*The Dative* William Van Belle 1996-03-20 Since antiquity, scholars have been fascinated by the phenomena of case. The explanation for this fascination is, as Hjelmslev already pointed out over fifty years ago, the fact that he who can unravel the meaning of case-relations, has the key to language structure as a whole. For over three years, a team of twenty scholars affiliated with the Linguistics Department of Leuven University in Belgium has concentrated on case phenomena in different languages, both Indo- and non-Indo-European. It is the first time that such a large scale investigation into case has been undertaken. Noteworthy is also its reliance on computer-stored corpora of authentic material. The results are published as a series (Case and Grammatical Relations across Languages) of which the first volume, a bibliography, appeared in 1994. The first volume on the dative case contains 13 articles, each of which gives a detailed syntactic-semantic description of the dative or its counterparts in a particular language. In addition to the lexico-syntactic frames in which they occur, a number of textual and extra-linguistic factors are taken into account. Languages investigated are English (K. Davidse), German (L. Draye), Dutch (W. Van Belle & W. Van Langendonck), Afrikaans (L.G. de Stadler), Latin (W. Van Hoecke), French (L. Melis), Spanish (N. Delbecque & B. Lamiroy), Portuguese (R. de Andrade), Polish (B. Rudzka-Ostyn), Hungarian (G. Tóth), Pashto (W. Skalmowski), Hebrew (P. Swiggers) and Orizaba Nahuatl (D. Tuggy).

The Dative William van Belle 1998-01-01 This book is the second part of a two-volume reader on the 'Dative'. In the first part, which appeared in 1996, eleven papers were presented providing a syntactic and semantic description of the category 'Dative' in eleven languages. The aim of this second part is to discuss several aspects of the Dative in greater detail. It contains eight papers dealing with theoretical considerations on 'dativity' as well as with contrastive, typological and diachronic issues. A major concern is the relation between form (case, grammatical relation) and meaning (semantic roles or other kinds of meaning). Most contributions in this volume represent cognitive and functional views or a critical discussion of them. As in the first volume, the linguistic material mainly stems from Germanic and Romance languages. Contemporary English is the basis for Davidse's theoretical claims; Pasicki studies the dative in Old English. Dutch appears especially in Geeraerts' semantic analysis, but also in the papers by Draye, Lamiroy & Delbecq and Van Langendonck. Draye, Lamiroy & Delbecq and Melis also take German into consideration. Latin is dealt with by Melis and Van Langendonck. Modern Romance languages, especially French, provide further data for Melis and Lamiroy & Delbecq. Finally, Newman adduces a variety of languages for his typological analyses.

**Receptive Multilingualism** Jan D. ten Thije 2007-06-05 Receptive multilingualism refers to the language constellation in which interlocutors use their respective mother tongue while speaking to each other. Since the mid-nineties receptive multilingualism is promoted by the European commission on par with other possibilities of increasing the mobility of the European citizens. Throughout the last ten years a marked increase in the research on this topic has been observable. This volume reveals new perspectives from different theoretical frameworks on linguistic analyses of receptive multilingualism in Europe. Case studies are presented from contemporary settings, along with analyses of historical examples, theoretical considerations and, finally, descriptions of didactical concepts established in order to transfer and disseminate receptive multilingual competence. The book contains results from research carried out at the Research Center on Multilingualism at the University of Hamburg as well as contributions by various international scholars working in the field of receptive multilingualism.

Contextual Identities Leo Loveday 2015-06-01 By bringing the concepts of identity, comparativism, and communication together, this volume invites a reinterpretation of these defining concepts of postmodernism. Composed of contributions from Australia, Azerbaijan, Japan, Romania and the Ukraine, this interdisciplinary and intercultural book investigates the multiple identities activated in broader discursive contexts. This collection of nineteen chapters opens with an introductory overview followed by two parts: the first, focusing on Plural identities and comparativism, contains a series of case studies that can be subsumed within imagology and comparativism; the second, Communication and discourse, illustrates two directions of research: literary communication and terminology. In spite of the methodological and thematic polyphony of its contributions, the volume adopts a unified and coherent tone. By integrating the study of contextual and discursive identities, this book will be of

interest to all those involved in image and literary studies, in both linguistics and culture.

**Robert Bosch** Peter Theiner 2019-10-15 Robert Bosch (1861 - 1942) was one of the most successful German entrepreneurs and philanthropists of the 20th century and, at the same time, a pioneer of the social market economy. This book presents a comprehensive and impressive biography of a visionary who thought far ahead of his time like almost no other. Peter Theiner follows the traces of this trailblazer of modernity who founded a global company. 1886, Robert Bosch opened his Werkstätte für Feinmechanik und Elektrotechnik, today's Robert Bosch GmbH, in a modest rear building. Pioneering innovations for motorized vehicles emerged from the young company, and Bosch was quickly able to point to tremendous international successes as an industrialist. Today, his name represents the rise of motor vehicles and electricity in the home. In addition, he also had an impact as a benefactor and philanthropist with a well-developed political profile and a strong sense of social responsibility. In a time of wars and upheaval, in an age of extremes, Bosch positioned himself as a staunch Democrat who cut against the grain of German history.

The Linguistics of Football Eva Lavric 2008-06-18 The first collection of articles on this topic is as international and varied as football itself. The publication covers media discourse, an online-dictionary of football terms, metaphors, the grammar of football commentary, emotions, football chants and football teams as multilingual eco-systems. Contributions from Sweden to Nigeria show how language operates in football. Would you know where football terms in Arabic come from? How does the German coach Otto Rehagel communicate with the Greek players? Which language did Materazzi use when insulting Zidane? Which special words do German, Polish and Igbo have for running, dribbling, penalty area and foul? In which country do the Canaries play the Roaring Lions? Where are the famous footballers enshrined in a 'Hall of Fame'? Which metaphors do Swedish, German and Russian football commentators tend to use? Are the British really less emotional than the Spanish when it comes to football commentating? And why are commentators from Russia to Italy speechless as soon as emotions really run high? That and much more is covered in this first wide-ranging compilation on the topic of football and language.

is hurtled from monologue to short story to anecdote, disparate lives collide in tantalizing ways. A family flees religious persecution in their village to take refuge in an urban slum; women walk the tightrope of free will and dormant violence; a father and son grant each other the relief of estrangement; and young men and women struggle to comprehend the consequences of sexual attraction. Insightful, ironic, and scathingly honest, *No God in Sight* is a brilliant debut by a talented young writer.

**The South Tyrol Question, 1866-2010** Georg Grote 2012 South Tyrol is a small, mountainous area located in the central Alps. Despite its modest geographical size, it has come to represent a success story in the protection of ethnic minorities in Europe. When Austrian South Tyrol was given to Italy in 1919, about 200,000 German and Ladin speakers became Italian citizens overnight. Despite Italy's attempts to Italianize the South Tyroleans, especially during the Fascist era from 1922 to 1943, they

sought to maintain their traditions and language, culminating in violence in the 1960s. In 1972 South Tyrol finally gained geographical and cultural autonomy from Italy, leading to the 'regional state' of 2010.&ltBR> This book, drawing on the latest research in Italian and German, provides a fresh analysis of this dynamic and turbulent period of South Tyrolean and European history. The author provides new insights into the political and cultural evolution of the understanding of the region and the definition of its role within the European framework. In a broader sense, the study also analyses the shift in paradigms from historical nationalism to modern regionalism against the backdrop of European, global, national and local historical developments as well as the shaping of the distinct identities of its multilingual and multi-ethnic population.

**Comics in Translation** Federico Zanettin 2015-12-22 Comics are a pervasive art form and an intrinsic part of the cultural fabric of most countries. And yet, relatively little has been written on the translation of comics. *Comics in Translation* attempts to address this gap in the literature and to offer the first and most comprehensive account of various aspects of a diverse range of social practices subsumed under the label 'comics'. Focusing on the role played by translation in shaping graphic narratives that appear in various formats, different contributors examine various aspects of this popular phenomenon. Topics covered include the impact of globalization and localization processes on the ways in which translated comics are embedded in cultures; the import of editorial and publishing practices; textual strategies adopted in translating comics, including the translation of culture- and language-specific features; and the interplay between visual and verbal messages. *Comics in translation* examines comics that originate in different cultures, belong to quite different genres, and are aimed at readers of different age groups and cultural backgrounds, from Disney comics to Art Spiegelman's *Maus*, from Katsuhiro Ōtomo's *Akira* to Goscinny and Uderzo's *Astérix*. The contributions are based on first-hand research and exemplify a wide range of approaches. Languages covered include English, Italian, Spanish, Arabic, French, German, Japanese and Inuit. The volume features illustrations from the works discussed and an extensive annotated bibliography. Contributors include: Raffaella Baccolini, Nadine Celotti, Adele D'Arcangelo, Catherine Delesse, Elena Di Giovanni, Heike Elisabeth Jüngst, Valerio Rota, Carmen Valero-Garcés, Federico Zanettin and Jehan Zitawi.
