*The Settlement Of The Americas A New Prehistory* Thomas D. Dillehay 2000-05-04 Offers a new theory on the first settlement of the Americas, drawing on archeological evidence from South America to describe how the earliest Americans lived and to speculate on the route they may have taken to arrive in South America.

**Oceanic Histories** David Armitage 2018 Freshly presents world history through its oceans and seas in uniquely wide-ranging, original chapters by leading experts in their fields.

**The Ethics of Identity** Kwame Anthony Appiah 2010-06-28 Race, ethnicity, nationality, religion, gender, sexuality: in the past couple of decades, a great deal of attention has been paid to such collective identities. They clamor for recognition and respect, sometimes at the expense of other things we value. But to what extent do "identities" constrain our freedom, our ability to make an individual life, and to what extent do they enable our individuality? In this beautifully written work, renowned philosopher and African Studies scholar Kwame Anthony Appiah draws on thinkers through the ages and across the globe to explore such questions. The Ethics of Identity takes seriously both the claims of individuality--the task of making a life--and the claims of identity, these large and often abstract social categories through which we define ourselves. What sort of life one should lead is a subject that has preoccupied moral and political thinkers from Aristotle to Mill. Here, Appiah develops an account of ethics, in just this venerable sense--but an account that connects moral obligations with collective allegiances, our individuality with our identities. As he observes, the question who we are has always been linked to the question what we are. Adopting a broadly interdisciplinary perspective, Appiah takes aim at the clichés and received ideas amid which talk of identity so often founders. Is "culture" a good? For that matter, does the concept of culture really explain anything? Is diversity of value in itself? Are moral obligations the only kind there are? Has the rhetoric of "human rights" been overstretched? In the end, Appiah's arguments make it harder to think of the world as divided between the West and the Rest; between locals and cosmopolitans; between Us and Them. The result is a new vision of liberal humanism--one that can accommodate the vagaries and variety that make us human.

## **Historical Archaeologies of Transhumance across Europe** Eugene Costello 2018-03-05

Transhumance is a form of pastoralism that has been practised around the world since animals were first domesticated. Such seasonal movements have formed an important aspect of many European farming systems for several thousand years, although they have declined markedly since the nineteenth century. Ethnographers and geographers have long been involved in recording transhumant practices, and in the last two decades archaeologists have started to add a new material dimension to the subject. This volume brings together recent advances in the study of European transhumance during historical times, from Sweden to Spain, Romania to Ireland, and beyond that even Newfoundland. While the focus is on the archaeology of seasonal sites used by shepherds and cowherds, the contributions exhibit a high degree of interdisciplinarity. Documentary, cartographic, ethnographic and palaeoecological evidence all play a part in the examination of seasonal movement and settlement in medieval and post-medieval landscapes. Notwithstanding the obvious diversity across Europe in terms of livestock, distances travelled and socio-economic context, an extended introduction to the volume shows that cross-cutting themes are now emerging, including mobility, gendered herding, collective land-use, the agency of non-elite people and competition for grazing and markets. The book will appeal not only to archaeologists, but to historians, geographers, ethnographers, palaeoecologists and anyone interested in rural lifeways across Europe.

*A Book for a Rainy Day* John Thomas Smith 1905

Les Natchez: Roman Indien François-René vicomte de Chateaubriand 1827

Island of Shattered Dreams Chantal T. Spitz 2007 Finally in English, *Island of Shattered Dreams* is the first ever novel by an indigenous Tahitian writer. In a lyrical and immensely moving style, this book combines a family saga and a doomed love story, set against the background of French Polynesia in the period leading up to the first nuclear tests. The text is highly critical of the French government, and as a result its publication in Tahiti was polarising.

*Walled Towns and the Shaping of France* M. Wolfe 2009-08-31 This book focuses on the development of towns in France, taking into account military technology, physical geography, shifting regional networks tying urban communities together, and the emergence of new forms of public authority and civic life.

**A Philosophical Commentary on These Words of the Gospel, Luke XIV, 23** Pierre Bayle 1708

*A Narrative of the Mission Sent by the Governor-general of India to the Court of Ava in 1855* Sir Henry Yule 1858 In December 1852, at the conclusion of the second Anglo-Burmese War, the British annexed the southern and coastal regions of Burma (known as Lower Burma). Pagan Min, and later his brother Mindon Min, continued to rule Upper Burma. In 1855, Arthur Phayre, the British commissioner for the annexed territories, visited the court of Ava in Upper Burma as part of an effort to improve relations with Mindon. Henry Yule was secretary to Phayre and accompanied him on the mission. This work, written by Yule, is a modified version of the mission's report, based on Phayre's journals and Yule's own observations and impressions. The work includes detailed maps and drawings, and remains an extraordinarily valuable source for the study of the history, geography, arts, religion, and culture of Burma. A long chapter is devoted to the ruins of the ancient city of Bagan (then known as Pagan) and its temples, as they were found by the mission in 1855.

**Philosophical Texts** Gottfried Wilhelm Freiherr von Leibniz 1998 The Oxford Philosophical Texts series consists of authoritative teaching editions of canonical texts in the History of Philosophy from the ancient world down to modern times. Each volume, issued in a uniform and affordable paperback format, provides a clear, well laid out text together with a comprehensive introduction by a leading specialist, giving the student detailed critical guidance on the intellectual context of the work and the structure and philosophical importance of the main arguments. Endnotes are supplied to expand further on the arguments and explain unfamiliar references and terminology, and a full bibliography and index are also included. The series aims to build up a definitive corpus of key texts in the Western philosophical tradition, which will form a reliable and enduring resource for students and teachers alike. This volume contains Leibniz's most important texts, starting with the Discourse on Metaphysics (1686), which marks the beginning of maturity in Leibniz's ideas, and ending with the Monadology (1714), written in response to requests for a systematic, organized account of his overall philosophy. In between fall other key works including the New System of Nature (1695), the Specimen of Dynamics (1695), Nature Itself (1698), and the Principles of Nature and Grace (1714). Also included in the volume are critical reactions to the Discourse and the New System by Leibniz's contemporaries, Antoine Arnauld, Pierre Bayle, and Simon Foucher, together with Leibniz's responses. All the texts are newly translated into English for this edition, and each is preceded by a summary explaining its background, structure, and content. Also containing a substantial introduction, notes, and bibliography, the volume offers a comprehensive introduction to Leibniz's philosophy.

**The European Landscape Convention** Michael Jones 2011-02-09 This important and insightful book provides, for the first time, a broad presentation of ongoing research into public participation in landscape conservation, management and planning, following the 2000 European Landscape Convention which came into force in 2004. The book examines both the theory of participation and what lessons can be learnt from specific European examples. It explores in what manner and to what extent the provisions for participation in the European Landscape Convention have been followed up and implemented. It also presents and compares different experiences of participation in selected countries from northern, southern, eastern and western Europe, and provides a critical examination of public participation in practice. However, while the book's focus is necessarily on Europe, many of the conclusions drawn are of global relevance. The book provides a valuable reference for researchers and advanced students in landscape policies and management, as well as for professionals and others interested in land-use planning and environmental management.

**The Roll in England and France in the Late Middle Ages** Stefan G. Holz 2019-12-16 In the Middle Ages, rolls were ubiquitous as a writing support. While scholars have long examined the texts and images on rolls, they have rarely taken the manuscripts themselves into account. This volume readdresses this imbalance by focusing on the materiality and various usages of rolls in late medieval England and France. Researchers from England, France, Germany and Singapore demonstrate in 11 contributions how this approach can increase our understanding of the rolls and their contents, as well as the contexts in which they were produced and used.

**Gene Drives on the Horizon** National Academies of Sciences, Engineering, and Medicine 2016-08-28 Research on gene drive systems is rapidly advancing. Many proposed applications of gene drive research aim to solve environmental and public health challenges, including the reduction of poverty and the

burden of vector-borne diseases, such as malaria and dengue, which disproportionately impact low and middle income countries. However, due to their intrinsic qualities of rapid spread and irreversibility, gene drive systems raise many questions with respect to their safety relative to public and environmental health. Because gene drive systems are designed to alter the environments we share in ways that will be hard to anticipate and impossible to completely roll back, questions about the ethics surrounding use of this research are complex and will require very careful exploration. *Gene Drives on the Horizon* outlines the state of knowledge relative to the science, ethics, public engagement, and risk assessment as they pertain to research directions of gene drive systems and governance of the research process. This report offers principles for responsible practices of gene drive research and related applications for use by investigators, their institutions, the research funders, and regulators.

*Corpus* Jean-Luc Nancy 2009-08-25 How have we thought “the body”? How can we think it anew? The body of mortal creatures, the body politic, the body of letters and of laws, the “mystical body of Christ”—all these (and others) are incorporated in the word *Corpus*, the title and topic of Jean-Luc Nancy’s masterwork. *Corpus* is a work of literary force at once phenomenological, sociological, theological, and philosophical in its multiple orientations and approaches. In thirty-six brief sections, Nancy offers us at once an encyclopedia and a polemical program—reviewing classical takes on the “corpus” from Plato, Aristotle, and Saint Paul to Descartes, Hegel, Husserl, and Freud, while demonstrating that the mutations (technological, biological, and political) of our own culture have given rise to the need for a new understanding of the body. He not only tells the story of this cultural change but also explores the promise and responsibilities that such a new understanding entails. The long-awaited English translation is a bold, bravura rendering. To the title essay are added five closely related recent pieces—including a commentary by Antonia Birnbaum—dedicated in large part to the legacy of the “mind-body problem” formulated by Descartes and the challenge it poses to rethinking the ancient problems of the corpus. The last and most poignant of these essays is “The Intruder,” Nancy’s philosophical meditation on his heart transplant. The book also serves as the opening move in Nancy’s larger project called “The deconstruction of Christianity.”

**The Religious Enlightenment** David Sorkin 2018-06-05 In intellectual and political culture today, the Enlightenment is routinely celebrated as the starting point of modernity and secular rationalism, or demonized as the source of a godless liberalism in conflict with religious faith. In *The Religious Enlightenment*, David Sorkin alters our understanding by showing that the Enlightenment, at its heart, was religious in nature. Sorkin examines the lives and ideas of influential Protestant, Jewish, and Catholic theologians of the Enlightenment, such as William Warburton in England, Moses Mendelssohn in Prussia, and Adrien Lamourette in France, among others. He demonstrates that, in the century before the French Revolution, the major religions of Europe gave rise to movements of renewal and reform that championed such hallmark Enlightenment ideas as reasonableness and natural religion, toleration and natural law. Calvinist enlightened orthodoxy, Jewish Haskalah, and reform Catholicism, to name but three such movements, were influential participants in the eighteenth century’s burgeoning public sphere and promoted a new ideal of church-state relations. Sorkin shows how they pioneered a religious Enlightenment that embraced the new science of Copernicus and Newton and the philosophy of Descartes, Locke, and Christian Wolff, uniting reason and revelation to renew faith and piety. This book reveals how Enlightenment theologians refashioned belief as a solution to the dogmatism and intolerance of previous centuries. Read it and you will never view the Enlightenment the same way.

Changing Difference Catherine Malabou 2011-09-19 Translated by CAROLYN SHREAD In the post-feminist age the fact that 'woman' finds herself deprived of her 'essence' only confirms, paradoxically, a very ancient state of affairs: 'woman' has never been able to define herself in any other way than in terms of the violence done to her. Violence alone confers her being - whether it is domestic and social violence or theoretical violence. The critique of 'essentialism' (i.e. there is no specifically feminine essence) proposed by both gender theory and deconstruction is just one more twist in the ontological negation of the feminine. Contrary to all expectations, however, this ever more radical hollowing out of woman within intellectual movements supposed to protect her, this assimilation of woman to a 'being nothing', clears the way for a new beginning. Let us now assume the thought of 'woman' as an empty but resistant essence, an essence that is resistant precisely because it is empty, a resistance that strikes down the impossibility of its own disappearance once and for all. To ask what remains of woman after the sacrifice of her being is to signal a new era in the feminist struggle, changing the terms of the battle to go beyond both essentialism and anti-essentialism. In this path-breaking work Catherine Malabou begins with philosophy, asking: what is the life of a woman philosopher?

**Historical Seismology** Julien Fréchet 2008-08-22 Modern seismology has faced new challenges in the study of earthquakes and their physical characteristics. This volume is dedicated to the use of new approaches and presents a state-of-the-art in historical seismology. Selected historical and recent earthquakes are chosen to document and constrain related seismic parameters using updated methodologies in the macroseismic analysis, field observations of damage distribution and tectonic effects, and modelling of seismic waveforms.

*The Coming of the French Revolution* Georges Lefebvre 2019-12-31 The Coming of the French Revolution remains essential reading for anyone interested in the origins of this great turning point in the formation of the modern world. First published in 1939, on the eve of the Second World War, and suppressed by the Vichy government, this classic work explains what happened in France in 1789, the first year of the French Revolution. Georges Lefebvre wrote history "from below"—a Marxist approach. Here, he places the peasantry at the center of his analysis, emphasizing the class struggles in France and the significant role they played in the coming of the revolution. Eloquently translated by the historian R. R. Palmer and featuring an introduction by Timothy Tackett that provides a concise intellectual biography of Lefebvre and a critical appraisal of the book, this Princeton Classics edition continues to offer fresh insights into democracy, dictatorship, and insurrection.

**The Grand Strategy of the Roman Empire** Edward Luttwak 2016-05-18 A newly updated edition of this classic, hugely influential account of how the Romans defended their vast empire. At the height of its power, the Roman Empire encompassed the entire Mediterranean basin, extending much beyond it from Britain to Mesopotamia, from the Rhine to the Black Sea. Rome prospered for centuries while successfully resisting attack, fending off everything from overnight robbery raids to full-scale invasion attempts by entire nations on the move. How were troops able to defend the Empire's vast territories from constant attacks? And how did they do so at such moderate cost that their treasury could pay for an immensity of

highways, aqueducts, amphitheaters, city baths, and magnificent temples? In *The Grand Strategy of the Roman Empire*, seasoned defense analyst Edward N. Luttwak reveals how the Romans were able to combine military strength, diplomacy, and fortifications to effectively respond to changing threats. Rome's secret was not ceaseless fighting, but comprehensive strategies that unified force, diplomacy, and an immense infrastructure of roads, forts, walls, and barriers. Initially relying on client states to buffer attacks, Rome moved to a permanent frontier defense around 117 CE. Finally, as barbarians began to penetrate the empire, Rome fielded large armies in a strategy of "defense-in-depth," allowing invaders to pierce Rome's borders. This updated edition has been extensively revised to incorporate recent scholarship and archeological findings. A new preface explores Roman imperial statecraft. This illuminating book remains essential to both ancient historians and students of modern strategy.

**French Grammar in Context** Margaret A. Jubb 2003 Taking authentic texts from a variety of sources - the human body on CD-ROM, a fish recipe, 'L'Etranger' and many others - this book uses them as a starting point for the illustration and explanation of key areas of French grammar. It includes a range of exercises, many of them text-based.

**Specters of Marx** Jacques Derrida 2012-10-12 Prodigiously influential, Jacques Derrida gave rise to a comprehensive rethinking of the basic concepts and categories of Western philosophy in the latter part of the twentieth century, with writings central to our understanding of language, meaning, identity, ethics and values. In 1993, a conference was organized around the question, 'Whither Marxism?', and Derrida was invited to open the proceedings. His plenary address, 'Specters of Marx', delivered in two parts, forms the basis of this book. Hotly debated when it was first published, a rapidly changing world and world politics have scarcely dented the relevance of this book.

[More than Homer Knew - Studies on Homer and His Ancient Commentators](#) 2020-04-06 This book contains a collection of twenty-one essays in honour of Professor Franco Montanari by eminent specialists on Homer, ancient Homeric scholarship, and the reception of the Homeric Epics in both ancient and modern times. It covers a wide range of important subjects, including neoanalysis and oral poetry, the Doloneia, the Homeric scholia, the theoretical premises of Aristarchean scholarship, and Homer in Sappho, Pindar, Comedy, Plato, and Hellenistic Poetry. As a whole, the contributions demonstrate the vitality of modern scholarship on Homeric poetry.

im Jahr 2008 wird Österreich erstmals "Start-Staat" im volkerrechtlichen Sinn sein. Mangels eines österreichischen Weltraum-Gesetzes sind viele Rechtsfragen in diesem Kontext jedoch ungeklärt. Im September 2006 kamen internationale Experten zu einer Konferenz in Graz zusammen, um über Notwendigkeit und Mindestinhalte nationaler Weltraumrechts-Gesetze zu diskutieren. Konferenzbeiträge und Ergebnisse, weiterführende Analysen und der mögliche Inhalt eines österreichischen Weltraumgesetzes, dies auf der Basis eines Vergleichs mit jüngsten nationalen Weltraumgesetzen in Europa, werden zum Teil auf Englisch und zum Teil auf Deutsch veröffentlicht.
