All The Broken Places John Boyne 2022-09-15 'Gripping and well-

honed...consummately constructed, humming with tension... a defence of literature's need to shine a light on the darkest aspects of human nature and it does so with a novelist's skill, precision and power' THE GUARDIAN From the author of the globally bestselling, multi-million-copy classic, *The Boy in the Striped Pyjamas*, comes its astonishing and powerful sequel. 'When is a monster's child culpable? Guilt and complicity are multifaceted. John Boyne is a maestro of historical fiction. You can't prepare yourself for the magnitude and emotional impact of this powerful novel' John Irving 'An incredible feat of storytelling. *All the Broken Places* is a stark confrontation of evil, an examination of guilt and deflection, and an old-fashioned page-turner. John treads the finest of narrative lines with skill and grace and proves himself yet again to be among the world's greatest storytellers. ' Donal Ryan *Ninety-one-year-old Gretel Fernsby* has lived in the same mansion block in London for decades. She leads a comfortable, quiet life, despite her dark and disturbing past. She doesn't talk about her escape from Germany over seventy years before. She doesn't talk about the post-war years in France with her mother. Most of all, she doesn't talk about her father, the commandant of one of the most notorious Nazi concentration camps. Then, a young family moves into the apartment below her. In spite of herself, Gretel can't help but begin a friendship with the little boy, Henry, though his presence brings back memories she would rather forget. One night, she witnesses a violent argument between Henry's mother and his domineering father, one that threatens Gretel's hard-won, self-contained existence. Gretel is faced with a chance to expiate her guilt, grief and remorse and act to save a young boy - for the second time in her life. But to do so, she will be forced to reveal her true identity to the world. Will she make a different choice this time, whatever the cost to herself? *All the Broken Places* is a devastating, beautiful story about a woman who must confront the sins of her past and a present in which it is never too late for bravery.

Earth Unaware Orson Scott Card 2012-07-17 A hundred years before Ender's Game, humans thought they were alone in the galaxy. Humanity was slowly making their way out from Earth to the planets and asteroids of the Solar System, exploring and mining and founding colonies. The mining ship El Cavador is far out from Earth, in the deeps of the Kuiper Belt, beyond Pluto. Other mining ships, and the families that live on them, are few and far between this far out. So when El Cavador's telescopes pick up a fast-moving object coming in-system, it's hard to know what to make of it. It's massive and moving at a significant fraction of the speed of light. But the ship has other problems. Their systems are old and failing. The family is getting too big. There are claim-jumping corporates bringing Asteroid Belt tactics to the Kuiper Belt. Worrying about a distant object that might or might not be an alien ship seems...not important. They're wrong. It's the most important thing that has happened to the human race in a million years. This is humanity's first contact with an alien race. The First Formic War is about to begin. Earth Unaware is the first novel in The First Formic War series by Orson Scott Card and Aaron Johnston. A Monograph on Whiteflies N.S. Butter 2021-10-14 In all, 1550 species of whiteflies have been identified. The rapid spread of *Bemisia tabaci* has occurred throughout the globe and it is regarded as the most notorious species. It is a complex species known to contain many biotypes namely, New World (Biotype -A), B-biotype MEAM1 (Biotype-B or *Bemisia argentifolii*, and MED (Biotype-Q) depending upon the geographical location. The complete information on the bio-ecology of important species along with the feeding mechanism has been presented in this book. The use of modern techniques of identification has added more biotypes considering the variations in host range, species of endosymbionts, virus transmission efficiency, and resistance to pesticides. The resistance and resurgence due to pesticides has been discussed in the monograph. The information on economic thresholds for judicious use of pesticides or release of natural enemies against whiteflies has been quoted in this compilation. The pest control methods, namely chemical, cultural measures, biocontrol agents, resistant varieties, and mechanical devices have been elaborated on. Based on the availability of information the integrated model has been suggested to contain the whitefly menace under different situations. Considering the key factors responsible for the outbreak of whiteflies, a sound system of IPM has been formulated. The book also contains the use of semiochemicals and biotechnological tools likely to gain momentum in the future.
