On Startups: Advice and Insights for Entrepreneurs Dharmesh Shah 2012-12-09 Note from the Author Hi, my name is Dharmesh, and I'm a startup addict. And, chances are, if you're reading this, you have at least a mild obsession as well. This book is based on content from the OnStartups.com blog. The story behind how the blog got started is sort of interesting—but before I tell you that story, it'll help to understand my earlier story. As a professional programmer, I used to work in a reasonably fun job doing what I liked to do (write code). Eventually, I got a little frustrated with it all, so at the ripe old age of 24, I started my first software company. It did pretty well. It was on the Inc. 500 list of fastest growing companies three times. It reached millions of dollars of sales and was ultimately acquired. I ran that first company for over 10 years working the typical startup hours. When I sold that company, I went back to school to get a master's degree at MIT. I've always enjoyed academics, and I figured this would be a nice "soft landing" and give me some time to figure out what I wanted to do with my life. As part of my degree requirements, I had to write a graduate thesis. I titled my thesis "On Startups: Patterns and Practices of Contemporary Software Entrepreneurs." And, as part of that thesis work, I wanted to get some feedback from some entrepreneurs. So, I figured I'd start a blog. I took the first two words of the thesis title, "On Startups," discovered that the domain name OnStartups.com was available, and was then off to the races. The blog was launched on November 5, 2005. Since then, the blog and associated community have grown quite large. Across Facebook, LinkedIn, and email subscribers, there are over 300,000 people in the OnStartups.com audience. This book is a collection of some of the best articles from over 7 years of OnStartups.com. The articles have been topically organized and edited. I hope you enjoy them.

Kozier & Erb's Fundamentals of Nursing Australian Edition Audry Berman 2014-12-01 Kozier and Erb's Fundamentals of Nursing prepares students for practice in a range of diverse clinical settings and help them understand what it means to be a competent professional nurse in the twenty-first century. This third Australian edition has once again undergone a rigorous review and writing process. Contemporary changes in the regulation of nursing are reflected in the chapters and the third edition continues to focus on the three core philosophies: Person-centred care, critical thinking and clinical reasoning and cultural safety. Students will develop the knowledge, critical thinking and clinical reasoning skills to deliver care for their patients in ways that signify respect, acceptance, empathy, connectedness, cultural sensitivity and genuine concern.

Cultural Competence in Clinical Psychiatry Wen-Shing Tseng 2008-05-20 Building on their previous works about cultural competency in clinical areas and in psychotherapy, the editors have created in this volume an exceptional and entirely new approach to understanding and acquiring cultural competency. Instead of examining populations of different ethnic groups, particularly minority groups (as is typical in the literature), this illuminating volume examines cultural issues as applied to the practice of virtually every psychiatric service (e.g., inpatient, outpatient, consultation-liaison, pain management, and emergency) and specialty (e.g., child and adolescent, geriatric, addiction, and forensic psychiatry). Concluding chapters discuss cultural factors in psychopharmacology and psychotherapy. Thirteen distinguished contributors bring these issues to life with numerous case vignettes in all 11 chapters. The foundation for this breakthrough approach rests on Culture -- The unique behavior patterns and lifestyle that encompass a set of views, beliefs, values, and attitudes shared by a group of people that distinguish it from other groups. Culture and people influence each other reciprocally and interactionally -- on a conscious or unconscious level. Cultural competence -- Clinicians need to master cultural sensitivity, knowledge, and empathy; they need to be flexible, and they need to be skilled in culturally relevant doctor-patient relationships and interactions and to know how to use these elements therapeutically. The critical importance of cultural competence -- Clinicians typically work in multiethnic-cultural societies, providing care for patients of diverse backgrounds. For this reason, virtually all clinical practice can be seen as transcultural. Even when clinicians treat patients who share cultural backgrounds similar to their own, it is inevitable that some differences exist. Further, in the medical setting, three types of culture are present: the culture of the patient, the culture of the physician, and the medical culture in which the clinical work is practiced. Understanding these three cultural dimensions is essential to comprehending and carrying out culturally competent clinical work. This practical and innovative guide -- designed to help mental health care professionals meet the new requirements for cultural competence in clinical work -- will find a

welcoming audience among students, residents, educators, and clinicians everywhere.

Slouching Towards Bethlehem Joan Didion 2017-03-21 The "dazzling" and essential portrayal of 1960s America from the author of *South and West* and *The Year of Magical Thinking* (The New York Times). Capturing the tumultuous landscape of the United States, and in particular California, during a pivotal era of social change, the first work of nonfiction from one of American literature's most distinctive prose stylists is a modern classic. In twenty razor-sharp essays that redefined the art of journalism, National Book Award-winning author Joan Didion reports on a society gripped by a deep generational divide, from the "misplaced children" dropping acid in San Francisco's Haight-Ashbury district to Hollywood legend John Wayne filming his first picture after a bout with cancer. She paints indelible portraits of reclusive billionaire Howard Hughes and folk singer Joan Baez, "a personality before she was entirely a person," and takes readers on eye-opening journeys to Death Valley, Hawaii, and Las Vegas, "the most extreme and allegorical of American settlements." First published in 1968, *Slouching Towards Bethlehem* has been heralded by the New York Times Book Review as "a rare display of some of the best prose written today in this country" and named to Time magazine's list of the one hundred best and most influential nonfiction books. It is the definitive account of a terrifying and transformative decade in American history whose discordant reverberations continue to sound a half-century later.

Problems of Youth Muzafer Sherif 2017-07-05 This book describes and analyzes, from an interdisciplinary point of view, those problems of youth that are currently objects of remedial action on both community and national levels. It explores the many causes of adolescent happiness and discontent, behavior and misbehavior,

aspirations and aversions in the rapidly changing patterns of contemporary class, institutional, and cultural settings. It provides practical information for all professionals concerned with adolescent problems and affords small comfort to any who hopes for quick results. Problems of Youth first considers problems traditionally considered in youth research, discussing adolescent attitudes and goals within a broadly applicable theory of adolescent development. The second part concentrates on youth problems in terms of their dynamics in social and cultural settings undergoing change at different rates. The third part presents studies of youth in trouble, offering guidelines for new theoretical and empirical approaches and underscoring the need, to study individual youth problems within their socio-cultural and class frameworks. The final part attempts through research and measurement the major sources of influences affecting youth. Reflecting the position that there is a constant danger of viewing adolescence exclusively through the eyes of one's own specialty, the contributors to this volume take a cross-disciplinary approach to the subject, drawing on resources of other fields to expand the perspective of their particular area of specialization. In doing so, they offer all students of sociology, social psychology, and related disciplines a new, unified approach to the timely paradox of youth in transition with itself and with a world that is itself in transition.

Strategic Entrepreneurial Finance Darek Klonowski 2014-11-27 Entrepreneurial finance is a discipline that

studies financial resource mobilization, resource allocation, risk moderation, optimization in financial contracting, value creation, and value monetization within the context of entrepreneurship. However, without proper strategic consideration the discipline is incomplete. This book examines how the activity of entrepreneurial finance can be enhanced via a concentration on value creation and through improved strategic decision-making. The most unique feature of the book is its focus on value creation. For entrepreneurs, value creation is not a one-off activity, but rather a continuous cycle of incremental improvements across a wide range of business activities. Entrepreneurial value creation is described in four comprehensive stages: value creation, value measurement, value enhancement, and value realization, referred to as the C-MER model. This book focuses on what creates value rather than merely presenting value creation in a straight accounting framework. At the same time, deliberate and tactical planning and implementation ensure that the firm does not ignore the components necessary for it to survive and flourish. Vigorous strategic deliberations maximize the entrepreneurial firm's chances of making the right business decisions for the future, enable the firm to manage its available financial and non-financial resources in the most optimal manner, ensure that the necessary capital is secured to progress the development of the firm to its desired development level, and build value. While financial considerations are important, the field of strategic entrepreneurial finance represents a fusion of three disciplines: strategic management, financial management, and entrepreneurship. This orientation represents a natural evolution of scholarship to combine specific domains and paradigms of naturally connected business disciplines and reflects the need to simultaneously examine business topics from different perspectives which may better encapsulate actual entrepreneurial practices.

The Individual and the Group Malcolm Pines 2012-12-06 ~~lcolm Pines and Lise Rafaelsen The Seventh International Congress of Group Psychotherapy organized in Copenhagen by the International Association of Group Psychotherapy was one of the largest and most representative congresses on this subject that has yet been held. Probably for the first time we achieved the declared aim of the International Association: that of bringing together representatives of the different approaches to group psychotherapy in the same forum to allow for communication, exchange, and development of our relationships. Previous congresses have been less representative and it seems to augur well for the future of the Association and of its congresses that there was this strong force and wish for unification and for exchange within the field of group psychotherapy. The Congress theme, "The Individual and the Group: Boundaries and Interrelations in Theory and Practice" was chosen because it gave an opportunity once again to examine the very basis for group psychotherapy as theory and as practice. The basic theme, stated in the opening papers by Professor Marie Jahoda and Professor James Anthony, was replayed daily with new developments and variations according to the theoretical position of each subsequent speaker.

The Phenomenology of Autobiography Arnaud Schmitt 2017-05-08 Taking a fresh look at the state of autobiography as a genre, *The Phenomenology of Autobiography: Making it Real* takes a deep dive into the experience of the reader. Dr. Schmitt argues that current trends in the field of life writing have taken the focus away from the text and the initial purpose of autobiography as a means for the author to communicate with a reader and narrate an experience. The study puts autobiography back into a communicational context, and putting forth the notion that one of the reasons why life writing can so often be aesthetically unsatisfactory, or difficult to distinguish from novels, is because it should not be considered as a literary genre, but as a modality with radically different rules and means of evaluation. In other words, not only is autobiography radically different from fiction due to its referentiality, but, first and foremost, it should be read differently.

Explaining Knowledge Rodrigo Borges 2017-11-24 The Gettier Problem has shaped most of the fundamental debates in epistemology for more than fifty years. Before Edmund Gettier published his famous 1963 paper, it was generally presumed that knowledge was equivalent to true belief supported by adequate evidence. Gettier presented a powerful challenge to that presumption. This led to the development and refinement of many prominent epistemological theories, for example, defeasibility theories, causal theories, conclusive-reasons theories, tracking theories, epistemic virtue theories, and knowledge-first theories. The debate about the appropriate use of intuition to provide evidence in all areas of philosophy began as a debate about the epistemic status of the 'Gettier intuition'. The differing accounts of epistemic luck are all rooted in responses to the Gettier Problem. The discussions about the role of false beliefs in the production of knowledge are directly traceable to Gettier's paper, as are the debates between fallibilists and infallibilists. Indeed, it is fair to say that providing a satisfactory response to the Gettier Problem has become a litmus test of any adequate account of knowledge even those accounts that hold that the Gettier Problem rests on mistakes of various sorts. This volume presents a collection of essays by twenty-six experts, including some of the most influential philosophers of our time, on the various issues that arise from Gettier's challenge to the analysis of knowledge. *Explaining Knowledge* sets the agenda for future work on the central problem of epistemology.

Social Experiments Larry L. Orr 1999 Intended to provide a basic understanding not only of how to design and implement social experiments, but also of how to interpret their results once they are completed, author Larry L. Explaining European Identity Formation Stephanie Bergbauer 2017-10-24 What makes people identify with Europe? To answer this question, this book analyzes the development and determinants of a common European identity among EU citizens from the Maastricht Treaty in 1992 to the recent financial and economic crisis. The author examines citizens' identification with Europe for all EU member states, and systematically explores the theoretical and empirical implications of two turning points in the recent history of EU integration, namely the EU's enlargement to Central and Eastern Europe in 2004/2007 and the financial and economic crisis that started in 2008. The book integrates theoretical approaches to European identity in sociology, social-psychology and EU public opinion research in a comprehensive model for explaining individual identification with Europe. The empirical analysis employs a multilevel framework to systematically assess the influence of individual characteristics and the political, economic, and social context on citizens' feelings of identity. The long analysis period spanning from 1992 to the present allows inferences to be drawn about the long-term developments in the sources of European identification as well as the immediate impact of EU enlargement and the crisis on the determinants of European identification.

Researching Entrepreneurship Per Davidsson 2004-09-17 Entrepreneurship is a phenomenon of tremendous societal importance. It is also an elusive phenomenon, and researching entrepreneurship is therefore fun, fascinating—and frustrating at times. In *Researching Entrepreneurship*, one of the most highly recognized entrepreneurship scholars shares in a personal and readable way his rich experience and ideas on how entrepreneurship can or should be researched. After a comprehensive treatment of entrepreneurship as societal phenomenon and scholarly domain, the core chapters of the book discuss design, sampling, operationalization and analysis issues on several levels of analysis: individual, venture, firm, industry, region and nation. The author provides numerous examples of problems and solutions from real research projects, as well as experienced-based suggestions for further improvements in future work. The book is targeted primarily at doctoral students and other (relative) newcomers to the field of entrepreneurship research. However, taking a fresh, reflective perspective and looking beyond research conventions, it should provide potential for inspiration and food for thought also for experienced entrepreneurship researchers. Moreover, while the examples are taken from entrepreneurship research, the book provides a unique "experienced empirical researcher" (rather than "textbook method expert") treatment of issues that are of equal relevance across the social sciences. This goes for topics such as the role of theory; qualitative vs. quantitative research; validity checking; statistical inference, and replication. Per Davidsson is Professor in Entrepreneurship at Brisbane Graduate School of Management, QUT, Australia, and Jönköping International Business School, Sweden. He is also Chair of the Research Committee of the Entrepreneurship Division of the (American) Academy of Management.

TOMORROW IS TODAY, A behavior modification methodology, guide, and workbook to manage the job search process Lawrence D. Alter This 240-page workbook is a highly effective, no nonsense, self-marketing instrument to facilitate and manage the entire job-search campaign. Contained in its pages are all the tools and information necessary to help your terminated employee win and keep their next job. Whether or not you provide Outplacement support to your separated employees, our workbook would be an excellent tool to augment their job search. It provides a complete resource to help the discharged worker achieve and keep their next position. **FINDING A JOB IS HARD WORK.** It has been estimated that as many as one out of every three workers attempts to change jobs annually in the United States. Out of a labor force of 153 million, that represents almost 50,000,000 job seekers who are seeking new employment each year. As a result, the job search process is highly competitive at all levels. It can be lengthy, frustrating, prejudicial, and unfair. Older, more traditional job finding techniques have become less productive. The traditional resume no longer has the same impact in generating the all important and often elusive interview. Both the Wall Street Journal and USA TODAY have highlighted the fact that only about 15% of all professionals find a new position through responding to published advertisements or online postings, another 10% through placement agencies or search

firms, and only 5% through unsolicited direct mail. Why then, would anyone focus 90% of their time and effort in areas that represent only about 30% of all potential opportunities? It is not uncommon for 200-300 people to respond to help wanted advertisements. Yet seldom do more than 6 to 10 people achieve interviews, and after an often lengthy process, only one person gets the job. Everyone else starts the whole process again. Older Americans, women, and minorities can often face an even more difficult road due to unspoken, but ever-present biases. There is a better way. *Tomorrow Is Today* dispels the myth that the most qualified candidate always gets the job. It points out that the person who is hired is usually the one who is liked the best. This book can be a major factor in how you differentiate yourself from other candidates when the hiring decision is almost always based upon subjective factors such as the individual's personality style, body language, and manner of being interviewed. It is an invaluable resource in helping you to achieve your next position with added features that assist in effectively managing both career growth and family issues.

The key, rather than to emphasize past accomplishments or education, is to sell your value to prospective employers. In *Cracking the New Job Market*, Holland introduces the prevailing rules of this new approach to job seeking and equips readers to master the skills required for success. You'll learn how to gather information on what a prospective employer finds important; emphasize key skills, accomplishments, and qualities in tailored resumes; tell the right stories during your interview; identify the intersection between personal talents and what the marketplace needs; unlock the networking power of social media; and negotiate the best possible offer. Archaeological Sites as Space for Modern Spiritual Practice Raimund Karl 2018-11-07 Archaeological heritage can be disputed, especially where it is important to religions and their practitioners. While the destruction of archaeological sites in war – often due to religious fervour – is frequently making the headlines, apparently lesser disputes about local heritage sites go unreported. This book focuses on these lesser, but much more frequent, potential conflicts between archaeological heritage management and conservation on the one hand, and practitioners of religious beliefs who use archaeological heritage in their practice on the other. By exploring case studies from Austria, the Czech Republic, Estonia, France, Norway, Romania, Russia, Spain, Sweden and Wales, this book examines the interaction between spiritual practice and monuments conservation. This book will be of great interest to heritage professionals, archaeologists, historians, conservationists and religious practitioners alike, through its exploration of various kinds of interactions between these different heritage communities and their interests in archaeology.
