Bodies of Water T. Greenwood 2022-02-22 *LAMBDA Literary Award Finalist* Alternating between past and present, a forbidden love story blooms in the sexually oppressive early-1960's in T. Greenwood's shimmering, haunting novel that explores the nature of memory, aging, feminism, lust, and most importantly, love in a tumultuous era. In this deeply tender novel, acclaimed novelist T. Greenwood moves deftly between the past and present to create a poignant and wonderfully moving story of friendship, the resonance of memories, and the love that keeps us afloat. In 1960, Billie Valentine is a young housewife living in a sleepy Massachusetts suburb, treading water in a dull marriage and caring for two adopted daughters. Summers spent with the girls at their lakeside camp in Vermont are her one escape—from her husband's demands, from days consumed by household drudgery, and from the nagging suspicion that life was supposed to hold something different. Then a new family moves in across the street. Ted and Eva Wilson have three children and a fourth on the way, and their arrival reignites long-buried feelings in Billie. The relationship that deepens between the two women offers a solace Billie has never known, until their secret is revealed and both families are wrenched apart in the tragic aftermath. Fifty years later, Ted and Eva's son, Johnny, contacts an elderly but still spry Billie, entreating her to return east to meet with him. Once there, Billie finally learns the surprising truth about what was lost, and what still remains, of those joyful, momentous summers.

Undressing The Moon T. Greenwood 2010-10-01 In evocative shards of memory, a terminally ill young woman pieces together her family's difficult past in this "lyrical, delicately affecting tale" (Publisher Weekly). At thirty, Piper Kincaid feels too young to be dying, even as breast cancer eats away her strength. Yet with all the questions of her future before her, she's adrift in the past, remembering the fateful summer she turned fourteen and her life changed forever. It was back then that what Piper dreaded came to pass: her restless, artistic mother, finally left. She had a brother who loved her, but her mother's absence, her father's distance, and a volatile secret threatened to shatter her whole world. Now Piper is back in her hometown of Quimby, Vermont—and once again left with the jagged pieces of a broken life. If she is ever going to survive, she'll have to begin with the summer that broke them all.

Oil and Governance David G. Victor 2011-12-08 National Oil Companies (NOCs) play an important role in the world economy. They produce most of the world's oil and bankroll governments across the globe. Although NOCs superficially resemble private-sector companies, they often behave in very different ways. *Oil and Governance* explains the variation in performance and strategy for NOCs and provides fresh insights into the future of the oil industry as well as the politics of the oil-rich countries where NOCs dominate. It comprises fifteen case studies, each following a common research design, of NOCs based in the Middle East, Africa, Asia, Latin America and Europe. The book also includes cross-cutting pieces on the industrial structure of the oil industry and the politics and administration of NOCs. This book is the largest and most systematic analysis of NOCs to date and is suitable for audiences from industry and academia, as well as policy makers.

Nearer Than The Sky T. Greenwood 2011-05-26 The acclaimed author draws readers into the fascinating world of Munchausen syndrome by proxy in this “totally absorbing novel about daughters and mothers” (Ursula Hegi, author of *The Patron Saint of Pregnant Girls*). When Indie Brown was four years old, she was struck by lightning. In the oft-told version of the story, Indie’s life was heroically saved by her mother. But Indie’s own recollection of the event, while hazy, is very different. Most of Indie’s childhood memories are like this—tinged with vague, unsettling images and suspicions. Her mother, Judy, fussed over her pretty youngest daughter, Lily, as much as she ignored Indie. That neglect, coupled with the death of her beloved older brother, is the reason Indie now lives far away in rural Maine. It’s why her relationship with Lily is filled with tension, and why she dreads the thought of flying back to Arizona. But she has no choice. Judy is gravely ill, and Lily, struggling with a challenge of her own, needs her help. In Arizona, faced with Lily’s hysteria and their mother’s instability, Indie slowly begins to confront the truth about her half-remembered past and the legacy that still haunts her family. And as she revisits her childhood, with its nightmares and lost innocence, she finds she must reevaluate the choices of her adulthood—including her most precious relationships. “Lush, evocative.” —The New York Times Book Review “A complicated story of love and abuse told with a directness and intensity that pack a lightning charge.” —Booklist “A lyrical investigation into the unreliability and elusiveness of memory . . . the kaleidoscopic heart of the story is rich with evocative details about its heroine’s inner life.” —Publishers Weekly

The Global Game of Oil Pipelines Gulshan Dietl 2021-11-30 Oil has long been and will continue to be at the centre of the global economy. This book explores the oil trade, energy (geo)politics, and new trends in regionalising or globalising the oil industry in the new era of international relations and economic competition. Energy pipelines carrying oil and gas from the well-head to the market, generally run through two or more states; and often from one continent to the other. This book maps the oil flowing through international and intercontinental pipelines and unravels the political, commercial and technological considerations behind the mapping of oil routes and forging of trade ties between nation-states. Through case studies from the major oil-exporting regions like Saudi Arabia, Iraq, Iran, the USA, Canada and Russia, it analyses the changing trends in their policies around oil trade,

bilateral relations, energy, and security. It also considers the environmental protests around the continued dependency on oil, the teapot refineries under the Islamic State, investments, oil lobbies and insurrections to understand the broad picture of shifting regional and geopolitical realities and the scramble for vital resources. This comprehensive book will be of interest to students of the geopolitics of energy, international relations, security and strategic studies, energy studies as well as the media and with policymakers.

Renewable Gas Jo Abbess 2016-04-29 The author looks at the prospects for a transition from natural gas to low carbon gas, which could take several decades, and at how this will depend on the evolution of the fossil fuel industry. She investigates the technologies and energy systems for making the best use of renewable gas resources.

God Will Judge Each One According to Works Kyoung-Shik Kim 2011 This monograph provides a fresh perspective on judgment according to works by challenging both the majority scholarly view and the new perspective advocated by E. P. Sanders, James D. G. Dunn and N. T. Wright. Employing intertextuality and early Jewish mediation of scripture, this study examines the idea of judgment according to works with reference to Psalm 62:13 in early Jewish literature and the New Testament. The originality of this study is to highlight the significance of Psalm 62:13 in the context of judgment according to works and to argue that the texts dealing with judgment according to works in the New Testament are to be understood as interpretations of Psalm 62:13 and its broad context.

Monday and The Edge of Lost

Peace Is Possible Prem Rawat 2018-11-27 Global peace ambassador Prem Rawat has spent his entire life travelling the world to deliver one timeless message: Peace is Possible. Conflict, he explains, takes place at three levels: between countries, between people, and finally within each of us as individuals. These levels are all interconnected. Hence the conflict that rages within a person will lead them to seek out conflict with another. Similarly, conflict between people of one nation is likely to result in conflict between many nations. So the first step to world peace is a simple one: we must first find peace within ourselves. Peace is Possible draws together age-old stories which, as they have been passed down over generations, inspired and transformed the lives of millions. From the power of adaptability, to the importance of trust, to the sticking-place of courage, these are the messages that will change the world. For good.

The Greatest Truth of All Prem Rawat 2012-12-05 Prem Rawat recommends living in the "moment called now", because that is where peace can be found. In this book, his words, taken from 21 of his talks from around the world, help the reader to understand that human beings are designed to enjoy life. He believes that anyone can know joy, no-one is excluded from that chance. He makes his case with a poetic edge, using his own particular brand of humour and inspiration.
