Stylistics analyzes the structures of texts with regard to their semantic potential and their function in the life of the individual and in society. The handbook offers surveys of theoretical approaches, forms of linguistic practice and practical contexts from antiquity to the present.

PONS Die Drei ??? - Soccer Gangsters Brigitte Johanna Henkel-Waidhofer 2015 Die englische Version des drei ???-Titels "Fussballgangster" ist bereits im Jahr 2009 erschienen und hier besprochen worden (vgl. Leadership for Learning John MacBeath 2008 The impact of globalization is being felt in numerous spheres of educational policy and practice, in rapid growth of information and communication technologies, in economic transformation, and international market competition, all of which conspire to create new demands and place new pressures on school leadership. Drawing on examples from 12 countries in different parts of the world. The Editors have brought together 28 renowned scholars in Europe, Australia, North America, and Asia-Pacific countries to contribute to this book. The first six chapters address key themes and provide the framework for the 12 country reports which follow. With the aim of increasing international understanding and teasing out issues of transfer and application across cultural and linguistic boundaries, we have chosen national reports which cover a range of countries representing a diversity of culture and contextual backgrounds. We believe, these chapters and the book as a whole, can provide important theoretical, policy and practical implications that will inform the debate about the future of education and of schooling. While each of these country narratives underscore the importance of context, at the same time there are insights and values held in common.

City and School in Late Antique Athens and Alexandria Edward J. Watts 2008-09-10 This lively and wide-ranging study of the men and ideas of late antique education explores the intellectual and doctrinal milieux in the two great cities of Athens and Alexandria from the second to the sixth centuries to shed new light on the interaction between the pagan cultural legacy and Christianity. While previous scholarship has seen Christian reactions to pagan educational culture as the product of an empire-wide process of development, Edward J. Watts crafts two narratives that reveal how differently education was shaped by the local power structures and urban contexts of each city. Touching on the careers of Herodes Atticus, Proclus, Damascius, Ammonius Saccas, Origen, Hypatia, and Olympiodorus; and events including the Herulian sack of Athens, the closing of the Athenian Neoplatonic school under Justinian, the rise of Arian Christianity, and the sack of the Serapeum, he shows that by the sixth century, Athens and Alexandria had two distinct, locally determined, approaches to pagan teaching that had their roots in the unique historical relationships between city and school.
