Brief Principles of Macroeconomics N. Gregory Mankiw 2012-12-19 BRIEF PRINCIPLES OF MACROECONOMICS, Sixth Edition, became a best seller after its introduction and continues to be the most popular and widely used text in the economics classroom. Instructors found it the perfect complement to their teaching. A text by a superb writer and economist that stressed the most important concepts without overwhelming students with an excess of detail was a formula that was quickly imitated, but has yet to be matched. The sixth edition features a strong revision of content in all eighteen chapters. Dozens of new applications emphasize the real-world relevance of economics for today's students through interesting news articles, realistic case studies, and engaging problems. The premier ancillary package is the most extensive in the industry, using a team of instructors/preparers that have been with the project since the first edition. The text material is again fully integrated into Aplia, the best-selling online homework solution. I have tried to put myself in the position of someone seeing economics for the first time. My goal is to emphasize the material that students should and do find interesting about the study of the economy. N. Gregory Mankiw. Cheering for Self James Vass Jr 2003-05-01 This book is a study of UW men's basketball fans during the 2001-2002 season and explores their proclivity to 'cheering for self' during basketball events. The term 'basketball event' is used rather than 'basketball game' to make clear that everything connected to and seen, heard, or experienced before, during and after a basketball game is included. The actual game itself is only part of the 'basketball event. An undercurrent runs throughout this participant observation mini-ethnography dealing with access, and the relative quality of that access, to basketball events being affected by ones age, class, race, and gender. The prominent role of advertising in shaping basketball events and helping to construct fans as consumers of products (both commercial and institutional) during the process of cheering for self is central to this idea. Cheering for self is the activity engaged in by individual fans after they find things to identify or connect with through personal investment. Fans cheer for self indirectly. Fans cheer for the team that they identify with. Through the process of cheering for self while attending the basketball event people are taught how to become fans, to consume a UW product--the basketball event and to consume advertisers' products. People have a tendency to spend their entire life trying to impress others.
