

Pratap Subramanyam Investment Banking

Thank you very much for downloading **pratap subramanyam investment banking**. Maybe you have knowledge that, people have search numerous times for their favorite books like this pratap subramanyam investment banking, but end up in infectious downloads. Rather than reading a good book with a cup of tea in the afternoon, instead they are facing with some malicious virus inside their computer.

pratap subramanyam investment banking is available in our book collection an online access to it is set as public so you can get it instantly.

Our book servers spans in multiple locations, allowing you to get the most less latency time to download any of our books like this one.

Merely said, the pratap subramanyam investment banking is universally compatible with any devices to read

Bulls, Bears and Other Beasts (5th Anniversary Edition) Santosh Nair 2021-11-26
Insightful, interesting and a lot of fun' Ravi Subramanian 'An honest and extremely detailed recounting of the evolution of the market' BusinessLine 'A delightful book on the stock markets' Free Press Journal A rip-roaring history of the Indian stock market post liberalization. The wise and wily Lalchand Gupta takes you on an exciting journey through Dalal Street in this comprehensive history of the stock market since 1991. From tech booms and tax evasion to banks and money laundering; scams and crashes to fixers and investors, Lala has seen it all. Bringing the story up to the present, this special fifth anniversary edition also makes keen observations about the developments on the trading floor of the Bombay Stock Exchange in more recent times and doles out smart investing hacks in Lala's inimitable style. Bulls, Bears and Other Beasts is a must-read for anyone interested in the financial health of the country as well as those who want to know about the sensational events that led up to the far more sterile stock-market operations of the present day.

India's New Capitalists H. Damodaran 2008-06-25 In order to do business effectively in contemporary South Asia, it is necessary to understand the culture, the ethos, and the region's new trading communities. In tracing the modern-day evolution of business communities in India, this book uses social history to systematically document and understand India's new entrepreneurial groups.

INNOVATION, ECONOMIC DEVELOPMENT, AND INTELLECTUAL PROPERTY IN INDIA AND Kung-Chung Liu 2019-01-01 This open access book analyses intellectual property and innovation governance in the development of six key industries in India and China. These industries are reflective of the innovation and economic development of the two economies, or of vital importance to them: the IT Industry, the film industry, the pharmaceutical industry, plant varieties and food security, the automobile industry, and the sharing economy. The analysis extends beyond the domain of IP law, and includes economics and policy analysis. The overarching concerns of the book are how the examined industries have developed in the two countries, what role state innovation policy and/or IP policy has played in such development, what the nature of the state innovation policy/IP policy is, whether such policy

has been causal, facilitating, crippling, co-relational, or simply irrelevant, and whether there is a possibility of synergy between the two economies. The book also inquires as to why and how one specific industry has developed in one country and not in the other, and what India and China can learn from each other. The book provides a real-life understanding of how IP laws interact with innovation and economic development in the six selected economic sectors in China and India. The reader can also draw lessons from the success or failure of these sectors. --

Finance India 2005

India Unbound Gurcharan Das 2002 Traces India's economic and social transformation into a free-market democracy, sharing the stories of its top players while weaving in the author's own life experiences as a former CEO for Procter & Gamble India. Reprint.

Investment Banking Joshua Pearl 2013-05-29 Investment Banking, UNIVERSITY EDITION is a highly accessible and authoritative book written by investment banker that explains how to perform the valuation work at the core of the financial world. This body of work builds on Rosenbaum and Pearl's combined 30+ years of experience on a multitude of transactions, as well as input received from numerous investment bankers, investment professionals at private equity firms and hedge funds, attorneys, corporate executives, peer authors, and university professors. This book fills a noticeable gap in contemporary financial literature, which tends to focus on theory rather than practical application. It focuses on the primary valuation methodologies currently used on Wall Street—comparable companies, precedent transactions, DCF, and LBO analysis—as well as M&A analysis. The ability to perform these methodologies is especially critical for those students aspiring to gain full-time positions at investment banks, private equity firms, or hedge funds. This is the book Rosenbaum and Pearl wish had existed when we were trying to break into Wall Street. Written to reflect today's dynamic market conditions, *Investment Banking, UNIVERSITY EDITION* skillfully: Introduces students to the primary valuation methodologies currently used on Wall Street Uses a step-by-step how-to approach for each methodology and builds a chronological knowledge base Defines key terms, financial concepts, and processes throughout Provides a comprehensive overview of the fundamentals of LBOs and an organized M&A sale process Presents new coverage of M&A buy-side analytical tools—which includes both qualitative aspects, such as buyer motivations and strategies, along with technical financial and valuation assessment tools Includes a comprehensive merger consequences analysis, including accretion/(dilution) and balance sheet effects Contains challenging end-of-chapter questions to reinforce concepts covered A perfect guide for those seeking to learn the fundamentals of valuation, M&A, and corporate finance used in investment banking and professional investing, this UNIVERSITY EDITION—which includes an instructor's companion site—is an essential asset. It provides students with an invaluable education as well as a much-needed edge for gaining entry to the ultra-competitive world of professional finance.

Eclipse Arvind Subramanian 2011 In his new book, Arvind Subramanian presents the following possibilities: What if, contrary to common belief, China's economic dominance is a present-day reality rather than a faraway possibility? What if the renminbi's takeover of the dollar as the world's reserve currency is not decades, but mere years, away? And what if the United States's economic pre-eminence is not, as many economists and policymakers would like to believe, in its own hands, but China's to determine? Subramanian's analysis is based

on a new index of economic dominance grounded in a historical perspective. His examination makes use of real-world examples, comparing China's rise with the past hegemonies of Great Britain and the United States. His attempt to quantify and project economic and currency dominance leads him to the conclusion that China's dominance is not only more imminent, but also broader in scope, and much larger in magnitude, than is currently imagined. He explores the profound effect this might have on the United States, as well as on the global financial and trade system. Subramanian concludes with a series of policy proposals for other nations to reconcile China's rise with continued openness in the global economic order, and to insure against China becoming a malign hegemon.

Routledge International Encyclopedia of Women Cheris Kramarae 2004-04-16 For a full list of entries and contributors, sample entries, and more, visit the Routledge International Encyclopedia of Women website. Featuring comprehensive global coverage of women's issues and concerns, from violence and sexuality to feminist theory, the Routledge International Encyclopedia of Women brings the field into the new millennium. In over 900 signed A-Z entries from US and Europe, Asia, the Americas, Oceania, and the Middle East, the women who pioneered the field from its inception collaborate with the new scholars who are shaping the future of women's studies to create the new standard work for anyone who needs information on women-related subjects.

A Proposal to End the COVID-19 Pandemic Ruchir Agarwal 2021-05-19 Urgent steps are needed to arrest the rising human toll and economic strain from the COVID-19 pandemic that are exacerbating already-diverging recoveries. Pandemic policy is also economic policy as there is no durable end to the economic crisis without an end to the health crisis. Building on existing initiatives, this paper proposes pragmatic actions at the national and multilateral level to expeditiously defeat the pandemic. The proposal targets: (1) vaccinating at least 40 percent of the population in all countries by the end of 2021 and at least 60 percent by the first half of 2022, (2) tracking and insuring against downside risks, and (3) ensuring widespread testing and tracing, maintaining adequate stocks of therapeutics, and enforcing public health measures in places where vaccine coverage is low. The benefits of such measures at about \$9 trillion far outweigh the costs which are estimated to be around \$50 billion—of which \$35 billion should be paid by grants from donors and the residual by national governments potentially with the support of concessional financing from bilateral and multilateral agencies. The grant funding gap identified by the Access to COVID-19 Tools (ACT) Accelerator amounts to about \$22 billion, which the G20 recognizes as important to address. This leaves an estimated \$13 billion in additional grant contributions needed to finance our proposal. Importantly, the strategy requires global cooperation to secure upfront financing, upfront vaccine donations, and at-risk investment to insure against downside risks for the world.

Ideology and Identity Pradeep K. Chhibber 2018-08-24 Indian party politics, commonly viewed as chaotic, clientelistic, and corrupt, is nevertheless a model for deepening democracy and accommodating diversity. Historically, though, observers have argued that Indian politics is non-ideological in nature. In contrast, Pradeep Chhibber and Rahul Verma contend that the Western European paradigm of "ideology" is not applicable to many contemporary multiethnic countries. In these more diverse states, the most important ideological debates center on statism-the extent to which the state should dominate and regulate society-and recognition-whether and how the state should accommodate various marginalized groups and protect minority rights from majorities. Using survey data from the Indian National Election Studies and evidence from the Constituent Assembly debates, they show how education, the media, and religious practice transmit the competing ideas that lie at the heart of ideological debates in India.

Far Eastern Economic Review 1995

Handbook Of Financial Econometrics, Mathematics, Statistics, And Machine Learning (In 4 Volumes) Cheng-few Lee 2020-07-30 This four-volume handbook covers important concepts and tools used in the fields of financial econometrics, mathematics, statistics, and machine learning. Econometric methods have been applied in asset pricing, corporate finance, international finance, options and futures, risk management, and in stress testing for financial institutions. This handbook discusses a variety of econometric methods, including single equation multiple regression, simultaneous equation regression, and panel data analysis, among others. It also covers statistical distributions, such as the binomial and log normal distributions, in light of their applications to portfolio theory and asset management in addition to their use in research regarding options and futures contracts. In both theory and methodology, we need to rely upon mathematics, which includes linear algebra, geometry, differential equations, Stochastic differential equation (Ito calculus), optimization, constrained optimization, and others. These forms of mathematics have been used to derive capital market line, security market line (capital asset pricing model), option pricing model, portfolio analysis, and others. In recent times, an increased importance has been given to computer technology in financial research. Different computer languages and programming techniques are important tools for empirical research in finance. Hence, simulation, machine learning, big data, and financial payments are explored in this handbook. Led by Distinguished Professor Cheng Few Lee from Rutgers University, this multi-volume work integrates theoretical, methodological, and practical issues based on his years of academic and industry experience.

Bull! Maggie Mahar 2009-10-13 In 1982, the Dow hovered below 1000. Then, the market rose and rapidly gained speed until it peaked above 11,000. Noted journalist and financial reporter Maggie Mahar has written the first book on the remarkable bull market that began in 1982 and ended just in the early 2000s. For almost two decades, a colorful cast of characters such as Abby Joseph Cohen, Mary Meeker, Henry Blodget, and Alan Greenspan came to dominate the market news. This inside look at that 17-year cycle of growth, built upon interviews and unparalleled access to the most important analysts, market observers, and fund managers who eagerly tell the tales of excesses, presents the period with a historical perspective and explains what really happened and why.

Key investment banking operations Strategies for risk management Advice on cryptocurrencies Updated IPO coverage Discounted cash flow analysis Mergers and acquisitions Structuring a leveraged buyout Resources for investment bankers

Violence against Women and Girls Jennifer L. Solotaroff 2014-09-04 This report documents the dynamics of violence against women in South Asia across the life cycle, from early childhood to old age. It explores the different types of violence that women may face throughout their lives, as well as the associated perpetrators (male and female), risk and protective factors for both victims and perpetrators, and interventions to address violence across all life cycle stages. The report also analyzes the societal factors that drive the primarily male — but also female — perpetrators to commit violence against women in the region. For each stage and type of violence, the report critically reviews existing research from Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, and Sri Lanka, supplemented by original analysis and select literature from outside the region. Policies and programs that address violence against women and girls are analyzed in order to highlight key actors and promising interventions. Finally, the report identifies critical gaps in research, program evaluations, and interventions in order to provide strategic recommendations for policy makers, civil society, and other stakeholders working to mitigate violence against women in South Asia.

Lok Sabha Debates India. Parliament. Lok Sabha 1897

The Tatas Girish Kuber 2019-03-25 | WINNER OF THE GAJA CAPITAL BUSINESS BOOK PRIZE 2019 | The nineteenth century was an exciting time of initiative and enterprise around the world. If John D. Rockefeller was creating unimagined wealth in the United States that he would put to the service of the nation, a Parsi family with humble roots was doing the same in India. In 1822, a boy was born in a priestly household in Gujarat's Navsari village. Young Nusserwanji knew early on that his destiny lay beyond his village and decided to head for Bombay to start a business - the first in his family to do so. He had neither higher education nor knowledge of business matters, just a burning passion to carve a path of his own. What Nusserwanji started as a cotton trading venture, his son Jamsetji, born in the same year as Rockefeller, grew into a multifaceted business, turning around sick textile mills, setting up an iron and steel company, envisioning a cutting-edge institute of higher learning, building a world-class hotel, and earning himself the title of the 'Bhishma Pitamah of Indian Industry'. Stewarded ably over the decades by Jamsetji's sons Dorabji and Ratanji, the charismatic and larger-than-life JRD, and thereafter the more business-like Ratan, the Tata group today is a 110-billion-dollar empire. The Tatas is their story. But it is more than just a history of the industrial house; it is an inspiring account of India in the making. It chronicles how each generation of the family invested not only in the expansion of its own business interests but

also in nation building. Few know, for instance, that the first hydel power project in the world was conceived of and built by the Tatas. Nor that some radical labour concepts such as eight-hour work shifts were born in India, at the Tata mill in Nagpur. The Tata Cancer Research Centre, the Indian Institute of Science, the Tata Institute of Fundamental Research, as also the national carrier Air India - the family has a long, rich and unrivalled legacy. The Tatas is a tribute to a line of visionaries who have a special place in the hearts and minds of ordinary Indians. Written by seasoned journalist Girish Kuber, this is also the only book that tells the complete Tata story spanning almost two hundred years.

CODE OF CIVIL PROCEDURE JATINDRA KUMAR DAS 2013-08-21 The book written with a rich teaching experience of the author at National Law University and State University, attempts to critically analyse Indian High Court and Apex Court cases on the Law of Civil Procedure. It also evaluates the relation between statutory procedural law and case laws as subject. Most importantly, the book presents recent judgments of Supreme Court, particularly based on Post Amendment Acts of 1999 and 2002. Also, these cases have been analysed in addition to a critical examination of the radical and far reaching effect of the Code. This lucid and well-organised book is divided into five parts. Part I develops theoretical foundations of the readers on Civil Procedure Code. Part II demonstrates certain important issues on the (i) scope of jurisdiction of civil courts to entertain disputes, (ii) principles governing res sub judice, res judicata and foreign judgement, (iii) nature of powers exercised by civil courts in matters relating to place of suing, institution of suit, transfer of cases, withdrawal and compromise of suits, (iv) necessary conditions for first hearing, interim order, trial as well as special suits, (v) scope and ambit of law relating to pleadings, appearance and non-appearance of parties, discovery, inspection, production of documents, death, marriage, insolvency of parties, judgment and decrees. Part III explores various issues on appeals, reference, review and revision. In this part, an attempt has also been made to discuss different facets of law on first appeal, second appeals, appeals from orders, appeal by indigent persons, appeals to the Supreme Court. Part IV is devoted to discuss various principles on execution. Part V deals with miscellaneous issues on the Law of Civil Procedure and includes Appendix on the Law of Limitation. The book will prove useful to the students of LLB and LLM for their course study. Besides, the book will be of immense use to the professionals. Key Features • Written with case analysis method. • Contains an authoritative discussion on the complexity of the Second Appeal after its determination and re-determination since the British period. • Important Supreme Court and High Court decisions are examined and analysed critically.

Bank Quest 2005

Proceedings of International Conference on Advances in Computing Aswatha Kumar M. 2012-09-03 This is the first International Conference on Advances in Computing (ICAdC-2012). The scope of the conference includes all the areas of New Theoretical Computer Science, Systems and Software, and Intelligent systems. Conference Proceedings is a culmination of research results, papers and the theory related to all the three major areas of computing mentioned above. Helps budding researchers, graduates in the areas of Computer Science, Information Science, Electronics, Telecommunication, Instrumentation, Networking to take forward their research work based on the reviewed results in the paper by mutual interaction through e-mail contacts in the proceedings.

Breeding Oilseed Crops for Sustainable Production Surinder Kumar Gupta 2015-09-25
Breeding Oilseed Crops for Sustainable Production: Opportunities and Constraints presents key insights into accelerating the breeding of sustainable and superior varieties. The book explores the genetic engineering/biotechnology that has played a vital role in transforming economically important traits from distant/wild species to cultivated varieties, enhancing the quality and quantity of oil and seed yield production. Integrated nutrient management, efficient water management, and forecasting models for pests diseases outbreaks and integrated pest and pest management have also added new dimensions in breeding for sustainable production. With the rise in demand, the scientific community has responded positively by directing a greater amount of research towards sustainable production both for edible and industrial uses. Covering the latest information on various major world oil crops including rapeseed mustard, sunflower, groundnut, sesame, oilpalm, cotton, linseed/flax, castor and olive, this book brings the latest advances together in a single volume for researchers and advanced level students. Describes various methods and systems to achieve sustainable production in all major oilseed crops Addresses breeding, biology and utilization aspects simultaneously including those species whose information is not available elsewhere Includes information on modern biotechnological and molecular techniques and production technologies Relevant for international government, industrial and academic programs in research and development

Eclipse: Living in the Shadow of China's Economic Dominance Arvind Subramanian 2011 By most accounts, China has quickly grown into the second largest economy in the world. In this controversial new book, Subramanian argues that China has already become the most economically dominant country in the world in terms of wealth, trade and finance. Its dominance and eclipsing of US global economic power is more imminent, more broad-based and larger in magnitude than anyone has anticipated. Subramanian compares the economic dominance of China with that of the two previous economic superpowers--the United States and the United Kingdom--and highlights similarities and differences. One corollary is that the fundamentals are strong for the Chinese currency to replace the dollar as the world's reserve currency. The final chapter forecasts how the international economic system is likely to evolve as a result of Chinese dominance.

Shaping the Emerging World Waheguru Pal Singh Sidhu 2013-08-01 India faces a defining period. Its status as a global power is not only recognized but increasingly institutionalized, even as geopolitical shifts create both opportunities and challenges. With critical interests in almost every multilateral regime and vital stakes in emerging ones, India has no choice but to influence the evolving multilateral order. If India seeks to affect the multilateral order, how will it do so? In the past, it had little choice but to be content with rule taking—adhering to existing international norms and institutions. Will it now focus on rule breaking—challenging the present order primarily for effect and seeking greater accommodation in existing institutions? Or will it focus on rule shaping—contributing in partnership with others to shape emerging norms and regimes, particularly on energy, food, climate, oceans, and cyber security? And how do India's troubled neighborhood, complex domestic politics, and limited capacity inhibit its rule-shaping ability? Despite limitations, India increasingly has the ideas, people, and tools to shape the global order—in the words of Jawaharlal Nehru, "not wholly or in full measure, but very substantially." Will India emerge as one of the shapers of the emerging international order? This volume seeks to answer that question.

Proceeding of the Second International Conference on Microelectronics, Computing & Communication Systems (MCCS 2017) Vijay Nath 2018-07-30 The volume presents high quality papers presented at the Second International Conference on Microelectronics, Computing & Communication Systems (MCCS 2017). The book discusses recent trends in technology and advancement in MEMS and nanoelectronics, wireless communications, optical communication, instrumentation, signal processing, image processing, bioengineering, green energy, hybrid vehicles, environmental science, weather forecasting, cloud computing, renewable energy, RFID, CMOS sensors, actuators, transducers, telemetry systems, embedded systems, and sensor network applications. It includes original papers based on original theoretical, practical, experimental, simulations, development, application, measurement, and testing. The applications and solutions discussed in the book will serve as a good reference material for future works.

Index India 1975

Kashmir in Conflict Victoria Schofield 1996 "Why has the valley of Kashmir, famed for its beauty and tranquillity, become a major flashpoint, threatening the stability of a region of great strategic importance and challenging the integrity of the Indian state? This book examines the Kashmir conflict in its historical context, from the period when the valley was an independent kingdom right up to the struggles of the present day. Located on the borders of China, Central Asia and the Sub-Continent, the insurgency in the valley has also created serious tensions between India and Pakistan. Drawing upon research in India and Pakistan, as well as historical sources, this book traces the origins of the state in the 19th century and the controversial "sale" by the British of the predominantly Muslim valley to a Hindu Maharaja in 1846. Through an exploration of the implications for Kashmir of independence in 1947, it gives a critical account of why, for Kashmir, self-determination may seem a more attractive option than affiliation to a larger multi-racial whole."--Bloomsbury Publishing.

Multinational Enterprises in India Nagesh Kumar 2002-09-11 Multinational enterprises play a vital role in the economic activity of most developing countries. In India MNE affiliates dominate whole sectors of industry - such as plastics and pharmaceuticals - characterised by a high degree of product differentiation, complex technology and high skill intensity. Such advantages, combined with intangible assets, centralised decision making and global outlook lead to a divergence of approach between MNEs and their local counterparts in host developing countries. This book analyses the inter-industry pattern of MNEs in India in the framework of the internationalisation theory, also examining the comparative behaviour of MNE affiliates and LCEs in terms of conduct and performance. The book goes further to explain the different performance of these two strategic groups by assessing profit and export.

Irrigation and Water Resources Engineering G L Asawa 2006-01-01 The Book Irrigation And Water Resources Engineering Deals With The Fundamental And General Aspects Of Irrigation And Water Resources Engineering And Includes Recent Developments In Hydraulic Engineering Related To Irrigation And Water Resources Engineering. Significant Inclusions In The Book Are A Chapter On Management (Including Operation, Maintenance, And Evaluation) Of Canal Irrigation In India, Detailed Environmental Aspects For Water Resource Projects, A Note On Interlinking Of Rivers In India, And Design Problems Of Hydraulic Structures Such As Guide Bunds, Settling Basins Etc.The First Chapter Of The Book

Downloaded from avenza-dev.avenza.com

Introduces Irrigation And Deals With The Need, Development And Environmental Aspects Of Irrigation In India. The Second Chapter On Hydrology Deals With Different Aspects Of Surface Water Resource. Soil-Water Relationships Have Been Dealt With In Chapter 3. Aspects Related To Ground Water Resource Have Been Discussed In Chapter 4. Canal Irrigation And Its Management Aspects Form The Subject Matter Of Chapters 5 And 6. Behaviour Of Alluvial Channels And Design Of Stable Channels Have Been Included In Chapters 7 And 8, Respectively. Concepts Of Surface And Subsurface Flows, As Applicable To Hydraulic Structures, Have Been Introduced In Chapter 9. Different Types Of Canal Structures Have Been Discussed In Chapters 10, 11, And 13. Chapter 12 Has Been Devoted To Rivers And River Training Methods. After Introducing Planning Aspects Of Water Resource Projects In Chapter 14, Embankment Dams, Gravity Dams And Spillways Have Been Dealt With, Respectively, In Chapters 15, 16 And 17. The Students Would Find Solved Examples (Including Design Problems) In The Text, And Unsolved Exercises And The List Of References Given At The End Of Each Chapter Useful.

The Accidental Prime Minister Sanjaya Baru 2015-07-05 When The Accidental Prime Minister was published in 2014, it created a storm and became the publishing sensation of the year. The Prime Minister's Office called the book a work of 'fiction', the press hailed it as a revelatory account of Prime Minister Manmohan Singh's first term in UPA. Written by Singh's media adviser and trusted aide, the book describes Singh's often troubled relations with his ministers, his cautious equation with Sonia Gandhi and how he handled the big crises from managing the Left to pushing through the nuclear deal. Insightful, acute and packed with political anecdotes, The Accidental Prime Minister is one of the great insider accounts of Indian political life.

Management of Banking and Financial Services: Padmalatha Suresh Management of Banking and Financial Services focuses on the basic concepts of banking and financial services, and how these concepts are applied in the global banking environment as well as in India. In addition to presenting the big picture of the

Business Maharajas Gita Piramal 2000-10-14 The inside track to India's most powerful tycoons The eight business maharajas profiled here are among Asia's most powerful industrial tycoons, Their combined turnover runs into billions of rupees, and between them they employ some 650,000 people, while indirectly affecting the lives of millions more. Sip a cup of tea, drive to work, listen to music, build a house and the chances are that in these and a myriad other ways you are using products that they manufacture or market. By any yardstick, the achievements of these men would rank among the great business stories of our time. How did these men build their enormous empires? What are their management secrets? How did they thrive and prosper even as others failed? What is their vision for the future? Top business writer and industry insider Gita Piramal draws on exhaustive interviews and in-depth research to discover the answers to these and related questions in her profiles of the men who will lead the country's push to become an industrial superpower in the 21st century.

Investment Banking Pratap Giri S. 2017

Unstable Constitutionalism Mark Tushnet 2015-09-04 This book examines constitutional law and practice in five South Asian countries: India, Pakistan, Sri Lanka, Nepal, and Bangladesh.

The Accidental Investment Banker Jonathan A. Knee 2006-08-15 Jonathan A. Knee had a ringside seat during the go-go, boom-and-bust decade and into the 21st century, at the two most prestigious investment banks on Wall Street--Goldman Sachs and Morgan Stanley. In this candid and irreverent insider's account of an industry in free fall, Knee captures an exhilarating era of fabulous deal-making in a free-wheeling Internet economy--and the catastrophe that followed when the bubble burst. Populated with power players, back stabbers, celebrity bankers, and godzillionaires, here is a vivid account of the dramatic upheaval that took place in investment banking. Indeed, Knee entered an industry that was typified by the motto "first-class business in a first-class way" and saw it transformed in a decade to a free-for-all typified by the acronym IBG, YBG ("I'll be gone, you'll be gone"). Increasingly mercenary bankers signed off on weak deals, knowing they would leave them in the rear-view mirror. Once, investment bankers prospered largely on their success in serving the client, preserving the firm, and protecting the public interest. Now, in the "financial supermarket" era, bankers felt not only that each day might be their last, but that their worth was tied exclusively to how much revenue they generated for the firm on that day--regardless of the source. Today, most young executives feel no loyalty to their firms, and among their clients, Knee finds an unprecedented but understandable level of cynicism and distrust of investment banks. Brimming with insight into what investment bankers actually do, and told with biting humor and unflinching honesty, *The Accidental Investment Banker* offers a fascinating glimpse behind the scenes of the most powerful companies on Wall Street.

Big Billion Startup: The Untold Flipkart Story Mihir Dalal 2019-10-06 The definitive account of India's biggest startup that redefined e-commerce, entrepreneurship and the way we shop and live. IIT graduates Sachin Bansal and Binny Bansal founded out of a Bangalore apartment what would become India's biggest e-commerce startup. Established in October 2007, Flipkart began as an online bookstore and soon came to be known for its 'customer obsession'. As the startup's reputation grew, so did its value, with venture capitalists in India and abroad lining up to invest heavily in the company that stood for bold ambition, unabashed consumerism and the virtues of technology. Investigative journalist Mihir Dalal recounts the astounding story of how the Bansals built Flipkart into a multi-billion-dollar powerhouse in the span of a few years and made internet entrepreneurship a desirable occupation. But it is also a story of big money, power and hubris, as both business and interpersonal complexities weakened the founders' control over their creation and forced them to sell out to a retailer whose dominance they had once dreamt of emulating. Flipkart's auction involved some of the corporate world's biggest names, from Jeff Bezos, Satya Nadella, Sundar Pichai to Masayoshi Son and Doug McMillon, an ironic testimony to the strength of what the Bansals had forged. Based on extraordinary research, extensive interviews and deep access to key characters in the Flipkart story, *Big Billion Startup* is the riveting and revealing account of how Sachin and Binny Bansal built and sold India's largest internet company.
