Each new print copy of PHTLS: Prehospital Trauma Life Support, Eighth Edition also includes an access code that unlocks a complete eBook and skills videos. PHTLS: Prehospital Trauma Life Support, Eighth Edition is the premier and proven global prehospital trauma education program from NAEMT. For three decades, PHTLS has improved the quality of trauma patient care and has saved lives. The Eighth Edition of PHTLS continues the PHTLS mission to promote excellence in trauma patient management by all providers involved in the delivery of prehospital care through global education. This legendary program was first developed by the National Association of Emergency Medical Technicians (NAEMT) in the early 1980s in cooperation with the American College of Surgeons Committee on Trauma (ACS-COT). Its medical content is continuously revised and updated to reflect current, state-of-the-art knowledge and practice. PHTLS promotes critical thinking as the foundation for providing quality care. It is based on the belief that EMS practitioners make the best decisions on behalf of their patients when given a good foundation of knowledge and key principles. The Eighth Edition of PHTLS features a new chapter, Physiology of Life and Death. This chapter creates a solid understanding of the physiology of life and pathophysiology that can lead to death. This understanding is essential for the prehospital care provider if abnormalities are to be found and addressed quickly in the trauma patient. Clear Approach to Assessing a Trauma Patient In the field, seconds count. PHTLS teaches and reinforces the principles of rapidly assessing a trauma patient using an orderly approach, immediately treating life-threatening problems as they are identified, and minimizing any delays in initiating transport to an appropriate destination. Dynamic Technology Solutions World-class content joins instructionally sound design in a user-friendly online interface to give instructors and students a truly interactive and engaging learning experience with: • eBook • Video Demonstrations of Critical Skills • Interactive Lectures PHTLS Online Continuing Education is also available. Pediatric Education for Prehospital Professionals (PEPP), Fourth Edition American Academy of Pediatrics (AAP), 2020-02-24 Pediatric Education for Prehospital Professionals (PEPP), Fourth Edition is an evidence-based resource of essential medical content for the assessment and management of infants and children in the field. This respected and ground-breaking program paired physicians and EMS providers together to ensure the content reflects current best practices and the realities of the field. Developed by the American Academy of Pediatrics, PEPP is designed to give prehospital professionals the knowledge, skills, and confidence they need to effectively assess and manage pediatric patients. PEPP combines world-class content with engaging features and an interactive course to truly prepare prehospital professionals to care for pediatric patients. The Fourth Edition Includes: A new chapter on Behavioral Emergencies A top-flight EMS author team working with AAP physician reviewers to ensure exceptional medical content with a focus on how it is applied in the “streets” New procedures on tourniquet application and intranasal medication administration Features Include: The Pediatric Assessment Triangle (PAT) represents the essence of the PEPP patient assessment method, which includes assessing appearance, work of breathing, and circulation to the skin. The Patient Assessment Flowchart provides students with an easy-to-understand reference of the pediatric patient assessment process. Case Studies provide an opportunity for students to apply the foundational knowledge presented in the chapter and strengthen their critical-thinking skills. Procedures provide step-by-step explanations and visual summaries of vital BLS and ALS pediatric care skills. Flexible Course Options: PEPP Course Coordinators may offer a 2-day onsite course or a 1-day enhanced hybrid course at the BLS or ALS level. The onsite course features interactive case-based lectures where students apply their knowledge in a safe environment. The hybrid course features case-based online modules with engaging interactivities, including rapid skills demonstration videos that students complete before attending the onsite portion for hands-on skill station coaching and small-group discussions. The BLS-level courses are geared toward emergency responders and EMTs, while the ALS-level courses are geared toward AEMTs and Paramedics.

Phtls: Prehospital Trauma Life Support, Military Edition Naemt 2019-07-29 PHTLS: Prehospital Trauma Life Support, Military Edition consists of the PHTLS core content and features thirteen chapters written by military prehospital trauma care experts for practitioners in the military environment. PHTLS: Prehospital Trauma Life Support, Military Edition is created in partnership between the National Association of Emergency Medical Technicians (NAEMT) and the Committee on Tactical Combat Casualty Care (C-TCCC). Since 1996, TCCC has improved the care rendered in combat prehospital environments. TCCC is the battlefield prehospital component of the Joint Trauma System, an organization within the United States Department of Defense that projects combat trauma care out to the point of injury and continues that care seamlessly while bringing the casualty home for recuperation and rehabilitation. TCCC guidelines are continuously revised and updated by C-TCCC, an all-volunteer group of military medicine and trauma care specialists. The membership of C-TCCC includes combat medics, corpsmen, and pararescuemen as well as physicians and physician assistants.

Ranger Medic Handbook U S Department of Defense 2019-11-21 Historically in warfare, the majority of all combat deaths have occurred prior to a casualty ever receiving advanced trauma management. The execution of the Ranger mission profile in the Global War on Terrorism and our legacy tasks undoubtedly will increase the number of lethal wounds. Ranger leaders can significantly reduce the number of Rangers who die of wounds sustained in combat by simply targeting optimal medical capability in close proximity to the point of wounding. Survivability of the traumatized Ranger who sustains a wound in combat is in the hands of the first responding Ranger who puts a pressure dressing or tourniquet and controls the bleeding of his fallen comrade. Directing casualty response management and evacuation is a Ranger leader task; ensuring technical medical competence is a Ranger Medic task.

A solid foundation has been built for Ranger leaders and medics to be successful in managing casualties in a combat environment. An integrated team response from non-medical personnel and medical providers must be in place to care for the wounded Ranger. The Ranger First Responder, Squad EMT, Ranger Medic Advanced Tactical Practitioner, and Ranger leaders, in essence, all Rangers must unite to provide medical care collectively, as a team, without sacrificing the flow and violence of the battle at hand. An integrated team approach to casualty response and care will directly translate to the reduction of the died of wounds rate of combat casualties and minimize the turbulence associated with these events in times of crisis. The true success of the Ranger Medical Team will be defined by its ability to complete the mission and greatly reduce preventable combat death. Rangers value honor and reputation more than their lives, and as such will attempt to lay down their own lives in defense of their comrades. The Ranger Medic will do no less. I will never leave a fallen comrade...

Urgencias en la atención prehospitalaria María Jaramillo 2015-11-01 La Atención Prehospitalaria (APH) es uno de los pilares fundamentales de los Sistemas de Emergencias Médicas. Los orígenes y el desarrollo de los modelos clásicos de este tipo de atención en Norteamérica y Europa han sido una pieza sólida que ha permitido la creación de diferentes modelos a nivel mundial, basados en estas dos grandes tendencias. Los modelos han evolucionado de diferentes maneras, de acuerdo a la realidad de cada país, y dentro de esta diversa realidad, claramente la mayor evolución la han logrado los países que desarrollaron paralelamente procesos educativos especializados en esta área. Estos procesos de educación superior en APH han sufrido un avance muy importante, especialmente en las dos últimas décadas en Latinoamérica. Colombia ha sido uno de los países que más ha generado procesos de desarrollo en APH, incluyendo procesos educativos y legislativos. Textos especializados como éste, donde se plasma la experiencia acumulada por un grupo de profesionales que han desarrollado gran parte de su desempeño laboral, en el área de formación del personal de APH, son un ejemplo de cómo se puede avanzar y permitir que información actualizada, basada en evidencia científica e interpretada por personal experto, llegue a estudiantes de las carreras de formación, no solo en Colombia, sino en toda América Latina. Estos procesos de educación superior en APH han sufrido un avance muy importante, especialmente en las dos últimas décadas en Latinoamérica.

Nancy Caroline's Emergency Care in the Streets American Academy of Orthopaedic Surgeons (AAOS), 2010-02-05 Think back to a time when paramedics didn't exist. When "drivers" simply brought injured patients to the hospital. When the EMS industry was in its infancy. A time before Nancy Caroline. Dr. Caroline's work transformed EMS and the entire paramedic field. She created the first national standard curriculum for paramedic training in the United States. She also wrote the first paramedic textbook: *Emergency Care in the Streets*. The impact that Dr. Caroline had on EMS and health care spanned across the U.S. and abroad. From establishing EMS systems to training paramedics, to providing better nourishment and health care for orphans, her work had a profound impact on humanity. Throughout her life, Dr. Caroline brought a sense of excitement, joy, and humor to her work. The American Academy of Orthopaedic Surgeons is proud to continue Dr. Caroline's legacy. Her sense of excitement and humor live on in this text, which is dedicated to her. The Sixth Edition honors Dr. Caroline's work with a clear, fun, understandable writing style for which she was known. Welcome back a familiar training companion to your classroom! Say hello to Sidney Sinus, AV Abe, and a cast of memorable characters and amusing anecdotes. Make learning for your students more fun!

Clinical ECGs in Paramedic Practice Charles L. Till 2021-11-30 A concise and easy-to-use guide to ECG interpretation, this book takes the complex subject of cardiac electrophysiology and presents it in a clear, full-colour format designed specifically for paramedics and those working in the out of hospital environment. Presented as independently accessible sections, the reader is taken from the basics of cardiac anatomy, physiology and fundamental ECG principles, through to arrhythmia recognition and 12-lead ECG interpretation. The inclusion of information on clinical signs and symptoms, underlying causes and differentials, and management decisions for each presentation places the reader's ECG learning clearly in the context of their wider clinical knowledge and experience. Practice ECGs and case-based scenarios enable the reader to consolidate their learning and understanding. Applying ECG interpretation to paramedic practice and clinical presentations, this book is an essential learning resource for both students who are new to the subject as well as prehospital professionals hoping to expand and consolidate their knowledge. Key features include: Over 100 practice ECGs, including 25 case-based scenarios A new ECG Interpretation Tool that includes clinical considerations Full colour and easy-to-understand format Evidence-based and in line with current UK guidelines Specifically written for paramedics, student paramedics, ambulance staff and others working in the out of hospital setting

PHTLS 2003 Prehospital Trauma Life Support (PHTLS) revised reprint, is a unique, continuing education program that directly addresses trauma issues in the prehospital environment. Following the publication cycle of ATLS (Advanced Trauma Life Support) by the Committee on Trauma of the American College of Surgeons, the PHTLS program is designed to enhance and increase knowledge and skill in delivering trauma care. This revised fifth edition of the PHTLS textbook is the required book for the PHTLS course, and is also ideal for use as the trauma component of a paramedic course or as a general reference book on trauma assessment and management. It combines both basic and advanced trauma concepts and skills in one definitive resource and now features an entirely new chapter on evidence-based guidelines for military medicine, developed by the Committee on Tactical Combat Casualty Care. PLEASE NOTE: The Instructor's Manual and Slide Set are available for certified PHTLS Instructors ONLY. They are ordered through Mosby but customers must first obtain an "access code"

PHTLS Spanish: Soporte Vital de Trauma Prehospitalario National Association of Emergency Medical Technicians (NAEMT) 2018-07-30 PHTLS: Soporte Vital de Trauma Prehospitalario, octava edición, es el siguiente paso en la evolución del principal programa educativo de Trauma Prehospitalario. Durante tres décadas, el PHTLS ha mejorado la calidad del cuidado del paciente traumatizado y ha salvado vidas. La octava edición del PHTLS continúa con la misión de promover la excelencia en el manejo del paciente traumatizado en todos los proveedores involucrados en el cuidado prehospitalario por medio de una educación global. Este programa legendario fue desarrollado a principios de la década de los ochenta del siglo pasado por la Asociación Nacional de Técnicos en Urgencias Médicas (Association of Emergency Medical Technicians, NAEMT), con la cooperación del Comité para el Trauma del Colegio Americano de Cirujanos (American College of Surgeons Committee on Trauma, ACS-COT). El contenido médico se revisa y actualiza de manera continua para que refl eje lo último y lo más actualizado del conocimiento y la práctica. El PHTLS promueve el pensamiento crítico como la base para proporcionar un cuidado de calidad. Se fundamenta en la creencia de que los practicantes de los servicios médicos de urgencia toman las mejores decisiones en benefi cio de sus pacientes cuando se les da una buena base de conocimiento y principios clave. La octava edición de PHTLS presenta un nuevo capítulo, Fisiología de la vida y la muerte, que crea un entendimiento sólido de la fi siología de la vida y de la fi siopatología que puede llevar a la muerte. Ese entendimiento es esencial para el proveedor del cuidado prehospitalario para que pueda tratar las anormalidades rápidamente, en caso de encontrarlas en el paciente traumatizado. Curso National Association of Emergency Medical Technicians (NAEMT) 2019-12-05 En el ambiente táctico civil, cada segundo cuenta. TECC: Atención táctica a víctimas en emergencias, segunda edición enseña a los proveedores de atención prehospitalaria cómo responder y atender a pacientes durante una emergencia táctica civil, incluso en tiroteos activos. Este atractivo programa está diseñado para preparar a los proveedores de servicios médicos de emergencia (EMS) para atender pacientes en un entorno táctico. Desarrollada por la Asociación Nacional de Técnicos en Emergencias Médicas (National Association of Emergency Medical Technicians, NAEMT) y aprobado por el Colegio Estadounidense de Cirujanos (American College of Surgeons), TECC, segunda edición aborda los dominios actuales de los Servicios Tácticos de Emergencia Médica (Tactical Emergency Medical Services, TEMS) y es consistente con las pautas actuales del Comité sobre TECC. NAEMT es un socio educativo reconocido del Comité de TECC. Componentes del programa dinámico El manual del curso TECC, segunda edición refuerza y clarifica los conceptos clave del curso, tiene un diseño atractivo e interactivo, y está escrito de modo que sienta que está participando en una conversación, en lugar de escuchando una lección. El manual del curso incluye las siguientes características clave: * Compruebe sus conocimientos: aplique los conocimientos presentados en la lección y refuerce sus habilidades de tratamiento de pacientes. * Estaciones de habilidades: revisión paso a paso de cómo utilizar habilidades que salvan vidas en el entorno táctico.
