Why We Took the Car Wolfgang Herrndorf 2014-01-07 Mike Klingenberg doesn't get why people think he's boring. Sure, he doesn't have many friends. (Okay, zero friends.) And everyone laughs at him when he reads his essays out loud in class. And he's never invited to parties - including the gorgeous Tatiana's party of the year. Andre Tschichatschow, aka Tschick (not even the teachers can pronounce his name), is new in school, and a whole different kind of unpopular. He always looks like he's just been in a fight, his clothes are tragic, and he never talks to anyone. But one day Tschick shows up at Mike's house out of the blue. Turns out he wasn't invited to Tatiana's party either, and he's ready to do something about it. Forget the popular kids: Together, Mike and Tschick are heading out on a road trip. No parents, no map, no destination. Will they get hopelessly lost in the middle of nowhere? Probably. Will they meet crazy people and get into serious trouble? Definitely. But will they ever be called boring again? Not a chance.

Four-Day Planet H. Beam Piper 2018-01-19 I went through the gateway, towing my equipment in a contragravity hamper over my head. As usual, I was wondering what it would take, short of a revolution, to get the city of Port Sandor as clean and tidy and well lighted as the spaceport area. I knew Dad's editorials and my sarcastic news stories wouldn't do it. We'd been trying long enough. The two girls in bikinis in front of me pushed on, still gabbling about the fight one of them had had with her boy friend, and I closed up behind the half dozen monster-hunters in long trousers, ankle boots and short boat-jackets, with big knives on their belts. They must have all been from the same crew, because they weren't arguing about whose ship was fastest, had the toughest skipper, and made the most money. They were talking about the price of tallow-wax, and they seemed to have picked up a rumor that it was going to be cut another ten centisols a pound. I eavesdropped shamelessly, but it was the same rumor I'd picked up, myself, a little earlier...

Essays on Professions Robert Dingwall 2016-05-13 Over the past 30 years Robert Dingwall has published an influential series of articles on the professions, especially law and medicine. This represents a substantial and coherent body of work in an important sub-discipline of sociology. This volume assembles the best of these writings in one single accessible place. The ten essays are republished in their original form, each bearing the traces of the time and place it was written. In sum, they provide a fascinating account of an academic journey. They are introduced with a foreword from the author, who places the work in context and offers some thoughts about how the work might be used by scholars in developing the field, to evaluate, for example, the effects of the New Labour period on professional autonomy. The essays will be indispensable to sociologists with a general interest in the professions and to scholars of law, medicine and business.

Narrative □ *State of the Art* Michael Bamberg 2007-03-14 *Narrative – State of the Art* which was originally published as a Special Issue of *Narrative Inquiry* 16:1 (2006) is edited by Michael Bamberg and contains 24 chapters (with a brief introduction by the editor) that look back and take stock of developments in narrative theorizing and empirical work with narratives. The attempt has been made to bring together researchers from different disciplines, with very different concerns, and have them express their conceptions of the current state of the art from their perspectives. Looking back and taking stock, this volume further attempts to begin to deliver answers to the questions (i) What was it that made the original turn to narrative so successful? (ii) What has been accomplished over the last 40 years of narrative inquiry? (iii) What are the future directions for narrative inquiry? The contributions to this volume are deliberately kept short so that the readers can browse through them and get a feel about the diversity of current narrative theorizing and emerging new trends in narrative research. It is the ultimate aim of this edited volume to stir up discussions and dialogue among narrative researchers across these disciplines and to widen and open up the territory of narrative inquiry to new and innovative work.

Rock Crystal Adalbert Stifter 2015-12-15 Seemingly the simplest of stories—a passing anecdote of village life—Rock Crystal opens up into a tale of almost unendurable suspense. This jewel-like novella by the writer that Thomas Mann praised as "one of the most extraordinary, the most enigmatic, the most secretly daring and the most strangely gripping narrators in world literature" is among the most unusual, moving, and memorable of Christmas stories. Two children—Conrad and his little sister, Sanna—set out from their village high up in the Alps to visit their grandparents in the neighboring valley. It is the day before Christmas but the weather is mild, though of course night falls early in December and the children are warned not to linger. The grandparents welcome the children with presents and pack them off with kisses. Then snow begins to fall, ever more thickly and steadily. Undaunted, the children press on, only to take a wrong turn. The snow rises higher and higher, time passes: it is deep night when the sky clears and Conrad and Sanna discover themselves out on a glacier, terrifying and beautiful, the heart of the void. Adalbert Stifter's rapt and enigmatic tale, beautifully translated by Elizabeth Mayer and Marianne Moore, explores what can be found between Christmas Eve and Christmas Day—or on any night of the year.

The Alps Jon Mathieu 2019-02-25 Stretching 1,200 kilometres across six countries, the colossal mountains of the Alps dominate Europe, geographically and historically. Enlightenment thinkers felt the sublime and magisterial peaks were the very embodiment of nature, Romantic poets looked to them for divine inspiration, and Victorian explorers tested their ingenuity and courage against them. Located at the crossroads between powerful states, the Alps have played a crucial role in the formation of European history, a place of intense cultural fusion as well as fierce conflict between warring nations. A diverse range of flora and fauna have made themselves at home in this harsh environment, which today welcomes over 100 million tourists a year. Leading Alpine scholar Jon Mathieu tells the story of the people who have lived in and been inspired by these mountains and valleys, from the ancient peasants of the Neolithic to the cyclists of the Tour de France. Far from being a remote and backward corner of Europe, the Alps are shown by Mathieu to have been a crucible of new ideas and technologies at the heart of the European story.
