - how they can thrive in a competitive environment of constant, unpredictable change. The book is the product of the authors' extensive research in cooperation with industry and government leaders that resulted in the influential 1991 report, 21st Century Manufacturing Enterprise Strategy. This book presents an updated and expanded vision of agile competition, which promises to affect life in the 21st century as profoundly as mass production-based competition affected life in the 20th century. By focusing on practice rather than on theory, the book describes in detail how this new form of competition is rapidly differentiating winners from losers, not just in the U.S. but around the world.

Executive Salaries in South Africa Debbie Collier 2014 "Who Should Have a Say on Pay? examines the pay packages of 50 of South Africa's largest and most influential listed companies. The findings are revealing: on average, the CEOs got paid more than R15 million a year - more than 700 times the minimum wage in certain industries - while the average cash and benefits package came to almost R13.1 million and once the gains on the vesting and exercise of share options is included, this average rises steeply to almost R49 million. This book addresses these pressing issues and considers possible mechanisms to rein in excessive executive pay"--Publiher description.
