Musicians' Mobilities and Music Migrations in Early Modern Europe Gesa zur Nieden 2016-10-31 During the 17th and 18th century musicians' mobilities and migrations are essential for the European music history and the cultural exchange of music. Adopting viewpoints that reflect different methodological approaches and diversified research cultures, the book presents studies on central scopes, strategies and artistic outcomes of mobile and migratory musicians as well as on the transfer of music. By looking at elite and non-elite musicians and their everyday mobilities to major and minor centers of music production and practice, new biographical patterns and new stylistic paradigms in the European East, West and South emerge.

[Immigrant Associations, Integration and Identity](#) João Sardinha 2009 This book sheds light on the integration processes and identity patterns of Angolan, Brazilian and Eastern European communities in Portugal. It examines the privileged position that immigrant organisations hold as interlocutors between the communities they represent and various social service mechanisms operating at national and local levels. Through the collection of ethnographic data and the realisation of 110 interviews with community insiders and middlemen, culled over a year's time, Joo Sardinha provides insight into how the three groups are perceived by their respective associations and representatives. Following up on the rich data is a discussion of strategies of coping with integration and identity in the host society and reflections on Portuguese social and community services and institutions.

Active Learning Charles C. Bonwell 1991 This monograph examines the nature of active learning at the higher education level, the empirical research on its use, the common obstacles and barriers that give rise to faculty resistance, and how faculty and staff can implement active learning techniques. A preliminary section defines active learning and looks at the current climate surrounding the concept. A second section, entitled "The Modified Lecture" offers ways that teachers can incorporate active learning into their most frequently used format: the lecture. The following section on classroom discussion explains the conditions and techniques needed for the most useful type of exchange. Other ways to promote active learning are also described including: visual learning, writing in class, problem solving, computer-based instruction, cooperative learning, debates, drama, role playing, simulations, games, and peer teaching. A section on obstacles to implementing active learning techniques leads naturally to the final section, "Conclusions and Recommendations," which outlines the roles that each group within the university can play in order to encourage the implementation of active learning strategies. The text includes over 200 references and an index. (JB)

Grammar of Paraguayan Guarani Bruno Estigarribia 2020-06-29 The history of Guarani is a history of resilience. Paraguayan Guarani is a vibrant, modern language, mother tongue to millions of people in South America. It is the only indigenous language in the Americas spoken by a non-ethnically-indigenous majority, and since 1992, it is also an official language of Paraguay alongside Spanish. This book provides the first comprehensive reference grammar of Modern Paraguayan Guarani written for an English-language audience. It is an accessible yet thorough and carefully substantiated description of the language's phonology, morphosyntax, and semantics. It also includes information about its centuries of documented history and its current sociolinguistic situation.

Witness to Hope George Weigel 2009-10-13 "Fascinating...sheds light on the history of the twentieth century for everyone."—New York Times Book Review Now, with an updated preface, the latest edition of the definitive biography of Pope John Paul II that explores how influential he was on the world stage and in some of the most historic events of the twentieth century that can still be felt today. *Witness to Hope* is the authoritative biography of one of the singular figures—some might argue the singular figure—of our time. With unprecedented cooperation from John Paul II and the people who knew and worked with him throughout his life, George Weigel offers a groundbreaking portrait of the Pope as a man, a thinker, and a leader whose religious convictions defined a new approach to world politics—and changed the course of history. As even his critics concede, John Paul II occupied a unique place on the world stage and put down intellectual markers that no one could ignore or avoid as humanity entered a new millennium fraught with possibility and danger. The Pope was a man of prodigious energy who played a crucial, yet insufficiently explored, role in some of the most momentous events of our time, including the collapse of European communism, the quest for peace in the Middle East, and the democratic transformation of Latin America. With an updated preface, this edition of *Witness to Hope* explains how this "man from a far country" did all of that, and much more—and what both his accomplishments and the unfinished business of his pontificate mean for the future of the Church and the world.

Selected Writings of Girolamo Savonarola Girolamo Savonarola 2008-10-01 Five hundred years after his death at the stake, Girolamo Savonarola remains one of the most fascinating figures of the Italian Renaissance. This wide-ranging collection, with an introduction by historian Alison Brown, includes translations of his sermons and treatises on pastoral ministry, prophecy, politics, and moral reform, as well as the correspondence with Alexander VI that led to Savonarola's silencing and excommunication. Also included are first-hand accounts of religio-civic festivities instigated by Savonarola and of his last moments. This collection demonstrates the remarkable extent of Savonarola's contributions to the religious, political, and aesthetic debates of the late fifteenth century.

Genre in a Changing World Charles Bazerman 2009-09-16 Genre studies and genre approaches to literacy instruction continue to develop in many regions and from a widening variety of approaches. Genre has provided a key to understanding the varying literacy cultures of regions, disciplines, professions, and educational settings. *GENRE IN A CHANGING WORLD* provides a wide-ranging sampler of the remarkable variety of current work. The twenty-four chapters in this volume, reflecting the work of scholars in Europe, Australasia, and North and South America, were selected from the over 400 presentations at SIGET IV (the Fourth International Symposium on Genre Studies) held on the campus of UNISUL in Tubarão, Santa Catarina, Brazil in August 2007—the largest gathering on genre to that date. The chapters also represent a wide variety of approaches, including rhetoric, Systemic Functional Linguistics, media and critical cultural studies, sociology, phenomenology, enunciation theory, the Geneva school of educational sequences, cognitive psychology, relevance theory, sociocultural psychology, activity theory, Gestalt psychology, and schema theory. Sections are devoted to theoretical issues, studies of genres in the professions, studies of genre and media, teaching and learning genre, and writing across the curriculum. The broad selection of material in this volume displays the full range of contemporary genre studies and sets the ground for a next generation of work.

The Netherlands and the Oil Crisis Duco Hellema 2004 This incisive study examines the role of the Netherlands in the October War and the oil crisis of 1973. The authors contend that the actions of the Dutch government were hypocritical: the Dutch government faced a domestic crisis when an oil embargo was levied against them by Arab countries for selling arms to Israel; yet after oil began arriving again two months later, the Dutch rejected a proposal for a stricter interventionist energy policy within the European Union. A probing and thought-provoking study, *The Netherlands and the Oil Crisis* draws on previously unavailable archival sources to shed new light on a pivotal moment in contemporary Dutch history.

Threads and Traces Carlo Ginzburg 2012-09-02 "This book is a translation of historian Carlo Ginzburg's latest collection of essays. Through the detective work of uncovering a wide variety of stories or microhistories from fragments, Ginzburg takes on the bigger questions: How do we draw the line between truth and fiction? What is the relationship between history and memory? Stories range from medieval Europe, the inquisitional trial of a witch, seventeenth-century antiquarianism, and twentieth-century historians"--Provided by publisher.

Innovative Biosystems Engineering for Sustainable Agriculture, Forestry and Food Production Antonio Coppola 2020-03-19 This book gathers the latest advances, innovations, and applications in the field of innovative biosystems engineering for sustainable agriculture, forestry and food production. Focusing on the challenges of implementing sustainability in various contexts in the fields of biosystems engineering, it shows how the research has addressed the sustainable use of renewable and non-renewable resources. It also presents possible solutions to help achieve sustainable production. The Mid-Term Conference of the Italian Association of Agricultural Engineering (AIIA) is part of a series of conferences, seminars and meetings that the AIIA organizes, together with other public and private stakeholders, to promote the creation and dissemination of new knowledge in the sector. The contributions included in the book were selected by means of a rigorous peer-review process, and offer an extensive and multidisciplinary overview of interesting solutions in the field of innovative biosystems engineering for sustainable agriculture.

Dosso's Fate Dosso Dossi 1998 Dosso Dossi has long been considered one of Renaissance Italy's most intriguing artists. Although a wealth of documents chronicles his life, he remains, in many ways, an enigma, and his art continues to be as elusive as it is compelling. In *Dosso's Fate*, leading scholars from a wide range of disciplines examine the social, intellectual, and historical contexts of his art, focusing on the development of new genres of painting, questions of style and chronology, the influence of courtly culture, and the work of his collaborators, as well as his visual and literary sources and his painting technique. The result is an important and original contribution not only to literature on Dosso Dossi but also to the study of cultural history in early modern Italy.

Aristotle's Animals in the Middle Ages and Renaissance Emeritus Professor for Ancient & Medieval Philosophy Carlos Steel 1999 Aristotle's zoological writings with their wealth of detailed investigations on diverse species of animals have fascinated medieval and Renaissance culture. This volume explores how these texts have been read in various traditions (Arabic, Hebrew, Latin), and how they have been incorporated in different genres (in philosophical and scientific treatises, in florilegia and encyclopedias, in theological symbolism, in moral allegories, and in manuscript illustrations). This multidisciplinary and multilinguistic approach highlights substantial aspects of Aristotle's animals.

The Rationale of Central Banking and the Free Banking Alternative Vera C. Smith 1990 Vera Smith's book remains an authoritative and accurate summary of the theoretical arguments for and against free banking, a subject that has recently received renewed attention. —Milton Friedman, Hoover Institution The Rationale of Central Banking was first published in England in 1936. Vera Smith spent her professional career in a variety of research positions. She wrote articles and books on money, banking, economic development, and the labor market and translated into English books by Wilhelm Röpke, Oskar Morgenstern, and Fritz Machlup. This book provides a scholarly review and judicious assessments of the experience and theory that bear on the issues of free banking and central banking. Its wide-ranging discussion identifies both the fallacies in the arguments for central banks and the influential fallacies in the arguments against free banking. Vera Smith's work should play a prominent role in any reappraisal of our monetary institutions. Leland B. Yeager is Ludwig von Mises Distinguished Professor of Economics at Auburn University.

Italian Mathematics Between the Two World Wars Angelo Guerraggio 2006-01-20 This book describes Italian mathematics in the period between the two World Wars. It analyzes the development by focusing on both the interior and the external influences. Italian mathematics in that period was shaped by a colorful array of strong personalities who concentrated their efforts on a select number of fields and won international recognition and respect in an incredibly short time. Consequently, Italy was considered a third mathematical power after France and Germany.
