Fungal Disease in Britain and the United States 1850-2000 A. Homei 2013-11-11 This book is open access under a CC BY license. The narrative of 20th-century medicine is the conquering of acute infectious diseases and the rise in chronic, degenerative diseases. The history of fungal infections does not fit this picture. This book charts the path of fungal infections from the mid 19th century to the dawn of the 21st century.

Handbook of Atopic Eczema Thomas Ruzicka 2013-03-09 State-of-the-art review on atopic eczema, one of the most common skin diseases today. This multi-authored handbook covers all aspects relevant for physicians from various disciplines.

Necrotizing Soft Tissue Infections Anna Norrby-Teglund 2020-10-20 This volume aims to enhance the current understanding of clinical features, treatment and pathogenic aspects in necrotizing soft tissue infections. Various representative case studies are discussed to enhance the readers' understanding of these complex diseases. Necrotizing soft tissue infections are rapidly spreading infections that may cause extensive soft tissue or limb loss, multiorgan failure and are associated with a considerable fatality rate. It is undisputed that rapid diagnosis and prompt intervention is directly related to survival. The initial presentation may be limited to unspecific symptoms such as tenderness, swelling, erythema and pain. Thus, diagnosis and management are challenging due to heterogeneity in clinical presentation, in co-morbidities, in microbiological aetiology, as well as in the pathogenic mechanisms. An international and multidisciplinary consortium, INFECT, has for the last 6 years been pursuing research aimed to advance the understanding of the clinical and pathogenic aspects of these infections. A central part has been to create a comprehensive clinical registry and associated biobank which have also formed the basis for the experimental studies. Using the INFECT patient cohort, as well as an integrated systems biology approach in patients and clinically relevant experimental models, an advanced insight of diagnostic features, causative microbial agents, treatment strategies, and pathogenic mechanisms (host and bacterial disease traits and their underlying interaction network) has been obtained.

Proceedings of the 8th International Conference on Sciences of Electronics, Technologies of Information and Telecommunications (SETIT18), Vol. 1 Med Salim Bouhlel 2020 This two-volume book presents an unusually diverse selection of research papers, covering all major topics in the fields of information and communication technologies and related sciences. It provides a wide-angle snapshot of current themes in information and power engineering, pursuing a cross-disciplinary approach to do so. The book gathers revised contributions that were presented at the 2018 International Conference: Sciences of Electronics, Technologies of Information and Telecommunication (SETIT'18), held on 20-22 December 2018 in Hammamet, Tunisia. This eighth installment of the event attracted a wealth of submissions, and the papers presented here were selected by a committee of experts and underwent additional, painstaking revision. Topics covered include: · Information Processing · Human-Machine Interaction · Computer Science · Telecommunications and Networks · Signal Processing · Electronics · Image and Video This broad-scoped approach is becoming increasingly popular in scientific publishing. Its aim is to encourage scholars and professionals to overcome disciplinary barriers, as demanded by current trends in the industry and in the consumer market, which are rapidly leading toward a convergence of data-driven applications, computation, telecommunication, and energy awareness. Given its coverage, the book will benefit graduate students, researchers and practitioners who need to keep up with the latest technological advances.

Dermatologie infectieuse Mourad Mokni 2014-08-26 L'infectiologie est une discipline essentielle et complexe de la dermatologie. Cette pratique implique

de larges connaissances cliniques, un suivi de l'actualité des avancées thérapeutiques et une capacité à mettre en œuvre un traitement parfois long et contraignant. L'objectif de cet ouvrage est de répondre à ces problématiques en abordant de manière exhaustive les expressions cutanées des maladies infectieuses selon les pathogènes en cause : virus, bactéries, mycoses, parasites, ectoparasites, algues. Les principaux syndromes infectieux sont aussi présentés, de même que des situations cliniques particulières avec un focus sur les populations vulnérables, les pathologies antérieures à risque et le cancer. Chaque chapitre recouvre tous les aspects épidémiologique, microbiologique, clinique, diagnostique, thérapeutique et préventif le cas échéant. Cet ouvrage de référence a été rédigé par des spécialistes francophones, experts de la dermatologie infectieuse. Illustré par 300 photos retenues pour la pertinence de leur représentativité, il constitue un outil précieux pour la pratique quotidienne des dermatologues, des infectiologues et des médecins généralistes. Ce livre s'adresse également aux étudiants cherchant à en connaître davantage sur cette discipline couvrant un large spectre de compétences.

Procedures in Cosmetic Dermatology Series: Cosmeceuticals E-Book Zoe Diana Draelos 2008-10-31 This newly revised title helps you incorporate the very latest in cosmeceuticals into your busy practice. Succinctly written and lavishly illustrated, this book focuses on procedural how-to's and offer step-by-step advice on proper techniques, pitfalls, and tricks of the trade—so you can refine and hone your skills...and expand your repertoire. Contains valuable advice from board-certified dermatologist Zoe Diana Draelos, MD to help you make the best possible recommendations for your patients. Provides a wealth of color illustrations and photographs that depict cases as they appear in practice so you can visualize techniques clearly. Includes a new chapter dedicated to the future of cosmeceuticals to keep you completely current. Features new uses for botanicals.

ACNE and ROSACEA G. Plewig 2012-12-06 The third, revised edition of this lavishly illustrated book covers all aspects of acne, acne-like disorders and rosacea, including its physiology, pathology, bacteriology, and endocrinology, with special emphasis placed on the histopathology. The text is supplemented by selected references and a richly illustrated portfolio of histopathological pictures. The authors critically examine the spectrum of pharmacological and physical methods of controlling acne, acne-like diseases, and rosacea, and go on to present in detail their personal strategies for successful treatment.
