Frau Jenny Treibel. English Theodor Fontane 1976 "In his satirically humorous society novel "Frau Jenny Treibel", which was published in 1892, Fontane unmasked the main characters in their selfish intrigues clearly enough as sentimental, conceited or downright pragmatic. Nevertheless, one can smile with sympathy towards the characters who come to such refreshing conclusions as: "Money is nonsense."--Goodreads

Storying Later Life Gary Kenyon 2010-12-20 In its brief but vigorous history, gerontology has spawned a broadening range of specializations. One of the newest of such specializations is narrative gerontology, so named for its emphasis on the biographical, or inside, dimensions of the experience of aging. Telling stories about our world, our relationships, and ourselves is fundamental to how we make meaning. Everything from our history to our religion and our memories to our emotions is linked to the tales we tell ourselves, and others, about where we have come from and where we are going. They are central to who we are. The biographical side of human life is every bit as critical to fathom as the biological side, if we seek a more balanced, positive, and

optimistic perspective on what aging is about; if we would honor the dignity and complexity, the humanity and uniqueness of the lives of older persons, no matter what their health or economic standing. In this respect, a narrative approach is particularly suited to the exploration of such topics as meaning, spirituality, and wisdom, and the connections they share. This volume reflects a selection of new directions and insights, and constitutes a general broadening and deepening of narrative gerontology, exploring its implications for theory and research in the field of aging, and for the quality of life of older adults themselves. Such deepening indicates a greater refinement of thought, method, and intervention. The evolution of narrative gerontology is also evidenced by a significant increase in the number of faculty and graduate students engaged in research in this area, as well as by increasing collaboration among researchers, practitioners, and administrators in applying narrative insights to contexts such as long term care - indeed, healthcare in general. These initiatives have given rise to the phrase, "narrative care as core care".

Was bindet Menschen mit Demenz an das Leben? Henrike Voß 2022-01-24 Advance Care Planning (ACP) wurde gesetzlich in Pflegeeinrichtungen angesiedelt. Zwei Drittel aller Pflegeheimbewohner sind von einer Demenz betroffen. Bemerkenswert, dass gerade diese Personen im deutschen ACP-Konzept keine eigene modulare Bedeutung erhalten. Es wurden zwölf Menschen mit Demenz zu zwei Zeitpunkten mithilfe einer modifizierten Werteanamnese interviewt. Die qualitative Auswertung der Interviews fokussierte sich auf die Perspektive der Lebensbindung als erweiternder Grundgedanke für ACP. So erweist sich die modifizierte Werteanamnese als gut anwendbar. Es konnten deutlich mehr fördernde als hemmende Aspekte von Lebensbindung identifiziert werden. Eine konzeptionelle Erweiterung um diese Perspektive erscheint angebracht.

Inspirations from Kant Leslie Forster Stevenson 2011 These essays on Kant's theoretical philosophy, besides deriving inspiration from him, bring insights from contemporary analytical philosophy to bear in interpreting some of his most deep and difficult themes. The topics covered include representation and reality, appearances and things in themselves, the given and synthesis, transcendental idealism, the limits of scientific explanation, knowledge, belief and faith, freedom of judgment, different levels of operation within the mind, and determinism and free will. Though written separately (and in some

cases already published), the essays bear close relations with each other, and these inter-relations have been emphasized and signposted in preparing revised versions for this book. This collection of essays features a variety of concrete examples (and occasional humor) to illustrate and illuminate the very abstract themes of Kant's philosophy. It is designed to be readable with enjoyment and profit by those who do not count themselves as Kant scholars.

Exaltation Mark Jennings 2014 Based on two richly described case studies - a Pentecostal worship service and popular music festival - this book draws on sociology, theology and religious studies in order to understand the significance of ecstatic experience in these contexts. Interviews with performers in both settings, together with detailed first person accounts of worship services and live performances, combine to create a picture of the role of music, performance and space in catalysing ecstasy. Drawing on the work of thinkers as diverse as Michel Foucault, Emile Durkheim, Victor Turner and Friedrich Schleiermacher, this book demonstrates that religious and non-religious disciplines, paradigms and understandings can work in a complementary fashion to help us understand the significance of phenomena such as music and ecstatic experience.
 Ultimately, the argument put forward in the book is that ecstatic experience takes place in both religious and secular settings and is best understood by both theistic and non-theistic approaches, working together. The ecstatic experience common to both contexts is theorised as 'proto-religious phenomena' - the kernel from which religion may develop.
