Guess what is Growing Inside this Egg Mia Posada 2007 Gives facts about the many ways animals care for their eggs and young.

Flowers Are Calling Rita Gray 2015 Rhyming text explores the wonders of natural cooperation between flowers and the animals and insects of the forest.

When Plants Attack Rebecca E. Hirsch 2020-08-01 Audisee® eBooks with Audio combine professional narration and sentence highlighting to engage reluctant readers! Science writer and plant expert Rebecca E. Hirsch presents fun and gross facts about a variety of plants along with explaining the science behind why they do what they do. Featured plants include the Venus Flytrap, an African tree that houses stinking ants to protect itself from hungry animals, a "vampire vine" that sucks nutrients from other plants, and fiendishly invasive kudzu.

Tooth by Tooth Sara C. Levine 2016-03-01 What animal would you be if a few of your teeth grew so long that they stuck out of your mouth even when it was closed? What would you be if your top canine teeth grew almost all the way down to your feet? This picture book will keep you guessing as you read about how human teeth are like—and unlike—those of other animals.

Who Was Here? Mia Posada 2014-10-01 What animal was here? Can you solve the mystery? Study the picture and read the clues to figure out who left each set of tracks. Then turn the page to find out about animals from around the world. Watercolor and collage illustrations show the many kinds of trails that animals leave behind in mud, snow, and sand.

Death Eaters Kelly Milner Halls 2020-08-01 Audisee® eBooks with Audio combine professional narration and sentence highlighting to engage reluctant readers! What happens to the bodies of animals and humans after death? Nature's army of

death eaters steps in to take care of clean up. Without these masters of decomposition, our planet would be covered in rotting bodies. This high-interest science text dives into the science behind how bodies decompose.

Night Creatures Rebecca E. Hirsch 2021-09-07 As the sun sets, night creatures awaken. In their rural backyard, a parent and child camp out, watching as fireflies flicker, bats flap, and rabbits race. Atmospheric illustrations bring the nocturnal world to life in this lyrical and informative picture book.

A Way to Garden Margaret Roach 2019-04-30 "A Way to Garden prods us toward that ineffable place where we feel we belong; it's a guide to living both in and out of the garden." –The New York Times Book Review For Margaret Roach, gardening is more than a hobby, it's a calling. Her unique approach, which she calls "horticultural how-to and woo-woo," is a blend of vital information you need to memorize and intuitive steps you must simply feel and surrender to. In *A Way to Garden*, Roach imparts decades of garden wisdom on seasonal gardening, ornamental plants, vegetable gardening, design, gardening for wildlife, organic practices, and much more. She also challenges gardeners to think beyond their garden borders and to consider the ways gardening can enrich the world. Brimming with beautiful photographs of Roach's own garden, *A Way to Garden* is practical, inspiring, and a must-have for every passionate gardener.

The Monarchs Are Missing Rebecca E. Hirsch 2018 Monarch butterfly populations have been declining for the last two decades, and scientists aren't sure why. This book takes readers on a quest to discover what is happening and what scientists know. --

Summer Green to Autumn Gold Mia Posada 2019-08-06 This nonfiction picture book, written and illustrated by Mia Posada, beautifully explains why leaves change color in fall. It highlights both the eye-catching colors of the season and the science behind the colors. Back matter offers additional scientific details for curious readers as well as suggested further reading and links to hands-on activities.

Summer Green to Autumn Gold Mia Posada 2019-08-06 This nonfiction picture book, written and illustrated by Mia Posada, beautifully explains why leaves change color in fall. It highlights both the eye-catching colors of the season and the science behind the colors. Wait, Rest, Pause Marcie Flinchum Atkins 2020-08-01 Audisee® eBooks with Audio combine professional narration and text highlighting to engage reluctant readers! Captivating photos of animals accompany simple, engaging text to explain dormancy in nature. This highly curricular book teaches young readers about different kinds of dormancy and which animals do what. Featuring creatures like ladybugs, chickadees, squirrels, and even alligators, this book won't put curious kids to sleep!

Flower Talk Sara Levine 2019 A cantankerous talking cactus reveals to readers the significance of different colors of flowers in terms of which pollinators (bees, bats, birds, etc.) different colors "talk" to.

One Plastic Bag Miranda Paul 2020-01-01 Audisee® eBooks with Audio combine professional narration and text highlighting for an engaging read aloud experience! The inspiring true story of how one African woman began a movement to recycle the plastic bags that were polluting her community. Plastic bags are cheap and easy to use. But what happens when a bag breaks or is no longer needed? In Njau, Gambia, people simply dropped the bags and went on their way. One plastic bag became two. Then ten. Then a hundred. The bags accumulated in ugly heaps alongside roads. Water pooled in them, bringing mosquitoes and disease. Some bags were burned, leaving behind a terrible smell. Some were buried, but they strangled gardens. They killed livestock that tried to eat them. Something had to change. Isatou Ceesay was that change. She found a way to recycle the bags and transform her community. This inspirational true story shows how one person's actions really can make a difference in our world.

Germs Up Close Sara Levine 2021-04-06 Have you ever seen a germ up close? Really, really close? Award-winning science writer Sara Levine introduces readers to a variety of viruses, bacteria, protozoa, and fungi that can make people sick—including SARS-CoV-2, E. coli, and ringworm. Micrographs and illustrations show extremely close-up views of the germs that are at once incredible and a little gross. The book concludes with tips for staying healthy as well as information about the immune system, vaccines, and medicines. It gives readers accessible, up-to-date scientific information presented in a way that emphasizes curiosity rather than fear.

Dandelions Mia Posada 2000-01-01 Rhyming text presents the dandelion, not as a weed, but as a flower of great beauty. Includes information about the flower, a recipe, and science activities.

Snowy Owl Invasion! Sandra Markle 2020-01-01 Follow along as scientists figure out why snowy owls took part in an unusual migration

An Ambush of Tigers Betsy R. Rosenthal 2015-04-01 Have you ever heard of a prickle of porcupines? Or a tower of giraffes? What about a parcel of penguins? This fun-filled romp through the animal kingdom introduces collective nouns for animals through wordplay. Clever rhymes and humorous illustrations bring these collective nouns to life in funny ways, making it easy to remember which terms and animals go together. A glossary in the back matter offers further explanation of words used as collective nouns, such as sleuth meaning "detective."

Zombie Makers Rebecca L. Johnson 2017-01-01 Audisee® eBooks with Audio combine professional narration and sentence highlighting to engage reluctant readers! Are zombies real? As far as we know, dead people do not come back to life and start walking around, looking for trouble. But there are things that can take

over the bodies and brains of innocent creatures, turning them into senseless slaves. Meet nature's zombie makers—including a fly-enslaving fungus, a suicide worm, and a cockroach-taming wasp—and their victims.

Read Anything Good Lately? Susan Allen 2006-08-01 An alphabetical look at some different places and things to read, from an atlas at the airport to a zodiac at the zoo.

Fossil by Fossil Sara Levine 2022-08-01 Audisee® eBooks with Audio combine professional narration and sentence highlighting for an engaging read aloud experience! An innovative look at animal eyes from the creators of *Bone by Bone*, *Tooth by Tooth*, and *Eye by Eye*. What dinosaur would you be if you had a bony ridge rising from the back of your skull and three horns poking up from the front? Answer: a triceratops! This picture book will keep you guessing as you find out how human skeletons are like—and unlike—those of dinosaurs! "Another 'humerus' study in comparative anatomy."—Kirkus Reviews

Bow-Tie Pasta Brian P. Cleary 2015-11-01 Acrostic? What kind of stick is that? Actually, it's a poem! Acrostic poems are created from a word or phrase written vertically down the page. Each letter becomes part of a line in the poem, revealing a thought or a clue about the poem's topic. Award-winning author Brian P. Cleary shows how even the wackiest words can make an acrostic poem. *Bow-Tie Pasta* is packed with acrostics to make you snicker and snort. And when you've finished reading, you can try your hand at writing your own poems!

Build, Beaver, Build! Sandra Markle 2016-01-01 The first year of a beaver kit's life is full of new discoveries and dangers. But the most important lesson the kit learns is how to take care of his family's home. The lodge where he lives is protected by a long dam that many beavers have worked to build over the years. As the kit grows up, he helps repair and add to the family dam—and begins to build a life for himself. Set at what is believed to be the world's longest beaver dam, *Build, Beaver, Build!*—by award-winning author Sandra Markle—provides a glimpse of beaver life, seen through the eyes of one young beaver and his family.

Garfield's ® Almost-as-Great-as-Lasagna Guide to Science Rebecca E. Hirsch 2019-08-01 Come along with Garfield and explore breakthroughs in science, from the very beginning of astronomy—when people believed Earth was the center of the universe—to modern times and into the future, when scientists might create an invisibility cloak. All along, Garfield adds his own hilarious comments on each breakthrough. Join in to laugh and learn!

Birds Vs. Blades? Rebecca Hirsch 2016-08-01 Find out how scientists are working to ensure that the promise of clean, renewable offshore wind power won't spell disaster for the millions of seabirds that play a critical role in the ocean food web.

Bone by Bone Sara Levine 2014-01-01 What would you be if your finger bones grew

so long that they reached your feet? You'd be a bat! What if you had no leg bones but kept your arm bones? You'd be a whale, a dolphin, or a porpoise! This entertaining picture book will keep readers guessing as they learn about how our skeletons are like—and unlike—those of other animals.

Water Can Be . . . Laura Purdie Salas 2022-08-01 Audisee® eBooks with Audio combine professional narration and sentence highlighting for an engaging read aloud experience! Water can be a . . . • Thirst quencher • Kid drencher • Cloud fluffer • Fire snuffer Find out about the many roles water plays in this poetic exploration of water throughout the year.

The Reason for the Seasons Ellie Peterson 2020-06-09 We all know there are four seasons in a year. But HOW do we know? Join intrepid young scientist-adventurer Joulia Copernicus on a journey around the world as she explains with humor and wit how we know what causes the seasons. Winter, Spring, Summer, Fall -- we all have a favorite season. But what makes the seasons happen in the first place? Ellie Peterson's clear, concise language and bold, kid-friendly illustrations bring science to life through narrator Joulia Copernicus, a strong and adventurous kid scientist. Kids will laugh while learning at the same time about the science behind the changing of the seasons throughout the year.

Living Fossils Rebecca E. Hirsch 2021-01-01 Audisee® eBooks with Audio combine professional narration and sentence highlighting to engage reluctant readers! In the history of life on this planet, 99.9 percent of all species have gone extinct. But a few have survived almost unchanged. Author Rebecca E. Hirsch introduces readers to six living fossils, including the chambered nautilus, the horseshoe crab with its sticky blue blood, and venomous platypuses that sting, as well as a comprehensive explanation of evolution and extinction for readers who may not be familiar with the terms yet. Readers will also discover a spectacular timeline of the history of animal life on Earth. Dive into the stories of these incredible animals and find out how they help scientists piece together evolutionary history.

Eye by Eye Sara Levine 2020-09-01 An innovative look at animal eyes from the creators of *Bone by Bone*, *Tooth by Tooth*, and *Fossil by Fossil*. What kind of animal would you be if you had eight eyes? Or if your pupils were the shape of the letter W? Keep an eye out for weird and surprising facts in this playful picture book, which brings together comparative anatomy with a guessing game format. See how your animal eyes are like—and unlike—those of starfish, spiders, goats, cuttlefish, owls, and slugs. Author Sara Levine and illustrator T.S Spookytooth present an insightful view of all eyes can do!

A Leaf Can Be . . . Laura Purdie Salas 2012-03-01

Seeds and Trees Brandon Walden 2018-04-03 "[The story of] a young prince who grows up giving and receiving seeds (words). He faithfully plants and waters those seeds daily, until they grow to become very powerful trees. Later, with the help of a friend, he is able to cut down and uproot the bad ones and then

replant good seeds in their place"--Preliminary page.

Plants Can't Sit Still Rebecca E. Hirsch 2016-08-01 Do plants really move? Absolutely! You might be surprised by all ways plants can move. Plants might not pick up their roots and walk away, but they definitely don't sit still! Discover the many ways plants (and their seeds) move. Whether it's a sunflower, a Venus flytrap, or an exotic plant like an exploding cucumber, this fascinating picture book shows just how excitingly active plants really are.

The Adventures of Dr. Sloth Suzi Eszterhas 2022-04-05 True or false: Sloths are lazy. Answer: False! True or false: Sloths are mysterious. Answer: True! Scientists are only beginning to discover how sloths live in the wild. Sloths spend most of their lives in trees, and until recently scientists didn't know very much about them. But Dr. Rebecca Cliffe was determined to discover their secrets. To find out more, she fitted sloths with special backpacks containing a device to track their activity. She learned how to climb trees in the Costa Rican jungle so she could take sloth hair samples and test their DNA. And she's helped create sloth crossings and plant trees to ensure the sloths aren't trapped in shrinking territories. Along the way, she earned the nickname Dr. Sloth. Discover the story of how an animal-loving kid in England grew up to become one of the world's leading sloth scientists, and learn how Dr. Sloth is using her discoveries to help keep sloths safe. Author and professional wildlife photographer Suzi Eszterhas brings readers up close to the action with engaging text and fantastic photos. Scan QR codes throughout the book to see her videos of sloths in the wild!
