*On the Edge of Reason* Miroslav Krleža 2017-05-17 "On the Edge of Reason is one of the great European novels of the first half of the twentieth century – and Krleža's themes, his seriousness, his protest against the normality of delusion and cruelty, could hardly be more relevant to the century's end." –Susan Sontag During his long and distinguished career, the Croatian writer Miroslav Krleža (1893-1981) battled against many forms of tyranny. In *On the Edge of Reason*, his protagonist is a middle-aged lawyer whose life and career have been eminently respectable and respected. One evening, at a party attended by the local elite, he inadvertently blurts out an honest thought. From this moment, all hell breaks loose... *On the Edge of Reason* reveals the fundamental chasm between conformity and individuality. As folly piles on folly, hypocrisy on hypocrisy, reason itself begins to give way, and the edge between reality and unreality disappears.

The Functions of the Executive Chester I. Barnard 1971-01-01 Most of Chester Barnard's career was spent in executive practice. A Mount Hermon and Harvard education, cut off short of the bachelor's degree, was followed by nearly forty years in the American Telephone & Telegraph Company. His career began in the Statistical Department, took him to technical expertness in the economics of rates and administrative experience in the management of commercial operations, and culminated in the presidency of the New Jersey Bell Telephone Company. He was not directly involved in the Western Electric experiments conducted chiefly at the Hawthorne plant in Cicero, but his association with Elton Mayo and the latter's colleagues at the Harvard Business School had an important bearing on his most original ideas. Barnard's executive experience at AT&T was paralleled and followed by a career in public service unusual in his own time and hardly routine today. He was at various times president of the United Services Organization (the USO of World War II), head of the General Education Board and later president of the Rockefeller Foundation (after Raymond Fosdick and before Dean Rusk), chairman of the National Science Foundation, an assistant to the Secretary of the Treasury, a consultant to the American representative in the United Nations Atomic Energy Committee, to name only some of his public interests. He was a director of a number of companies, a fellow of the American Association for the Advancement of Science and of the American Academy of Arts and Sciences. He was a lover of music and a founder of the Bach Society of New Jersey.
