Children and Biography Kate Douglas 2022-08-25 The first study of life narratives produced for, about, and written by children, this book examines the recent popularity of children's biographies and how they engage with the biggest issues of our time: environmental change, health crises, education, and children's personal and political development. Beginning with a literary-historical overview, *Children and Biography* proceeds to examine 21st-century examples and trends such as illustrated texts including *Women in Science*, the *Fantastically Great Women Who...* books, *Rebel Dogs*, *Goodnight Stories for Rebel Girls*, *Kids Who Did*, *My Beautiful Birds* and *The Journey*. The book also considers archives of children's writings and drawings, in particular the testimonies of child asylum seekers, children's biographical art, and 'Lockdown diaries' produced during the Covid-19 pandemic. By analyzing these works alongside empirical studies into how such material is received by child readers, and how texts generated by children are perceived both by them and their parents, this book provides new knowledge on how biographies for children are produced and read. Comprehensive and original, *Children and Biography*, presents an ethical methodological framework for scholarly practice when reading, witnessing and interpreting children's life narratives. The book offers a mandate for future researchers: to place children's voices and writing at the centre of inquiries in ways that facilitate genuine agency for child authors.

Children, Citizenship, and Environment Bronwyn Hayward 2012 Her comparative discussion with the US and UK draws on lessons from New Zealand, a country where young citizens often express a strong sense of personal responsibility for their planet but where many children also face shocking social conditions. Hayward develops a 'SEEDS' model of ecological citizenship education (Social agency, Environmental Education, Embedded justice, Decentred deliberative democracy and Self transcendence). The discussion considers how the SEEDs model can support young citizens' democratic imagination and develop their 'handprint' for social justice. From eco-worriers and citizen-scientists to streetwise sceptics, "*Children, Citizenship and Environment*" identifies a variety of forms of citizenship and discusses why many approaches make it more difficult, not easier, for young citizens to effect change.

Young Researchers Margaret Mallett 2002-02-07 Informational kinds of reading are crucial in every lesson. This book looks at how we can encourage children from the very beginning to think of themselves as young researchers using skills and strategies for clear purposes. It argues that the creative practitioner nurtures children's sense of wonder and curiosity about the world and all its phenomena. Packed full of advice on how to use the most stimulating and exciting texts and the liveliest approaches, the book celebrates the good practice of teachers and student teachers in a large number of classroom case studies. The content includes: * a summary of the recent developments and a framework of principles to inform good practice in this challenging aspect of literacy * chapters concentrating on particular age groups - beginning with the nursery and ending with the later primary years - and thus taking up an essentially developmental approach * an assessment of recent research and how findings can be put to practical and creative use in the classroom. A central message is that children benefit from collaborating with teachers and peers at every stage of finding out. The spoken language energises informational reading and writing, making the sharing of the fruits of children's research highly enjoyable. This book will inspire you and lead to the very best practice.

How Children Learn to Write Dorothy Latham 2002-07-25 This book is a useful addition to any staff library. What makes it different to many other similar books is that it shows teachers that speaking, listening and reading create the foundations for writing. Tested in schools, staff said: "It is a very useful framework for action-research based upon secure theory. When deciding classroom strategies, it is easy to find what you are looking for and the chapter summaries are very helpful. Some of the staff development and training suggestions are very practical and we are trying them out. We found the

emphasis upon class novels and the class discussion that follows, very important, especially when linked to the excellent examples of children's writing." This book may appear to some as theoretical and 'academic', but this is why it will be valuable. It does what the title says because it shows how children learn to write. It starts at the beginning and saves diving into the latest trend. Perhaps its best recommendation is that every school that was asked to look at it said, 'It's good and we have ordered a copy' - John Lilly, independent education consultant 'The chapter on the Taxonomy of Writing Purposes will be useful for planning and those on extending and enhancing writing will definitely be helpful in many day-to-day situations' - Nicholas Bielby, Times Educational Supplement This book outlines the processes which are involved when children learn to write. The author shows how certain strategies can improve children's progress in writing. Dealing with the age range three to 13, the book addresses issues to do with: - the gender gap - children with English as an additional language - left-handedness Dorothy Latham includes ideas for sound and easy ongoing assessment of writing. The book is written in line with the requirements of the English National Curriculum and The National Literacy Strategy Framework for England, but is not limited to them. Topics also covered include: - brain development and structures - the acquisition of speech - language and thinking - working memory - secretarial skills - stages in compositional development - writing purposes and cross-curricular applications - strategies for improving self-generated writing - using reading to improve writing - using speech and drama to improve writing and - ten ways to improve children's writing. This book is for serving teachers in schools wishing to study the subject in further depth, and as a source book for students. Useful for school-based staff INSET, it provides simple activities for teachers to do and discuss.

Engaging Students in Academic Literacies María Estela Brisk 2022-11-30 The second edition of this important and practical text provides specific information to guide teachers in planning and carrying out genre writing instruction in English for K-8 students within the content areas. Informed by systemic functional linguistics (SFL)—a framework conducive to instruction that views language as a meaning-making resource—this book guides teachers by presenting concrete ways to teach writing in the language arts, science, and social science curricula. Introducing theory of language that is effective in addressing the writing development of all students, especially multilingual/multicultural groups, the book provides essential scaffolding for teachers to design and implement effective, inclusive curricula while building their own knowledge. Fully up to date, the second edition features new genres appropriate for middle school, examples of student writing, an expanded focus on genre pedagogy, a new chapter on bilingual learners, guidance for teaching in the middle grades, as well as clear steps to prepare genre units based two decades of experience working with whole schools. The chapter units cover distinct genres, including memoirs, historical, genres, fictional narratives, arguments, and more. With ready-to-use tools, the new edition prepares elementary and middle school teachers to meet and adapt to the variable demands of their own educational contexts. Easy to navigate, this teacher-friendly text is an essential resource for courses in academic writing, English education, and multilingual education, and for pre-service and practicing English Language Arts (ELA) teachers who want to expand their teaching abilities and knowledge bases.
