Respected geographers Philip Dearden and Bruce Mitchell explore a host of contemporary environmental issues such as drought, flooding, loss of

biodiversity, ecosystem toxicity, and crop failure, while also offering a detailed overview of basic scientific concepts. Maintaining the same optimistic tone of previous editions, the text emphasizes that informed global citizens are the key to meeting these challenges and generating positive change. With increased coverage of demography, more international examples, and new material on human health and the environment throughout, this updated edition shows students how environmental concerns impact our daily lives both at home and abroad.

**The Language of Measurement** Association for Science Education 2010 The aim of this booklet is to enable teachers, publishers, awarding bodies and others to achieve a common understanding of important terms that arise from practical work in secondary science, consistent with the terminology used by professional scientists. This vocabulary underpins all empirical science and so is applicable not only to school science experiments but also to evaluating aspects of scientific claims made in the public domain.

Up, Down, Across Alisa Goetz 2003 The impact of cars, trains, and planes on our landscape, buildings, and culture has been well documented, but an account of the history of elevators, escalators, and moving sidewalks has previously been far from complete. Filling this gap, this landmark publication documents the extraordinary impact of these methods of human conveyance on the urban and suburban landscape, building types, and culture worldwide. Though elevators, escalators, and moving sidewalks are used by millions of people daily, they are often taken for granted by their riders. By design, many of these devices have become seamless within their surroundings. Function has often superseded form, as building and station managers have sought to move tenants and passengers through to their destinations with ease and efficiency. Yet there is a re-emerging desire to make conveyance mechanisms the spectacles they once were. Elevators and their support frames pulled out from hidden shafts for display in soaring atriums, escalators with different coloured steps and handrails, and moving sidewalks that turn corners are just some of the innovations that are helping these devices to get noticed. Engagingly and authoritatively written and illustrated with widely sourced images that range from historical prints, photographs, and movie stills to the latest computer renderings, Up, Down, Across makes a long-overdue and valuable addition to urban and architectural studies and cultural history.

**The Philokalia** G.E.H. Palmer 2011-09-15 The Philokalia is a collection of texts written between the fourth and the fifteenth centuries by spiritual masters of the Orthodox Christian tradition. First published in Greek in 1782, translated into Slavonic and later into Russian, The Philokalia has exercised an influence far greater than that of any book other than the Bible in the recent history of the Orthodox Church. It is concerned with themes of universal importance: how man may develop his inner powers and awake from illusion; how he may overcome fragmentation and achieve spiritual wholeness; how he may

attain the life of contemplative stillness and union with God. Only a selection of texts from The Philokalia has been available hitherto in English. The present rendering, which is a completely new translation, is designed to appear in five volumes. The first of these was published by Faber & Faber in 1979. The second volume consists mainly of writings from the seventh century, in particular by St Maximus the Confessor, the greater part of which has never before been translated into English. As in the first volume, the editors have provided introductory notes to each of the writers, a glossary of key terms, and a detailed index.

**An Actor Adrift** Lorna Marshall 2011-03-15 An Actor Adrift is the remarkable account of Japanese actor director Yoshi Oida, who in 1968 left Japan and joined Peter Brook's international theatre company in Paris. Since then he has become a leading member and trainer in the company. In this book, part personal story and part a workbook for actors and directors wishing to understand and employ Peter Brook's techniques, Oida describes the formation and early training of Brook's company and provides an account of the first decade of work. It provides a fascinating account of the company's first public performance - The Conference of the Birds in Iran, of the extraordinary explorative journey that followed through Africa, of work in America and of the return to work in France. While he relates productions of The Ik, The Conference of the Birds, The Mahabharata, Orghast and Timon of Athens, he interweaves his vivid personal experience as an actor in whom Eastern and Western culture and practices come together.

*Gutter Paradise* 2020-12 This book showcases Adele Renault's studio practice, large oil paintings and outdoor murals. It focusses on the "Gutter Paradise" series which started as depiction of pigeon feathers and have become more and more abstract over the years. Through her "Gutter Paradise" series, started in 2016, Adele Renault has pushed her practice towards a meticulous study of a detail that has become the subject. She forcefully alters an element that might seem banal to make it the main focus of her research.

*The Mystical as Political* Aristotle Papanikolaou 2012-10-30 Theosis, or the principle of divine-human communion, sparks the theological imagination of Orthodox Christians and has been historically important to questions of political theology. In *The Mystical as Political: Democracy and Non-Radical Orthodoxy*, Aristotle Papanikolaou argues that a political theology grounded in the principle of divine-human communion must be one that unequivocally endorses a political community that is democratic in a way that structures itself around the modern liberal principles of freedom of religion, the protection of human rights, and church-state separation. Papanikolaou hopes to forge a non-radical Orthodox political theology that extends beyond a reflexive opposition to the West and a nostalgic return to a Byzantine-like unified political-religious culture. His exploration is prompted by two trends: the fall of communism in traditionally Orthodox countries has revealed an unpreparedness on the part of Orthodox Christianity to address the question of political theology in a way that is consistent with its core axiom of theosis; and recent Christian political theology, some of it evoking the notion of "deification," has been critical of liberal democracy, implying a mutual incompatibility between a Christian worldview and that of modern liberal democracy. The first comprehensive treatment from an Orthodox theological perspective of the issue of the compatibility between Orthodoxy and liberal democracy, Papanikolaou's is an affirmation that Orthodox support for liberal forms of democracy is justified within the framework of Orthodox understandings of God and the human person. His overtly theological approach shows that the basic principles of liberal democracy are not tied exclusively to the language and categories of Enlightenment philosophy and, so, are not inherently secular.

*Permafrost Tunnel, Camp TUTO, Greenland* John F. Abel 1960 An experimental tunnel, 300 x 9 ft. was driven into a glacial till hillside near Camp TUTO during the summer of 1959 for the purposes of determining the feasibility of excavating subsurface openings in frozen glacial till, developing efficient methods for excavating this material, and determining the characteristics of the glacial till at depth. Excavation of frozen glacial till by conventional hard-rock mining methods, modified slightly to allow for low temperatures, was found to be feasible. The employment, effectiveness, and possible improvement of the mining methods and equipment are discussed and problems for future study are suggested.
