**Mountains of the Heart** Scott Weidensaul 2016-05-01 Part natural history, part poetry, Mountains of the Heart is full of hidden gems and less traveled parts of the Appalachian Mountains Stretching almost unbroken from Alabama to Belle Isle, Newfoundland, the Appalachians are one of the oldest mountain ranges in the world. In Mountains of the Heart, renowned author and avid naturalist Scott Weidensaul shows how geology, ecology, climate, evolution, and 500 million years of history have shaped one of the continent's greatest landscapes into an ecosystem of unmatched beauty. This edition celebrates the book's 20th anniversary of publication and includes a new foreword from the author.

**Human-Environment Relations** Emily Brady 2012-02-01 This fresh and innovative approach to human-environmental relations will revolutionise our understanding of the boundaries between ourselves and the environment we inhabit. The anthology is predicated on the notion that values shift back and forth between humans and the world around them in an ethical communicative zone called 'value-space'. The contributors examine the transformative interplay between external environments and human values, and identify concrete ways in which these norms, residing in and derived from self and society, are projected onto the environment.

*Magellanic Sub-Antarctic Ornithology* Ricardo Rozzi 2014-06-15 The first synthesis of current knowledge of forest and wetland birds in the world's southernmost forests, this book contains both original work by Rozzi and Jiménez and the results of a decade of research conducted by the scientists associated with the Omora Park. The first part is a guide to the forest bird populations and habitats in the Reserve, and a summary of the data recorded for the bird species captured with mist-nets and banded. The information is given in two pages for each species, with English, Spanish, and scientific names, as well as a full-color photo, distribution maps, a table with original morphological information, a figure indicating abundance rates, and a brief description of the species' main features. The second part is a selection of twenty-two published articles on ornithological research at Omora Park during its first decade of studies, from 2000 to 2010. Eleven of the twenty-two articles were originally published in Spanish and are here translated and available to a larger readership. The reprinting of these articles in one place provides interested scientists, students, and wildlife managers a unique and convenient resource. "This book has two important sources of information: original morphological data and the compilation of all publications about the birds in the southern extreme of South America. I think the book will have great significance."—Victor R. Cueto, professor of natural sciences, Universidad de Buenos Aires, Argentina "A wonderfully rich and in-depth contribution to Sub-Antarctic Ornithology."—Julie Hagelin, senior research scientist, University of Alaska, Fairbanks

**Rhymes (And Other Sorts of Poetry) and Reasons** David Bamford 2020-04-29 The poems in this collection fall into four categories: Snapshots, Chile, Spiritual Stirrings and Nature. What they have in common is that they are born out of the author's lived experience: sights seen or moments lived, holidays in Chile, a country in which he lived for 22 years, visits to churches and other holy places, and the Cumbrian countryside in which he now lives. Every poem in the collection is preceded by a brief comment on the circumstances in which it came to be written. This is what gave rise to the title.

**The Point of Poetry** Joe Nutt 2019-03-21 What's the point of poetry? It's a question asked in classrooms all over the world, but it rarely receives a satisfactory answer. Which is why so many people, who read all kinds of books, never read poetry after leaving school. Exploring twenty-two works from poets as varied as William Blake, Seamus Heaney, Rita Dove and Hollie McNish, this book makes the case for what poetry has to offer us, what it can tell us about the things that matter in life. Each poem is discussed with humour and refreshing clarity, using a mixture of anecdote and literary criticism that has been honed over a lifetime of teaching. Poetry can enrich our lives, if we'll let it. The Point of Poetry is the perfect companion for anyone looking to discover how.

Novels. Poetry. Non-Fiction. Illustrated Ann Radcliffe 2022-03-31 Popularity of Ann Radcliffe continued through the nineteenth century; for Keats, she was Mother Radcliffe, and for Scott, the first poetess of romantic fiction. Radcliffe created the novel of suspense by combining the Gothic romance of Walpole with the novel of sensibility, which focused on the proper, tender heroine and emphasized the love interest. In all her novels, "a beautiful and

Valuable Broadleaved Forests in Europe Heinrich Spiecker 2009-02-28 Ecological and economic considerations recently increased the interest in growing valuable broadleaved tree species. Although the demand for valuable timber is growing, and there is a notable interest among forest owners and farmers to grow valuable broad leaved tree species, the current level of knowledge about these species is insufficient. More information on how to grow valuable broadleaved species to obtain high-quality wood and more research on new options for forest management is needed. This book covers various relevant aspects of growing valuable broadleaved trees in an interdisciplinary approach.

Perishable World Alicia Hokanson 2021-10-21 "Who knows if the grief / I squeeze through my lips can be borne?" says an ancient Aztec singer. In this collection, prize-winning poet Alicia Hokanson sets out to map the raw boundaries of grief by ruthlessly examining occasions and consequences of loss, offset by close and affectionate attention to the smallest nuances of the sensual universe. We learn that what perishes from this world is not only bearable but inseparable from what we celebrate. -Samuel Green, former Washington Poet Laureate, author of *Disturbing the Light*.

*Old-Growth Forests* Christian Wirth 2009-07-07 Many terms often used to describe old-growth forests imply that these forests are less vigorous, less productive and less stable than younger forests. But research in the last two decades has yielded results that challenge the view of old-growth forests being in decline. Given the importance of forests in battling climate change and the fact that old-growth forests are shrinking at a rate of 0.5% per year, these new results have come not a moment too soon. This book is the first ever to focus on the ecosystem functioning of old-growth forests. It is an exhaustive compendium of information that contains original work conducted by the authors. In addition, it is truly global in scope as it studies boreal forests in Canada, temperate old-growth forests in Europe and the Americas, and global tropical forests. Written in part to affect future policy, this eminently readable book is as useful for the scientist and student as it is for the politician and politically-interested layman.

Nature, Love, Medicine Thomas Lowe Fleischner 2017-11-14 "A beautiful collaboration that brings together diverse perspectives...a common passion and sense of beauty unites the book and transcends any expectations." –BOOKLIST A diverse array of people—psychologists and poets, biologists and artists, a Buddhist teacher and a rock musician—share personal stories that reveal a common theme: when we pay conscious, careful attention to our wider world, we strengthen our core humanity. This practice of natural history leads to greater physical, psychological, and social health for individuals and communities. *Nature, Love, Medicine* features writers with varied backgrounds and talents. Notable contributors range from conservationist and author Brooke Williams and award-winning author Elisabeth Tova Bailey to Vietnamese Buddhist monk and teacher Thich Nhat Hanh and internationally known poet Jane Hirshfield. THOMAS LOWE FLEISCHNER, editor of *Nature, Love, Medicine*, is a naturalist and conservation biologist, and founding director of the Natural History Institute at Prescott College, where he has taught interdisciplinary environmental studies for almost three decades. He edited *The Way of Natural History* and authored *Singing Stone: A Natural History of the Escalante Canyons and Desert Wetlands*.

*Estuaries* Jason Kirkey 2011 The poems in this book are an attempt to speak in a common tongue with mountains, rivers, and forests. Too often poetry is thought of as the domain of human creativity with its source in the depths of the imagination. We use it to speak of the world, but not to the non-??human world--let alone with it. The poems in *Estuaries* suggest that speech and poetry are fundamentally rooted in the ecosystem--the detritus of fallen leaves, the curvature of a river bend, and the sound of rain on a heron's wings. All of this might be regarded as the speech of the Earth. When we speak or write poetry that engages these voices we become participant in the patterns of the watershed.

The Littoral Zone 2007-01-01 In this, the first collection of ecocritical essays devoted to Australian contexts and their writers, Australian and US scholars explore the transliteration of land and sea through the works of Australian authors and through their own experiences. The littoral zone is the starting point in this fresh approach to reading literature organised around the natural environment—rainforest, desert, mountains, coast, islands, Antarctica. There's the beach, where sexual and spiritual crises occur; the Western Australian wheatbelt; deserts, camel trekking, and the transformation of a salt flat into an inland island; New Age literature that 'appropriates' Aboriginal culture as the healing poultice for an ailing West; a re-examination

of pastoralism; an inquiry into whether Judith Wright's work can "persuade us to rejoice" in the world; the Limestone Plains, home of the bush capital and the bogong moth; tropical North Queensland; national parks where "the mountains meet the sea"; temperate islands, with their history of sealing, Soldier Settlement, and sea country pastoral; and Antarctica, where a utopian vision gives way to an emphasis on its 'timeless' icescape as minimalist backdrop for human dramas. The author-terrain includes poets, playwrights, novelists, and non-fiction writers across the range of contexts constituting the littoral zone of 'Australia'.

**Yesteryears of Henry M. King** Philip L Carroll 2012-08-01 Philip L. Carroll brings to life the recollections, memories and poems of his late uncle Henry M. King in this unique and fascinating collection. Henry M. King was born in India in 1911 in the Garrison town of Allahabad. At that time, in the British Military Zone, the British Raj was strong and the Indians with whom Henry came in contact were a source and inspiration for many stories and writings. With rich and colorful vitality and detail, Henry also recounted his days as a boarder at Lawrence College in Ghora Gali. During his intriguing life, his keen and insightful interest in his surroundings is evident in his memoirs. Henry M. King remained in India until November, 1947. This book is dedicated in loving memory of Margaret Alice King Carroll McGuire.

The Chile Reader Elizabeth Quay Hutchison 2013-11-29 The Chile Reader makes available a rich variety of documents spanning more than five hundred years of Chilean history. Most of the selections are by Chileans; many have never before appeared in English. The history of Chile is rendered from diverse perspectives, including those of Mapuche Indians and Spanish colonists, peasants and aristocrats, feminists and military strongmen, entrepreneurs and workers, and priests and poets. Among the many selections are interviews, travel diaries, letters, diplomatic cables, cartoons, photographs, and song lyrics. Texts and images, each introduced by the editors, provide insights into the ways that Chile's unique geography has shaped its national identity, the country's unusually violent colonial history, and the stable but autocratic republic that emerged after independence from Spain. They shed light on Chile's role in the world economy, the social impact of economic modernization, and the enduring problems of deep inequality. The Reader also covers Chile's bold experiments with reform and revolution, its subsequent descent into one of Latin America's most ruthless Cold War dictatorships, and its much-admired transition to democracy and a market economy in the years since dictatorship.

**Caring for the Earth** The World Conservation Union (Iucn) 2013-11-05 'This is a strategy for a kind of development that provides real improvements in the quality of human life and at the same time conserves the vitality and diversity of the Earth. The goal is development that will be sustainable. Today it may seem visionary. but it is attainable. To more and more people it also appears our only rational option.' – from Chapter 1 in 1980, the International Union for Conservation of Nature and Natural Resources, the United Nations Environment Programme and the World Wide Fund for Nature, the world's three most powerful organizations dedicated to preventing environmental catastrophe, published the World Conservation Strategy. It stressed the interdependence of conservation and development, it gave currency to the idea of sustainable development and it made the point that unless the vitality and productivity of the planet are safeguarded, the future for humanity is at risk. Its impact was immediate and worldwide. Now, ten years later, the same three organizations have formulated a new strategy for the 1990s. Caring for the Earth builds on all that has been learned in the last decade about the complexity of the problems and shows how radical and far-reaching are the actions and objectives needed to meet them. Nothing less than a new ethic is required, based on affirming the community of life and cherishing its diversity – an ethic which has to be reflected in our personal attitudes and the organization of our communities as much as in wider policies. Public participation is essential for the success of the strategy, which is addressed to individuals and citizens' groups as well as to governments - whatever their systems. Adopting it will not be easy, but it does provide the agenda for immediate action. Originally published in 1991

**The Fate of Difficulty in the Poetry of Our Time** Nicholas Nace 2017-10-15 The Fate of Difficulty in the Poetry of Our Time offers original readings of poems composed in this century—poems that are challenging to follow, challenging to understand, challenging to discuss, and challenging to enjoy. Difficult poetry of the past relied on allusion, syntactic complexity, free association, and strange juxtapositions. The new poetry breaks with the old in its stunning variety; its questioning of inherited values, labels, and narratives; its multilingualism; its origin in and production of unnamed affects; and its coherence around critical and social theorists as much as other poets. The essays in this volume include poets writing on the works of a younger generation (Lyn Hejinian on Paolo Javier, Bob Perelman on Rachel Zolf, Roberto Tejada on Rosa Alcalá), influential writers addressing the work of peers (Ben Lerner on Maggie Nelson, Michael W. Clune on Aaron Kunin), critics making imaginative leaps to encompass challenging work (Brian M. Reed on Sherwin Bitsui, Siobhan Philips on Juliana Spahr), and younger scholars coming to terms with poets who continue to govern new poetic experimentation (Joseph Jeon on Myung Mi Kim, Lytle Shaw on Lisa Robertson). In pairings that are both intuitive (Marjorie Perloff on Craig Dworkin) and unexpected (Langdon Hammer on Srikanth Reddy), *The Fate of Difficulty in the Poetry of Our Time* illuminates the myriad pathways and strategies for exploring difficult poetry of the present.

**The Oxford Companion to Modern Poetry in English** Jeremy Noel-Tod 2013-05-23 Provides over 1,700 biographies of influential poets writing in English from 1910 to the present day, exploring the influences, inspirations, and movements that have shaped their works and lives.

*Edinburgh Companion to Contemporary Scottish Poetry* Matt McGuire 2009-07-03 The last three decades have seen unprecedented flourishing of creativity across the Scottish literary landscape, so that contemporary Scottish poetry constitutes an internationally renowned, award-winning body of work. At the heart of this has been the work of poets. As this poetry makes space for its own innovative concerns, it renegotiates the poetic inheritance of preceding generations. At the same time, Scottish poetry continues to be animated by writing from other places. The *Edinburgh Companion to Contemporary Scottish Poetry* is the definitive guide to this flourishing poetic scene. Its chapters examine Scottish poetry in all three of the nation's languages. It analyses many thematic preoccupations: tradition and innovation; revolutions in gender; the importance of place; the aesthetic politics of devolution. These chapters are complemented by extended close readings of the work of key poets that have defined this era, including Edwin Morgan, Kathleen Jamie, Don Paterson, Aonghas MacNeacail and John Burnside.

**The Art of Sanskrit Poetry** Niels Hammer 2003 This book is both an introduction to Sanskrit and an investigation into the relationship between the nine basic affective states (bhava) and the form they take in the absence of self-interest (tatasthya) according to the theory of Indian aesthetics as developed in the *Dhvanyaloka* and the *Abhinavabharati*. To illustrate the process of aesthetic

appreciation the different categories of suggestion (dhvani) in a continuous twelfth century poetic text (kavya), and the various forms of aesthetic experience (rasa) which the suggestions initiate, are analysed consecutively. The aspects of culture, mythology, astronomy, botany, etc., which were particularly characteristic of mediaeval India, are discussed in the notes on the basis of references to Vedic, Upanisadic, Epic, and Puranic texts, as well as to other anthologies of poetry, but also to recent scientific literature in order to explicate them in a more multidisciplinary context. The grammatical section is based on the text. The vocabulary facilitates alternative translations and hence different suggestions and aesthetic experiences. The General Index includes explanations of all grammatical forms and translations of Sanskrit technical terms plus cross references of English-Sanskrit and Latin-English-Sanskrit regarding flora and fauna.

**The Environmental Imaginary in Brazilian Poetry and Art** M. McNee 2014-07-10

This study contributes to ongoing discussions on the connections between the environmental imaginary and issues of identity, place and nation. Utilizing a delimited ecocritical approach, McNee puts Brazilian culture, through the work of contemporary poets and visual artists, into a broader, transnational dialogue.

**Japan in the 21st Century** Pradyumna Karan 2010-09-12 The ancient civilization of Japan, with its Shinto shrines and Buddhist temples, is also closely associated with all that is new and modern. Looking outward, Japan sees what it has become since Hiroshima: the world's second-largest economy, a source of fury and wonder, a power without arms. Looking inward, Japan sees old ways shaken and new ones developing at a hectic pace. Japan in the Twenty-first Century offers compelling insights into the current realities of the country and investigates the crucial political, economic, demographic, and environmental challenges that face the nation. A combination of text, maps, and photographs provides an essential understanding of Japan's geography, cultural heritage, demography, economic and political development, and of many other important issues. Pradyumna P. Karan explores the obstacles and opportunities that will shape Japan and affect the world community in the coming years. He highlights strategies and policies that will facilitate economic and political change and stimulate the development of effective institutions for long-term, sustainable prosperity and economic vitality. Unique field reports drawn from direct observations of events and places in Japan illuminate Japanese traditions and sensibilities. The first full-length English-language textbook on Japan's geography, culture, politics, and economy to appear in nearly four decades, *Japan in the Twenty-first Century* will be a vital resource for researchers, academics, general readers, and students of Japan. Pradyumna P. Karan, professor of geography and Japan studies at the University of Kentucky, is the author or editor of numerous books on Asian geography and culture,

including *The Japanese City* and *Japan in the Bluegrass*.

Poetry of the Earth: Mapuche Trilingual Anthology Sergio Holas 2014-12-09

Mapuche poetry has flourished in recent decades and is now one of the most compelling neighbourhoods of contemporary Latin American literature.

Incredibly, however, much of it remains untranslated into English. Not only does this anthology correct the situation, it goes far beyond the scale of anything published before. Some of the most important and exciting Mapuche poets are gathered here. Providing versions of each poem in Mapudungun, Spanish and English, *Poetry of the Earth* demonstrates how Mapuche poetry is so much more than just a collection of poems, or an act of writing. Rather, it is an expression of a long, rich and dynamic history, which at different times and places has made use of many kinds of musical, literary and linguistic forms. As the poems are often operatic in their scope and register, the anthology as a whole is also a sophisticated ensemble of languages, cultures, critics and poets. Translations by Mapuche and Settler Chileans meet the translations of Chileans and Australians on the other side of the Pacific Ocean. Then, Aboriginal, Mapuche and Settler scholars provide extremely useful introductory essays. *Poetry of the Earth* is a remarkable example of Australian-Chilean resonance, and of the shared history of European colonisation of indigenous peoples around the world. This is not just an anthology of poetry from a distant land and language; it's an illustration of a vital, trans-Pacific force. - Stuart Cooke, Griffith University
