The African Diaspora Isidore Okpewho 2001-11-09 "This book examines the character of New World black cultures and their relationships with the plural societies within which they function. This volume seeks a balanced look at the fate of the African presence in Western society as well as insights into the sources of periodic conflict between blacks and others."--Résumé de l'éditeur.

The World System and the Earth System Alf Hornborg 2016-09-17 In this benchmark volume top scholars come together to present state-of-the-art research and pursue a more rigorous framework for understanding and studying the linkages between social and ecological systems. Contributors from a wide spectrum of disciplines, including archaeology, anthropology, geography, ecology, palaeo-science, geology, sociology, and history, present and assess both the evolution of our thinking and current, state-of-the-art theory and research. Covering ancient through modern periods, they discuss the complex ways in which human culture, economy, and demographics interact with ecology and climate change. The World System and the Earth System is critical reading for all scholars and students working at the interface of nature and society. Contributors: Thomas Abel, Björn Berglund, Chris Chase-Dunn, Alfred Crosby, Carole L. Crumley, John Dearing, Bert de Vries, Nina Eisenmenger, Andre Gunder Frank, Jonathan Friedman, Stefan Giljum, Thomas Hall, Karin Holmgren, Alf Hornborg, Kristian Kristiansen, Thomas Malm, Daniel Mandell, Betty Meggers, George Modelski, Emilio Moran, Helena Öberg, Frank Oldfield, Susan Stonich, William Thompson, Peter Turchin.

A World Dictionary of Livestock Breeds, Types and Varieties Ian L. Mason 1996 This dictionary covers cattle, sheep, pigs, goats, horses, asses and buffalo. It includes all names which have been applied to interbreeding groups of these species whether they are called breeds, sub-breeds, types, varieties, strains or lines. The region or country of origin of each group is given and this is followed by a very brief description of the 'breed' in terms of products, colour, and major morphological features. There is a note on the history of the breed and the dates of formation of breed societies and herdbooks. Synonyms for its name are listed as well as the present conservation status. Overall the book continues to represent a standard reference work for all concerned with domestic livestock, particularly those involved in animal breeding and genetics.

A Shi'ite Anthology William C. Chittick 1981-01-01 Created by the Prophet Muhammad and his twelve Imams, the Hadith is an ancient and profoundly influential body of religious texts in Shi'ite Muslim literature, second in importance only to the Holy Koran itself. Texts on the practical aspects of life and pure metaphysics are included in this first English translations of excerpts from the Hadith. Especially selected for the Western reader by the renowned Islamic scholar Tabataba'i, the passages from the Hadith shed light on the culture, history, law, and theology of the Shi'ite community and provide direct translations of some of the most famous of Islamic prayers.

Colonial Blackness Herman L. Bennett 2009-07-06 Asking readers to imagine a history of Mexico narrated through the experiences of Africans and their descendants, this book offers a radical reconfiguration of Latin American history. Using ecclesiastical and inquisitorial records, Herman L. Bennett frames the history of Mexico around the private lives and liberty that Catholicism engendered among enslaved Africans and free blacks, who became majority populations soon after the Spanish conquest. The resulting history of 17th-century Mexico brings forth tantalizing personal and family dramas, body politics, and stories of lost virtue and sullen honor. By focusing on these phenomena among peoples of African descent, rather than the conventional history of Mexico with the narrative of slavery to freedom figured in, Colonial Blackness presents the colonial drama in all its untidy detail.

Planetary Materials James J. Papike 2018-12-17 Volume 36 of Reviews in Mineralogy presents a comprehensive coverage of the mineralogy and petrology of planetary materials. The book is organized with an introductory chapter that introduces the reader to the nature of the planetary sample suite and provides some insights into the diverse environments from which they come. Chapter 2 on Interplanetary Dust

Particles (IDPs) and Chapter 3 on Chondritic Meteorites deal with the most primitive and unevolved materials we have to work with. It is these materials that hold the clues to the nature of the solar nebula and the processes that led to the initial stages of planetary formation. Chapter 4, 5, and 6 consider samples from evolved asteroids, the Moon and Mars respectively. Chapter 7 is a brief summary chapter that compares aspects of melt-derived minerals from differing planetary environments.

Transformations in Slavery Paul E. Lovejoy 2011-10-10 This history of African slavery from the fifteenth to the early twentieth centuries examines how indigenous African slavery developed within an international context. Paul E. Lovejoy discusses the medieval Islamic slave trade and the Atlantic trade as well as the enslavement process and the marketing of slaves. He considers the impact of European abolition and assesses slavery's role in African history. The book corrects the accepted interpretation that African slavery was mild and resulted in the slaves' assimilation. Instead, slaves were used extensively in production, although the exploitation methods and the relationships to world markets differed from those in the Americas. Nevertheless, slavery in Africa, like slavery in the Americas, developed from its position on the periphery of capitalist Europe. This new edition revises all statistical material on the slave trade demography and incorporates recent research and an updated bibliography.

Exchanging Our Country Marks Michael A. Gomez 2000-11-09 The transatlantic slave trade brought individuals from diverse African regions and cultures to a common destiny in the American South. In this comprehensive study, Michael Gomez establishes tangible links between the African American community and its African origins and traces the process by which African populations exchanged their distinct ethnic identities for one defined primarily by the conception of race. He examines transformations in the politics, social structures, and religions of slave populations through 1830, by which time the contours of a new African American identity had begun to emerge. After discussing specific ethnic groups in Africa, Gomez follows their movement to North America, where they tended to be amassed in recognizable concentrations within individual colonies (and, later, states). For this reason, he argues, it is possible to identify particular ethnic cultural influences and ensuing social formations that heretofore have been considered unrecoverable. Using sources pertaining to the African continent as well as runaway slave advertisements, ex-slave narratives, and folklore, Gomez reveals concrete and specific links between particular African populations and their North American progeny, thereby shedding new light on subsequent African American social formation.

Cholinesterase-inhibiting Insecticides Pierre Mineau 1991 Foremost specialists in the field of cholinesterase-inhibiting insecticides have contributed to this volume, to provide an accurate assessment of the impacts of organophosphate and carbamate pesticides on non-target organisms, especially wildlife. The increased scrutiny of pest control agents in recent years has resulted from several factors. These comprise the demands for environmental protection, the recognition of wildlife as a valuable and diminishing resource, and the realization that few wild habitats exist that pest control programs do not directly target or indirectly affect. In that context, the book brings together the scattered literature on the effects of anticholinesterase pesticides on wildlife and other non-target species. The literature has long been dominated by research emanating from the drug industry and the military. The therapeutic aspects of cholinergically-active substances and their potential as chemical warfare agents has directed research in the field. Thus the measurement of cholinesterase activity as a biomarker to assess the impact on wildlife species is a relatively recent phenomenon.

Africa and Africans in the Making of the Atlantic World, 1400–1800 John Thornton 1998-04-28 This book explores Africa's involvement in the Atlantic world from the fifteenth century to the eighteenth century. It focuses especially on the causes and consequences of the slave trade, in Africa, in Europe, and in the New World. African institutions, political events, and economic structures shaped Africa's voluntary involvement in the Atlantic arena before 1680. Africa's economic and military strength gave African elites the capacity to determine how trade with Europe developed. Thornton examines the dynamics of colonization which made slaves so necessary to European colonizers, and he explains why African slaves were placed in roles of central significance. Estate structure and demography affected the capacity of slaves to form a self-sustaining society and behave as cultural actors, transferring and transforming African culture in the New World.

Atlas of Meteorites Monica Grady 2013-03-24 A complete visual reference for meteorite classification, this atlas combines high resolution optical microscope images with detailed descriptions. It provides a systematic account of meteorites and their most important classification parameters, making it an essential resource for meteorite researchers. Each chapter starts with a description of the meteorite class, with a summary of the mineralogical, chemical and isotopic characteristics of the group. The full-color images are taken in plane- and cross-polarized light and reflected light, and arranged to highlight textural variations in meteorites. Specimens are grouped to show the effects of increasing thermal alteration and shock, as well as variations in chondrule size and type. Chapters on iron meteorites, pallasites and mesosiderites are included, photographed as mounts in reflected light, to show the range of textural variations that accompany these meteorites. Images from the book can be downloaded from www.cambridge.org/9780521840354.

The Dutch Overseas Empire, 1600–1800 Pieter C. Emmer 2020-10-15 This pioneering history of the Dutch Empire provides a new comprehensive overview of Dutch colonial expansion from a comparative and global perspective. It also offers a fascinating window into the early modern societies of Asia, Africa and the Americas through their interactions.

Visual Soil Evaluation Bruce C. Ball 2015-10-23 Visual Soil Evaluation (VSE) provides land users and environmental authorities with the tools to assess soil quality for crop performance. This book describes the

assessment of the various structural conditions of soil, especially after quality degradation such as compaction, erosion or organic matter loss. Covering a broad range of land types from abandoned peats to prime arable land, this useful handbook assesses yield potential across a range of scales. It also appraises the use of VSE in determining the potential of different land types for carbon storage, greenhouse gas emissions and nutrient leaching, and for diagnosing and rectifying erosion and compaction in soils.

The Languages of Ghana Mary E. Kropp Dakubu 2015-06-03 First published in 1988, this book provides an easily accessible handbook of knowledge about the languages of Ghana; their geographical distribution, their relationships with each other, the social patterns of their use, and their structures. Besides the general introduction, it contains chapters on each of the individually recognised families of languages spoken in Ghana: Gur, Volta-Comoé, Gbe, Ga-Dangme, Central-Tongo and Mande. An additional chapter outlines the use of non-indigenous languages in the country.

Saltwater Slavery Stephanie E. Smallwood 2009-06-30 This bold, innovative book promises to radically alter our understanding of the Atlantic slave trade, and the depths of its horrors. Stephanie E. Smallwood offers a penetrating look at the process of enslavement from its African origins through the Middle Passage and into the American slave market. *Saltwater Slavery* is animated by deep research and gives us a graphic experience of the slave trade from the vantage point of the slaves themselves. The result is both a remarkable transatlantic view of the culture of enslavement, and a painful, intimate vision of the bloody, daily business of the slave trade.

The Peasant in Postsocialist China Alexander F. Day 2013-07-18 A radical new appraisal of the role of the peasant in post-socialist China, putting recent debates into historical perspective.

Many Thousands Gone Ira Berlin 2009-07-01 Today most Americans, black and white, identify slavery with cotton, the deep South, and the African-American church. But at the beginning of the nineteenth century, after almost two hundred years of African-American life in mainland North America, few slaves grew cotton, lived in the deep South, or embraced Christianity. *Many Thousands Gone* traces the evolution of black society from the first arrivals in the early seventeenth century through the Revolution. In telling their story, Ira Berlin, a leading historian of southern and African-American life, reintegrates slaves into the history of the American working class and into the tapestry of our nation. Laboring as field hands on tobacco and rice plantations, as skilled artisans in port cities, or soldiers along the frontier, generation after generation of African Americans struggled to create a world of their own in circumstances not of their own making. In a panoramic view that stretches from the North to the Chesapeake Bay and Carolina lowcountry to the Mississippi Valley, *Many Thousands Gone* reveals the diverse forms that slavery and freedom assumed before cotton was king. We witness the transformation that occurred as the first generations of creole slaves--who worked alongside their owners, free blacks, and indentured whites--gave way to the plantation generations, whose back-breaking labor was the sole engine of their society and whose physical and linguistic isolation sustained African traditions on American soil. As the nature of the slaves' labor changed with place and time, so did the relationship between slave and master, and between slave and society. In this fresh and vivid interpretation, Berlin demonstrates that the meaning of slavery and of race itself was continually renegotiated and redefined, as the nation lurched toward political and economic independence and grappled with the Enlightenment ideals that had inspired its birth.

The Cambridge Handbook of Language Standardization Wendy Ayres-Bennett 2021-02-28 Language standardization is the process by which conventional forms of a language are established and maintained. Bringing together internationally renowned experts, this Handbook provides a comprehensive overview of standardization, norms and standard languages. Chapters are grouped into five thematic areas: models and theories of standardization, questions of authority and legitimacy, literacy and education, borders and boundaries, and standardization in Late Modernity. Each chapter addresses a specific issue in detail, illustrating it with linguistic case studies and taking into account the particular political, social and cultural context. Showcasing cutting-edge research, it offers fresh perspectives that go beyond traditional accounts of the standardization of national European languages, and affords new insights into minoritized, indigenous and stateless languages. Surveying a wide range of languages and approaches, this Handbook is an essential resource for all those interested in language standards and standard languages.

The Cambridge World History Jerry H. Bentley 2015-04-09 The era from 1400 to 1800 saw intense biological, commercial, and cultural exchanges, and the creation of global connections on an unprecedented scale. Divided into two books, Volume 6 of the Cambridge World History series considers these critical transformations. The first book examines the material and political foundations of the era, including global considerations of the environment, disease, technology, and cities, along with regional studies of empires in the eastern and western

hemispheres, crossroads areas such as the Indian Ocean, Central Asia, and the Caribbean, and sites of competition and conflict, including Southeast Asia, Africa, and the Mediterranean. The second book focuses on patterns of change, examining the expansion of Christianity and Islam, migrations, warfare, and other topics on a global scale, and offering insightful detailed analyses of the Columbian exchange, slavery, silver, trade, entrepreneurs, Asian religions, legal encounters, plantation economies, early industrialism, and the writing of history.

The Atlantic Slave Trade Philip D. Curtin 1972-03-01 Curtin combines modern research and statistical methods with his broad knowledge of the field to present the first book-length quantitative analysis of the Atlantic slave trade. Its basic evidence suggests revision of currently held opinions concerning the place of the slave trade in the economies of the Old World nations and their American colonies. "Curtin's work will not only be the starting point for all future research on the slave trade and comparative slavery, but will become an indispensable reference for anyone interested in Afro-American studies."—*Journal of American History* "Curtin has produced a stimulating monograph, the product of immaculate scholarship, against which all past and future studies will have to be judged."—*Journal of American Studies* "Professor Curtin's new book is up to his customary standard of performance: within the limits he set for himself, *The Atlantic Slave Trade* could hardly be a better or more important book."—*American Historical Review*

Mason's World Dictionary of Livestock Breeds, Types and Varieties, 6th Edition Valerie Porter 2020-05-26 *Mason's World Dictionary of Livestock Breeds, Types and Varieties*, now in its sixth edition, has a long history as a reliable and authoritative source of key livestock breed information. Intended as a list of livestock names and synonyms for breeds, groups, types and varieties worldwide, the dictionary aims to include all names found in the literature, 'defining' each breed or type with a brief indication of identifying characteristics, uses and source of origin.

Angelbound (Angelbound Origins #1) Christina Bauer 2018-08-22 Eighteen year old Myla Lewis is a girl who loves two things: kicking ass and kicking ass. She's not your every day quasi-demon, half-demon and half-human, girl. For the past five years, Myla has lived for the days she gets to fight in Purgatory's arena. When souls want a trial by combat for their right to enter heaven or hell, they go up against her, and she hasn't lost a battle yet. But as she starts her senior year at Purgatory High, the arena fights aren't enough to keep her spirits up anymore. When the demons start to act weird, even for demons, and the King of the Demons, Armageddon, shows up at Myla's school, she knows that things are changing and it's not looking good for the quasi-demons. Myla starts to question everything, and doesn't like the answers she finds. What happened seventeen years ago that turned the quasi-demons into slave labor? Why was her mom always so sad? And why won't anyone tell her who her father is? Things heat up when Myla meets Lincoln, the High Prince of the Thrax, a super sexy half-human and half-angel demon hunter. But what's a quasi-demon girl to do when she falls for a demon hunter? It's a good thing that Myla's not afraid of breaking a few rules. With a love worth fighting for, Myla's going to shake up Purgatory.
