Section in Part 1000 were rewritten, and detailed QC sections were added in Parts 2000 through 7000. These changes are a direct and necessary result of the mandate to stay abreast of regulatory requirements and a policy intended to clarify the QC steps considered to be an integral part of each test method. Additional QC steps were added to almost half of the sections."--Pref. p. iv.

**The Testing Charade** Daniel Koretz 2017-08-31 For decades we've been studying, experimenting with, and wrangling over different approaches to improving public education, and there's still little consensus on what works, and what to do. The one thing people seem to agree on, however, is that schools need to be held accountable—we need to know whether what they're doing is actually working. But what does that mean in practice? High-stakes tests. Lots of them. And that has become a major problem. Daniel Koretz, one of the nation's foremost experts on educational testing, argues in *The Testing Charade* that the whole idea of test-based accountability has failed—it has increasingly become an end in itself, harming students and corrupting the very ideals of teaching. In this powerful polemic, built on unimpeachable evidence and rooted in decades of experience with educational testing, Koretz calls out high-stakes testing as a sham, a false idol that is ripe for manipulation and shows little evidence of leading to educational improvement. Rather than setting up incentives to divert instructional time to pointless test prep, he argues, we need to measure what matters, and measure it in multiple ways—not just via standardized tests. Right now, we're lying to ourselves about whether our children are learning. And the longer we accept that lie, the more damage we do. It's time to end our blind reliance on high-stakes tests. With *The Testing Charade*, Daniel Koretz insists that we face the facts and change course, and he gives us a blueprint for doing better.

Faculty Leadership Sue Wells 2018-04-26 At its heart, outstanding teaching is about leadership, and reflective practice is the essential foundation for advancing academic leadership in the classroom and beyond. Teaching in higher education is a complex and multi-faceted endeavor. It is highly creative, relational, dynamic and inspiring, and also demanding in a context of changing student expectations and the proliferation of knowledge across all disciplines and professions. Given that learning is completely volitional on the part of your students, high-impact teaching involves inspiring, motivating and facilitating rich and authentic learning experiences. Within all of the complexity of the teaching role, how do you know where you are most effective, and where you can further grow and develop? Reflective practice is the key! Whether you are new to teaching or are an experienced college faculty member, this manual offers a roadmap for your own personal journey of discovery and growth, with a wide range of tools and resources to help you in advancing your teaching excellence. The activities and resources in this manual have been drawn from research and scholarship on teaching in higher education, as well as the lived experience of a diverse group of faculty members and other academic leaders, to support you in your learning journey across the many dimensions of your role. Personal stories, case examples, and reflections from faculty colleagues are offered throughout, bringing the material to life and establishing direct linkages with the 'art and science' of teaching and learning. I believe the time spent on reflection is a gift; it allows us the distance necessary to understand the complexity, joy, challenges and learnings of a set of experiences, and then, most critically, to peel apart our emotions and expectations, basking in what worked and adapting to what's next. This guide offers the tools to get the most from that gift. Whether a new practitioner or seasoned faculty, reflective practice supports your development as an academic leader, making for experiences that are more meaningful for you, and for your students. Ann Buller President and CEO, Centennial College As a faculty member, this Reflective Practice Guide has numerous activities that will help you to not only reflect on teaching excellence but will assist you in developing your ideal teaching self. All the activities in this Reflective Practice Guide were so inspiring to do and reaffirmed my passion for teaching. This manual can help you as faculty to develop to your full potential. Jackie Bishop, RN BScN Med Professor, Nursing

**Making Change Happen** Bill Lamperes 2005 Educators will find more than sixty strategies and reflections to help guide the success of any new or experienced school leader. Beginning with methods of assessing the organization's culture, the book expands on ways to empower staff, students, and community members to embrace change. It is filled with creative approaches that make more out of

less, work with individuals from an asset model, and assess results. This book examines the process used by one Colorado school to achieve two, five-year visions and to change its image in the community. Once staff, students, parents, and community stakeholders "catch the vision," programs, people and resources are aligned to promote success. As a result, the school, once slated for the financial chopping block, effectively moved from potential closure to national recognition as an exemplary program. Like its unique programs, most of the visions strategies can be replicated and adapted to any organizational setting. For aspiring or veteran principals or school leaders.

*Grading for Equity* Joe Feldman 2018-09-25 "Joe Feldman shows us how we can use grading to help students become the leaders of their own learning and lift the veil on how to succeed. . . . This must-have book will help teachers learn to implement improved, equity-focused grading for impact." --Zaretta Hammond, Author of Culturally Responsive Teaching & The Brain Crack open the grading conversation Here at last—and none too soon—is a resource that delivers the research base, tools, and courage to tackle one of the most challenging and emotionally charged conversations in today’s schools: our inconsistent grading practices and the ways they can inadvertently perpetuate the achievement and

opportunity gaps among our students. With *Grading for Equity*, Joe Feldman cuts to the core of the conversation, revealing how grading practices that are accurate, bias-resistant, and motivational will improve learning, minimize grade inflation, reduce failure rates, and become a lever for creating stronger teacher-student relationships and more caring classrooms. Essential reading for schoolwide and individual book study or for student advocates, *Grading for Equity* provides A critical historical backdrop, describing how our inherited system of grading was originally set up as a sorting mechanism to provide or deny opportunity, control students, and endorse a “fixed mindset” about students’ academic potential—practices that are still in place a century later A summary of the research on motivation and equitable teaching and learning, establishing a rock-solid foundation and a “true north” orientation toward equitable grading practices Specific grading practices that are more equitable, along with teacher examples, strategies to solve common hiccups and concerns, and evidence of effectiveness Reflection tools for facilitating individual or group engagement and understanding As Joe writes, “Grading practices are a mirror not just for students, but for us as their teachers.” Each one of us should start by asking, “What do my grading practices say about who I am and what I believe?” Then, let’s make the choice to do things differently . . . with *Grading for Equity* as a dog-eared reference.
