Water Resources Perspectives: Evaluation, Management and Policy W.W. Wood 2003-12-09
Many countries in the world have made great efforts, to remedy the water shortage, by providing financial and technical backing, for water desalination, treatment of wastewater and improved management and conservation techniques. Water ministries, universities and research centres have supported scientific research, and applied the most recent technologies, in search of new and alternative water supplies. Laws have been promulgated, economic and public relation campaigns developed, to promote and encourage the practice of efficient water use and the conservation of this scarce commodity. This book covers water resources and management and provides a new vision of water resources management, water conservation and legislations, water law, and modern techniques of water resources investigation.

The Middle East Barry Rubin 2015-03-17 Provides a comprehensive overview of the development of the field of Organizational Behavior. This book covers the foundations of the scientific method, theory development, and the accrual of scientific knowledge in the field. It introduces the ideas of pioneers whose work pre-dates the emergence of Organizational Behavior.

Regional Security Dialogue in the Middle East Chen Kane 2014-07-25 At this time of considerable political turmoil in the Middle East, there is a pressing need to explore alternative frameworks for regional security. The book discusses the Helsinki Process as one potentially relevant historical model to learn from. The Helsinki Process began in a divided Europe in the early 1970s and, over 40 years, achieved major successes in promoting cooperation between the Warsaw Pact and NATO member states on social, human rights, security, and political issues. In this volume, established Middle East experts, former diplomats, and emerging scholars assess the regional realities from a broad range of perspectives and, with the current momentum for reform across the Middle East, chart a path towards a comprehensive mechanism that could promote long-term regional security. Providing a gamut of views on regional threat perception and suggesting ways forward for regional peace, this book is essential reading for students and scholars with an interest in Politics, the Middle East and Conflict Studies.

Principles of Economics Robert H. Frank 2009

A Mathematical Treatment of Economic Cooperation and Competition Among Nations, with Nigeria, USA, UK, China, and the Middle East Examples Ethelbert N. Chukwu 2005-09-30 The book presents a careful mathematical study of Economic Cooperation and Competition among Nations. It appropriates the

principles of Supply and Demand and of Rational Expectations to build the dynamic model of the Gross Domestic Products of two groups of nations which are linked up together. The first group consists of Nigeria, the US, the UK and China. The second group is made up of Egypt, the US, Jordan and Israel. The link connecting the four nations of each group is mirrored in the net export function which is broadened to include trade, debts and the inflow or the outflow of wealth from the competing and cooperating nations. This realistic models of the four interacting GDP's, a hereditary differential game of pursuit are validated with historical data from International Financial Statistic Year Book. The Mathematical model is then studied for controllability: from a current initial GDPs a better state can be attained using government and private strategies which are carefully identified. We use regression and differential equation methods to test whether the four countries are competing or cooperating. The consequences of competition or cooperation are explored. Cooperation can be realized and the growth of wealth assured because the system is controllable and we can increase the growth of GDP and then increase the coefficient of cooperation. The outcome may be unbounded growth of wealth for all concerned - the triumph of cooperation. With analogous simple examples the book shows that sufficiently cooperating systems grow unbounded and competing ones are either bounded at best, or become extinct in finite time. If competition is small, i.e., limited, or regulated the GDP's need not be extinct even after a long time. This results are in contrast with popular opinion which advocate competition over cooperation. The detailed policy implication of the cooperation analysis at one time or the other were advocated by Pope John Paul II, President Clinton and President Bush. The mathematical message is clear: the strategy of cooperation is the best way in an Interconnected World: Cooperation triumphs over competition. The same type of analysis allows the book to argue through modeling that prosperity, internal peace and harmony can flourish in Nigeria among the old three regions and the newer six geopolitical regions. The same is true for the four powerful states in the Middle East. Thus the author's refreshing approach is the "scientific" treatment of cooperation and competition models of the gross-domestic product of two groups of nations - Nigeria, the USA, the UK, and China, and the USA, Egypt, Jordan and Israel. Attempts are made to provide "scientific" answers to broad national policies. It allows predictions of growth to be made with some degree of accuracy for up to 4 years. MATLAB and Maple programs in accompanied CD are provided. The author's individual nations economic models are cited. The dynamics are ordinary and hereditary games of pursuit also cited from the original earlier writings of the author are models of the economic state of each nation - a vector of six things - the gross domestic product (GDP) (y), interest rate R ; employment (or unemployment) (L), value of capital stock (k), prices $p(t)$, and therefore inflation and cumulative balance of payment (E). Each economic state is isolated except the impact of export function on aggregate demand. The main difference between this earlier contributions and this book is the link and its apparent policy implications and consequences. Key features:

Prophecy, Piety, and Profits Ayman Reda 2017-12-26 This book examines, in greater depth than the existing literature, the history of Islamic economic thought. It seeks to introduce Islamic views to debates surrounding critical economic concepts, such as scarcity, wealth, poverty, charity, usury, self-interest, rationality, and markets. It does so through a comparative analysis with the views of Judaic, Christian, and secular economic thought. "Prophecy" is meant to signify the theoretical dimension of religion, while "piety" represents its practical element; neither part is feasible without the other. Together, prophecy and piety inform the Islamic view of economic concepts and phenomena. This view seeks to adjust our approach to profits, both in this world and the next, and seeks to reexamine what is truly profitable and worthy of sacrifice.

Water in the Middle East Karl David Hambricht 2006-01-01 Scarcity of water is a problem in many areas around the world. In this sense the Middle East which suffers from frequent droughts and a shortage of potable water, is not unique. However, when political disagreements among states combine with issues of fair and equitable access to common water resources, the problems associated with water scarcity seem intractable. In this sense the Middle East, and particularly the Jordan River Valley, is indeed unique. This enlightening book brings together the insights of scholars from Israel, Palestine, Jordan, and the United States who employ a broad range of perspectives and disciplines—engineering, agronomy, biology, economics, history, geography, and political science—to examine the significance of water in Middle East conflicts. These contributors do not offer facile remedies. Rather they show that any solution must be achieved within a political and social framework of peace, enlightened economic policies, and technical measures that take due account of environmental conditions. This volume is the result of the conference "Water in the Jordan Valley," sponsored by the Center for Peace Studies, a division of the International Programs Center at the University of Oklahoma.

Global Political Economy Robert Gilpin 2011-08-29 This book is the eagerly awaited successor to Robert Gilpin's 1987 *The Political Economy of International Relations*, the classic statement of the field of international political economy that continues to command the attention of students, researchers, and policymakers. The world economy and political system have changed dramatically since the 1987 book was published. The end of the Cold War has unleashed new economic and political forces, and new regionalisms have emerged. Computing power is increasingly an impetus to the world economy, and technological developments have changed and are changing almost every aspect of contemporary economic affairs. Gilpin's *Global Political Economy* considers each of these developments. Reflecting a lifetime of scholarship, it offers a masterful survey of the approaches that have been used to understand international economic relations and the problems faced in the new economy. Gilpin focuses on the powerful economic, political, and technological forces that have transformed the world. He gives particular attention to economic globalization, its real and alleged implications for economic affairs, and the degree to which its nature, extent, and significance have been exaggerated and misunderstood. Moreover, he demonstrates that national policies and domestic economies remain the most critical determinants of economic affairs. The book also stresses the importance of economic regionalism, multinational corporations, and financial upheavals. Gilpin integrates economic and political analysis in his discussion of "global political economy." He employs the conventional theory of international trade, insights from the theory of industrial organization, and endogenous growth theory. In addition, ideas from political science, history, and other disciplines are employed to enrich understanding of the new international economic order. This wide-ranging book is destined to become a landmark in the field.

Migration and Urbanization: Local Solutions for Global Economic Challenges Ushakov, Denis 2019-08-16 International migration and urbanization as economic processes can provide great opportunities to solve local and regional economic and social problems and lead to the leveling of global economic unfairness and multi-complexity. However, uncontrolled migration and urbanization can easily destroy market stability and create many new social and economic problems both in developed (due to migration) and developing (due to urbanization) countries. *Migration and Urbanization: Local Solutions for Global Economic Challenges* is a collection of innovative research that sets basic rules and patterns for state regulation of urbanization and international migration and for increasing the economic efficiency of developed and developing countries. Additionally, the book evaluates the economic impact of urbanization and international migration at the global, national, and regional levels. While highlighting topics including economic security, modern mechanisms, and migration policy, this book is ideally designed for government officials, economists, educators, policymakers, industry leaders, business managers, academicians, researchers, and students.

Contrasts and Solutions in the Middle East Ole Høiris 1997 This splendid volume provides an interdisciplinary overview of the Middle East from age-old enmities to discussions of current political concerns. In forty-four essays, an international assemblage of scholars, politicians, and experts address the problems of Palestine and Israel; Iran, Syria and Iraq; Turkey; and the Kurdish regions. Concerned with questions of national, religious, or ethnic identification, the authors touch on topics from the definition of the "Middle East", the Salman Rushdie fatwa, the constancy of the Mosque as an institution, mass murders in Iraq, the role of women, the crises affecting the Assyrian Chaldean-Syriacs, torture in Iran, and the peace process. Comprehensive chapters chart the politics, ethnicity, and history of Turkey.

Water and Peace in the Middle East J. Isaac 1994-04-05 The volume serves as an important milestone in the process called "second track" dialogue and cooperation between Israeli and Palestinian academics on crucial shared problems, the resolution of which is vital to the peace process. The book contains forty-one original papers dealing with almost all aspects of the Middle-Eastern water problems, and should serve as a useful reference to students, scholars and policy makers all over the world interested in understanding the complexities of the Middle-Eastern water conflicts.

The Water-Energy-Food Nexus in the Middle East and North Africa Martin Keulertz 2017-10-02

This book discusses key issues concerning water, energy and food in the Middle East and North Africa (MENA) region. It provides an interdisciplinary account of current developments in the most water-scarce and conflict-torn region in the world. Key analysts on MENA water, agriculture and energy affairs have been drawn together to compile one of the first edited volumes dedicated to the crucial role of water, energy and food security in the 21st century MENA region. It will be of interest to decision-makers, analysts and students of the future of the Middle East from a broad range of disciplines including the physical and social sciences. This book was previously published as a special issue of the International Journal of Water Resources Development.

Global Liberalism, Local Populism Guy Ben-Porat 2006-04-28 In recent years the conflicts in Israel/Palestine and Northern Ireland continue to oscillate between momentum for peaceful resolution and regression into new cycles of violence or political deadlock. To understand these shifts Guy Ben-Porat provides an in-depth analysis of the global environment and the profound effect it has on local conflicts. Because globalization affects localized social structures, institutions, and political divisions as well as international relationships between states and societies, it offers a unique perspective from which to examine the commonalities and differences between two regions laden with conflict. Ben-Porat reveals how the complex and often contradictory characteristics of globalization both constrain and promote the peace processes in Israel/Palestine and Northern Ireland. Drawing on scholarship in the field of globalization and on archival research, including interviews with leading businessmen involved in the peace process, Ben-Porat believes that a critical interrogation of the interface between economic interests and policy makers is central to an understanding of the complex relationship between globalization and peace. In clear and convincing arguments, this book presents an important and innovative approach to two of the world's most intractable conflicts.

State and Economics in the Middle East Alfred Bonne 1998 This volume traces the modern critical and performance history of this play, one of Shakespeare's most-loved and most-performed comedies. The essay focus on such modern concerns as feminism, deconstruction, textual theory, and queer theory.

Religion, Religiosity, and Democratic Values Abbas Mehregan 2014-05-28 In *Religion, Religiosity, and Democratic Values*, Abbas Mehregan examines empirically the effects of individual religiosity, historical religion, institutional democracy, and socioeconomic development on attitudes towards free market economics and confidence in civil society organizations in 60 Islamic and non-Islamic societies.

Climate Change Law and Policy in the Middle East and North Africa Region Damilola S. Olawuyi 2021-07-29 *Climate Change Law and Policy in the Middle East and North Africa Region* provides an in-depth and authoritative examination of the guiding principles of climate change law and policy in the MENA region. This volume introduces readers to the latest developments in the regulation of climate change across the region, including the applicable legislation, institutions, and key legal innovations in climate change financing, infrastructure development, and education. It outlines participatory and bottom-up legal strategies—focusing on transparency, accountability, gender justice, and other human rights safeguards—needed to achieve greater coherence and coordination in the design, approval, financing, and implementation of climate response projects across the region. With contributions from a

range of experts in the field, the collection reflects on how MENA countries can advance existing national strategies around climate change, green economy, and low carbon futures through clear and comprehensive legislation. Taking an international and comparative approach, this book will be of great interest to students, scholars, and practitioners who work in the areas of climate change, environmental law and policy, and sustainable development, particularly in relation to the MENA region.

Social welfare and religion in the Middle East Jawad, Rana 2009-07-29 As religion continues to regain its centrality in both academic and policy circles around the world, this book presents a new framework which examines the complex social and political dynamics shaping social welfare in the Middle East. Based on an in-depth study of the major Muslim and Christian religious welfare organisations in Lebanon (including Hezbollah), and drawing upon supplementary research conducted in Iran, Egypt and Turkey, the book argues that religion is providing sophisticated solutions to the major social and economic problems of the Middle East. It will be of use to students and academics of social policy, sociology, politics and Middle Eastern studies.

Palestine and International Law Sanford R. Silverburg 2002-01-31 This collection of thirteen essays explains and analyzes the conflict between the Government of Israel and the Palestine Authority over the granting of sovereignty to Palestinians from the point of view of international law. The dispute--emotional, so far intractable, often violent--is of global, not merely Middle Eastern concern. The essays cover two general topics: the political nature of the conflict and the economic issues. The collection includes eight respected contributions previously published and five newly written essays. The contributors represent a range of political alignments and differing perspectives, providing the widest possible scope for understanding the issues and beliefs relating to the conflict. Includes bibliography and index.

Commonsense Guide to Current Affairs Vincent Frank Bedogne 2009-08-01 From clones, family, abortion, terrorism, and the concept of the collective to economics, nuclear power, cap and trade, renewable energy, and the politics of climate change, Everest and Bedogne do something much needed and remarkably absent in today's media. They strip away the layers of liberal and conservative ideology to look at the most talked about topics of our time from the standpoint of what the politicians have forgotten--common sense. Brought to light by logic, history, and science, the book filters the issues that in today's world every citizen, student, and educator needs to understand through what we know to be sound--that which we have gained through our day-to-day trials--our all-too-often repressed ability to see things in a practical and matter-of-fact way.

World At The Crossroads: New Conflicts New Solutions A - Proceedings Of The 43rd Pugwash Conference On Science And World Affairs Rotblat Joseph 1994-11-08 Photonics and nanotechnology are popular emerging fields of technology. This proceedings volume contains over 12 selected papers from the International Workshop and Conference on Photonics and Nanotechnology (ICPN) 2007, held in Pattaya, Thailand, from December 16-18, 2007. The papers cover a wide range of topics, from optical and nonlinear optical physics to nanoelectronics.

100 Years of the MiddleEast Adnan Khan 2016-08-13 The Middle East today stands at an epoch. The

artificial architecture created by the British and French is tearing apart at the seams and no amount of stitching can keep it together. The Muslim rulers, who have long played the role of maintaining the artificial architecture in the Middle East, have lost their most potent weapon; fear. This was their only method of maintaining Sykes-Picot as well as themselves in power. Looking forward there are huge unprecedented demographic, economic, political, social, technological and geopolitical trends taking shape that will subsume everything standing in its way and sweep away those who try to maintain the status quo. In order to understand the present, the past needs to be evaluated. The actions, intrigues, plots and plans of the past have come to shape the Middle East today and understanding them will give us a better idea of the current situation of the region. To comprehend the Middle East of the future, an accurate assessment of the region today is necessary in order to place the emerging trends in their correct context. This book looks to provide answers to a number of questions. How did the Muslims, led by the Ottomans, go from a global power to the sick man of Europe? Was the Sykes-Picot agreement a folly by the French and British empires and poor strategic planning? Or part of a carefully constructed plan to divide the Muslim world in order to control it? Does the Arab spring confirm the end of Sykes-Picot and a new dawn for the people of the region? What are the most important emerging trends going forward? What do these mean for the region and beyond? What myths exist of the region which are simply untrue and upon closer scrutiny, do not stack up to the facts?

The Economic Metabolism Willem Heijman 1998-04-30 Students in Technical and Agricultural faculties spend only a limited amount of time on general economics, environmental economics and resource economics. However, while their knowledge of economics may be limited, they often have adequate mathematical skills. The objective of *The Economic Metabolism*, therefore, is to present these three branches of economics in an integrated, mathematically oriented way, so that the subjects can be taught together, without losing time on separate economics courses. While the approach adopted is mathematical, the mathematics used is certainly not too difficult for the target group: university students in technical and/or agricultural faculties will be used to far more difficult mathematics. After studying the book, the basic/intermediate level student should be able to understand the basic principles of economics, especially microeconomics; understand the economic principles of environmental policy; understand the economic principles of resource extraction; apply the standards for efficiency and sustainability; and apply the theory to practical problems.

The Middle East Peace Process and the EU Taylan Özgür Kaya 2012-12-20 EU policy-makers have in the past decade endeavoured to formulate a substantial redefinition of the organisation's international ambitions. Attempting to carve out a new role as a key foreign and security policy actor in international politics, the EU has been involved in peace negotiations across the globe. Here, Taylan Ozgur Kaya looks at how this is enacted, with particular reference to the Middle East peace process. Expanding its political, diplomatic, economic and security role in the region, the EU, whilst still being the junior partner to the US, has increasingly played a more conspicuous role in the attempts to resolve (or at least mediate) the Israeli-Palestinian conflict. Bearing this in mind, Kaya examines to what extent the EU manages to live up to its self-image as a key player in conflict resolution and crisis management in the region and beyond. With the financial and diplomatic future of Europe ever more in the spotlight, this book will appeal both to researchers of the Peace Process and to policy-makers.

China and the Middle East James M. Dorsey 2018-07-19 This book explores China's significant economic and security interests in the Middle East and South Asia. To protect its economic and security interests, China is increasingly forced to compromise its long-held foreign policy and defence principles, which include insistence on non-interference in the domestic affairs of others, refusal to envision a foreign military presence, and focus on the development of mutually beneficial economic and commercial

relations. The volume shows that China's need to redefine requirements for the safeguarding of its national interests positioned the country as a regional player in competitive cooperation with the United States and the dominant external actor in the region. The project would be ideal for scholarly audiences interested in Regional Politics, China, South Asia, the Middle East, and economic and security studies.
